The selected consolidated balance sheet data as of December 31, 2018 and consolidated statements of income data for the years ended December 31, 2017 and 2018 are derived from our audited consolidated financial statements included elsewhere in this Annual Report, after adjustment for the retrospective adoption of ASC 842.

The selected consolidated balance sheet data as of December 31, 2017 are derived from our audited consolidated financial statements that are not included in this Annual Report, after adjustment for the retrospective adoption of ASC 842. The selected consolidated balance sheets data as of December 31, 2015 and 2016 and consolidated statements of income data for the years ended December 31, 2015 and 2016 are derived from our audited consolidated financial statements that are not included in this Annual Report, after adjustment for the retrospective adoption of Accounting Standard Updates 2015-03 and 2015-17.

Ruble amounts have been translated into U.S. dollars at a rate of RUB 78.8493 to \$1.00, the official exchange rate quoted as of March 25, 2020 by the Central Bank of the Russian Federation. Such U.S. dollar amounts are not necessarily indicative of the amounts of U.S. dollars that could actually have been purchased upon exchange of Russian rubles at the dates indicated, and have been provided solely for the convenience of the reader. See “Risk Factors—The principal markets in which we operate are generally subject to greater financial, economic, legal and political risks than more developed markets. Such risks may have a material adverse effect on our business, financial condition and results of operations.”

The following selected consolidated financial data should be read in conjunction with our “Operating and Financial Review and Prospects” and our consolidated financial statements and the related notes appearing elsewhere in this Annual Report. Our consolidated financial statements are prepared in accordance with U.S. GAAP. These historical financial results are not necessarily indicative of the results to be expected in any future period.

(2) A major component of other income/(loss), net is foreign exchange gains and losses generally resulting from changes in the value of the U.S. dollar compared with the Russian ruble. Because the functional currency of our operating subsidiaries in Russia is the Russian ruble, changes in the ruble value of these subsidiaries' monetary assets and liabilities that are denominated in other currencies (primarily U.S. dollar-denominated cash, cash equivalents and term deposits maintained in Russia) due to exchange rate fluctuations are recognized as foreign exchange gains or losses in our statement of income. For example, in 2019, other loss, net includes RUB 1,294 million of foreign exchange losses arising mainly from the appreciation of the Russian ruble compared to the U.S. dollar in that year. In 2018, other income, net included a RUB 1,169 million gain arising mainly from the significant depreciation of the Russian ruble compared to the U.S. dollar in that year. Although the U.S. dollar value of our U.S. dollar denominated cash, cash equivalents and term deposits are not impacted by these currency fluctuations, they result in upward and downward revaluations of the ruble equivalent of these U.S. dollar denominated monetary assets.

Exchange Rate Information

Our business is primarily conducted in Russia and the majority of our revenues are denominated in Russian rubles. We have presented our most recent annual results of operations in U.S. dollars for the convenience of the reader. Unless otherwise noted, all conversions from RUB to U.S. dollars and from U.S. dollars to RUB in this Annual Report were made at a rate of RUB 78.8493 to \$1.00, the official exchange rate quoted by the Central Bank of the Russian Federation as of March 25, 2020. On March 30, 2020, the official exchange rate quoted by the Central Bank of the Russian Federation was RUB 77.7325 to \$1.00.

See "Risk Factors—The principal markets in which we operate are generally subject to greater financial, economic, legal and political risks than more developed markets. Such risks may have a material adverse effect on our business, financial condition and results of operations." for a discussion of the foreign currency exchange rate risks and uncertainties our business faces.

B. Risk Factors

Investing in our Class A shares involves a high degree of risk. The risks and uncertainties described below and elsewhere in this Annual Report, including in the section headed “Operating and Financial Review and Prospects”, could materially adversely affect our business. These are not the only risks that we face; additional risks and uncertainties of which we are unaware, or that we currently deem immaterial, may also become important factors that affect us. Any of these risks could adversely affect our business, financial condition and results of operations. In such case, the trading price of our Class A shares could decline.

Risks Related to the Current Global Political, Regulatory and Economic Environment

The principal markets in which we operate are generally subject to greater financial, economic, legal and political risks than more developed markets. Such risks may have a material adverse effect on our business, financial condition and results of operations.

Financial, economic, banking, legal and political risks in our markets, or an increase in the perceived risks associated with investing in emerging economies, could dampen foreign investment and adversely affect the economies of the countries in which we operate. For example, the current geopolitical situation, as well as volatility in oil prices (to which the Russian economy is particularly sensitive), may continue to have negative macroeconomic and other effects on the regions in which we operate, including increased volatility in currency values and a weaker overall business environment. In general, the Russian economy has experienced a high degree of volatility in the local currency, periods of high inflation rates and fluctuations in oil prices. Economic conditions continue to be uncertain and future changes may have negative effects on our business.

The value of the Russian ruble has fluctuated significantly in recent periods. Although our revenues and expenses, including our personnel expenses, are both primarily denominated in Russian rubles, we may have to increase our personnel expenses from time to time in order to better compete with other companies that denominate their personnel expenses in currencies which appreciate in relation to the Russian ruble. Also, the lease for our Moscow headquarters, are denominated in U.S. dollars, and a major portion of our capital expenditures, primarily for servers and networking equipment, although payable in rubles, is for imported goods and therefore can be materially affected by changes in the value of the ruble. In addition, our expenses related to the development of our business internationally, and, in some cases, for acquisitions, are often denominated in other currencies, including U.S. dollars and Euros. If the Russian ruble were to experience a prolonged and significant decline in value against foreign currencies, we could face material foreign currency exchange exposure, which may materially adversely affect our business, financial condition and results of operations. See “Operating and Financial Review and Prospects—Quantitative and Qualitative Disclosures About Market Risk”.

We face risks related to health epidemic and related crisis.

In recent years, there have been outbreaks of epidemics in various countries throughout the world. The current outbreak of a novel strain of coronavirus (COVID-19) has spread rapidly to many parts of the world, including Russia. The epidemic has resulted in quarantines, travel restrictions, and the temporary closure of stores and facilities. In March 2020, the World Health Organization declared COVID-19 a pandemic.

Our results of operations may be adversely and materially affected, to the extent that COVID-19 or any other epidemic harms the Russian and global economy in general. Any potential impact to our results will depend on, to a large extent, future developments and new information that may emerge regarding the duration and severity of COVID-19 and the actions taken by government authorities and other entities to contain COVID-19 or treat its impact, almost all of which are beyond our control. Potential impacts include, but are not limited to, the following:

- temporary closure of offices, travel restrictions or suspension of services of our customers and suppliers have negatively affected, and could continue to negatively affect, the demand for our services;
- our customers in industries that are negatively impacted by the outbreak of COVID-19, including the healthcare, travel, offline education, transportation and real estate sectors, may reduce their budgets on

online advertising and marketing, which may materially adversely impact our revenue from online advertising services;

- our customers may require additional time to pay us or fail to pay us at all, which could significantly increase the amount of accounts receivable and require us to record additional allowances for doubtful accounts;
- any disruption in the network access provided by third parties or any failure by them to handle current or higher future volumes as a result of COVID-19 may cause our customers to lose access for a period of time to our platforms, which may harm our business and may also lead to loss of customers, as well as reputational, competitive and business harm to us;
- certain of our customers, distributors, suppliers and other partners may be particularly vulnerable to the slowing macroeconomic conditions arising from COVID-19 and may not be in a position to resume business as usual after a prolonged outbreak, which may have a material adverse impact on our revenues and business operations; and
- the global stock markets have experienced, and may continue to experience, significant decline from the COVID-19 outbreak and the private and public companies that we have invested in could be materially adversely affected, which may lead to significant impairment in the fair values of our investments and in turn materially adversely affect our financial condition and operating results.

Because of the uncertainty surrounding the COVID-19 pandemic, the financial impact related to the outbreak of and response to the coronavirus cannot be reasonably estimated at this time, but our consolidated results for the first quarter of and full year 2020 may be adversely affected. We expect our total revenues in the first quarter of 2020 to increase year over year, but there is no guarantee that our total revenues will grow or remain at the similar level year over year in the next three quarters of 2020. We may have to record downward adjustments or impairment in the fair value of investments in the first quarter of 2020, if conditions have not been significantly improved and global stock markets have not recovered from recent declines.

In general, our business could be adversely affected by the effects of epidemics, including, but not limited to, the COVID-19, avian influenza, severe acute respiratory syndrome (SARS), the influenza A virus, Ebola virus, severe weather conditions such as a snowstorm, flood or hazardous air pollution, or other outbreaks. In response to an epidemic, severe weather conditions, or other outbreaks, government and other organizations may adopt regulations and policies that could lead to severe disruption to our daily operations, including temporary closure of our offices and other facilities. These severe conditions may cause us and/or our partners to make internal adjustments, including but not limited to, temporarily closing down business, limiting business hours, and setting restrictions on travel and/or visits with clients and partners for a prolonged period of time. Various impacts arising from a severe condition may cause business disruption, resulting in material, adverse impact to our financial condition and results of operations.

The adoption and maintenance of international embargo, economic or other sanctions against Russia may have a material adverse effect on our business, financial condition and results of operations.

The United States, the European Union and certain other countries have imposed economic sanctions on certain Russian government officials, private individuals and Russian companies, as well as “sectoral” sanctions affecting specified types of transactions with named participants in certain industries, including named Russian financial institutions, and sanctions that prohibit most commercial activities of U.S. and EU persons in Crimea and Sevastopol. In 2018 and 2019, these sanctions were prolonged and extended. There is significant uncertainty regarding the extent or timing of any potential further economic or trade sanctions or the potential easing of such measures. Political and economic sanctions may affect the ability or willingness of our international customers to operate in Russia, which could negatively impact our revenue and profitability. Sanctions could also impede our ability to effectively manage our legal entities and operations in and outside of Russia. Although neither our parent company nor our principal operating subsidiary or other subsidiaries are targets of U.S. or EU sanctions, our business has been adversely affected from time to time by the impact of sanctions on the broader economy in Russia. In addition, Yandex.Money, our joint venture with Sberbank, in which we hold an approximately 25% minority stake, is subject to U.S. sectoral sanctions.

Since May 2017, Yandex LLC and Yandex.Ukraine LLC, both subsidiaries of Yandex N.V., have been subject to Ukrainian sanctions, which have blocked Ukrainian users from accessing our services and websites. The applicable sanctions, which were extended in March 2019 for a further three years with regard to Yandex LLC, ban all trade operations and require blocking of all assets, including bank accounts.

In January 2018, pursuant to the Countering America's Adversaries through Sanctions Act of 2017, the U.S. administration presented the U.S. Congress with a report on senior Russian political figures, "oligarchs" and "parastatal" entities. Our founder, executive director and substantial shareholder, Arkady Volozh, is one of nearly 100 persons included in one part of the so called "Kremlin List", on the basis of his reported net worth, and Herman Gref, a member of our Board of Directors and the CEO and Chairman of Sberbank, was included on the "List of Senior Political Figures." Although we are not aware of any intention on the part of the U.S. government to impose sanctions on Mr. Volozh or Mr. Gref, if Mr. Volozh or Mr. Gref were to become a target of sanctions, it could have material adverse effect on our business.

The applicable sanctions rules, or the authoritative interpretation of current rules by the relevant authorities, could change at any time. In particular, OFAC (or other regulators) could:

- add additional parties to the sectoral sanctions list;
- designate parties with whom we have significant business relationships as "specially designated nationals", meaning that all dealings with them by U.S. and/or EU persons would be prohibited; or
- expand current or new sanctions to cover entities that are less than 50% owned by a listed party, which could adversely affect our Yandex.Market joint venture.

Many U.S. and EU parties typically take a cautious approach to compliance matters, given the ambiguities of some of these rules and the approach taken by the regulators. Some parties, in particular some U.S. and EU financial institutions, have adopted internal compliance policies that are more restrictive than are strictly required by the applicable rules and have, for example, declined to engage in any dealings with parties on the sectoral sanctions list (including dealings that are not prohibited by the rules applicable to such parties) or with entities closely affiliated with such entities (even if such affiliated entities are not themselves a target of sanctions).

We rely on the continued availability, development and maintenance of the internet infrastructure in the countries in which we operate. Any errors, failures or disruption in the products and services provided by third-party providers of our principal internet connections and the equipment critical to our internet properties and services, or any regulatory limitations on the internet in Russia, could materially adversely affect our brand, business, financial condition and results of operations.

Our success depends on the continued availability, development and maintenance of the internet infrastructure globally and particularly in the countries in which we operate. This includes maintenance of a reliable network backbone with the necessary speed, data capacity and security for providing reliable internet services. Any disruption in the network access provided by third parties or any failure by them to handle current or higher future volumes of use may significantly harm our business. We have experienced and expect to continue to experience interruptions and delays in service from time to time. Furthermore, we depend on hardware and software suppliers for prompt delivery, installation and service of servers and other equipment to deliver our services. Public health concerns or epidemics, such as the recent coronavirus outbreak, may affect the production capabilities of our suppliers and resulting quarantines or closures could further disrupt our supply chain. The internet infrastructure may also be unable to support the demands placed on it by growing numbers of users and time spent online or increased bandwidth requirements. Government regulation may also limit our access to adequate and reliable internet infrastructure. Any outages or delays resulting from inadequate internet infrastructure or due to problems with our third-party providers or new regulatory requirements could reduce the level of internet usage as well as our ability to provide our services to users, advertisers and network partners, which could materially adversely affect our business, financial condition and results of operations.

A recent law, which partly came in force in November 2019, introduced tighter regulation of traffic routing in the Russian internet. While it is not entirely clear yet how this regulation will be applied in practice, its implementation, among other things, may lead to a requirement that Russian internet traffic should be routed through Russian

communication centers. This could reduce data transfer speed significantly and even result in interruptions and delays of the online services in the Russian internet.

The principal markets in which we operate offer uncertain environment for investment and business activity that could have a material adverse effect on the value of our Class A shares, our business, financial condition and results of operations.

The legal framework in which we operate continues to evolve. The current geopolitical environment could increase the risk of new legislative initiatives that could be seen as protecting a country's national security and/or limiting foreign influence over the sector.

In addition, there can be contradictions between different laws and regulations, and the enforcement of laws can be selective or unpredictable. At the same time, there is sometimes a perceived lack of judicial and prosecutorial independence from political, social and commercial forces.

These factors could have a material adverse effect on our Class A shares and our business, financial condition and results of operations. The fact that we are a high-profile company may heighten these risks.

There has been increased scrutiny in recent periods of technology businesses across the globe. Should our operating environment become more challenging because of a change in the regulation or perception of technology companies, our business, financial condition and results of operations may be materially and adversely affected.

Around the world, technology companies are operating in an increasingly uncertain and challenging environment, in part due to increased scrutiny from policymakers, regulators and the general public. Such scrutiny has included concerns about business practices, market presence and strategic direction. A number of our competitors, including Google and Facebook, have received scrutiny in different jurisdictions over business practices, including the application of targeted advertising and data processing. Our partner in our Taxi joint venture, Uber, has received scrutiny over labor practices and licensing in many of the jurisdictions in which it operates. Our businesses have also been subject to increasing scrutiny in the markets in which we operate.

Restrictive trade practices in many jurisdictions, including the United States, have also made doing business more difficult for technology companies. For example, governments in a number of jurisdictions have been considering the possibility of excluding Huawei from participating as a supplier in 5G networks based on perceptions of the Chinese government's influence over Huawei. Should our business practices, market presence or strategic direction receive adverse scrutiny or experience increased regulation in any material market in which we operate, we may experience a material adverse effect on our business, financial condition and result of operations.

If existing limitations on foreign ownership were to be extended to our business, or if new limitations were to be adopted, it could materially adversely affect our group and the value of our Class A shares.

Applicable law restricts foreign (non-Russian) ownership or control of companies involved in certain strategically important activities in Russia as well as companies that are classified as "mass media" businesses. Currently, technology, the internet and online advertising are not industries specifically covered by this legislation, but proposals have from time to time been considered by the Russian government and the State Duma, which, if adopted, would impose foreign ownership or control restrictions on certain large technology or internet companies.

A draft law which was proposed in mid-2019, for example, was aimed at restricting foreign ownership of "significant" internet companies and, if adopted, could have been applied to Yandex. A number of parties, including representatives of the Russian government, identified concerns with the draft law, and the proposal was withdrawn in November 2019. Notwithstanding the restructuring of our corporate governance approved in December 2019, we cannot assure you that similar legislation will not be proposed and adopted. If any such legislation were to be adopted and were applicable to Yandex, it could have a material adverse effect on our business and the value of our Class A shares. See also "Item 4. Information on the Company – Governance Structure".

In addition, we believe that our Yandex.Money joint venture is subject to restrictions on foreign ownership because this business currently holds an encryption license covered by the strategic enterprises law. We have also recently obtained an encryption license for our Yandex.Cloud service in order to expand this business. Therefore, the restrictions imposed by the strategic enterprises law have become applicable to Yandex as a whole. In particular, a third-party non-Russian investors would be required to obtain prior approval from the competent Russian authority in some cases if it seeks to acquire more than 25% of the voting power in Yandex or seeks to enter into an agreement that would establish direct or indirect control over Yandex. Such investors would also be required to notify the competent Russian authority if it acquires more than 5% of the voting power in Yandex (which would represent more than 33.3 million Class A shares). In addition, foreign states and international organizations, or entities controlled by them are prohibited from entering into agreements to establish direct or indirect control over Yandex.

Further, draft legislation was introduced in 2018 that would restrict foreign ownership of news aggregators. The draft legislation is broadly worded and, if adopted, might be applied to Yandex.News and other services. At this time, we cannot anticipate if the draft legislation will be adopted or, if it is adopted, whether such restrictions will be applied to us. See also "Item 4. Government Regulation".

Any restrictions on non-Russian ownership or control could require us to take significant steps to modify our operating, corporate governance or ownership structure, which could have a material adverse effect on our operations or the value of our Class A shares.

Risks Related to Our Governance Structure

Although we have recently implemented a restructuring of our corporate governance, we may not be compliant with any legislation limiting foreign ownership or control in our sector that might ultimately be adopted. Any such non-compliance could have a material adverse effect on our business, financial condition, results of operations and cash flows, as well as on the trading price of our Class A Shares.

Even following our recent corporate governance restructuring, we cannot assure you that our business will not become subject to any law that might ultimately be adopted with the goal of limiting foreign ownership or control of businesses in our sector. If our business becomes subject to, and is found not to be compliant with, any such legislation, we cannot assure you that enforcement actions against Yandex or our business by the Russian authorities will not be imposed. The imposition of such enforcement actions could have a material adverse effect on our business, financial condition, results of operations and cash flows, as well as on the trading price of our Class A Shares. See also "Item 4. Information on the Company – Governance Structure".

The Public Interest Foundation that was formed in connection with our recent restructuring has important rights in our corporate governance structure. These rights could be exercised in a manner that is different from what we expect or that is not in the interests of our Class A shareholders.

The Public Interest Foundation has limited and targeted rights, through the powers associated with its holding of the Priority Share in Yandex N.V. and a so-called "Special Voting Interest" in Yandex LLC. The board of the Public Interest Foundation, as well as the designated directors on the Yandex N.V. board and any interim General Director of Yandex LLC appointed by the Foundation in the circumstances set out in the charter of Yandex LLC, may take actions, however, that are not in the interests of our stakeholders, including our Class A shareholders, or decline to approve actions that would be in the interests of our Class A shareholders. These actions could include exercising the veto right over the nomination of four members of our Board in such a way as to prevent the nomination of persons whom the other members of our Nominating Committee and Board believe would best serve the interests of our company and our shareholders. Moreover, these directors, together with the two designated directors, could act in a manner that results in Board deadlocks on material matters, such as budget approvals, that restrict our flexibility or ability to operate. Further, if the Public Interest Foundation exercised its right to use the Special Voting Interest in Yandex LLC in a manner that is inconsistent with our expectations, or if it did so repeatedly, it could disrupt our operations and materially adversely affect the public perception of our business. Any such actions could have a material adverse effect on our business, financial condition and results of operations and cash flows, as well as on the trading price of our Class A Shares. The impact and perception of such actions could also make it difficult or impossible for us to access the public capital markets going forward.

In addition, no foundations have previously been formed under the newly adopted in Russia legislative framework under which the Public Interest Foundation has been incorporated. We may therefore face new issues in connection with the untested mechanics of the Foundation legislation and supporting regulations.

See also "Item 4. Information on the Company – Governance Structure".

Our recently implemented restructuring has introduced new elements of our corporate governance with which we have no experience, and the rights granted may be exercised in unexpected ways.

Although our restructuring was designed to provide targeted and precise governance rights, some of these rights are not precisely defined. For instance, what may constitute an "Special Situation" is not defined, although it is our understanding, based on our discussions with the relevant authorities, that such "Special Situations", if they ever arose, would relate to an action, failure to act or practice by Yandex that was deemed to be materially adverse to the national security interest of Russia. However, it is possible that the Foundation, by approval of at least seven of its directors, may interpret the scope of national security broadly and determine that there is a Special Situation in circumstances that we cannot foresee or reasonably consider to be related to the national security. It is possible that the powers granted to the Public Interest Foundation, the designated directors, the Public Interest Committee and any interim General Director may be exercised in unexpected ways, which may be adverse to the interests of Class A Shareholders and result in a decline in the trading price of our Class A Shares. See also "Item 4. Information on the Company – Governance Structure".

Risks Related to Our Business and Industry

We face significant competition from major global and local companies, including Google, Mail.ru and Sberbank, which could negatively affect our business, financial condition and results of operations. If our competitors start to more rapidly develop their technologies, we may need to increase R&D investments to defend our market share.

We face strong competition in various aspects of our business from global and Russian companies that provide internet services and content, including search services. Currently, we consider our principal competitors in our core business to be Google and Mail.ru.

Out of the large global internet companies, we consider Google to be our principal competitor in the market for desktop and mobile internet search, and for performance-based advertising, online advertising network revenues, advertising intermediary services, distribution arrangements and other services. According to Yandex Radar, Google's share of the Russian search market, based on search traffic generated, was 40.1% for the full year 2019 and 40.0% in 2018, compared with our market share of 57.0% in 2019 and 56.3% in 2018. Google conducts extensive online and offline advertising campaigns in Russia. In recent years, Google has actively marketed its products and services, including its mobile and voice search, YouTube, and advertising products for businesses, leading to increased competition.

With Android, its popular mobile platform, Google exerts significant influence over the increasingly important market for mobile and location-based search and advertising. Pursuant to a settlement between FAS and Google reached in April 2017, Google is prohibited from arrangements prohibiting pre-installation of rival applications and is required to provide a choice to users in selecting their default search engine in Russia. Following this settlement, our search share on the Android platform increased in 2018 and 2019. Nevertheless, we expect that Google will continue to use its brand recognition and global financial and engineering resources to compete aggressively with us and can provide no assurance that Google is fully complying or will fully comply with the settlement. In addition to Google, we also face competition, albeit less intense, from the Russian and international business of Microsoft.

On the domestic side, our principal competitor is Mail.ru Group. Although we power paid search on Mail.ru Group properties and monetize a number of Mail.ru Group properties through our Yandex Advertising Network, we also compete with Mail.ru Group for online advertising budgets, allocated between social networks and search. In addition, Mail.ru Group offers a wide range of internet services, including the most popular Russian web mail, and other services that are comparable to ours. Mail.ru's search market share was 2.2% and 1.6% in 2018 and 2019, respectively. Also, in December 2019 Mail.ru announced the formation of the OZO joint venture with Sberbank, pursuant to which Sberbank and Mail.ru Group will contribute approximately 47 billion rubles at closing and an additional investment of up to 17.6 billion rubles if certain performance targets are met. The joint venture is well

capitalized and focused on the expansion of food delivery (where our FoodTech business competes with Mail.ru Group's Delivery Club service), ride-hailing (where our Yandex.Taxi business competes with Citymobil) and other services.

Our Taxi business, which is a joint venture with Uber which we completed in February 2018, also faces competition from Gett, Vezeet and a variety of other ride-hailing and food delivery operators and dispatch services. We may also face new competitors as the ride-hailing and food delivery industries are highly competitive, with comparably low barriers to entry and switching costs.

We also view a number of social networking sites as increasingly significant competitors. In light of their large audiences and the significant amount of information they can access and analyze regarding their users' needs, interests and habits, we believe that they may be able to offer highly targeted advertising that could create increased competition for us. The popularity of such sites may also reflect a growing shift in the way in which people find information, get answers and buy products, which may create additional competition to attract users.

In addition, our business units, which include Media Services, Classifieds and our e-commerce joint venture, face significant competition in their respective business areas.

On the Media Services front, our KinoPoisk service faces competition from Ivi, Okko (operated by Rambler Group) and other online cinemas, while Yandex Music competes with VK Music and Boom (both operated by Mail.ru) and Apple Music.

Our Classifieds business faces competition from a range of online and offline classified services, including Avito (in real estate and automobile sales), CIAN (in real estate), and Drom (in automobile sales); and Yandex.Market's e-commerce business faces competition from online retailers and marketplaces, including Wildberries, Ozon, AliExpress Russia (operated through a JV between Mail.ru, MegaFon, RDIF, and Alibaba), Avito and others.

We understand that Sberbank, with whom we operate joint ventures in e-commerce and e-wallet services, has announced plans to expand its digital ecosystem, including in e-commerce and ride sharing (as described above). At the same time, we have non-compete obligations with Sberbank in e-commerce and fintech business areas which limits our as well as Sberbank's business expansion in these spheres.

We cannot guarantee you that we will be able to continue to compete effectively with current and future companies that may have greater ability to attract and retain users, greater name recognition, more personnel and greater financial and other resources. If our competitors are successful in providing similar or better search results or other services compared with those we offer, we could experience a significant decline in user traffic or other business. Any such decline could negatively affect our business, financial condition and results of operations.

We expect the rate of growth of our revenues to be lower in the future and we may experience downward pressure on our operating margin.

We expect that the rate of growth of our online advertising revenues will decline over time as a result of a number of factors, including continuing macroeconomic challenges in Russia, challenges in maintaining our growth rate as our revenues increase to higher levels, increasing competition, changes in the nature of queries, the evolution of the overall online advertising market, the declining rate of growth in the number of internet users in Russia as overall internet penetration increases and the COVID-19 pandemic. For example, in connection with current macroeconomic factors, Aeroflot, an advertising partner of ours, terminated all of its contracts for marketing, advertising and information services. A decline in our online advertising revenue growth rate may negatively impact the rate of growth of our revenues on a consolidated basis.

Other factors which may cause our operating margin to fluctuate or decline include:

- " changes in the proportion of our advertising revenues that we derive from the Yandex ad network compared with our own websites. In periods in which our Yandex ad network revenues grow more rapidly than those from our own sites, our operating margin generally declines because the operating margin we realize on revenues generated from partner websites is significantly lower than the operating margin generated from

our own websites, as a result of traffic acquisition costs (TAC) that we pay to our partner websites. Over the several past years our partner TAC was above 50% of our online advertising network revenues. The margin we earn on revenue generated from the Yandex ad network could also decrease in the future if we are required to share with our partners a greater percentage of the advertising fees generated through their websites;

- " investments we make in our businesses, in particular our experimental businesses within Other Bets and Experiments, our Taxi segment, which includes our food delivery business and self-driving solution, investments in content in Media Services as well as our initiatives related to the Internet of Things;
- " increased depreciation and amortization expense related to capital expenditures for many aspects of our business, particularly the expansion of our data centers to support growth in both our current and new markets;
- " relatively higher spending on advertising and marketing to further enhance our brand and promote our services in Russia, to build and expand brand awareness in other countries where we operate and to respond to competitive pressures, if these efforts do not drive revenue growth in the manner we anticipate;
- " expenses in connection with the launch of new products and related advertising and marketing efforts, which may not result in the anticipated increase in revenues or market share;
- " the possibility of higher fees or revenue sharing arrangements with our distribution partners that distribute our products or services or otherwise direct search queries to our website. We expect to continue to expand the number of our distribution relationships in order to increase our user base and to make it easier for our existing users to access our services;
- " costs incurred in our international expansion efforts until we succeed in building the user base necessary to begin generating sufficient revenues in these markets to earn accretive operating margins there; and
- " increased costs associated with the creation, support and maintenance of mobile products and services to maintain and expand our offering and competitive market position, which may not result in the anticipated increases in revenues or market share.

As the Russian internet market matures, our future expansion will increasingly depend on our ability to generate revenues from new businesses, from new business models or in other markets. If we do not continue to innovate and provide services that are useful and attractive to our users, we may be unable to retain them and may become less attractive to our advertisers, which could adversely affect our business, financial condition and results of operations.

As internet usage has spread in Russia, the rate of growth in the number of internet users has been declining. Our success depends on providing search and other services that make using the internet a more useful and enjoyable experience for our users. As search technology continues to develop, our competitors may be able to offer search capabilities that are, or that are seen to be, substantially similar to, or better than, ours. As our core market matures, we will need to provide new services, further exploit non-core business models, such as our Taxi, Classifieds and Media Services business units and our e-commerce joint venture, or expand into new geographic markets in order to continue to grow our revenues at previously achieved levels. The cost we incur in these efforts, both in terms of product development expenses and advertising and marketing costs, could be significant.

If we are unable to continue to develop and provide our users with high-quality, up-to-date services, and to appropriately time the services with market opportunities, or if we are unable to maintain the quality of such services, our user base may not grow, or may decline. Further, if we are unable to attract and retain a substantial share of internet traffic generated by mobile and other digital devices, or if we are slow to develop services and technologies that are compatible with such devices, our user base may not grow or may decline.

If our users move to our competitors, we will also become less attractive to advertisers and therefore to Yandex ad network partners. This could adversely affect our business, financial condition and results of operations.

The competition to capture market share on mobile devices is intense, and if we are not successful in maintaining substantial reach among users and monetizing search and other services on mobile devices, our business, financial condition and results of operations could be adversely affected.

Users are increasingly accessing the internet through mobile and other devices rather than desktop and laptop personal computers, including through smartphones, wearable devices, and handheld computers such as tablets, as well as through video game consoles, smart TVs and television set-top devices. Such devices have different characteristics than desktop and laptop personal computers (including screen size, operating system, user interface and use patterns). Tailoring our products and services to such devices requires particular expertise and the expenditure of significant resources. The versions of our products and services developed for these devices, including the advertising solutions we offer, may be or become less attractive to users, advertisers, manufacturers or distributors of devices than those offered by our competitors or than our desktop offerings. The percentage of our total search traffic that was generated from mobile devices increased from approximately 49% in the fourth quarter of 2018 to approximately 58% in the fourth quarter of 2019, while the percentage of our search revenues generated from mobile devices increased from approximately 41% to approximately 49% between those periods.

Each manufacturer or distributor of mobile or other devices may establish unique technical standards for its devices, and as a result our products and services may not work or be viewable on these devices. Some manufacturers may also elect not to include our products on their devices, or may be prohibited from doing so pursuant to their agreements with other parties. Although Google is prohibited from arrangements restricting pre-installation of rival applications and is required to provide a choice to users in selecting their default search engine in Russia, it is difficult to anticipate the long-term effects of such changes on our market shares in its Chrome browser and Chrome widget. In addition, consumers are increasingly accessing content directly via applications, or “apps”, tailored to particular mobile devices or in closed social media platforms, which could affect our share of the search market over time. As new devices and platforms are continually being released, it is difficult to predict the challenges we may encounter in adapting our products and services and developing competitive new products and services. See also “—As the internet evolves, an increasing amount of online content may be held in closed social networks, mobile apps or proprietary document formats, which may limit the effectiveness of our search technology, which could adversely affect our brand, business, financial condition and results of operations.”

We expect to continue to devote significant resources to the creation, support and maintenance of mobile products and services for all major operating systems including Android and iOS. If we are unable to attract and retain a substantial number of device manufacturers, distributors and users to our products and services, or if we are slow to develop products and technologies that are more compatible with such devices and platforms, we will fail to capture the opportunities available due to consumers’ and advertisers’ transition to a dynamic, multi-screen environment. Furthermore, given the importance of distribution and application pre-installation arrangements with the most popular device manufacturers to the successful operation of our business, failure to reach such arrangements may adversely affect our business, financial condition and results of operations.

We generate a substantial part of our revenues from advertising, which is cyclical and seasonal in nature, and any reduction in spending by or loss of advertisers would materially adversely affect our business, financial condition and results of operations.

In the past three years, we generated on average 79% of our revenues from advertising. Expenditures by advertisers tend to be cyclical, reflecting the overall economic conditions and budgeting and buying patterns, and can therefore fluctuate significantly. According to AKAR, the rate of growth in online advertising expenditures was 20% in 2019, compared to 22% in each of 2018 and 2017. Any decreases in online advertising spending due to economic conditions, or other reasons, could materially adversely impact our business, financial condition and results of operations.

Advertising spending and user traffic also tend to be seasonal, with internet usage, advertising expenditures and traffic historically slowing down during the months, when there are extended Russian public holidays and vacations, and increasing significantly in the fourth quarter of each year. For these reasons, comparing our results of operations on a period-to-period basis may not be meaningful, and past results should not be relied upon as an indication of future performance. Furthermore, as our business becomes more diversified, seasonal changes may have different effects on various lines of business.

Any decline in the internet as a significant advertising platform in the countries in which we operate could have a material adverse effect on our business, financial condition and results of operations.

We have significantly diversified our revenue streams in the recent years; however, the sale of online advertising in Russia still accounts for a sizeable portion of our overall revenue. Although the use of the internet as a marketing channel in Russia is already mature, the internet continues competing with traditional advertising media, such as television, print, radio and outdoor advertising. Although advertisers have become more familiar with online advertising in recent years, some of our current and potential customers still have limited experience with online advertising and have not historically devoted a significant portion of their marketing budgets to online marketing and promotion. As a result, they may be less inclined to consider the internet effective in promoting their products and services compared with traditional media.

Any decline in the appeal of the internet generally in Russia or the other countries in which we operate, whether as a result of increasing governmental regulation of the internet, the growth in popularity of other forms of media, a decline in the attractiveness of the internet as an advertising medium or any other factor, could have a material adverse effect on our business, financial condition and results of operations.

Several of our businesses operate through joint ventures with third parties, which involves risks that we do not face with respect to our core business.

Our Yandex.Taxi business operates as a joint venture with Uber, while our Yandex.Money and Yandex.Market businesses operate as joint ventures with Sberbank. We hold an approximately 61% interest in our Yandex.Taxi joint venture. We hold an approximately 25% interest in Yandex.Money and we and Sberbank each hold a 45% interest in Yandex.Market. Herman Gref, the chief executive officer and chairman of Sberbank, serves as one of our non-executive directors. Our joint venture partners have certain shareholder and contractual rights in respect of the management of these joint ventures, and therefore we do not have sole control over the management or operations of our joint ventures. The level of control exercisable by us depends on the size of our interest and the terms of the contractual agreements, in particular, the allocation of control among, and continued cooperation between, the participants.

We may face financial, reputational and other exposure (including regulatory actions) in the event that any of our partners fail to meet their obligations under the arrangements, encounter financial difficulty, or fail to comply with local or international regulation and standards. A temporary or permanent disruption to these arrangements, such as through significant deterioration in the reputation, financial position or other circumstances of the third party or material failure in controls, could adversely affect our results of operations.

The formation and operation of joint ventures involve significant challenges and risks, including:

- " difficulties in integrating operations and managing the large and diverse number of personnel, products, services, technology, internal controls and financial reporting of constituent components of our joint ventures, and any unanticipated expenses relating to business integration;
- " disruption of our ongoing business, distraction of our management and employees and increase of our expenses;
- " departure of skilled professionals as well as the loss of established client relationships of the businesses we invest in or acquire;
- " unforeseen or hidden liabilities or additional operating losses, costs and expenses that may adversely affect us following the transactions;
- " potential impairment charges or write-offs due to changes in the fair value of our business units as a result of market volatility or other reasons that we may not control which could have a material adverse effect on our financial results;
- " regulatory hurdles including in relation to the antimonopoly and competition laws;

- " the risk that any future proposed transaction fails to close, including as a result of political and regulatory challenges and protectionist policies; and
- " challenges in maintaining or further growing our business units, or achieving the expected benefits of synergies and growth opportunities in connection with these transactions.

Additionally, if we or one of our joint venture partners fail to maintain and enhance the Yandex brand, or if we incur excessive expenses in our efforts to do so, our business, financial condition and results of operations could be materially adversely affected.

We rely on partners for a material portion of our revenues and, in particular, for expanding our user base via distribution arrangements. Any failure to obtain or maintain such relationships on reasonable terms could have an adverse effect on our business, financial condition and results of operations.

Revenues from advertising on our ad network partner websites represented 20.9% of our online advertising revenues in 2019 compared with 23.4% in 2018. We consider our ad partner network to be important for the continued growth of our business. Our agreements with our network partners, other than our agreement to power paid search results on Mail.ru, are generally terminable at any time without cause. Our competitors could offer more favorable terms to our current or potential network partners, including guaranteed minimum revenues or other more advantageous revenue-sharing arrangements, in an effort to take market share away from us. Additionally, some of our partners in the Yandex ad network, such as Mail.ru and Microsoft Bing, compete with us in one or more areas and may terminate their agreements with us in order to develop their own businesses. If our network partners decide to use a competitor's advertising services, our revenues would decline.

Many of our key network partners operate high-profile websites, and we derive tangible and intangible benefits from this affiliation, such as increased numbers of users, extended brand awareness and greater audience reach for our advertisers. If our agreements with any of these partners are terminated or not renewed and we do not replace those agreements with comparable agreements, our business, financial condition and results of operations would be adversely affected.

The number of paid clicks and amount of revenues that we derive from our partners in the Yandex ad network depends on, among other factors, the quality of their websites and their attractiveness to users and advertisers. Although we screen new applicants, favor websites with high-quality content and stable audiences, and strive to monitor the quality of the network partner websites on an ongoing basis, these websites are operated by independent third parties that we do not control. If our network partners' websites deteriorate in quality or otherwise fail to provide interesting and relevant content and services to their users, this may result in reduced attractiveness to their users and our advertisers, which may adversely impact our business, financial condition and results of operations.

To expand our user base and increase traffic to our sites and mobile applications, we enter into arrangements with leading software companies and device manufacturers for the distribution of our services and technology. In particular, we have agreements, on a co-marketing basis, with certain internet browsers. As new methods for accessing the internet become available, including through new digital platforms and devices, we may need to enter into new or amended distribution agreements. See also "—The competition to capture market share on mobile devices is intense, and if we are not successful in maintaining substantial reach among users and monetizing search and other services on mobile devices, our business, financial condition and results of operations could be adversely affected."

Our most significant distribution partners in 2019 were Samsung, Opera and Huawei, which preinstall our applications on their devices in Russia and/or offer mobile and desktop browsers, where Yandex is the default search in certain search entry points. Original equipment manufacturers have become increasingly important partners due to mobile traffic growth over the last few years. Each of our other distribution partners constitutes less than 10% of our total distribution traffic acquisition costs. If we are unable to continue our arrangements with current key distribution partners, or maintain existing or enter into comparable arrangements with new distribution partners, particularly for the distribution of our search and other services on mobile devices, this would likely have a negative effect on our search market share over time. In the future, existing and potential distribution partners may not offer or renew distribution arrangements on reasonable terms for us, or at all, which could limit our ability to maintain and expand our user base, and could have a material adverse effect on our business, financial condition and results of operations.

Our business units and joint ventures face comparable risks. For example, if we are unable to attract or maintain a critical mass of Taxi partners, consumers, couriers, restaurants, grocery stores and convenience stores, whether as a result of competition or other factors, our ride-hailing and food delivery services could become less appealing to users, and our financial results could be adversely impacted.

Our business (in particular, Search&Portal and Media Services) depends on our ability to license, acquire or create compelling content at reasonable costs. Failure to offer compelling content would harm our ability to expand our base of users, advertisers and network partners.

We license much of our content from third parties, such as music, news items, weather reports and TV program schedules. If we are unable to maintain and build relationships with third-party content providers, this would likely result in a loss of user traffic. In addition, we may be required to make substantial payments to third parties from whom we license or acquire such content. An increase in the prices charged to us by third-party content providers would adversely affect our business, financial condition and results of operations. In addition, many of our content licenses with third parties are non-exclusive. Accordingly, other websites and other media such as radio or television may be able to offer similar or identical content. If other companies make available competitive content, the number of users of our services may not grow as anticipated, or may decline. This increases the importance of our ability to aggregate compelling content in order to differentiate Yandex from other businesses.

Our business benefits from a strong brand. Failure to maintain and enhance our brand would materially adversely affect our business, financial condition and result of operations.

We believe that the brand identity that we have developed through the strength of our technology, our user focus, our independence from political considerations and, in particular, our ability to deliver compelling content, has significantly contributed to the success of our business. We also believe that maintaining and enhancing the Yandex brand, including through continued significant marketing efforts, is critical to expanding our base of users, advertisers, advertising network partners, and other business partners. As described below, several of our business units operate as joint ventures. Although we have sought to implement appropriate controls and protections, depending on specific terms of joint venture arrangements we may have more limited ability to ensure that these businesses are operated in a manner that is consistent with the broader Yandex brand.

Maintaining and enhancing our brand, especially in relation to mobile services, will depend largely on our ability to continue to be a technology leader and a provider of high-quality, reliable services, which we may not continue to do successfully.

If we fail to manage effectively the growth and increasing complexity of our operations, our business, financial condition and results of operations could be adversely affected.

We have experienced, and continue to experience, growth in our operations, which has placed, and will continue to place, significant demands on our management and our operational and financial infrastructure.

We operate certain of our services through separate business units in order to facilitate the growth of those services. Management of these separate business units, some of which now operate as joint ventures with third-party partners, requires additional administrative effort, which may put strain on our management and other resources. If we do not effectively manage our growth and the operation of our business units, the quality of our services could suffer, which could adversely affect our brand, business, financial condition and results of operations.

As our user and advertiser bases expand, we will need to continue to increase our investment in technology, infrastructure, facilities and other areas of operations, in particular product development, sales and marketing. As a result of such growth, we will also need to continue to improve our operational and financial systems and managerial controls and procedures. We will have to maintain close coordination among our technical, accounting, finance, marketing and sales personnel. If the improvements are not implemented successfully, our ability to manage our growth will be impaired and we may have to make significant additional expenditures, which could harm our business, financial condition and results of operations.

Growth in our operations internationally may create increased risks that could adversely affect our business, financial condition and results of operations.

We have limited experience with operations outside Russia, and in 2019 derived only approximately 7.1% of our revenues from international markets. Part of our future growth strategy is to expand our operations geographically on an opportunistic basis. Our geographic expansion efforts (including the expansion efforts of our business units and joint ventures) generally require the expenditure of significant costs in the new geography prior to achieving the market share necessary to support the commercialization of our services, which allows us to begin generating revenues from our core services in the new geography. Our ability to manage our business and conduct our operations across a broader range of geographies will require considerable management attention and resources and is subject to a number of risks relating to international markets, including the following:

- " challenges caused by distance, language and cultural differences;
- " managing our relationships with local partners should we choose to adopt a joint venture approach in our international expansion efforts;
- " credit risk and higher levels of payment fraud in certain countries;
- " pressure on our operating margins as we invest to support our expansion;
- " currency exchange rate fluctuations and our ability to manage our currency exposure;
- " foreign exchange controls that might prevent us from repatriating cash earned in certain countries;
- " legal risks, including potential of claims for infringement of intellectual property and uncertainty regarding liability for online services and content;
- " adoption of new legislation and regulations, which may adversely impact our operations or may be applied in an unpredictable manner;
- " potentially adverse tax consequences;
- " deleterious changes in political environment;
- " unexpected changes in preferences and perceptions of our users and customers; and
- " higher costs and greater management time associated with doing business internationally.

In addition, compliance with complex and potentially conflicting foreign and Russian laws and regulations that apply to our international operations may increase our cost of doing business and may interfere with our ability to offer, or prevent us from offering, our services in one or more countries. These numerous laws and regulations include import and export requirements, content requirements, trade restrictions, tax laws, economic sanctions, internal and disclosure control rules, data protection, data retention, privacy and filtering requirements, labor relations laws, U.S. laws, such as the Foreign Corrupt Practices Act, and local laws prohibiting corrupt payments to governmental officials. Violations of these laws and regulations may result in fines; criminal sanctions against us, our officers, or our employees; prohibitions on the conduct of our business; and damage to our reputation. Although we have implemented policies and procedures designed to ensure compliance with these laws, we cannot assure you that our employees, contractors or agents will not violate our policies. Any such violations may result in prohibitions on our ability to offer our services in one or more countries, and may also materially adversely affect our reputation, our brand, our international expansion efforts, our ability to attract and retain employees, and our business, financial condition and results of operations.

Our corporate culture has contributed to our success, and if we cannot maintain the focus on teamwork and innovation fostered by this environment, our business, financial condition and results of operations would be adversely affected.

We believe that a critical contributor to our success has been our corporate culture, which values and fosters teamwork and innovation. As our business matures, and we are required to implement more complex organizational management structures, including those introduced in connection with our recently implemented corporate governance changes, we may find it increasingly difficult to maintain the beneficial aspects of our corporate culture. We operate a number of our services through separate business units, in order in part to maintain the “start-up spirit” and provide greater strategic and operational focus for these units. We also operate several of our business units as joint ventures with other parties and may establish new joint ventures in future. In such situations our efforts in maintaining our corporate culture may not be successful, which would adversely affect our business, financial condition and results of operations. In particular, the spin-off of certain business units or further establishing of joint ventures and partnerships may cause the loss of some of our clients, or disruption in the provision of the services that are being carved out, and may require additional attention from our management.

The loss of any of our key personnel, or a failure to attract, retain and motivate qualified personnel, may have a material adverse effect on our business, financial condition and results of operations.

Our success depends in large part upon the continued service of key members of our management team and technical personnel, as well as our continued ability to attract, retain and motivate other highly qualified engineering, programming, technical, sales, customer support, financial and managerial personnel.

Although we attempt to structure employee compensation packages in a manner consistent with the evolving standards of the markets in which we operate and to provide incentives to remain with Yandex, including equity awards under our employee incentive plans, we cannot guarantee that we will be able to retain our key employees. Although we grant additional equity awards to management personnel and other key employees from time to time, employees may be more likely to leave us after their initial award fully vests. Decline of the market value of our shares could also make such equity awards less effective in retaining our key employees, especially for options issued above the current trading price. If any member of our senior management team or other key personnel should leave our group, our ability to successfully operate our business and execute our business strategy could be impaired. We may also have to incur significant costs in identifying, hiring, training and retaining replacements for departing employees.

The competition for software engineers and qualified personnel who are familiar with the internet industry in Russia is intense. We may encounter difficulty in hiring and/or retaining highly talented software engineers to develop and maintain our services. There is also significant competition for personnel who are knowledgeable about the accounting and legal requirements related to a NASDAQ listing, and we may encounter difficulty in hiring and/or retaining appropriate financial staff needed to enable us to continue to comply with the internal control requirements under the Sarbanes-Oxley Act and related regulations. Any inability to successfully retain key employees and manage our personnel needs may have a material adverse effect on our business, financial condition and results of operations.

If our security measures are breached, malicious applications interfere with or exploit security flaws in our services, or our services are subject to attacks that degrade or deny the ability of users to access our products and services, our products and services may be perceived as not being secure, users and customers may curtail or stop using our products and services, and we may incur significant legal and financial exposure.

Third parties have in the past attempted, and may in the future attempt, to use malicious applications to interfere with our services and may disrupt our ability to connect with our users. Such interference often occurs without disclosure to or consent from users, resulting in a negative experience that users may associate with Yandex. Such an attack could also lead to the destruction or theft of information, potentially including confidential or proprietary information relating to Yandex’s intellectual property, content and users. For example, if a third party were to hack into our network, they could obtain access to our search code. Because the techniques used to obtain unauthorized access, disable or degrade service,

or sabotage systems change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or implement adequate preventative measures. If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed and we could lose users and customers.

Although we maintain substantial security measures, such measures may also be breached due to employee error, malfeasance, system errors or vulnerabilities, fraudulent actions of outside parties, or otherwise. Such security breaches may expose us to a risk of loss of this information, litigation, remediation costs, increased costs for security measures, loss of revenue, damage to our reputation, and potential liability.

In addition, we offer applications and services that our users download to their devices or that they rely on to store information and transmit information to others over the internet. These services are subject to attack by viruses, worms and other malicious software programs, which could jeopardize the security of information stored in a user's device or in our computer systems and networks. These applications may be difficult to remove or disable, may reinstall themselves and may circumvent other applications' efforts to block or remove them. If our efforts to combat these malicious applications are unsuccessful, or if our services have actual or perceived vulnerabilities, our reputation may be harmed, our user traffic could decline, and our communications with certain users could be impaired, which could adversely affect our business, financial condition and results of operations.

Our business depends on the accuracy and reliability of our search results and dependability of our other services. A systems failure, technical interference or human error could prevent us from providing accurate search results or ads or reliably deliver our other services, which could lead to a loss of users and advertisers and damage our reputation and materially adversely affect our business, financial condition and results of operations.

Our business depends on our ability to provide accurate and reliable search results, which may be disrupted. For example, because our search technology ranks a webpage's relevance based in part on the importance of the websites that link to it, people have attempted to link groups of websites together to manipulate search results. If our efforts to combat these and other types of "index spamming" are unsuccessful, our reputation for delivering relevant results could be harmed. This could result in a decline in user traffic, which may adversely affect our business, financial condition and results of operations.

We seek to ensure the speed and reliability of our services regardless of the user's location by operating our own Content Delivery Network (CDN) in points of presence in major cities throughout Russia and other countries in which we operate. This network allows us to support reliable 24/7 operations, including server-based computations, research and development work, and user and advertiser services. We use proprietary computer architecture to link these clusters of servers, as well as proprietary computational software that operates across these distributed servers, including software that enables us to deploy and monitor software across our systems. This allows us to use relatively inexpensive off-the-shelf servers as the foundation of our robust and effective systems for redundant, distributed data storage, retrieval and distributed calculations. Geographic distribution of our servers decreases the cost of internet usage for our users, increases the access speed for our services and increases the stability and dependability of our service offerings. This structure provides redundant fail-safe capacity such that the failure of a single facility would not cause our websites to stop functioning.

Nevertheless, although we maintain robust network security measures, our systems are potentially vulnerable to damage or interruption from terrorist attacks, denial-of-service attacks, computer viruses or other cyber-attacks or attempts to harm our system, power losses, telecommunications failures, floods, fires, extreme weather conditions, earthquakes and similar events. Our data centers are also potentially subject to break-ins, sabotage and intentional acts of vandalism, and to potential disruptions. The occurrence of a natural disaster or other unanticipated problems at our data centers could result in lengthy interruptions in our service, or a pandemic or an outbreak of disease or similar public health concern,

such as the recent coronavirus outbreak, or fear of such an event, could result in reduced customer traffic and consumer spending or labor shortages and delays in manufacturing and shipment of products. In each case, such events which could reduce our revenues and profits, and our brand could be damaged if people believe our services are unreliable.

From time to time, we have experienced power outages that have interrupted access to our services and impacted the functioning of our internal systems. Although we maintain back-up generators, these may not operate properly through a major sustained power outage or their fuel supply could be inadequate. Any unscheduled interruption in our services places a burden on our entire organization and would result in an immediate loss of revenue. If we experience frequent or persistent system failures on our websites, our reputation and brand could be permanently harmed. The steps we have taken to increase the reliability and redundancy of our systems are expensive, reduce our operating margin and may be insufficient to reduce the frequency or duration of unscheduled downtime.

Although we test updates before implementation and there were no significant downtime periods in recent years, errors made by our employees in maintaining or expanding our systems may damage our brand and may have a materially adverse effect on our business, financial condition and results of operations.

We may not be able to prevent others from unauthorized use of our intellectual property rights, which may adversely affect our competitive position, our business, financial condition and results of operations.

We rely on a combination of patents, trademarks, trade secrets and copyrights, as well as nondisclosure agreements, to protect our intellectual property rights. Our patent department is responsible for developing and implementing our group-wide patent protection strategy in selected jurisdictions, and to date we have filed more than 750 patent applications, of which more than 400 have resulted in issued patents. The protection and enforcement of intellectual property rights in Russia and other markets in which we operate, however, may not be as effective as that in the United States or Western Europe. Also, the efforts we have taken to protect our proprietary rights may not be sufficient or effective. Any significant infringement of our intellectual property rights could harm our business, our brand and/or our ability to compete, all of which could adversely affect our competitive position, our business, financial condition and results of operations.

We may be subject to intellectual property infringement claims, which are costly to defend, could result in significant damage awards, and could limit our ability to provide certain content or use certain technologies in the future.

A number of internet, technology, media and patent-holding companies own or are actively developing patents covering search, indexing, electronic commerce and other internet-related technologies, as well as a variety of online business models and methods. We believe that these parties will continue to take steps to protect these technologies, including, but not limited to, seeking patent protection in certain jurisdictions. As a result, disputes regarding the ownership of technologies and rights associated with online activities are likely to arise in the future. In addition, use of open-source software is often subject to compliance with certain license terms, which we may inadvertently breach.

With respect to any intellectual property rights claim, we may have to pay damages or compensation and/or stop using technology found to be in violation of a third party's rights. We may have to seek a license for the technology, which may not be available on commercially reasonable terms or at all, and may significantly increase our operating expenses. We may be required to develop an alternative non-infringing technology, which may require significant effort, expense and time to develop. If we cannot license or develop technology for any potentially infringing aspects of our business, we may be forced to limit our service offerings and may be unable to compete effectively. We may also incur substantial expenses in defending against third-party infringement claims regardless of the merit of such claims.

We may be subject to claims from our current or former employees as well as contractors for copyright, trade secret and patent - related matters, which are costly to defend, and which could adversely affect our business, financial condition and results of operation.

The software, databases, algorithms, images, patentable intellectual property, trade secrets and know-how that we use for the operation of our services were generally developed, invented or created by our former or current employees or contractors during the course of their employment with us within the scope of their job functions or under the relevant contractor's agreement, as the case may be. As a matter of Russian law, we are deemed to have acquired copyright and related rights as well as rights to file patent applications with respect to such products and have the intellectual property rights required for their further use and disposal subject to compliance with certain requirements set out in the Civil Code of Russia. We believe that we have appropriately followed such requirements, but they are defined in a broad and ambiguous manner and their precise application has never been definitively determined by the Russian courts. Therefore, former or current employees or contractors could either challenge the transfer of intellectual property rights over the products developed by them or with their contribution or claim the right to additional compensation for their works for hire and/or patentable results, in addition to their employment compensation. We may not prevail in any such action and any successful claim, although unlikely to be material, could adversely affect our business and results of operation.

We may be held liable for information or content displayed on, retrieved by or linked to our websites and mobile applications, or distributed by our users; or we may be required to block certain content or access to our websites could be restricted; any of which could harm our reputation, business, financial condition and results of operations.

The law and enforcement practice relating to the liability of providers of online services for the activities of their users is currently not settled in Russia and certain other countries in which we operate. Claims may be brought against us for defamation, libel, negligence, copyright, patent or trademark infringement, tort (including personal injury), fraud, other unlawful activity or other theories and claims based on the nature and content of information to which we link or that may be posted online via blogs and message boards, generated by our users or delivered or shared through our services, including if appropriate licenses and/or rights holder's consents have not been obtained. For example, we have previously been involved in litigation regarding alleged copyright infringement in the United States. We are also regularly required to remove content uploaded by users on grounds of alleged copyright infringement, and from time to time we receive requests from individuals who do not want their names or websites to appear in our search results. In addition, under the applicable laws any companies and their officers may be held liable for the failure to delete or to stop distributing such information as is required by a court enforcement officer's act. The liability may include penalties for companies and imprisonment for officers.

Third parties may also seek to assert claims against us alleging unfair competition, data misappropriation, violations of privacy rights or failure to maintain the confidentiality of user data. Our defense of any such actions could be costly and involve significant time and attention of our management and other resources. If any of these complaints results in liability to us, the judgment or settlement could potentially be costly, encourage similar lawsuits, and harm our reputation and possibly our business.

The governments of the countries in which we operate are increasingly developing legislation aimed at regulation of the internet, in many places expanding liability and creating new obligations for companies that operate in the internet. For example, under the law "On Information, Information Technologies and on the Protection of Information", we are required to delete from our search engine search results linking to websites that have been blocked in Russia for repeated copyright infringements.

Additional recent legislation in Russia has introduced a system of information and website blocking measures both to prevent and stop copyright and related rights infringements and to prevent dissemination of illegal information, such as child pornography, content encouraging suicides and drug use, information on minors hurt by illegal actions and

extremist information. The regulations generally require a request from the governmental authority to take down the allegedly infringing or illegal information prior to blocking of a particular website. However, in some cases, such as dissemination of extremist information, access to such information can be blocked without notification or prior judicial scrutiny. In 2018, an analogous simplified blocking process was proposed in draft legislation with regard to violation of copyright and related rights (e.g. to videos posted online). This proposal is currently under consideration of the Russian Government and has not been submitted to the Russian State Duma. Moreover, under the recent amendments to legislation a website may be blocked if the information published there contains disrespectful and indecent statements about the society, state, Constitution or governmental authorities. Additionally, the subjects who are accused of disseminating such statements can face administrative fines.

Therefore, if we fail to identify the above-mentioned types of information and delete them from our websites in timely manner, our websites might be blocked.

New legislation and regulations may impose additional new requirements on us and our operations and lead to material legal liability, which can be difficult to foresee or limit.

In addition, in 2018 we became party to an anti-piracy memorandum signed between the major Russian IT companies and copyright holders. This memorandum stipulates an out-of-court procedure that obligates search engines to remove URLs to infringing audio-visual content at the request of the rights holders. The memorandum was initially valid until September 1, 2019 but was prolonged until January 31, 2021 and is currently in force. It is planned that a corresponding draft law will be elaborated on the basis of this memorandum. Apart from that, under a recent resolution of the Supreme Court of the Russian Federation, liability may be imposed for the provision of access to materials that violate IP rights. We believe that according to the wording of the decision, this norm should be applicable to owners of websites where such materials are published. However, there is no assurance that courts would not interpret this provision broadly and would not apply this norm to Yandex.

The categories of illegal information to which access can be restricted may be interpreted broadly or be expanded. In certain cases, even removal of illegal information does not eliminate the risk of website blocking or reinstate access to the blocked website. For example, Russian legislation allows for permanent blocking of websites for repeated violation of copyright and related rights. A number of large websites have been blocked pursuant to this legislation so far, including, for example, a major hosting provider. We may be subject to unpredictable blocking measures, injunctions or court decisions that may require us to block or remove content and may adversely affect our services and operations. In addition, to ensure compliance with such laws, we may be required to commit greater resources, or to limit functionality of our services, which may adversely affect the appeal of our services to our customers. Although we believe that we are in full compliance with applicable laws, the application of new norms by government authorities might be sometimes inconsistent or unpredictable. In addition, draft legislation under consideration by the Russian State Duma describes the process of limiting access to a "program application" that contain materials violating copyright and related rights. The wording of the proposal is rather broad, and it is difficult to predict how this norm, if adopted, would be applied in practice (in particular, how a "program application" would be defined) and how this might affect all our applications.

As the internet evolves, an increasing amount of online content may be held in closed social networks, mobile apps or proprietary document formats, which may limit the effectiveness of our search technology, which could adversely affect our brand, business, financial condition and results of operations.

Social networks are important players in the internet market and have a significant degree of control over the manner and extent to which information on their websites can be accessed through third-party search engines. Information can also be stored in other closed systems, such as mobile apps.

If social or other networks or software providers take steps to prevent their content or documents in their formats from being searchable, such content would not be included in our search results even if the content was directly relevant to a search request. These parties may also seek to require us to pay them royalties in exchange for giving us the ability to search content on their sites, in their networks or documents in their format and provide links thereto in our search results. If these parties also compete with us in the search business, they may give their search technology a preferential ability to search their content or documents in their proprietary format. Any of these results could adversely affect our brand, business, financial condition and results of operations.

We may have difficulty scaling and adapting our existing technology architecture to accommodate increased traffic and technology advances or new requirements of our users and advertisers, which could adversely affect our business, financial condition and results of operations.

With some of the most highly visited websites in Russia, we deliver a growing number of services, page views and video programs to an increasing number of users. In addition, the services we offer have expanded and changed significantly and are expected to continue to do so in the future to accommodate bandwidth-intensive technologies and means of content delivery, such as interactive multimedia and video. Our future success will depend on our ability to adapt to rapidly changing technologies, to adjust our services to evolving industry standards and to maintain the performance and reliability of our services. Rapid increases in the levels or types of use of our online services could result in delays or interruptions in our services.

As we expand our services, we will need to continue to invest in new technology infrastructure, including data centers. We may have difficulty in expanding our infrastructure to meet increased demand for our services, including difficulties in obtaining suitable facilities or access to sufficient electricity supplies. A failure to expand our infrastructure could materially and adversely affect our ability to maintain and increase our revenues and profitability and could adversely affect our business, financial condition and results of operations.

Certain technologies could block our ads, which may adversely affect our business, financial condition and results of operations.

Advertising displayed on our platforms may be interfered with by third parties, which may adversely affect our ability to attract advertisers. For example, third parties had in the past, and may in the future, employ technologies to block the display of ads on webpages. The wide and effective use of ad-blocking technologies can reduce the amount of revenue generated by the ads we serve and decrease the confidence of our advertisers and Yandex ad network partners in our advertising technology, which may adversely affect our business, financial condition and results of operations.

If we fail to detect click fraud or other invalid clicks, we may face litigation and may lose the confidence of our advertisers, which may adversely affect our business, financial condition and results of operations.

We are exposed to the risk of fraudulent and invalid clicks on the ads we serve from a variety of potential sources. Invalid clicks are clicks that we have determined are not intended by the user to access the underlying content, including clicks resulting from click fraud executed by automated scripts of computer programs. We monitor our own websites and those of our partners for click fraud and proactively seek to prevent click fraud and filter out fraudulent or other invalid clicks. To the extent that we are unsuccessful in doing so, we credit our advertisers for clicks that are later attributed to click fraud. If we are unable to stop these invalid clicks, these credits to our advertisers may increase. This could negatively affect our profitability, and these invalid clicks could result in legal claims or harm our brand.

We acquire complementary businesses, teams and technologies from time to time, and may fail to identify additional suitable targets, acquire them on acceptable terms or successfully integrate them, which may limit our ability to implement our growth strategy. Acquisitions of new businesses may also lead to increased legal risks and other negative consequences, which could have an adverse effect on our business, financial condition and results of operations.

We regularly acquire other businesses, technologies and teams. The acquisition and integration of new businesses, technologies and people pose significant risks to our existing operations, including:

- " additional demands placed on our management, who are also responsible for managing our existing operations;
- " increased overall operating complexity of our business, requiring greater personnel and other resources;
- " difficulties in expanding beyond our core expertise;
- " significant initial cash expenditures or share dilution in connection with acquiring and integrating new businesses; and
- " legal risks (including potential claims of the counterparty or of third parties), which may result from our lack of expertise in the field of the target's business, incomplete or improper due diligence, misrepresentations by counterparties, and/or other causes.

The integration of new businesses presents a number of challenges, including differing cultures or management styles, poor financial records or internal controls on the part of the acquired companies, and an inability to establish control over cash flows. Furthermore, even if we are successful in integrating new businesses, expected cost and operating efficiencies may not materialize, the financial benefits from the acquisition may be less than anticipated, and we could be required to record impairment changes as a result of underperforming assets.

Moreover, our growth may suffer if we fail to identify suitable acquisition targets or are outbid by competing bidders. As a NASDAQ-listed company, we are subject to securities laws and regulations that, in certain circumstances, require that we file with the SEC audited historical financial statements for businesses we acquire that exceed certain materiality thresholds. Given financial reporting practices in Russia and other countries in which we operate, such financial statements and documented systems of internal controls over financial reporting are often not readily available or not capable of being audited to the standards required by U.S. securities regulations. As a result, we may be prevented from or delayed in pursuing acquisition opportunities that our competitors and other financial and strategic investors are able to pursue, which may limit our ability to implement our growth strategy.

Failure to maintain effective customer service may result in customer complaints and negative publicity and may adversely affect our business, financial condition and results of operations.

Customer complaints or negative publicity about our services or those offered by us (including services offered by our business units) or one of our joint ventures, or breaches of customers' privacy or of our security measures, could diminish consumer confidence in and use of our services. Measures we implement to combat risks of fraud and breaches of privacy and security may be viewed as onerous by our customers or those of our joint ventures and damage relations with them. Alternately, should breaches of customers' privacy or of security measures occur, we could be subject to investigations and claims from governmental bodies, as well as from our customers. These measures heighten the need for prompt and accurate customer service to resolve irregularities and disputes. Effective customer service requires significant personnel expense, and such expense, if not managed properly, may impact our profitability or that of one or more of our joint ventures. Any inability by us or our joint ventures to manage or train our or their customer service representatives properly could compromise our or their ability to handle customer complaints effectively. In case of failure to maintain effective customer service by us or by one of our joint ventures, our reputation may suffer, and we may lose our customers' confidence, which may adversely affect our business, financial condition and results of operations.

The inherent limitations of the available data regarding internet usage and online advertising may make it difficult to assess our markets and our market position.

We rely on and refer to information and statistics from various third-party sources, as well as our own internal estimates, regarding internet usage and penetration and the online advertising markets in the countries in which we operate. The information and statistics used in our industry are subject to inherent limitations reflecting the differing metrics and measurement methods utilized and applied by different sources; for example, data derived from computer usage contrasted to that derived from user surveys. In addition, while we believe that the available data and research on the Russian market is of comparable quality to that available in most developed countries, the data for Kazakhstan and Belarus are generally less consistent and reliable due to more limited third-party measurements in those countries.

We will need to make new arrangements for our Russian headquarters premises before our current lease expires in 2021, which may result in material expenses and distraction of management attention.

Our Russian headquarters are currently located in approximately 64,000 square meters of rented property in central Moscow, with leases expiring in 2021 on a portion of our properties under lease. We also lease additional office space of approximately 47,000 square meters in business centers in central Moscow, which houses some of our divisions. In order to secure sufficient office space to support our expected future growth, in December 2018 we acquired a property site for a new Moscow headquarters situated at 15 Kosygina Street. We may encounter challenges in developing our headquarters design proposal for the site and obtaining the required approvals for the finalized project. In addition, we may face difficulties in managing or coordinating a development process. If the development project is not finished by the time our current and future lease expires, we may need to negotiate a new lease for our current or future premises, and may be unable to secure favorable terms, or may be required to agree to rent denominated in, or linked to, U.S. dollars, which would subject us to foreign exchange risk.

Additional Risks Related to Regulatory Matters

Because the range of the services we provide is increasing and the legal framework governing the operations in our markets is evolving, we may be required to obtain additional licenses, permits or registrations or comply with other requirements, which may be costly or may limit our flexibility to run our business.

As we increase the range of services and diversify our business we may have to apply for additional licenses. Maintenance of granted licenses and obtaining new licenses may require us to spend additional resources. Licensing requirements may also limit our flexibility in running our business. Failure to maintain required licenses may significantly limit our ability to provide new services in respect of which these licenses are required.

As the legal framework in Russia continues to evolve, we may be required to take additional actions in order to comply with new legislation. Although we believe that we are in full compliance with applicable laws, ambiguities in legislation and the wide discretion granted to regulatory authorities may result in us being subject to additional regulatory requirements. Compliance with additional or new regulatory requirements, or new interpretations or applications of existing requirements, may also require us to spend additional resources and limit our flexibility in providing our services.

For instance, there are various discussions of regulation applicable to big data processing. Any restrictive regulations in this sphere might negatively affect our business operations and flexibility in providing our services.

We are subject to regulation regarding the processing and retention of personal and other data, which may impose additional obligations on us, limit our flexibility, or harm our reputation with users.

The collection and handling of user data by any entity or person in Russia (as in many other countries) may be subject to certain requirements and restrictions. If these requirements and restrictions are amended, interpreted or applied in a manner not consistent with current practice, we could face fines or orders requiring that we change our operating practices, which in turn could have a material adverse effect on our business, financial condition and results of operations.

Several companies in our group underwent a planned inspection by the competent Russian authority (Roskomnadzor) in 2019. The authority did not find any significant violations. If further inspections are conducted in the future and result in the determination that companies in our group fail to comply with the applicable data protection

legislation, we could experience financial and reputational losses and could be restricted from providing certain types of services until we comply with the requirements.

Furthermore, we use cookies and other widespread technologies that assist us in improving the user experience and personalization of our products and services that ultimately benefit both our users and advertisers through behavioral targeting, which makes our advertising more relevant. There is no clarity as to whether our practices are compliant with the requirements of applicable data protection legislation in Russia and abroad, and such laws could be interpreted and applied in a manner that is not consistent with our current data protection practices.

Additionally, “organizers of information distribution” (subjects that ensure the operation of information systems or computer software which are intended or used to receive, transmit, deliver and/or process electronic messages of internet users) are required to notify the relevant Russian authority about the commencement of their operations and must retain a broad range of data relating to and generated by their users for a period of time, which must be provided to the authorities at their request. Our principal subsidiary operating in Russia has notified the relevant Russian authority that it acts as an organizer of information distribution with respect to some of the services it provides. Organizers of information distribution that use encryption when delivering or processing electronic messages are required to provide the security authorities with information necessary for decoding the delivered or processed messages. Compliance with these requirements may require significant expenditures by us, including additional data centers, servers and other infrastructure or software development. Data retention may also harm our reputation with users. If we fail to comply with the above requirements, the Russian authorities can block access to our services in Russia.

Companies are also required to store all personal data of Russian users in databases located inside Russia. Compliance with the requirements provided in this legislation may be practically difficult, require significant efforts and resources, could lead to legal liability in other jurisdictions and limit functionality of our services. Compliance with these requirements may also limit our ability to compete with other companies located in other jurisdictions that do not require mandatory local storage of personal data related to their users and that may elect not to comply with such requirements in Russia. Nevertheless, after conducting an inspection in 2019, Roskommadzor has not revealed any violations by Yandex in this regard.

Due to the nature of the services we offer and the fact that we have a presence in a number of countries, we may also be subject to data protection laws of other jurisdictions, especially laws regulating the cross-border transfer of personal data, which may require significant compliance efforts and could result in liability for violations in other jurisdictions. For example, the General Data Protection Regulation (the GDPR) came into force in May 2018 in the EU. Although we have only modest operations in the EU and therefore our exposure under the GDPR should be limited, we believe that we are taking all necessary steps to comply with the GDPR. However, if we fail to interpret all the requirements of the GDPR in accordance with the official interpretation, we may be held liable for noncompliance. As our business grows, we may also encounter increased pressure from foreign state authorities with respect to the production of information related to users in circumvention of the international legal framework regulating the provision of such information. Any non-compliance with such requests may lead to liability and other adverse consequences. Further, current law imposes restrictions on the distribution of satellite images of certain areas in Russia and the other countries in which we operate and imposes requirements with respect to the information provided by the traffic monitoring service we offer. If we were found to be in violation of any such restrictions, we may be forced to suspend such services or may potentially be subject to fines or other penalties.

We may be subject to existing or new advertising legislation that could restrict the types and relevance of the ads we serve, which would result in a loss of advertisers and therefore a reduction in our revenues.

Russian law prohibits the sale and advertising of certain products and heavily regulates advertising with respect to certain products and services. Ads for certain products and services, such as financial services, as well as ads aimed at minors and some others, must comply with specific rules and must in certain cases contain required disclaimers.

Further amendments to legislation regulating advertising may impact our ability to provide some of our services or limit the type of advertising we may offer. The application of these laws to parties, such as Yandex, that merely serve or distribute ads and do not market or sell the product or service, however, can be unclear. Pursuant to our terms of service, we require that our advertisers have all required licenses or authorizations. If our advertisers do not comply with these requirements, and these laws were to be interpreted to apply to us, or if our ad-serving system failed to include necessary

disclaimers (or otherwise ensure compliance of the ads with advertising legislation), we may be exposed to administrative fines or other sanctions, and may have to limit the types of advertisers we serve.

The regulatory framework in Russia governing the use of behavioral targeting in online advertising is unclear. If new legislation were to be adopted, or current legislation were to be interpreted, to restrict the use of behavioral targeting in online advertising, our ability to enhance the targeting of our advertising could be significantly limited, which could result in a loss of advertisers or a reduction in the relevance of the ads we serve, which would reduce the number of clicks on the ads and therefore our revenues.

Our need to comply with applicable Russian laws and regulations could hamper our ability to offer services that compete effectively with those of our foreign competitors and may adversely affect our business, financial condition and results of operations.

Many of our global competitors, such as Google and Microsoft, have their principal operations outside of Russia, putting them generally outside of the jurisdiction of Russian courts and government agencies, even though some of them have offices in Russia. Our systems and operations are located principally in Russia. Russian laws and regulations that are applicable to us, but not to our non-Russian competitors, may impede our ability to develop and offer services that compete effectively on a global scale as well as in Russia with those offered by our non-Russian-based competitors and generally available worldwide over the internet. For instance, our non-Russian competitors might be not in compliance with the requirement of the Russian data protection legislation to store all personal data of Russian users in databases located inside Russia. In addition, our non-Russian competitors have not joined an anti-piracy memorandum signed between the major Russian IT companies and copyright holders. This memorandum stipulates an out-of-court procedure that obligates search engines to remove URLs to infringing audio-visual content at the request of the rights holders.

Any inability on our part to offer services that are competitive with those offered by our non-Russian competitors may adversely affect our business, financial condition and results of operations.

The competent authorities could determine that we hold a dominant position in one or more of our markets, and could impose limitations on our operational flexibility that may adversely affect our business, financial condition and results of operations.

Applicable antimonopoly legislation imposes restrictions on companies that occupy a dominant position in a given market. Were the competent authorities to investigate the internet or online advertising industries, the ride-hailing business or other businesses in which we operate, it is possible that they may conclude that, given our market share, we hold a dominant position in one or more of the markets in which we operate. Additionally, from time to time we receive information requests from Russian Federal Antimonopoly Service (FAS) related to certain of our services. If FAS deems that we hold a dominant position in one or more of the markets in which we operate this could result in limitations on our future acquisitions and a requirement that we pre-approve with the authorities any changes to our standard agreements with advertisers and Yandex ad network partners, as well as any specially negotiated agreements with business partners. In addition, if we were to decline to conclude a contract with a third party or terminate an existing agreement without sufficient substantiation this could, in certain circumstances, be regarded as abuse of a dominant market position.

Any abuse of a dominant market position could lead to administrative penalties and the imposition of fines of up to 15% of our prior year annual revenues in the relevant market. These limitations may reduce our operational and commercial flexibility and responsiveness, which may adversely affect our business, financial condition and results of operations.

In addition, under Russian antimonopoly legislation some potential acquisitions that we may consider require a preliminary approval by FAS. FAS may withhold the approval or may approve transactions subject to particular conditions. Such conditions could place significant restrictions on Yandex businesses, could make the acquisition less attractive, and could result in a termination of the proposed transaction.

Risks Related to Tax Matters

Some of our counterparties provide limited transparency in their operations, which could subject us to greater scrutiny and potential claims from government authorities.

We do business with a number of companies, especially small companies that may not always operate in a fully transparent manner and that may engage in unpredictable or otherwise questionable practices with respect to tax obligations or compliance with other legal requirements. We have been approached by government authorities from time to time regarding potential tax claims or other compliance matters in connection with such transactions. As we are a larger and more transparent company with greater resources than such counterparties, governmental authorities may seek to collect taxes and/or penalties from us in relation to such transactions on the basis that we could have had knowledge of or aided such practices even when we did not.

Changes in the tax systems in the countries in which we operate, or unpredictable or unforeseen application of existing rules, may materially adversely affect our business, financial condition and results of operations.

Russian tax, currency and customs laws and regulations are subject to varying interpretations and changes, which may be frequently revised and reviewed by the authorities. As a result, our interpretation of such tax legislation may be challenged by the relevant authorities. Russian tax legislation largely follows the OECD approach but may be implemented in a way which is not in line with international practice or our interpretation. Moreover, under the current conditions of weak economic growth and reduced tax revenue, the authorities are taking a more assertive position in their interpretation of the tax legislation and, as a result, it is possible that transactions and activities that have not been challenged in the past may now be questioned by the authorities. High-profile companies such as ours can be particularly vulnerable to such assertive positions of the authorities.

Although we believe that our interpretation of relevant legislation is appropriate and is in accordance with existing court practice, if the authorities were successful in enforcing differing interpretations, our tax liability may be greater than the estimated amount that we have expensed to date and paid or accrued on our balance sheet. We believe our tax position is consistent with the tax laws in the jurisdictions in which we conduct our business, however, the determination of our worldwide provision for tax liabilities, including digital tax, requires significant judgment and there are many transactions and calculations where the ultimate tax determination is uncertain and we are subject to regular review and audit by both domestic and foreign tax authorities. Generally, Russian taxpayers are subject to inspection of their activities for a period of three calendar years immediately preceding the year in which an audit is carried out, with tax audits routinely undertaken at least every two years. Tax years 2017, 2018 and 2019 are currently open for tax audit of our principal Russian subsidiaries.

There have also been significant developments and proposed changes in recent periods to international tax laws that increase the complexity, burden and cost of tax compliance. The OECD has published proposals covering a number of matters, including tax treaties and taxation of the digital economy. Future tax reform resulting from this development may result in changes to long-standing tax principles, which could adversely affect our effective tax rate or result in higher cash tax liabilities. The OECD is working towards a consensus-based solution by the end of 2020 to address the challenges posed to the current tax system by the digitalization of the economy. Russian authorities also may introduce turnover digital tax if the OECD fail to reach the agreement or the agreement is unsatisfactory.

Taxes payable on dividends from our Russian operating subsidiaries to our parent company might not benefit from relief under the Netherlands-Russia tax treaty.

In 2019, our principal Russian operating subsidiary distributed dividends to our parent company (Yandex N.V.) and applied withholding tax at a 5% rate in reliance on the provisions of the Netherlands-Russia tax treaty.

Yandex N.V. is incorporated in the Netherlands and our principal operating subsidiaries are incorporated in Russia. Our management seeks to ensure that we conduct our affairs in such a manner that our parent company is regarded as the beneficial owner of all its incomes and not regarded as tax resident in any jurisdiction other than the Netherlands and, in particular, is not deemed to be a tax resident of, or to have a permanent establishment in, Russia. Thus, dividends paid from our Russian operating subsidiaries to our parent company should generally be subject to Russian withholding

tax at a 5% rate. If our parent company were not treated as a Dutch resident for tax purposes or if it were deemed to have a permanent establishment in Russia, or if the Russian tax authorities were to determine that other conditions for the application of the 5% rate are not met because, for example, if Yandex N.V. is not deemed to be beneficial owner of the dividends received, dividends paid from our Russian operating subsidiaries to our parent company would be subject to Russian withholding tax at the rate of 15%.

We can provide no assurance that dividend withholding tax relief may not be challenged by the Russian tax authorities based on the grounds mentioned above. Furthermore, Russian tax rules regarding residency and beneficial ownership which were recently introduced may change or their interpretation may evolve, thus triggering changes in taxation of dividends from our Russian subsidiaries to our parent company in the future.

Based on the current state of the law and available interpretations, we believe that Yandex N.V. and our material foreign subsidiaries should not be treated as controlled foreign corporations for Russian tax purposes. However, there are risks that any of these rules may be interpreted or applied in a manner that may have an adverse effect on our results of operations.

We may be required to record a significant deferred tax liability if we are unable to reinvest our earnings in Russia.

Our principal Russian operating subsidiary has significant accumulated earnings that have not been distributed to our Dutch parent company. Our current policy is to retain substantially all our earnings at the level of our principal subsidiary for investment in Russia.

We did not provide for dividend withholding taxes on the unremitted earnings of our non-Dutch subsidiaries for 2012 or earlier years because we considered them to be permanently reinvested outside of the Netherlands. As of December 31, 2019, we had an accrual of RUB 795 million (\$10.1 million) for dividend withholding tax. If circumstances change and we are unable to reinvest in that subsidiary's current operations or acquire suitable businesses in Russia, U.S. GAAP would require us to record a deferred tax liability representing the dividend withholding taxes that we would be required to pay if this subsidiary were to pay these unremitted accumulated earnings to our Dutch parent company as a dividend, even if such dividends were not actually declared and paid. As of December 31, 2019, the cumulative amount of unremitted earnings in respect of which dividend withholding taxes have not been provided is RUB 83,531 million (\$1,059.4 million). The applicable withholding tax rate is 5% and the amount of the unrecognized deferred tax liability related to these unremitted earnings was RUB 4,177 million (\$53.0 million) as of December 31, 2019. We expect the amount of unremitted earnings to grow as our principal Russian operating subsidiary continues to generate net income. If we were required to record a deferred tax liability on an amount subsequently made available for distribution it may have a material adverse effect on our results of operations.

Risks Related to Ownership of our Class A Shares

The price of our Class A shares has been and may continue to be volatile. Market fluctuations specific to developing markets or to high-growth technology companies generally may affect the performance of our Class A shares and could expose us to potential securities litigation, which could result in substantial costs and a diversion of our management's attention and resources.

Macroeconomic and geopolitical events in recent periods have adversely affected the value of traded securities of companies with significant operations in Russia and certain other markets, including our Class A shares. In addition, the market for technology and other growth companies has generally experienced severe price and volume fluctuations that have often been disproportionate to the operating performance of those companies. These broad macroeconomic, geopolitical, market and industry factors may impact the market price of our Class A shares regardless of our actual operating performance.

The trading price of our Class A shares has been and may continue to be volatile and subject to wide fluctuations in price in response to various factors, some of which are beyond our control. These factors include:

- " macroeconomic and geopolitical developments, including those specific to technology businesses, the internet and online advertising both in Russia and globally, as well as the impact of COVID-19;

- " any proposed or adopted legislation in Russia that would impose limitations on foreign ownership or control of our business;
- " changes or proposed changes in the regulation of our services by the applicable government authorities, including with respect to operational requirements and governance;
- " market rumors (for example, rumors regarding potential changes to our capital structure in October 2018 had an immediate negative impact on the price of our Class A shares);
- " quarterly variations in our results of operations or those of our competitors;
- " fluctuations in our share of the internet search market;
- " the proportion of our revenues generated on our websites relative to those generated through the Yandex ad network or through distribution partners, as a result of the revenue sharing arrangements we enter into and the overall volume of advertising we provide our partners;
- " announcements of technological innovations or new services and media properties by us or our competitors;
- " the amount of advertising purchased or market prices for online advertising;
- " the emergence of new advertising channels in which we are unable to compete effectively;
- " the volume of searches conducted, the amounts bid by advertisers or the number of advertisers that bid in our advertising system;
- " changes in governmental regulations, in particular those applicable to regulation of online business in Russia and globally;
- " disruption to our operations or those of our partners;
- " our ability to develop and launch new and enhanced services on a timely basis;
- " commencement of, or our involvement in, litigation;
- " any major change in our directors or management;
- " changes in earnings estimates or recommendations by securities analysts;
- " our ability to compete effectively for users, advertisers, partner websites and content;
- " the operating and stock price performance of other companies that investors may deem comparable to us;
- " fluctuations in the exchange rate between currencies, including the Russian ruble and the U.S. dollar;
- " general global or Russian economic conditions and slow or negative growth or forecast growth of related markets; or
- " other events or factors, including those resulting from war, incidents of terrorism, natural disasters, public health concerns or epidemics, such as the COVID-19 pandemic, natural disasters, or responses to these events.

Additionally, volatility or a lack of positive performance in the price of our Class A shares may adversely affect our ability to retain key employees, some of whom have been granted equity awards.

This volatility may affect the price at which holders of Class A shares may sell such shares and the sale of substantial amounts of our Class A shares could adversely affect our trading price.

In the past, following periods of volatility in the overall market and the market price of a company's securities, securities class action litigation has often been instituted against these companies. Such litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

The concentration of voting power with our principal shareholders, including our founders, directors and senior management, together with the Priority Share held by the Public Interest Foundation, limits your ability to influence corporate matters, while a loss of voting control by our principal shareholders could affect the direction of our company.

Our Class B shares have ten votes per share and our Class A shares have one vote per share. As of February 20, 2020, our founder, directors, senior management (and their affiliates) and principal non-institutional shareholders together own 95.67% of our outstanding Class B shares and 3.7% of our outstanding Class A shares, representing in the aggregate 55.06% of the voting power of our outstanding shares. In particular, our founder, Mr. Volozh, directly or indirectly controls 86.73% of our outstanding Class B shares and 0.11% of our outstanding class A shares representing in aggregate 48.48% of the voting power of our outstanding shares. Additionally, the Priority Share provides the Public Interest Foundation with certain rights, including an effective veto on acquisitions related to our Company or the sale of our material businesses.

In addition, as part of our recently implemented restructuring, the automatic conversion feature of the Class B Shares has been amended to provide that, upon the death of a Class B holder, including Mr. Volozh, Class B Shares held by a family trust established by such holder will not automatically convert for a period of two years. During the two-year transition period following the death of Mr. Volozh, the trustee of the family trust will be bound to vote in favor of any proposal of the Board, and in accordance with the Board's recommendation on any other matter. These restrictions will fall away, and the shares will automatically convert into Class A Shares, after the end of that two-year period.

As a result, our founder, directors, senior management and their affiliates have significant influence over the management and affairs of our company and over all matters requiring shareholder approval, including the election of directors, the amendment of our articles of association and significant corporate transactions, such as a sale of our company or its assets.

This concentrated control limits your ability to influence decisions on corporate matters. We may take actions that our public shareholders do not view as beneficial or as maximizing value for them. As a result, the market price of our Class A shares may be adversely affected.

Certain of our directors and shareholders and their affiliates may have interests that are different from, or in addition to, the interests of other Yandex shareholders.

Some of our directors are affiliated with investment funds or financial institutions that have investments in other businesses or entities that currently or may in the future compete with us or with whom we may enter into transactions. For example, one of our directors, Herman Gref, is CEO and Chairman of Sberbank, with which we have joint ventures with regards to Yandex.Market and Yandex.Money. Such affiliations may require the directors to recuse themselves from consideration of certain transactions or may otherwise create real, potential or perceived conflicts of interest.

Our Board of Directors and our priority shareholder have the right to approve accumulations of stakes in our company or the sale of our principal Russian operating subsidiary, which may prevent or delay change-of-control transactions.

Our Board of Directors has the right to approve the accumulation by a party, group of related parties or parties acting in concert of the legal or beneficial ownership of shares representing 10% or more, in number or voting power, of our outstanding Class A and Class B shares (taken together). If our board grants its approval of such share accumulation, the matter is then submitted to Public Interest Foundation, as holder of our priority share, which has a further right of approval of such accumulation of shares. In addition, any decision by our Board of Directors to transfer all or substantially all of our assets to one or more third parties, including the sale of our principal Russian operating subsidiary, is subject to the prior approval of Public Interest Foundation, as priority shareholder.

Any holding, transfer or acquisition by a party, group of related parties or parties acting in concert of the legal or beneficial ownership of Class B shares representing 10% or more, in number or by voting power, of our outstanding Class A and Class B shares (taken together), without the prior approval of our Board of Directors, first, and then the priority shareholder, will be null and void. The acquisition of shares in excess of the thresholds permitted by our articles of association will be subject to certain notification requirements set forth in our articles of association. Failure to comply with those terms would render the transfer of such shares null and void. In addition, the holders of such shares would not be entitled to the dividend or voting rights attached to their excess shares. The rights of our Board of Directors and our priority shareholder to approve accumulations of stakes in our company may prevent or delay change-of-control transactions.

Anti-takeover provisions in our articles of association and the shareholders agreement among our principal shareholders may prevent or delay change-of-control transactions.

In addition to the rights of our board and of the priority shareholder to approve the accumulation of stakes of 10% or more, as described above, our multiple class share structure may discourage others from initiating any potential merger, takeover or other change-of-control transaction that our public shareholders may view as beneficial. Our articles of association also contain additional provisions that may have the effect of making a takeover of our company more difficult or less attractive, including:

- " the staggered terms, of up to four years, of our directors, as a result of which only a minority of our board is subject to election in any one year;
- " a provision that our directors, other than the two directors designated by the Public Interest Foundation from time to time, may only be removed by a two-thirds majority of votes cast representing at least 50% of our outstanding share capital;
- " requirements that certain matters, including an amendment of our articles of association, may only be brought to our shareholders for a vote upon a proposal by our Board of Directors;
- " minimum shareholding thresholds, based on par value, for shareholders to call general meetings of our shareholders or to add items to the agenda for those meetings, which will be very difficult for Class A shareholders to meet given our multiple class share structure; and
- " supermajority requirements for shareholder approval of certain significant corporate actions, including the legal merger or demerger of our company and the amendment of our articles of association.

The Dutch public offer rules, which impose substantive and procedural requirements in connection with the attempted takeover of a Dutch public company, only apply in the case of Dutch target companies that have shares listed on a regulated market within the European Union. We have not listed our shares, and do not expect to list our shares, on a regulated market within the European Union, and therefore these rules do not apply to any public offer for our Class A shares.

We rely on NASDAQ Stock Market rules that permit us to comply with applicable Dutch corporate governance practices, rather than the corresponding domestic U.S. corporate governance practices, and therefore your rights as a shareholder differ from the rights you would have as a shareholder of a domestic U.S. issuer.

As a foreign private issuer whose shares are listed on the NASDAQ Global Select Market, we are permitted in certain cases to follow Dutch corporate governance practices instead of the corresponding requirements of the NASDAQ Marketplace Rules. We follow Dutch corporate governance practices with regard to the quorum requirements applicable to meetings of shareholders and the provision of proxy statements for general meetings of shareholders. In accordance with Dutch law and generally accepted business practices, our articles of association do not provide quorum requirements generally applicable to general meetings of shareholders. Although we do provide shareholders with an agenda and other relevant documents for the general meeting of shareholders, Dutch law does not have a regulatory regime for the solicitation of proxies and the solicitation of proxies is not a generally accepted business practice in the Netherlands. Accordingly, our shareholders may not be afforded the same protection as provided under NASDAQ's corporate governance rules.

We do not comply with all the provisions of the Dutch Corporate Governance Code. This may affect your rights as a shareholder.

As a Dutch company we are subject to the Dutch Corporate Governance Code, or DCGC. The DCGC contains both principles and best practice provisions for management boards, supervisory boards, shareholders and general meetings of shareholders, financial reporting, auditors, disclosure, compliance and enforcement standards. The DCGC applies to all Dutch companies listed on a government-recognized stock exchange, whether in the Netherlands or elsewhere, including the NASDAQ Global Select Market. The principles and best practice provisions apply to the board (in relation to role and composition, conflicts of interest and independence requirements, board committees and remuneration), shareholders and the general meeting of shareholders (for example, regarding anti-takeover protection and obligations of the company to provide information to its shareholders) and financial reporting (such as external auditor and internal audit requirements). The DCGC requires that companies either “comply or explain” any noncompliance and, in light of our compliance with NASDAQ requirements and as permitted by the DCGC, we have elected not to comply with all of the provisions of the DCGC. This may affect your rights as a shareholder and you may not have the same level of protection as a shareholder in a Dutch company that fully complies with the DCGC.

Because of the secondary listing of our Class A shares on the Moscow Stock Exchange, we are subject to additional disclosure and compliance requirements that may conflict with those imposed by the SEC and NASDAQ, and we may experience trade fluctuations based on arbitrage activities.

In June 2014, we established a secondary listing of our Class A shares on the Moscow Stock Exchange. Pursuant to that listing, we and our insiders must comply with certain disclosure and other obligations that may differ in timing and substance from those applicable to our NASDAQ listing. In addition, many of the obligations imposed by the Moscow Stock Exchange are formalistic in nature, and that exchange has limited experience in the application of its requirements to companies incorporated outside Russia. As a result, we may not be able to comply with all formal obligations in a manner that is consistent with the requirements or interpretations of that exchange.

In addition, this secondary listing may create opportunities for trading arbitrage, particularly in connection with currency fluctuations between the trading in U.S. dollars on NASDAQ and in rubles on the Moscow Stock Exchange, which could impact the trading price of our Class A shares.

Risks for U.S. Holders

We cannot assure you that we will not be classified as a passive foreign investment company for any taxable year, which may result in adverse U.S. federal income tax consequence to U.S. holders.

Based on certain management estimates with respect to our gross income and the average value of our gross assets and on the nature of our business, we believe that we were not a “passive foreign investment company,” or PFIC, for U.S. federal income tax purposes for the 2019 tax year, and do not expect to be a PFIC in the foreseeable future. However, because our PFIC status for any taxable year will depend on the composition of our income and assets and the value of our assets in such year, and because this is a factual determination made annually after the end of each taxable year and there are uncertainties in the application of the rules, there can be no assurance that we will not be considered a PFIC for the current taxable year or any future taxable year. In particular, the value of our assets may be determined in large part by reference to the market price of our Class A shares, which has fluctuated, and may continue to fluctuate, significantly. If we were to be treated as a PFIC for any taxable year during which a U.S. holder held our Class A shares, certain adverse U.S. federal income tax consequences could apply to the U.S. holder. See “Taxation—Taxation in the United States—Passive foreign investment company considerations.”

Any U.S. or other foreign judgments you may obtain against us may be difficult to enforce against us in Russia or the Netherlands.

We have only very limited operations in the United States, most of our assets are located in Russia, our company is incorporated in the Netherlands, and most of our directors and senior management are located outside the United States. As a result, it may be difficult to serve process on us or these persons within the United States. Although arbitration awards are generally enforceable in Russia and the Netherlands, and Russian courts may elect to enforce foreign court judgments

as a matter of international reciprocity and judicial comity, you should note that judgments obtained in the United States or in other foreign courts, including those with respect to U.S. federal securities law claims, may not be enforceable in Russia or the Netherlands. There is no mutual recognition treaty between the United States and the Russian Federation or the Netherlands, and no Russian federal law or Dutch law provides for the recognition and enforcement of foreign court judgments. Therefore, it may be difficult to enforce any U.S. or other foreign court judgment obtained against our company, any of our operating subsidiaries or any of our directors in Russia or the Netherlands.

The rights and responsibilities of our shareholders are governed by Dutch law and differ in some important respects from the rights and responsibilities of shareholders under U.S. law.

Our corporate affairs are governed by our articles of association and by the laws governing companies incorporated in the Netherlands. The responsibilities of members of our Board of Directors under Dutch law are different than under the laws of some U.S. jurisdictions. In the performance of its duties, our Board of Directors is required by Dutch law to consider the interests of Yandex, its shareholders, its employees and other stakeholders and not only those of our shareholders. Also, as a Dutch company, we are not required to solicit proxies or prepare proxy statements for general meetings of shareholders.

In addition, the rights of our shareholders are governed by Dutch law and our articles of association and differ from the rights of shareholders under U.S. law. For example, Dutch law does not grant appraisal rights to a company's shareholders who wish to challenge the consideration to be paid upon a merger or consolidation of the company.

Item 4. Information on the Company.

History and Development of the Company; Organizational Structure.

Our founders began the development of our search technology in 1989, and launched the yandex.ru website in 1997. Our principal Russian operating subsidiary, Yandex LLC, was formed in 2000, as a wholly owned subsidiary of our former Cypriot parent company. In 2007, we undertook a corporate restructuring, as a result of which Yandex N.V. became the parent company of our group. Yandex N.V. is a Dutch public company with limited liability. Its registered office is at Schiphol Boulevard 165, 1118 BG, Schiphol, The Netherlands (tel: +31-20-206-6970). Business Overview

Our Business

Yandex is one of the largest internet companies in Europe. Since 1997, Yandex has delivered world-class, geographically relevant search and locally tailored experiences on all digital platforms, based on its innovative technologies. Yandex operates Russia's most popular search engine. We also provide a number of other services, including market-leading on-demand transportation services, navigation products, classifieds and entertainment services in Russia and other regions, including other CIS countries, Central Europe, the EU, Africa and the Middle East. Yandex's goal is to help consumers and businesses better navigate the online and offline worlds.

Yandex is a technology company that builds intelligent products and services powered by machine learning. Our products and services are based on complex, unique technologies that are not easily replicated. Benefiting from Russia's long-standing educational focus on mathematics and engineering, we have drawn upon the considerable local talent pool to create a leading technology company.

We derive a substantial part of our revenues from online advertising. We enable advertisers to deliver targeted, cost-effective ads that are relevant to our users' needs, interests and locations. We serve ads on our own search results and other Yandex webpages, as well as on thousands of third-party websites that make up our Yandex Advertising Network. Through our ad network, we extend the audience reach of our advertisers and generate revenue for both our network partners and us. We offer a variety of ad formats to our advertisers, including performance-based, brand and video

advertising formats across different platforms. A few years ago, we embarked on a strategy to diversify our revenue streams and broaden the appeal of our ecosystem. Other revenue streams are growing rapidly and come from our Taxi segment, which includes ride-hailing and food delivery services, classifieds and other initiatives, including music subscription and event tickets sales within our Media Services, as well as Other Bets and Experiments, particularly by our car-sharing business and personalized content feed.

Our businesses are organized in the following operating segments:

- Search and Portal, which includes all our services offered in Russia, Belarus and Kazakhstan (and, for periods prior to the imposition of sanctions on Yandex by the government of Ukraine in May 2017, all our services offered in Ukraine), other than those described below;
- Taxi (including our Ride-hailing business (which consists of Yandex.Taxi and Uber in Russia and other countries), FoodTech business (including Yandex.Eats, Yandex.Chef and Yandex.Lavka, a hyper local convenience store delivery service) and our Self-Driving Cars (“SDC”) division);
- Classifieds (including Auto.ru, Yandex.Realty and Yandex.Jobs);
- Media Services (including KinoPoisk, Yandex Music, Yandex.Afisha, Yandex.TV program, our production center Yandex.Studio and our subscription service Yandex.Plus);
- Other Bets and Experiments (including Zen, Yandex.Cloud, Yandex.Drive, Geolocation Services and Yandex.Education);
- E-commerce (the Company’s Yandex.Market service for the period prior to April 27, 2018, the date of the completion of the Yandex.Market joint venture between Yandex and Sberbank of Russia. Following the completion of the joint venture, we have deconsolidated Yandex.Market and now treat it as an equity investee under the equity method accounting).

Our Other Bets and Experiments aim to develop currently successful business models and to create new ones. Once an experiment becomes sizable enough, represents a new business model, and has good prospects for future development, we may decide to designate it a business unit or incorporate into one of our existing segments and report it accordingly.

Search and Portal

We offer a broad range of world-class, locally relevant search and information services that are free to our users and that enable them to find relevant information quickly and easily.

Yandex Search

Our search engine offers almost instantaneous access to the vast range of information available online. We utilize linguistics, mathematics, machine learning and AI to develop proprietary algorithms that efficiently extract, compile, systematize and present relevant information to our users. Our organic search results are ranked by computer algorithms based exclusively on relevance, and we clearly segregate organic results from paid results to avoid confusing our users.

We also offer a number of our core products and services, such as search, mail, weather and browser, to users in Belarus, Kazakhstan, Turkey and Uzbekistan, providing targeted platforms for local advertisers in those markets.

Yandex Search generated 57.0% of all search traffic in Russia in 2019 and 58.3% in February 2020, according to Yandex.Radar, a search traffic and browser usage analytics tool based on Yandex.Metrica data. In 2019, our search share on desktop and mobile reached 68.3% and 50.1%, respectively. In February 2020, our search share averaged 68.8% on desktop and 52.9% on mobile, respectively, with mobile search share of 55.8% on Android and 41.5% on iOS. The percentage of our total search traffic generated from mobile devices averaged approximately 58% in Q4 2019 compared with 49% in Q4 2018, while the percentage of our search revenues generated from mobile devices increased to approximately 49% in Q4 2019 from approximately 41% in Q4 2018.

In December 2019, Yandex presented Vega – a major update of its search engine that includes over 1,500 improvements, such as search results quality enhancement, instant results, expert responses and hyperlocality.

Personal Services

Yandex.Mail provides users with fast and easy access to their email.

Yandex.Disk is our cloud-based storage service that allows users to upload, store and share content online.

Yandex.News

Yandex.News is the most visited online news aggregation service in Russia, providing a comprehensive media overview for our users. We aggregate and present local, national and international news. The selection of news is fully automated and editorial-free.

Yandex.Weather

Our **Yandex.Weather** service offers hyperlocal, real-time weather information based on our proprietary weather forecasting technology, Meteum. Powered by machine learning, it gives accurate forecasts at the level of individual neighborhoods across the world. In 2018, based on our AI, neural networks and satellite technologies, we empowered our up-to-the-minute weather forecast service by using satellite imagery as a new data source for precipitation maps to provide users with highly advanced and accurate weather updates.

Yandex.Travel

Yandex.Travel is our travel aggregator service, which allows users to search for flight tickets and hotels, as well as to compare prices. The service also offers users an opportunity to purchase train and intercity bus tickets. Yandex.Travel is integrated into the services of Yandex’s ecosystem and, in addition to Yandex.Travel websites, provides services directly from Yandex search results and Yandex.Maps.

Alice

In October 2017, we launched **Alice**, the first conversational intelligent assistant for the Russian market. Alice assists users with a broad range of inquiries, such as factoid questions, weather forecasts, directions and currency exchange rates, as well as helps users to manage daily tasks, such as setting up an alarm, reminding of important things or hailing a taxi. Alice is not limited to predefined scenarios and includes a general “chit-chat” mode – a unique feature among intelligent assistants that has been enthusiastically embraced by millions of users. It also benefits from the near-human level of speech recognition accuracy (based on the Word Error Rate measurement) provided by the Yandex SpeechKit platform. In May 2018, we launched a developers’ skills platform, **Yandex.Dialogues**, designed to make it easy for any third-party developer to create new skills for Alice. Today, there are more than 4 million monthly users of external voice applications with Alice.

In May 2019, we announced our own smart home ecosystem powered by Alice, and by the end the year, the number of supported smart home device models is about 1,500, including air-conditioners, robot vacuum cleaners, light switches, power sockets, remote controllers and more. While initially only accessible through our search app, Alice is also accessible through Yandex.Browser, Yandex.Navigator, Yandex Launcher, Yandex.Station, Yandex.Station mini and Yandex.Auto, as well as on third-party platforms and smart speakers.

Turbo pages

Launched in mid-2017, Turbo pages is a new format of displaying content on mobile devices, which loads several times faster than regular web pages and is optimized for smaller screens. Our Turbo pages are easier to implement compared to other similar products and offer monetization from Yandex out of the box. Turbo pages are available on Search, Zen and News, in mobile and desktop. In 2019, our Turbo-pages were being used by tens of thousands internet websites.

Yandex Search App

Enhanced with Alice, the first conversational voice assistant on the Russian market, Yandex Search App integrates Yandex's must-have services into one app, including Search, Maps, News, Zen, Weather and many others. At the beginning of 2020, our Search App was installed on 55% of Android smartphones in Russia and generated 53% of Yandex' search traffic on the Android platform. The Yandex Search App audience reached 55 million users on Android on a monthly basis in January 2020.

Yandex Browser

Our Yandex Browser is the second most popular browser on desktops and the most popular non-native browser on mobile platforms in Russia. Yandex Browser is committed to delivering high-quality user experiences and to ensuring security for users online. Yandex.Browser's built-in Antishock technology blocks malicious and fraudulent advertising and its "Protect" technology offers comprehensive protection against the majority of online threats. For example, Yandex.Browser checks all downloaded files for viruses, warns users about dangerous websites, encrypts users' passwords when using public Wi-Fi networks, and ensures safe payments. In 2018, we introduced native ad blocking in the Russian version of Yandex Browser to enhance users' browsing experience by filtering intrusive advertising. Moreover, we started offering an energy-saving mode, making Yandex.Browser the most energy-efficient browser, according to the tests of ixbt.com, the Russian information and analytical website focused on IT technologies.

The combined share of our desktop and mobile visits processed through Yandex Browser in Russia reached 20.3% in February 2020, according to Yandex.Radar.

Hardware products

Yandex.Station

In May 2018, we launched **Yandex.Station**, the first smart speaker designed for the Russian market and Yandex's first hardware product, equipped with our AI voice assistant, Alice, to help users manage their daily tasks. Yandex.Station provides a complete in-home multimedia entertainment experience. As the first smart speaker with both audio and video capabilities, it plays music and also streams films, videos and television through its HDMI port to any connected display. Currently, Yandex.Station has access to Yandex's video platform Yandex.Live and streaming service KinoPoisk.

In October 2019, we launched our next smart speaker – the compact and affordable **Yandex.Station Mini**, which has all the features of Yandex.Station apart from video capabilities. In addition, it has a distinctive feature of gesture control.

Our Monetization and Advertiser Services

We offer a variety of ad formats to our advertisers, including performance-based, brand and video advertising formats.

Performance-based ads are principally targeted to a particular user query on our search engine result pages, and on the search result pages of our partners, as well as to the content of a particular website or webpage being viewed, or to user behavior or characteristics. Such ads are clearly marked as paid advertising and are separate from our organic search results and non-advertising content.

Most of our revenues are generated from performance-based advertising, on a pay-per-click basis, with a smaller, but growing portion of revenues generated from brand advertising and video advertising, based on the number of impressions delivered. We actively monitor the ads we serve, both automatically and manually, in order to help ensure the relevance of the ads as well as compliance with applicable laws.

Yandex.Direct

Yandex.Direct is our auction-based advertising placement platform, which uses auction theory and relies on our distributed infrastructure to process millions of auctions every day. Yandex.Direct lets advertisers cost-effectively deliver relevant ads targeted at particular search queries or content on Yandex websites or third-party websites in the Yandex ad

network. Advertisers may use our automated tools, often with little or no assistance from us, to create performance-based ads, bid on keywords that are likely to trigger the display of their ads, and set total spending budgets. Yandex.Direct features an automated, online sign-up process that enables advertisers to create and quickly launch their advertising campaigns. Advertisers may also work with our sales staff to design and implement more specialized or sophisticated advertising campaigns. Recently we enhanced Yandex.Direct with an opportunity to place display ads right in the system. We also offer a Yandex.Direct mobile app to better facilitate advertisers' access to our service to manage their advertising campaigns.

Performance-based ads on our desktop search engine results page (SERP) appear in one of several general categories: top of the page, appearing above the organic search results and featuring up to four paid links on desktop and up to three paid links on mobile; and bottom of the page, which appears either below the organic search results or the right-hand block located to the right of the organic search results, featuring up to nine paid links in total on desktop and up to one paid link on mobile. In late 2017 we started to test the concept of Templates – our new ad placement formats tailored to a search query of a particular user. Templates allow advertisers to dynamically enrich their ads with additional elements, such as quick links, contact information, working hours, merchants' ratings, images and others. We are constantly rolling out new templates and testing new formats. In April 2018, we introduced a change in our search engine results page layout. Instead of our typical ad placement blocks, paid links are mixed with organic search links, whereby our algorithms choose which format is more appropriate and efficient in each particular situation in order to provide a more personalized SERP. Advertisers bid for the amount of traffic they want to purchase, instead of traditional bidding for a specific ad placement block. Yandex.Direct continues using a Vickrey-Clarke-Groves (VCG) auction to serve ads on our SERP.

Yandex Advertising Network

Our Yandex Advertising Network partners include search websites, for which we provide search capabilities, as well as contextual network partners, where we serve ads on websites, digital panels and others, based on user behavior or characteristics or website content. Among our partners are some of the largest Russian websites, including Mail.ru, Rambler, Bing, Avito.ru, Gismeteo.ru and others.

We help third-party website owners monetize their content while extending the reach of our advertisers. Through the Yandex Advertising Network, our partners can deliver performance-based ads on their search results pages or websites. Our advertising algorithms use our proprietary MatrixNet technology, which optimizes the click-through rate on our network through improved click prediction. We screen applicants for the Yandex Advertising Network and favor websites with high-quality content and stable audiences to offer advertisers high-quality traffic.

Yandex's video advertising network allows users to place full-screen videos, video ads on pages of websites and ads within the video content available on over 300 advertising platforms, including desktop and mobile websites, mobile and Smart TV applications. Yandex's video ad network covers over 64.5 million users. Yandex's technologies enable users to provide advertising to the targeted audience and offer analysis of its efficiency through different tools and instruments, such as Brand Lift or video roll analysis.

In 2018, Yandex started offering auction-based digital outdoor advertising opportunities in partnership with leading outdoor advertising players in Russia, Gallery and RussOutdoor. In 2019 advertisers could run campaigns on billboards in Moscow, Saint Petersburg, Nizhny Novgorod, Kazan and other major cities. By the end of 2019, advertisers were able to use more than 500 outdoor formats for their advertising campaigns. Outdoor ads are sold on a thousand opportunity-to-see (OTS) basis. In September 2019, we launched Outdoor in Yandex.Direct, which gives many opportunities for advertisers to include Outdoor in their marketing mix using the same interface. Yandex's technologies also make it possible to estimate the audience coverage, and to divide it into segments in accordance with anonymized data on interests and social-demographic characteristics, which can be also used for Yandex.Direct retargeting.

In 2018, we also launched indoor advertising tailored to the targeted audience. The cameras on the digital advertising panels determine socio-demographic profile of the panels' audience, and when ads are shown to different types of viewers, we charge advertisers only for ads shown to the targeted audience. The system uses only anonymized data and does not make video recordings. In 2019 we enlarged the number of places where indoor advertising is available, such as pharmacies, beauty salons, business centers and mobile phone stores. The number of available indoor displays is currently more than 3,000. Indoor advertising was also launched in Yandex Direct in September 2019.

Programmatic advertising

We have developed a range of programmatic advertising products, which utilize real-time bidding, or RTB, technologies to provide effective solutions to our publisher and advertiser partners. Our RTB ad exchange connects our performance-based demand-side platform (DSP) Yandex.Direct, to our display-based DSP (called AWAPS) as well as to integrated third-party DSPs. Our RTB ad exchange leverages the wealth of targeting data generated by our own Data Management Platform, including Crypta, and search and browsing history. The RTB ad exchange is connected to many of our Yandex Advertising Network partners who have chosen to display ads from our RTB ad exchange as well as or in lieu of our regular Yandex.Direct ads. In addition, through ADFOX, we provide a supply-side platform to our publisher partners. ADFOX is able to mediate in real-time between programmatic brand ads from AWAPS, performance-based ads from Yandex.Direct, ads from integrated third-party DSPs and the publisher's own direct sales.

Mobile Advertising

We offer our advertisers the ability to display ads on mobile versions of Yandex services, including Search, Zen, and our Advertising Network partner websites, as well as in mobile applications, including our Yandex Search App. Advertisers are able to set up their mobile bid as a coefficient of their desktop bid.

Analytics tools

Our web analytics system, **Yandex.Metrica**, has the largest coverage among web analytics platforms in Russia, installed on 84% of .ru domains. It is also one of the three most popular web analytics system tools in the world. Yandex.Metrica combines near real-time reporting tools with intuitive heat maps and session replay. It features online-to-offline and cross-device tracking, easy-to-use attribution models, intuitive dashboards and fully customizable reports and segments. Yandex.Metrica filters out referral spam and bot traffic and lets site owners monitor ad blocker usage – all out-of-the-box. Yandex.Metrica provides the Logs API to export all raw data in order to accomplish complex tasks. Yandex.Metrica is available without any data caps or sampling, regardless of the traffic volume.

We also provide users with **AppMetrica**, a universal app analytics and marketing platform for install attribution that can be used for tracking various kinds of ad campaigns, as well as for product analytics, crash reports and push campaigns.

Yandex.Radar is our market analytics tool, which provides advertisers, webmasters, analysts, and other internet marketing professionals with accurate statistics on the internet technology trends in different countries. Yandex.Radar's technology reports are based on Yandex.Metrica aggregated data and provide statistics on search market shares and browser usage, as well as traffic breakdown by operating system and device type. In November 2018, we introduced Yandex.Radar's "**Top internet resources**", which represents the first ranking featuring cross-device audience data for the top 10,000 sites popular among visitors from Russia.

Taxi

We provide a multi-mode experience that seamlessly and efficiently satisfies the ride-hailing and FoodTech needs of users in our markets. Our platform enables access to both a wide range of personal mobility services through our ride-hailing offerings, and a variety of food and convenience store delivery services through our FoodTech offerings.

Ride-hailing

We launched our ride-hailing service in Russia in 2011. We have since expanded into 18 countries and 374 cities (with over 50,000 population), as of December 31, 2019. The scale of our network and our proprietary technological capabilities enable us to accurately forecast demand and incentivize drivers to be available to accept rides.

We have established one of the largest transportation networks in Russia and much of the CIS, providing over 700,000 drivers with taxi orders and enabling riders to complete 150 million rides in December 2019. The combined volume of downloads of our ride-hailing apps would make us the fourth-most downloaded ride-hailing service in the world in 2019, according to AppAnnie. In 2019, our total number of rides grew 54% year-over-year.

Russia has historically accounted for the largest portion of our ride-hailing operations, where we offer the broadest range of ride-hailing tariffs, varying by both price and functionality.

In addition to our primary ride-hailing services, our B2B platform offers complex solutions for corporate transportation services, including business trips, airport transfers and staff logistics, as well as transportation budget management. We launched our B2B platform in Russia in 2016 and have since expanded it to include Kazakhstan, Armenia and Israel.

Our app utilizes smartphone GPS to detect a rider's location and efficiently connect a rider with an available driver. Our app also provides robust features and functionality for riders throughout a trip, including the efficient determination of pickup points to reduce estimated arrival and waiting times. Our proprietary map infrastructure allows our apps to more precisely locate cars, as well as offers a more accurate match with nearby drivers. Our app provides riders with upfront pricing and may also suggest alternative pickup points with a shorter wait time or lower fare. Our app also alerts riders of price decreases when period of surge demand subsides. At locations with more complicated logistics such as airports or stadiums, pickup points are predetermined in our app and are integrated with offline points. Our app accepts a variety of payment methods, including credit cards, cash paid directly to the driver in certain markets and e-wallet payments.

We currently engage drivers for our ride-hailing services both directly and through a wide partner network. In certain regions, we also support the new simplified self-employment regime that has been introduced by the tax authorities in Russia, which allows us to engage more drivers directly.

We offer our Fleet Management Companies (FMCs) partners access to efficient fleet management software to manage their driver base and fleet, optimizing their administrative and technical workflows.

Safety is of the utmost importance, and we take a comprehensive approach to monitoring and improving the safety of all our platform users, before, during and after their rides. For riders, we offer insurance that covers passengers in the event of personal injuries sustained while on a ride. We have also implemented service access controls, such as driver scoring and detailed driver identification methods. We also tailor certain safety features to particular users, such as providing child safety seats. For drivers, we offer training and vehicle check-ups, both remotely and in person, and we have implemented technological tools to improve trip safety, such as video and telemetry monitoring to ensure drivers are alert. This hardware monitoring tool is currently in its pilot phase, and we hope to expand its use to a majority of our taxis in Russia in the near future. Our platform also includes protection and response tools, such as emergency support and a safety center section within the app for riders and drivers.

FoodTech

Our FoodTech business consists of Yandex.Eats, our ready-to-eat delivery service and Yandex.Lavka, a hyper local convenience store delivery service. We see a large potential for both segments in our target markets.

Our FoodTech business relies on a wide partner network of couriers, who make deliveries on bikes, scooters and on foot.

As of December 31, 2019, our Yandex.Eats services was available in 33 cities in Russia and Kazakhstan, with the majority of operations in Russia. Yandex.Eats is one of the leading online food ordering and delivery marketplaces in Russia collaborating with approximately 15,000 restaurant partners as of the end of December 2019. Approximately 85% of our food and other staple delivery orders in 2019 were through a first-party delivery model.

Yandex.Lavka offers on-demand delivery of groceries, ready-to-eat and other FMCG products within 15 to 20 minutes. The assortment includes 2,000 – 2,500 SKUs with a focus on fresh and ready-to-eat categories. As of the end of December 2019 Yandex.Lavka operated 50 "dark" stores (mini warehouses) in Moscow. We plan to expand our geographical footprint beyond the capital.

We use proprietary software powered by machine learning to manage inventories and assortment and ensure high level of stock availability and quality.

Our Yandex.Eats app provides a high-quality customer experience (focused on personalized and simple way of ordering food from a wide range of restaurants), discounts and special offers as well as real-time tracking of orders and couriers. Our app accepts a variety of payment methods, including credit cards and e-wallet payments.

Our FoodTech platform features separate apps for couriers and for our partner restaurants, which helps them to manage the order process. We are focused on enhancing the experience of our partner restaurants to improve efficiency of businesses processes.

Self-Driving Cars

In early 2017, we started working on our driverless technologies with the aim of creating a fully-fledged autopilot functionality, which is described in the industry as Level 5 – a fully-autonomous system. In May 2017, we unveiled our first prototype of our self-driving car, which leverages Yandex’s world-class technologies, such as AI and machine learning, mapping and real-time navigation.

In November 2018, we received a license to operate our self-driving car in the state of Nevada and demonstrated the advanced capabilities of our autonomous vehicles at CES, Las Vegas in January 2019 and again in 2020. In December 2018, we obtained the relevant permission from the Israeli Ministry of Transportation and Road Safety, and began testing our self-driving cars on public roads in Tel Aviv, Israel.

By the end of 2019, our self-driving fleet grew to over 100 cars, which have accumulated over 2 million autonomous miles on public roads in Russia, the USA and Israel. Yandex is also operating Europe’s first autonomous ride-hailing service with no one behind the steering wheel in Innopolis, Russia. In 2019, Yandex signed an MOU with Hyundai Mobis to jointly develop autonomous vehicles. We are also developing our own proprietary LIDAR sensors to be used in our self-driving cars. We have already started testing the first prototypes of our solid state and 360-degree LIDARs on the streets of Moscow.

In November 2019, we introduced our autonomous delivery robot, Yandex.Rover, which operates on our self-driving platform adapted for new tasks and driving dynamics. As a part of the initial testing phase, our Rovers are already delivering small packages on the Yandex campus in Moscow.

Classifieds

Yandex’s Classifieds business unit includes Auto.ru, Yandex.Realty and Yandex.Jobs.

Auto.ru is our classifieds platform for used and new cars, commercial vehicles and spare parts. We strive to make the used cars market as transparent as possible by trying to close the gap between the real conditions and customer perception of the cars advertised on our platform. Auto.ru puts significant effort into providing users with the special tools such as vehicle history reports, which include information from official databases as well as our internal and third-party data. In 2019, we launched a new feature that allows our users to apply for a car loan directly on the Auto.ru website. We partner with reliable financial organizations and do not provide loans ourselves.

Auto.ru continues to hold a leading position in its established markets with particularly strong presence in Moscow, St. Petersburg and Ekaterinburg. We also continue growing our market share in the regions. Successful integration of Hearst Shkulev Media, the largest media company in the Urals with 30 auto classifieds domains in the regions, and our deal with 24auto.ru, the leading auto classified in Krasnoyarsk region, have also strengthened our regional businesses.

We monetize Auto.ru through advertising, vehicle history reports, loan commissions, value added services (VAS) and listing fees for dealers, spare part sellers and certain individuals.

Yandex.Realty is our real estate classifieds platform for private individuals and realtors. The service provides listings for both the sale and rental of apartments, houses and commercial property. We also offer the opportunity to place listings for apartments in newly-built or under-construction apartment complexes across Russia. Yandex.Realty helps users not only to find the right listing but also discover all relevant information about the building and its surroundings. Yandex.Realty monetizes listings for new apartments, charging realtors for verified calls from clients.

Yandex.Jobs is our service for job seekers, which is mainly focused on blue collar and service industry jobs. The service is available as a mobile app for Android and iOS and allows users to get in touch with a potential employer directly from the app. Yandex.Jobs aggregates vacancies from a number of partners.

Media Services include our entertainment services (Yandex Music, KinoPoisk, Yandex.Afisha and Yandex.TV Program, which, combined, have a monthly audience of more than 50 million people), a subscription service

(Yandex.Plus), and a production center (Yandex.Studio). Based on Yandex's recommendation technologies and professional content, Media Services offer its users various entertainment options. We monetize Media Services through online advertising and transaction revenues, including music and video content subscriptions as well as event tickets sales. Our Media Services are available across different platforms, including Yandex.Station and Yandex.Auto.

The service provides subscribers with a high value bundle of multiple Yandex services, including unlimited music streaming on Yandex Music, ad-free movies and TV-shows on KinoPoisk HD, discounts for taxi and car-sharing rides, bonuses for Beru customers as well as other benefits from the Yandex ecosystem. We record Yandex.Plus' revenues in the Media Services segment.
- **Yandex.Studio** is our own production center, which we launched in 2018 to create video and music content, co-invest in different projects with other production studios and provide marketing support to movies releases. We have already participated in the co-production of several Russian movies. We believe the service is strategically important in a world where video consumption is rapidly shifting online and importance of original content as a key differentiating factor is increasing, and plan to expand our participation in such projects.

Other Bets and Experiments

In addition to our core business and our separate business units, we offer a number of services and products, including experimental ones that represent new business models and have good prospects for future development.

Zen

Yandex.Zen is a personal content recommendation service. Zen selects news, videos, images, blog entries, and other internet content that may be relevant to a user. The service uses Yandex's global search index and AI technology.

Zen has successfully developed its publisher content platform. In 2018, the service launched the partner program with publishers, aimed at increasing the share of high-quality content created on the Zen platform. In September 2019, Zen offered an opportunity to create short videos, in addition to articles and narratives (a set of screens combining text, video, images and GIFs that can be swiped through) to all publishers. In December 2019, Zen's publisher content platform generated over 66% of all clicks to Zen.

Yandex.Zen is available on Yandex Home Page, Yandex Search App, Yandex Browser, and as a standalone app on Android and iOS. In December 2018, Zen also became available to users of the Opera desktop browser in Russia. Zen is also preinstalled on some third-party devices sold in Russia by vendors such as Huawei, Xiaomi and Samsung. In 2019, Yandex.Zen recommendation service launched inside Coc Coc browsers in Vietnam and Opera in Turkey, as well as inside Viber, the second most popular messaging app among traditional messengers in Russia, in a pilot mode. Following the successful test, we rolled out Zen feed to all users of Viber in Russia and Belarus in March 2020.

Yandex.Cloud

In September 2018, we introduced our public cloud platform, Yandex.Cloud, allowing companies to host and develop their apps and services, and store and manage their data by leveraging Yandex's advanced technologies and infrastructure. At launch, Yandex.Cloud offered a scalable virtual infrastructure with multiple management options, automated services for the labor-intensive management tasks of popular databases systems and AI-based Yandex services (speech recognition and synthesis as well as machine translation).

As of December 2019, approximately 25,000 businesses and individuals were using our platform. We have enhanced our platform with new services such as Cloud Interconnect to extend customers' on-premise network to the Yandex.Cloud network via a private connection, DataLens to visualize data, and a range of services for developing cloud-native applications. We continue developing our cloud platform to provide users with a full-fledged cloud offerings. All Yandex.Cloud services are available on servers located in Russia.

Yandex.Drive

In February 2018, we launched our free-floating car-sharing service, **Yandex.Drive**, providing users with vehicles, which can be reserved by the minute, the hour or the day through a mobile app and which can be dropped off in any permitted parking place across the cities we serve, as well as at airports and shopping malls. Offering on-demand access to cars in Moscow, Saint Petersburg and Kazan, Yandex.Drive operates the leading car-sharing platform in Russia and one of the largest in the world. As of February 2020, Yandex.Drive users have completed approximately 58 million rides since the launch.

In 2019, we also introduced the cargo and minivan segments of our car-sharing service and added a fleet of 30 electric vehicles in Moscow.

We equip Yandex.Drive's car fleet with Yandex.Auto, our in-car infotainment system. Yandex.Auto provides a number of Yandex's services, including Yandex.Navigator and Yandex Music. Powered by our voice-controlled assistant Alice, Yandex.Auto allows the user to personalize the service. It recognizes each user, greeting them by name, loads their usual routes, plays their favorite music and warns about traffic or weather conditions.

Yandex.Drive pricing is inclusive of fuel, parking, insurance and other costs associated with car ownership. Yandex provides dynamic pricing, which integrates traffic conditions, customer demand and other factors at the time of reservation. In addition, Yandex.Drive became the first car-sharing service worldwide to launch fixed-price tariff based on the final destination point, which allows us to improve the utilization rates of our fleet.

Geolocation Services

Our **Geolocation Services** integrate Yandex's advanced technologies (including mapping, cartography, navigation, etc.) to provide broad range of services across Russia, other CIS countries and Turkey. We focus on the development of logistics and routing solutions for individual users and businesses, as well as advertising products for offline-businesses. Our Geolocation Services include Yandex.Maps, Yandex.Navigator, our infotainment system for connected cars, Yandex.Auto, as well as Yandex.Routing, our technology platform for businesses, which provide services and products in the transportation and logistics industries. We monetize Geolocation Services through online advertising, licensing and transaction services.

Yandex.Maps provide high-quality, detailed maps of Russia, its neighboring countries, Turkey and other countries where we operate our ride-hailing service. We offer our users panoramic views, navigation across cities enriched with augmented reality, public transportation routes, driving directions with voice controls and turn-by-turn navigation. We continue to develop Yandex.Maps to integrate new features, such as hotel bookings, food ordering, ratings and reviews of restaurants as well as their menus. In 2019, we introduced a new Transportation section, which enables users to see public transport routes as well as buses, trolleybuses and trams that move in real time.

We use our technology and licenses to create and edit maps from raw data, including satellite images, GPS coordinates and live user feedback. Yandex.Maps is also available via application programming interfaces, or APIs, which allow developers to embed and use our interactive maps in third-party websites and applications, as well as to add extra layers of information — for example, to offer a map showing the location of a restaurant or a hotel.

We also offer **Yandex.Navigator**, our mobile application, empowered by our AI assistant Alice, that provides turn-by-turn navigation, incorporates a voice input function, speed limit warnings, parking information, natural guidance features as reference points along a route and voice notifications for accidents or road works. It is one of Yandex's most popular mobile apps in terms of usage.

Our map-based apps allow offline businesses to place ads in native formats (adopted for different scenarios on the map) and target potential clients among those using Yandex.Maps and/or Navigator.

Yandex.Auto is our voice-activated in-car infotainment system, which offers Yandex's best-in-class mapping and navigation, music streaming, weather information and other services. We work with car manufacturers to equip cars with Yandex.Auto. Yandex.Auto is already available in some models of Toyota, Nissan, Honda, Renault, Geely, Chery and others on the Russian market. In this segment, we primarily generate revenues from the sale of Yandex.Auto software licenses.

In May 2019, Yandex entered into an agreement with Renault-Nissan-AvtoVAZ, which represents about a third of the Russian new car market. Under this agreement, Yandex.Auto will be fitted into more than 2 million Renault, Nissan and Lada cars in the next five years. In late 2019, we also signed an agreement with Geely for the integration of Yandex.Auto platform into new cars. About 80% of Geely cars sold in Russia and Belarus will be equipped with our platform.

Yandex.Fuel is a contactless payment service at gas stations built into Yandex.Navigator, Taximeter, an application for Yandex.Taxi drivers, Yandex.Drive car-sharing and Yandex.Auto multimedia systems, and is also available to corporate clients. The service was launched in December 2018.

Now more than 4,000 fueling stations are connected to the service throughout Russia, including EKA, PTK, Neftmagistral, Tatneft and Shell. In 2019, the users of Yandex.Fuel have purchased more than 145 million liters of fuel with a gross merchandise value of 5.5 billion rubles.

Yandex.Routing is our B2B routing platform, aimed at providing businesses in the transportation and logistics segments with routing-based solutions. Offering optimal and transparent routes for delivery and logistics, our service helps companies to minimize the time and fuel spent.

E-commerce

Launched in 2000, **Yandex.Market** is one of the most popular internet services in Russia, providing product information, price comparisons and user generated reviews of products and online retailers. We aggregate price, product and availability information from thousands of active online and “brick and mortar” retailers, and currently feature over 200 million offerings in approximately 3,000 product categories from over 30,000 domestic and international merchants. Similar to Yandex.Direct, Yandex.Market is mainly priced on a cost-per-click (CPC) basis and recognizes revenue only when a user clicks on product offerings placed by merchants on Yandex.Market.

In April 2018, Yandex and Sberbank of Russia completed the formation of a joint venture based on Yandex.Market to further develop domestic and cross-border e-commerce marketplaces, in addition to comparison shopping. Sberbank invested 30 billion rubles (approximately \$500 million at the time) into the new joint venture. At closing, the joint venture was valued at 60 billion rubles (approximately \$1 billion at the time). The two partners own equal stakes in the joint venture. Ten percent of the JV’s shares are reserved for current and future equity awards for management and employees of Yandex.Market.

Starting April 27, 2018, we deconsolidated Yandex.Market from Yandex’s consolidated financial results and we record our share of Yandex.Market’s financial results under the equity method of accounting within the other income/(loss), net line in the consolidated statements of income.

In May 2018, Yandex.Market launched in beta the marketplace Beru, a domestic e-commerce platform with 1P and 3P sales, allowing users to make purchases across multiple categories. Beru came out of beta in October 2018, featuring 100,000 SKUs, which expanded to over 600,000 SKUs by the end of 2019. The daily audience of the marketplace exceeded 1 million users as of the end of the year. In order to enhance the user shopping experience and provide full-fledged services, we introduced the first Beru-operated fulfillment center in Rostov-on-Don. In 2019, we launched another two fulfillment centers in Sofino and Tomilino, in the Moscow region. In addition, Beru leases capacity from a third-party fulfillment center.

Our Technology

Yandex is a technology company that is a pioneer in machine learning, artificial intelligence and neural networks. We believe this expertise uniquely positions us in the global technology arena and allows us to innovate in our local markets and continuously improve our products and services based on complex, unique technologies that are not easily replicated.

Advertisers

Our advertisers include individuals and small, medium and large businesses throughout the countries in which we operate, as well as large multinationals. Small and medium size enterprises purchase the bulk of our performance based advertising. No single advertiser accounted for more than 1.1% of our total revenues in 2017, 2018 or 2019.

Sales and Advertiser Support

We have an extensive sales and support infrastructure, with sales offices in a number of cities in Russia, as well as Minsk, Belarus; Lucerne, Switzerland; Newburyport, Massachusetts, USA; Istanbul, Turkey; Shanghai, China; and Almaty, Kazakhstan. In Russia we have 17 sales offices, which allows the company to better understand the needs of businesses in the regions and help them grow using new technologies and advertising opportunities.

The substantial majority of our advertisers use our automated Yandex.Direct service to establish accounts, create ads and manage their advertising campaigns. Our largest advertising clients are served by a dedicated sales team. These companies may request strategic support services, which include a dedicated accounts team, to help them set up and manage their campaigns. Our sales team specialists are able to help advertisers with tasks such as selecting relevant keywords, creating effective ads and audience targeting, thus measuring and improving advertisers’ return on investment.

The Yandex Advertising Network follows a similar model. Most of the websites in the network submit their applications through Yandex.Direct’s automated partner interface. Our direct sales force focuses on building relationships

with our largest partners to help them get the most out of their relationship with us. We also have relationships with different advertising sales agencies placing online advertising.

Marketing

We engage in significant marketing efforts directed first and foremost at internet users, as well as advertising agencies, advertisers and webmasters. Our marketing efforts are focused above all on delivering an optimal user experience with every Yandex product and service. We believe that satisfied users are the best and most credible advocates for our services. In order to improve user satisfaction and loyalty and to continue to use our products and services as marketing tools, we constantly experiment with and improve the design, technology and interface of these products and services. Although we believe that word of mouth is the best advertising strategy, we also view advertising campaigns in online and traditional media as an important element of our efforts to promote our brand, as well as key services. We also invest heavily into our separate business units, including Taxi, Classifieds, Media Services and Other Bets and Experiments to grow customer awareness, increase user base, increase usage in our existing markets and penetrate into other geographies.

Competition

We operate in a market characterized by rapid commercial and technological change, and we face significant competition in many aspects of our business, including search, ride-hailing, food delivery, classifieds, media services, e-commerce and cloud. We currently operate principally in Russia, Belarus, Kazakhstan, Uzbekistan and Turkey.

Across our different business lines we face competition from both global and local players.

We consider Google to be our primary competitor. In addition to its search solutions, including voice search, Google offers online advertising, information and other search services similar to ours, including services similar to Yandex.Direct. We expect that Google will continue to use its brand recognition, financial and engineering resources and to develop its technologies to compete with us.

The following table presents a comparison of Russian search market share, according to Yandex.Radar (a search traffic and browser usage analytics tool based on Yandex.Metrica data), based on search traffic generated:

	2017	2018	2019
Yandex	55.1%	56.3%	57.0%
Google	39.6%	40.0%	40.1%
Mail.ru	3.4%	2.2%	1.6%
Rambler	0.4%	0.2%	0.2%
Other	1.5%	1.3%	1.2%

We also face competition from the Russian and international websites of Microsoft and other established companies and start-ups that are developing search and online advertising technologies.

Mail.ru Group is one of our largest local competitors. Mail.ru offers many communication services, including Russia's most popular webmail, social networking and messenger services. Our Yandex.Direct platform competes for advertising budgets with myTarget, an advertising tool operated by Mail.ru across its social networks and e-commerce projects.

We believe that social networking sites, such as Facebook, Twitter, and Mail.ru Group's Vkontakte, Odnoklassniki and My World services, are becoming significant competitors for online ad budgets. These sites derive a growing portion of their revenues from online advertising, and are experimenting with innovative ways of monetizing user traffic. In light of their very large audiences and the significant amount of proprietary information they can access to analyze their users' needs, interests and habits, we believe that they may be able to offer highly targeted advertising which could create increased competition for us. The popularity of such sites may also reflect a growing shift in the way in which people find information, get answers and buy products, which may result in increased competition for users.

In certain vertical areas, in particular those in which our business units operate, we and our joint ventures compete with niche services, including e-commerce, video search, online news aggregators and dictionaries, real estate and

automobile services, and specialized search apps for mobile devices. Our Yandex.Taxi service competes with Yezet, Citymobil (operated through a JV between Mail.ru and Sberbank) and Gett as well as a number of regional offline players across Russia. In addition, although Yandex.Taxi and Uber operate as a joint venture in Russia and neighboring countries, our Taxi business may also compete with Uber in jurisdictions outside the scope of our joint venture territory. Yandex.Market's e-commerce services face competition from a number of local players acting as both merchants and marketplaces, including Wildberries, Ozon, AliExpress Russia (operated through a JV between Mail.ru, MegaFon, RDIF, and Alibaba), Avito and others. Our Classifieds services compete with Avito in most areas as well as with a number of niche players such as CIAN in real estate and Drom in automobile sales. On the Media Services front, our KinoPoisk service competes with Ivi, Okko (operated by Rambler Group) and other online cinemas, while Yandex Music competes with VK Music and Boom (both operated by the Mail.ru), and Apple Music. Our food delivery business Yandex.Eats competes with Delivery Club (a part of the JV between Sberbank and Mail.ru). Our Yandex.Drive car-sharing service competes with Delimobil, BelkaCar as well as a number of other players operating primarily in Moscow and St. Petersburg. Our public cloud platform competes mainly with international cloud services, such as Microsoft Azure, Google Cloud and Amazon Web Services (AWS), as well as with certain local players (Rostelecom, Sberbank, Mail.ru).

We also face competition from other search and service providers in establishing relationships with device manufacturers, such as mobile and tablet computer makers, and access providers, such as internet service providers. Such companies have a significant degree of control over the distribution of products and services, including by offering or establishing exclusive arrangements for "default" search features or other services and bundling them with their offerings. Our users typically have direct relationships with these companies, and may be influenced by economic or other factors in deciding which search or other services to use.

Science and Education

Yandex has been developing and implementing educational programs since 2007. Today the company has more than 30 educational projects and services that are used by people of all ages – from first graders to graduate students, from young professionals to those who decided to change their career paths. Our team of specialists represents many scientific disciplines, including mathematics, data analysis, programming and linguistics. Besides, working on products and technologies at Yandex, some of our experts teach, lecture and train students and young specialists.

The Yandex School of Data Analysis, offering free courses for undergraduates and graduate students, has been running since 2007. The school trains specialists in data processing, big data infrastructure, data analysis, and fact extraction in five Russian cities as well as in Minsk, Belarus. The school's graduates create a global alumni network advancing machine learning and distributed systems development in academia and the private IT sector. In October 2018, we launched Y-Data, a branch of Yandex School of Data Analysis in partnership with Tel Aviv University, Israel. It offers an advanced one-year master's degree program in machine learning. Yandex also has schools for project managers, user interface developers, designers and other specialists in IT.

In 2016 with the support of regional governments and ministries overseeing education and IT, we launched a project to teach programming to school children called Yandex.Lyceum which is now offered in 131 cities in Russia and Kazakhstan.

Yandex and Higher School of Economics (HSE) run the Faculty of Computer Science, for which we created an educational program. We also partner with other leading research centers and universities, including the Moscow Institute of Physics and Technology, Saint Petersburg State University and the Belarusian State University. We sponsor a number of contests and workshops/seminars in computer programming, mathematics and linguistics with participants from all over the world, and run a programming competition on the annual basis, Yandex Championship, in different fields of computer science such as backend, frontend, machine learning, mobile app development, data analytics and competitive programming.

In addition to educational services, Yandex and Coursera, the online education platform, launched several Specializations and Courses written by Yandex's employees for people who are eager to expand their knowledge in a certain field of IT.

In 2019, we launched Practicum, an online learning platform in the IT sphere available for users globally. The programs currently available on the service include frontend development, web development, backend development, data

analysis and data science. Over 300,000 people have already explored our educational opportunities with thousands of them choosing to meet their professional goals with help of our platform.

To reward achievements in academics and research as well as to support undergraduate and postgraduate students in computer science and information technology at HSE, in 2014 we established the Ilya Segalovich Scholarship, in memory of one of our co-founders. The scholarship committee includes faculty staff members and lead developers from Yandex. Since 2014, this scholarship has been awarded to over 80 students.

Among of our other important educational projects we note the following:

- Yandex.Textbook, an online service for schoolteachers for Russian language and mathematics with possibility for individual educational trajectories for each student.
- Yandex.Atlas, which provides students and their parents with information about the pass rates of Russian universities in previous years and helps them to choose an appropriate university in accordance with their requirements and opportunities.
- Yandex.Tutor, an online study tool for the Russian Unified State Exam (USE).

Employees and Workplace Culture

We place a high value on technological innovation and compete aggressively for talent. We strive to hire the best computer scientists and engineers, as well as talented sales, marketing, financial and administrative staff. We seek to create a dynamic, fulfilling work environment with the best features of a “start-up” atmosphere, encouraging equal participation, creativity, the exchange of ideas and teamwork.

Our total headcount increased from 8,767 at December 31, 2018 to 10,092 at December 31, 2019. As of December 31, 2019, we had 5,784 employees related to the product development cost category, 3,808 employees related to sales, general and administration, and 500 employees related to cost of revenues.

Intellectual Property

We rely principally on a combination of trademark, copyright, related rights, patent and trade secret laws in Russia and other jurisdictions as well as confidentiality procedures and contractual provisions to protect our proprietary technology and our brand. We enter into confidentiality and patent assignment agreements with our employees and consultants and confidentiality agreements with other third parties, and we rigorously control access to our proprietary technology.

Our patent department is responsible for developing and implementing our group-wide IP protection strategy in selected jurisdictions. We have filed more than 750 patent applications to date, of which more than 400 have resulted in issued patents in Russia, the USA, China and Taiwan. We also have internal procedures for invention disclosures, patent filings, patent acquisitions, freedom-to-operate analyses and patentability searches.

We have three registered well-known trademarks in Russia for certain services (classes 35, 38 and 42 under the International Classification of Goods and Services) on the basis of intensive use. Under Russian law, the protection granted to well-known trademarks is extended to non-homogeneous goods and services if customers associate specific use of the designation by third parties with the rights holder and the rights holder’s legitimate interests are infringed. Yandex is also a registered trademark in Ukraine, the United States, the European Union and other countries under the Madrid Agreement and Protocol. We have other registered trademarks in Russia and abroad. We continue to file applications to register new trademarks and widen the country coverage of our existing trademarks. Most of the software used by our services or distributed by Yandex to our users is either developed by our employees or by independent contractors who transfer all rights to Yandex.

We enter into written license and use arrangements with providers of a significant portion of the content we offer. Our agreements with most of the news content providers in Russia are on “content-for-traffic” terms, pursuant to which we obtain access to news content for free in consideration of the user traffic that accesses the content providers’

websites through our search engine. We license or purchase other additional content. We do not knowingly include content on our websites that we do not have the legal right to include.

We do not own the content generated or posted by users on our websites. As with all websites that host user-generated content, we are potentially liable for any intellectual property infringement committed by the creator of that content. If we receive a complaint from a party that user-generated content on our websites infringes that party's copyright or related rights, we examine the content in question. If the complaint is substantiated, we remove the content and notify the party that has posted the content (if their contact details are available). If the user evidences that the content does not violate third parties' intellectual property rights, it is possible to recover the deleted content. In the event of any court decision in the matter, we comply with the decision.

Facilities

Our principal operating subsidiary currently leases a total of approximately 64,000 square meters in a single location in central Moscow that serves as our group's headquarters. We also lease additional office space of about 49,000 square meters in business centers in central Moscow, of which approximately 19,000 square meters relates to the contract for office space in Moscow City business center that we signed in December 2019. We or our operating subsidiaries also lease or own office space in a number of other cities in Russia. We also lease offices in Newburyport, Massachusetts, USA; Istanbul, Turkey; Lucerne, Switzerland; Minsk, Belarus; Berlin, Germany; Schiphol, The Netherlands; Shanghai, China; Almaty, Kazakhstan; Tel Aviv, Israel, and other locations. We operate data centers in Moscow and other regions of Russia, as well as in Finland. We have points of presence in a number of cities in Russia and elsewhere. Taking into account the projected demand for our services, we continuously evaluate the capacity and locations of our data centers to determine the most cost-effective manner of delivering reliable services to our users.

In December 2018, we acquired a property site at 15 Kosygina Street, Moscow, Russia for our new Moscow headquarters. The acquisition cost of the property site amounted to 9.7 billion rubles (around \$145 million, based on the exchange rate as of the transaction date) exclusive of 18% VAT. We are continuing to progress in our efforts to develop this site, including obtaining required regulatory approvals.

Governance Structure

Overview

In December 2019, our shareholders approved targeted changes to Yandex's corporate governance structure, which we refer to as the restructuring. Our Board proposed this restructuring in response to the evolving legal and regulatory environment in Russia, and designed these changes to balance the concerns of public authorities in our core market with the interests of our shareholders, employees and users.

Pursuant to this restructuring, a newly formed Public Interest Foundation now has certain limited and targeted governance rights in our group. The Public Interest Foundation was incorporated in the Oktyabrskiy special administrative region in Kaliningrad, in the Russian Federation, under a newly adopted legislative framework. The Public Interest Foundation has no shareholders, owners or beneficiaries, and is governed by the Foundation's Board of Directors. The statutory purpose of the Public Interest Foundation, as set out in its charter, is to preserve the continuity and promote the success of Yandex. The Public Interest Foundation is not permitted by its charter to engage in any commercial activities; its operating costs will be covered by Yandex.

Priority Share

The Public Interest Foundation holds our Priority Share, which gives the Public Interest Foundation the following rights:

- to approve the accumulation by a party, group of related parties or parties acting in concert, of the legal or beneficial ownership of shares representing 10% or more, in number or by voting power, of the outstanding Class A and Class B Shares (taken together), if our Board has otherwise approved such accumulation of shares;

- to approve a decision of our Board to sell, transfer or otherwise dispose of, directly and indirectly, all or substantially all of our assets to one or more third parties in any transaction or series of related transactions, including the sale of Yandex LLC; and
- to make binding nominations of two members of our 12-person Board, whom we refer to as the designated directors. Under Dutch law, a binding nomination will be adopted at a General Meeting of our shareholders, unless rejected by a two-thirds (2/3) majority of those voting.

Board Committees

As part of the restructuring, our Board has also reorganized its Nominating Committee and has formed a new Public Interest Committee. One designated director will sit on the Nominating Committee, and both designated directors will sit on the Public Interest Committee.

Nominating Committee

The Nominating Committee will consist of five directors and will form two subcommittees:

- Subcommittee I will consist of one designated director, one director with a Russian passport and residency, and one other director. Subcommittee I will recommend to our Board for nomination four directors (the "Class I Directors"), who will then be subject to the approval of our Board as a whole. The designated director will have the right to veto any candidates for such slots, provided that the exercise of such veto has first been approved by the Public Interest Foundation. The initial Class I Directors are Herman Gref, Mikhail Parakhin, Charles Ryan and Ilya Strebulaev.
- Subcommittee II will consist of three directors who are not Class I Directors and will, by simple majority, recommend to the Board for nomination six directors (the "Class II Directors"); the designated directors will have no right of veto over candidates for these seats. Our Board must adopt the recommendations of candidates recommended by Subcommittee II, unless our Board votes by a supermajority of ten directors (subject to adjustment for Board vacancies) to reject such recommendation.

Public Interest Committee

The Public Interest Committee will have a right of approval over certain specified matters, and will consist of three members: the Yandex CEO (currently Mr. Volozh) and both of the designated directors. Decisions of the Public Interest Committee must be unanimous. The Public Interest Committee will not review ordinary business or commercial matters; its right of approval will be limited to a defined list of the following specific matters deemed to be of public interest:

- transactions or other transfers resulting in the granting of direct access to Russian users' personal data owned by us and non-depersonalized big data owned by us to non-Russian persons;
- the adoption, modification, amendment, and cancellation of the Yandex internal policies on protection of personal data and non-depersonalized big data of Russian users (including storage procedures, and sale/provision of such information to foreign persons);
- entry by Yandex into any agreement which concerns Russia with a non-Russian state or an international intergovernmental organization (or its bodies and agencies); and
- direct or indirect transfers or encumbrances of material intellectual property rights, including licensing such rights, if as a result of such license Yandex would lose the ability to use such rights in Russia.

Our Board cannot act in respect of any of these specified matters prior to receiving a recommendation from the Public Interest Committee. If the Public Interest Committee does not approve the matter referred to it, the Board will follow the decision of the Public Interest Committee, unless the Board rejects such decision by either (i) a supermajority of eight votes (subject to adjustment for Board vacancies), which must include the affirmative votes of the two designated directors; or (ii) a supermajority of eight votes (subject to adjustment for Board vacancies) (not including the affirmative votes of the two designated directors), provided that the Public Interest Foundation Board has given its

approval. The Public Interest Committee will act only as a check on our Board's actions; it cannot proactively make any decisions on behalf of the Board or require the Board to take any action.

Special Voting Interest in Yandex LLC

As an additional protection for the overall structure, the Public Interest Foundation holds a Special Voting Interest in Yandex LLC, which provides limited and defined powers that will be exercisable only in the case of what we describe as a Special Corporate Situation or a Special Situation related to a matter of national security.

Special Corporate Situations

A Special Corporate Situation is deemed to arise only in the following specific circumstances:

- the Public Interest Committee is not formed;
- the Public Interest Committee is dismissed by our Board;
- a designated director is not included in the Nominating Committee;
- a binding nomination for a designated director is rejected by the General Meeting;
- a designated director is removed by the General Meeting without approval of the holder of the Priority Share;
- the General Meeting appoints a candidate as a Class I Director that has not been recommended by the Nominating Committee through Subcommittee I; or
- a decision of the Public Interest Committee is breached by Yandex LLC.

If the Foundation Board decides (acting by a specified majority) that any of the above triggers for a Special Corporate Situation has occurred, it must send a notice to Yandex, providing details of such matter. Following receipt of such notice, we may cure such matter within a defined period. If we do not cure such matter, the Public Interest Foundation will have the ability (acting by specified majority) to replace the General Director of Yandex LLC without the vote of Yandex N.V. The Public Interest Foundation will appoint an interim General Director from a pre-approved list. As soon as the situation is resolved, Yandex N.V. will remove the interim General Director and appoint a permanent General Director.

Special Situations related to a matter of national security

A Special Situation is a matter constituting an extraordinary one-off event related to matters of the national security of the Russian Federation requiring quick remedy.

If the Foundation Board decides (acting by a specified supermajority) that a Special Situation has occurred, it must send a notice to Yandex providing the details of such matter. Following receipt of such notice, we may cure such matter within a defined period. If we do not cure such matter, the Public Interest Foundation will have the ability (acting by specified majority) to replace the General Director of Yandex LLC without the vote of Yandex N.V. In interim General Director appointed under these circumstances will hold office for a limited period of time, after which Yandex N.V. will again have the right to appoint a permanent General Director.

Public Interest Foundation Board

The Public Interest Foundation is governed by a board comprising 11 directors, including members appointed by five leading Russian universities (Higher School of Economics, Moscow Institute of Physics and Technology, Moscow State University, Saint Petersburg State University and the Saint Petersburg National Research University of Information Technologies, Mechanics and Optics), and three non-governmental institutions (the Russian Union of Industrialists and Entrepreneurs (RSPP), Moscow School of Management Skolkovo and the Endowment of Moscow School #57), all of which have long histories of cooperation with Yandex. The Public Interest Foundation Board will also include three representatives of Yandex management (initially, Arkady Volozh, Tigran Khudaverdyan and Elena Bunina). The initial members of the Foundation Board are:

Elena Bunina, General Director of Yandex LLC – Executive Director of the Foundation

Elena Shmeleva (Saint Petersburg State University), Director of Educational Center “Sirius”, the Head of the Education Fund “Talent and Success” – Chairperson of the Foundation

Arkady Volozh, CEO of Yandex N.V.

Tigran Khudaverdyan, Deputy CEO of Yandex N.V.

Pavel Bezruchko (Higher School of Economics), Managing Partner of “ECOPSY Consulting”

Mikhail Kirpichnikov (Moscow State University), Dean of the Biology Faculty at MSU

Alexander Dyukov (University of Information Technologies, Mechanics and Optics), Chairman of the Board, CEO of Gazprom Neft

Sergey Ryazansky (Moscow Institute of Physics and Technology), Head of “Russian Schoolchildren’s Movement”, an all-Russian public-state children and youth organization”

Alexander Shokhin (Russian Union of Industrialist and Entrepreneurs), President of Russian Union of Industrialist and Entrepreneurs

Andrey Sharonov (SKOLKOVO), President of the Moscow School of Management SKOLKOVO

Mikhail Sluch (School №57 Development Fund), Director of School №57

After Russian parties (including Russian citizens, Russian beneficially owned legal entities and the Mr. Volozh’s family trust) cease to hold cumulative voting power over at least 50% plus one vote in Yandex N.V., the number of representatives of management entitled to sit on the Foundation Board will be decreased from three to two, and the Higher School of Economics will have the right to appoint an additional member of the Foundation Board. As a result, the Foundation directors appointed by Russian universities will have the power to decide on the following matters without any additional votes by the other members of the Foundation Board:

- selection of candidates for binding nomination as designated directors; and
- proposals of candidates for inclusion on the list of persons who may serve as interim General Director of Yandex LLC from time to time.

Conversion Provisions of the Class B Shares

In addition, as part of the restructuring, the automatic conversion feature of the Class B Shares was amended. Previously, such shares would immediately convert into Class A Shares upon the death of the holder. To avoid this “cliff-edge” scenario, in which the voting control of our company could suddenly shift, following this amendment Class B Shares held by a family trust will not automatically convert for a period of two years after the death of the holder. Mr. Volozh has established such a trust. Mr. Volozh also agreed to enter into a two-year lock-up agreement with respect to 95% of his Class B Shares.

Government Regulation

We operate in a rapidly evolving environment of increasing regulatory complexity, reflecting a trend towards increasing scrutiny of large technology companies by policymakers, regulators and the general public in jurisdictions across the globe, including in Russia. As explained in more detail below, there are also a significant number of additional laws and regulations currently being debated and considered for adoption in Russia and other countries where we operate which, in the event of adoption, might require us to take significant steps to modify our operating, governance or ownership structure. Due to changing interpretations of laws and regulations, we could also be subject to laws and regulations to which we are not currently subject and which could materially affect our operations. We have not summarized laws and regulations to which we do not believe we are currently subject. See also “Risk Factors – If existing limitations on foreign ownership were to be extended to our business, or if new limitations were to be adopted, it could materially adversely affect our group and the value of our Class A shares”.

Regulation of Sensitive Businesses in Russia

In recent years, the Russian government has adopted a series of laws aimed at regulating the technology and internet sectors generally, as described in detail below. In addition, a number of laws have been adopted that impose restrictions on foreign ownership and control of businesses in sensitive sectors of the Russian economy, including strategically important enterprises and mass media, and we are aware of various discussions about potentially imposing similar restrictions on businesses such as ours. Most significantly, legislation was proposed in the Russian State Duma in the summer of 2019 that, in its original form, would have limited non-Russian ownership of “significant” internet companies to no more than 20%. Following extensive debate, that proposal was withdrawn in late November 2019, but we can provide no assurance that similar legislation will not be proposed, and potentially adopted, in the future.

In light of this regulatory environment, our shareholders approved a restructuring of our corporate governance in December 2019. See “Governance Structure” above.

Advertising Regulation

The principal Russian law governing advertising, including online advertising, is the Federal Law No. 38-FZ “On Advertising,” dated March 13, 2006 (as amended) (the “Russian Advertising Law”). The Russian Advertising Law prohibits advertisements for certain regulated products and services without the required certification, licensing or approval. For example, advertisements for products such as pharmaceuticals and medical equipment, food supplements and infant food, financial instruments or securities and financial services as well as incentive sweepstakes and advertisements aimed at minors and some other products and services must comply with specific requirements and must in certain cases be accompanied by certain required disclaimers. Additionally, Russian law contains certain prohibitions regarding the advertising of alcohol, tobacco and medical services. In addition, the distribution of advertisements over the internet (for example, by email) may require the prior express consent of recipients. In some cases, violation of these Russian laws can lead to civil action by third parties who suffer damages, or administrative penalties imposed by FAS. Further amendments to legislation regulating advertising may impact our ability to provide some of our services or limit the type of advertising we may offer.

We seek to comply with all advertising laws and regulations. At the same time, the application of the advertising laws, in particular in relation to products or services requiring certification, licensing or approval, can be ambiguous and inconsistent. The application of these laws in an unanticipated manner, or the failure of our compliance efforts, may expose us to substantial liability as distributors of advertising and may restrict our ability to provide some of our services. Other laws or interpretations of laws, including those of foreign jurisdictions, may also restrict advertising and negatively impact our business. For example, some French courts have interpreted French trademark laws in ways that would limit the ability of competitors to advertise in connection with generic keywords. Adoption of similar interpretations by Russian or other national courts may adversely affect our business. In addition, Russian law does not specifically regulate behavioral targeting in relation to advertising, which is a standard tool widely used in online business. Any future interpretation of Russian law affecting the regulation of behavioral targeting could have a negative impact on our business.

In addition, according to publicly available information there are currently unofficial discussions of proposals related to the centralized collection of data about the auditory of online services. For now, it is difficult to predict what impact such regulation, if adopted, might have on our services.

Intellectual Property Regulation

In principle, the acquisition, protection and enforcement of intellectual property rights in Russia are addressed in line with international standards. In particular, literary, artistic and scientific works are subject to copyright protection without any registration and enjoy legal protection simply by virtue of being created in an objective form perceivable by third parties.

Mandatory registration with Rospatent is required for “hard IP” such as trademarks and patents (available in Russia for inventions, utility models and industrial designs) in order for the rights holder to acquire exclusive rights. Trademarks registered abroad under the Madrid Agreement and/or Madrid Protocol have the same legal protection in Russia as locally registered trademarks.

Under Russian law, we have exclusive rights to trade secrets (know-how) only if we have complied with a legal requirement to introduce reasonable measures to maintain confidentiality of our trade secrets, which measures may be burdensome and formalistic to implement. As we rely extensively in our operations on the protection afforded to trade secrets, we have implemented a set of measures required by Russian law in order to protect these trade secrets (know-how). However, there is a risk that our measures will be deemed insufficient and, as a result, we will fail to acquire rights to these trade secrets under Russian law.

One of the known problems and risks in Russian business practice relates to acquiring exclusive rights to works for hire and patentable results from employees. As a rule, the exclusive rights to works for hire and patentable results are assigned to the employer if the intellectual property is made during the course of employment. However, there are often uncertainties and disputes around the scope of such assignments. In case of employment disputes, Russian courts are often inclined to follow an overly formalistic approach and may take a pro-employee position in the event of uncertainty in a dispute of this nature.

Nonetheless, under Russian law, subject to the risks outlined above, we are deemed to have acquired copyrights and rights to file patent applications with respect to works for hire and patentable results created by our employees during the course of their employment with us and within the scope of their job duties, and have the exclusive rights to their further use and disposal subject to compliance with the requirements of the Civil Code of Russia.

Liability of Online Service Providers

Laws relating to the liability of online service providers for the activities of their users and other third parties are still being developed in Russia and certain other countries in which we operate.

Russian law contains provisions aimed at establishing a framework for limitation of liability of online service providers for the information communicated by third parties over such providers' networks. Substantial ambiguity remains in Russian law around the scope and protection of such limitation of liability. In particular, there is little clarity on the limitation of liability with respect to types of online service providers other than providers transmitting information and hosting providers (such as those caching data or providing information location tools). Because the law has not been given detailed binding interpretation, our exposure to liability will depend significantly on the interpretation of these provisions by the courts and officials.

The Russian Civil Code also imposes strict liability for infringement of intellectual property rights if such infringement is committed in connection with business activities. It might be unclear how these provisions apply to online service providers.

Russian law establishes a system for the blocking of websites that make available specific categories of illegal information related to child pornography, suicide or drug use as well as other restricted information. Current law also permits the blocking of websites for violation of data protection, copyright and related rights. The procedure for deleting such information is complex and strictly enforced and the failure to follow such procedures may lead to the blocking of the applicable website by all Russian internet service providers and telecommunication service operators.

Other legislation is currently in place in Russia that allows blocking of websites that contain extremist information (including containing calls for mass rioting, extremist activity and participation in mass assemblies conducted in violation of established procedure) at the request of certain governmental authorities without prior notification. Only a subsequent post-blocking notification to the relevant website owner or hosting provider is required. The categories of illegal information to which access can be restricted may be interpreted broadly or be expanded by government authorities depending on circumstances. We may find ourselves subject to such blocking if government authorities interpret information provided by our services as violating these rules and we may be unable to prevent this blocking of our services.

Moreover, pursuant to recent legislative amendments, a website might be blocked if the published information contains disrespectful and indecent statements about the society, state, Constitution or governmental authorities. Additionally, the subjects who are accused of disseminating such statements can face administrative fines. Russian law also restricts the circulation of certain identified categories of publicly available and distributed information that may be harmful to minors. In particular, there is a requirement to take administrative and technical measures to prevent the dissemination of restricted information. In addition, the circulation of information products must be accompanied by a

relevant mark identifying the age restriction category of information.

This legislation, as well as any similar additional regulations, and the interpretation of such legislation and regulations, may impose new requirements on us and our operations and lead to material legal liability, which can be difficult to foresee or limit. See “Risk Factors—We may be held liable for information or content displayed on, retrieved by or linked to our websites and mobile applications, or distributed by our users; or we may be required to block certain content or access to our websites could be restricted; any of which could harm our reputation, business, financial condition and results of operations”.

In February 2020, draft legislation aimed at regulating big data in Russia was introduced and remains under consideration. The wording of the legislation is very broad and ambiguous, but would create a basis for further regulation in this sphere. In particular, it states that the Government should implement control over big data processing. Currently big data processing is not specifically covered by Russian law. This legislation, if adopted, may have a far-reaching impact on our business, which is difficult to estimate at the present time.

Applicability of the Russian Law on Strategic Enterprises

Our Yandex.Money joint venture with Sberbank, in which we hold an approximately 25% interest, is subject to laws and regulations specifically applicable to electronic payments and encrypted information. Under the regulations governing electronic payment systems, payments with digital money fall into the sphere of banking activities, and such payments are regarded as a special transaction entered into without the need to open an account. Such transactions, however, have to be performed by a credit organization supervised by the Central Bank of Russia. To comply with this law, our Yandex.Money joint venture established a non-banking credit organization subsidiary, which obtained the required license from the Central Bank of Russia.

Under Russian law, a variety of activities related to encryption require a special permit (license) granted by the Federal Security Service (the “FSS”) subject to the applicant’s continued compliance with a number of licensing requirements, including the requirement to use only certified encryption means and equipment and to ensure timely extension of such certification when its terms expire.

Our Yandex.Money joint venture with Sberbank uses encryption algorithms, as permitted by the applicable licenses, for the protection of transfers performed by its customers and may be required to obtain additional licenses for their use. The requirements for the grant and maintenance of licenses for the use of encryption algorithms are very broad and unclear, leaving the regulator with significant discretion in applying and enforcing the applicable laws. See also “Risk Factors— Because the range of the services we provide is increasing and the legal framework governing the operations in our markets is evolving, we may be required to obtain additional licenses, permits or registrations or comply with other requirements, which may be costly or may limit our flexibility to run our business”.

As a holder of an encryption license, our Yandex.Money joint venture is subject to the strategic enterprises law, which restricts the acquisition of voting shares or participation interests and establishment of control by foreign legal entities and individuals, as well as states, international organizations and entities controlled by them, with respect to business entities with strategic importance.

We have also recently obtained an encryption license for our Yandex.Cloud service in order to expand this business. Therefore, the restrictions imposed by the strategic enterprises law have become applicable to Yandex as a whole. In particular, a third-party non-Russian investors would be required to obtain prior approval from the competent Russian authority in some cases if it seeks to acquire more than 25% of the voting power in Yandex or seeks to enter into an agreement that would establish direct or indirect control over Yandex. Such investors would also be required to notify the competent Russian authority if it acquires more than 5% of the voting power in Yandex (which would represent more than 33.3 million Class A shares). In addition, foreign states and international organizations, or entities controlled by them are prohibited from entering into agreements to establish direct or indirect control over Yandex.

See also “Risk Factors— If existing limitations on foreign ownership were to be extended to our business, or if new limitations were to be adopted, it could materially adversely affect our group and the value of our Class A shares”.

Mass Media Regulation

Russian law requires certain parties that disseminate news and similar mass communications and information to be registered with the appropriate Russian governmental body, Roskomnadzor, and to comply with restrictions regarding the distributed content. The law currently permits electronic network publications (websites) to register as mass media. As registration under this amendment is voluntary, we elected not to register our online properties as mass media. See “Risk Factors — Because the range of the services we provide is increasing and the legal framework governing the operations in our markets is evolving, we may be required to obtain additional licenses, permits or registrations or comply with other requirements, which may be costly or may limit our flexibility to run our business.”

Since 2016, Russian law imposes a limit of no more than 20% on non-Russian ownership and control, direct or indirect, of Russian mass media. Accordingly, if our core business were to be required to register as a mass media, or if such law were otherwise amended to cover our business, it would have a material impact on the ownership structure of our business and could materially adversely affect the value of our Class A shares. See also “Risk Factors— If existing limitations on foreign ownership were to be extended to our business, or if new limitations were to be adopted, it could materially adversely affect our group and the value of our Class A shares”.

In addition, in March 2019 a new law came into force that imposes liability for the dissemination of “fake news” in mass media or telecommunication networks if such news items are potentially of social importance. The liability includes fines up to 1.5 million rubles (depending mainly on the consequences of such violation). It is difficult to predict how these norms will be interpreted in practice. This regulation can be applied to some of our services and, therefore, we could be held liable for the information published by third parties.

Internet Regulation

A recent draft law that partly came in force in November 2019 introduced tighter regulation of traffic routing in the Russian internet. While it is not entirely clear yet how this regulation will be applied in practice, its implementation, among other things, may lead to a requirement that Russian internet traffic should be routed through Russian communication centers. This could reduce data transfer speeds significantly and even result in interruptions and delays of the online services in the Russian internet segment. We are not able to predict the potential impact of this regime on our services or our business.

Privacy and Personal Data Protection Regulation

We are subject to Russian and foreign laws regarding privacy and the protection of our users’ personal data. We publish on our websites our privacy policies and practices concerning the use, processing, storage and disclosure of user data. Any failure by us to comply with our privacy policies as well as Russian or other applicable laws and regulations relating to privacy and the protection of user data may result in proceedings against us by governmental authorities, individuals or other third parties, which may adversely impact our business. In addition, the adoption and interpretation of data protection laws, and their application to internet operations, are often unclear, difficult to predict and in a constant state of development. Although we believe that we comply with all current requirements, these laws could in the future be interpreted and applied in a manner that is inconsistent with current practice. For instance, in May 2014 the Court of Justice of the European Union established that an operator of a search engine can be obligated to remove from the list of search results links to webpages containing inaccurate or outdated information related to an individual. Russian personal data laws have been amended, granting a similar right to Russian citizens, who may apply for the removal of search results that link to inaccurate or irrelevant information about them. In addition, in May 2018, the General Data Protection Regulation, or GDPR, came into force in the EU. We believe that we have taken all necessary steps to comply with the applicable requirements of the GDPR, although our exposure is relatively limited. Nevertheless, some provisions of the GDPR are formulated broadly and their interpretation by the competent authorities might be unpredictable. Therefore, we may fail to interpret all the requirements in accordance with the official interpretation and may be held liable for noncompliance.

Russian data protection laws provide that an individual must freely consent to the processing of her/his personal data. Such consent must be concrete, informed and conscious, and may be provided in any form evidencing the fact that consent has been provided, unless otherwise established by federal law, which requires that it be made in writing, signed by digital electronic signature or evidenced in a similar manner prescribed by laws and regulations.

We, like our peers, seek this consent from our users by asking them to click on a button or select a check-box in appropriate circumstances prior to commencement of the account registration process, indicating the user's consent to our collection, use, storage and processing of personal data. Furthermore, many of our services do not require the creation of an account prior to their use and we collect only limited information in these circumstances. In particular, we place cookies and use other widespread technologies that assist us in improving user experience of our products and services and ultimately benefit both our users and advertisers through behavioral targeting of advertising. No clear legislative guidelines have been provided addressing whether our practices are compliant with the requirements of the data protection legislation in Russia and abroad. There is a risk that such laws may be interpreted and applied in a manner that is not consistent with our current data protection practices. Complying with various regulations in this area may cause us to incur additional costs or to change our business practices. Further, any failure by us to protect our users' privacy and data may result in a decrease of user confidence in our services, and may ultimately result in a loss of users, which would adversely affect our business.

Russian legislation also regulates "organizers of information distribution". Organizers of information distribution must retain a broad range of data relating to and generated by users for a period of time and provide such data to security and investigation authorities at their request. Organizers of information distribution that use encryption when delivering or processing electronic messages have to provide the security authorities with information necessary for decoding the delivered or processed messages. If an organizer of information distribution fails to comply with the above requirements, the Russian authorities can prescribe the blocking of access to the services of such organizer of information distribution.

Russian personal data law also requires that companies store all personal data of Russian users only in databases located inside Russia. Although we have data centers located in Russia, this law could limit our flexibility in managing our operations globally. Failure to comply with applicable data protection legislation may lead to the restriction of access to our services. For example, in 2016 a Russian court ordered the blocking of access to a popular social networking website for violation of data protection legislation.

In 2019 several companies in our group underwent a planned inspection by the competent Russian authority (Roskomnadzor). After this inspection only a small number of insignificant violations were found, we complied with the instructions of Roskomnadzor and no further issues arose. If Roskomnadzor were in the future to determine that we had failed to comply with the applicable data protection legislation, we could experience financial penalties and reputational damage and could be restricted from providing certain types of services until we comply with the requirements.

Licenses for the Provision of Particular Services

Entities that provide certain telecommunication services for a fee are required under Russian law to obtain a "telematics" license from Roskomnadzor. In order to increase our range of services and diversify our business, we have obtained the telematics licenses necessary for the provision of certain of our services in Russia. However, we generally do not charge a fee for the online services we provide to our users and therefore believe that we are not required to hold a telematics license for provision of these services. We do, however, generate revenue from ads directed to our users. As a result, it is possible that a Russian court or government agency may construe our online advertising revenues as a fee and determine that we are required to hold an additional telematics license for such services, which would require us to apply for and comply with the terms of any such license.

Additionally, we may in certain cases offer user services for a fee, which could require us to comply with the licensing requirements described above.

Antimonopoly Regulation

Russian law grants to the Federal Antimonopoly Service, or FAS, wide powers and authorities to maintain competition in the market, including approval or monitoring of mergers and acquisitions, establishment of rules of conduct for market players occupying dominant positions, prosecution of any wrongful abuse of a dominant position, and the prevention of cartels and other anti-competitive agreements or practices. The regulator may impose significant administrative fines (up to 15% of the annual revenue derived in the market where the violation occurred) on market players that abuse their dominant position or otherwise restrict competition, and is entitled to challenge contracts,

agreements or transactions that are in violation of the antimonopoly regulation. We could be considered to possess a substantial market share in the online advertising market and/or other markets in which we operate, including ride-hailing; although we are not recognized by the regulator as occupying a dominant position in any market. However, we understand that the regulator from time to time focuses on internet services, could in the future recognize online advertising as a separate market and could identify dominant players and impose conduct limitations and other restrictions.

In addition, the “fifth antimonopoly package” developed by FAS is currently under consideration, which would introduce amendments to the existing antimonopoly legislation in the sphere of digital markets and IP. The new legislation aims to facilitate the review of cases in this sphere. In particular, the document specifies new triggers for determining the dominant position of a digital transactional platform. Therefore, this legislation, if adopted, may have a far-reaching impact on our business, which is difficult to estimate at the present time.

Taxation Regulation

Taxation of legal entities and individuals in Russia is regulated primarily by the Tax Code of the Russian Federation. The scope and application of the Tax Code is elaborated by numerous regulations and clarifications from the Ministry of Finance of Russia and by the Federal Tax Service, which enforces the tax laws. Russian tax law and procedures are still not fully developed and local divisions of the Federal Tax Service have considerable autonomy in tax law interpretation and often interpret tax rules inconsistently. Also, there is extensive court practice on the construction of the Code’s provisions, which can sometimes be unpredictable or even contradictory. Both the substantive provisions of the Russian tax law and the interpretation and application of those provisions by the Russian tax authorities and by Russian courts may be subject to rapid and unpredictable change. See “Risk Factors — Changes in the tax systems in the countries in which we operate, or unpredictable or unforeseen application of existing rules, may materially adversely affect our business, financial condition and results of operations.”

Consumer protection legislation

Recent amendments to Russian consumer protection legislation impose duties on aggregators of information about goods and services. These norms are applicable to some of our and Yandex.Market’s services and the failure to comply with such norms could lead to liability.

Securities Regulation

Our Class A ordinary shares are currently listed on the NASDAQ Global Select Market and in June 2014 were admitted to trading on Moscow Exchange; therefore, we are required to comply with specific Russian regulation concerning information disclosure, insider trading and certain other requirements as may be applied to foreign issuers in Russia.

Applicability of Other Regulations

Because our services are accessible to Russian-language speakers worldwide and are becoming increasingly available to other users globally, certain foreign jurisdictions, including those in which we have not established a local office, employees or infrastructure, may require us to comply with their local laws.

In addition to historical information, this discussion contains forward-looking statements based on our current expectations that involve risks, uncertainties and assumptions. Overview

We are one of the largest European internet companies and the leading search provider in Russia. Our principal constituencies are:

- *Users.* We provide our users with advanced search capabilities and an extensive range of online services that enable them to find relevant, objective information quickly and easily, as well as communicate, connect, arrange transportation, access entertainment and shop over the internet.
- *Advertisers.* Our online advertising platform allows advertisers to reach a large audience of users in their markets and deliver cost-effective online advertising. With Yandex.Direct, our auction-based advertising platform, advertisers can promote their products and services through relevant ads targeted to a particular user query, the content of a website or webpage being viewed, or user behavior or characteristics.
- *Yandex ad network partners.* We have relationships with a large number of third-party websites, which we refer to as the Yandex ad network. In addition to serving ads on our own websites, we also serve ads on our network partners’ websites and share the fees generated by these ads with our partners, providing an important revenue stream for them.

Our yandex.ru website first began generating revenue in 1998. We became profitable in 2003 and have been profitable every year since then.

Online advertising revenues accounted for 93.0%, 80.4% and 69.4% of our total revenues in 2017, 2018 and 2019, respectively. Our online advertising revenues consist of fees charged to advertisers for serving online ads on our websites and those of our partners in the Yandex ad network. We place the significant majority of our performance-based ads through Yandex.Direct. We sell approximately half of our performance-based ads on a prepaid basis. Our Yandex.Direct advertisers pay us on a cost-per-click (CPC) basis, which means that we recognize revenue only when a user clicks on one of our advertisers’ ads. Our brand advertising is generally sold on a cost-per-thousand (CPM) impressions basis. For these ads, we recognize as revenue the fees charged to advertisers when their ads are displayed. We recognize our online advertising revenues net of value added tax and sales commissions and bonuses. In Russia, the VAT rate was 18% in 2018 and increased to 20% as of January 1, 2019. Although the largest part of our revenues is generated by direct sales to our advertisers, a significant portion of our advertising is sold through media agencies. We recognize revenues from those advertising sales net of the commissions and bonuses paid to these agencies.

We benefit from a large and diverse base of advertisers. Our advertisers include individuals and small, medium and large enterprises across Russia and the other countries in which we operate, as well as large multinational corporations. No individual advertiser accounted for more than 1.1% of our total revenues in 2017, 2018 or 2019. On a geographical basis, we generated more than 92% of our total revenues in each of 2017, 2018 and 2019 from advertisers and other customers with billing addresses in Russia, including the Russian offices of large multinational corporations.

We serve ads both on our own websites and on the websites of our partners in the Yandex ad network. For performance-based ads served on the websites of our partners in the Yandex ad network, we recognize as revenue the fees paid to us by advertisers each time a user clicks on one of their performance-based ads or, for those advertisers paying for brand ads on a CPM basis, as their ads are displayed. We pay our partners in the Yandex ad network fees for serving our advertisers’ ads on their websites. These fees are primarily based on revenue-sharing arrangements. As such, the fees paid to our partners in the Yandex ad network are calculated as a percentage of the revenues we earn by serving ads on partners’ websites. We account for the fees we pay to our partners in the Yandex ad network as traffic acquisition costs, a component of cost of revenues. Since we launched our Yandex ad network in 2006, these costs annually have, in aggregate, amounted to more than one-half of the revenues we have earned from serving ads on the Yandex ad network and we expect them to continue to do so in the foreseeable future. Yandex ad network partners do not pay us any fees associated with our serving ads on their websites.

Our agreements with our partners in the Yandex ad network generally have an indefinite term but may be terminated by either party at will with no termination fees. Agreements with larger partners in the Yandex ad network are individually negotiated and vary in duration but typically renew automatically. In 2017, 2018 and 2019, none of our ad network partners accounted for more than 8% of our total revenues. In 2019, Mail.ru Group continued to be our most significant ad network partner.

We believe the most significant factors that influence our ability to continue to increase our online advertising revenues include the following:

- the level of internet penetration and usage in Russia and the other markets in which we operate;
- the absolute and relative level of traffic on our own websites and those of our partners in the Yandex ad network;
- the relevance, objectivity and quality of our search results and the quality of our other services and of the Yandex ad network;
- our search market share, including on mobile devices, with a larger market share allowing us to better monetize our users' search activity and attract and retain advertisers, as well as partners in our Yandex ad network;
- the demand for online advertising in Russia and the other markets in which we operate, particularly among small and medium-size businesses;
- our ability to effectively monetize traffic generated by our websites and those of the Yandex ad network partners, including through improvements to our advanced auction and advertising placement system, while maintaining an attractive return on investment for our advertisers; and
- our ability to effectively monetize mobile search where the number of search queries is growing more quickly than on desktops.

Segments

During 2019, we revised our organizational structure, separating several focus areas into product lines and geographies. As a result, our businesses are now organized in the following operating segments:

- Search and Portal, which includes all our services offered in Russia, Belarus and Kazakhstan (and, for periods prior to the imposition of sanctions on Yandex by the government of Ukraine in May 2017, all our services offered in Ukraine), other than those described below;
- Taxi (including our Ride-hailing business (which consists of Yandex.Taxi and Uber in Russia and other countries), FoodTech business (including Yandex.Eats, Yandex.Chef and Yandex.Lavka, a hyper local convenience store delivery service) and our Self-Driving Cars ("SDC") division);
- Classifieds (including Auto.ru, Yandex.Realty and Yandex.Jobs);
- Media Services (including KinoPoisk, Yandex Music, Yandex.Afisha, Yandex.TV program, our production center Yandex.Studio and our subscription service Yandex.Plus);
- Other Bets and Experiments, where we aim to prove new business models. These include Zen, Yandex.Cloud, Yandex.Drive, Geolocation Services and Yandex.Education; and
- E-commerce (Yandex.Market service for the period prior to April 27, 2018, the date of the completion of the Yandex.Market joint venture between Yandex and Sberbank of Russia. Following the completion of the joint venture, we have deconsolidated Yandex.Market and now treat it as an equity investee under the equity method accounting).

In addition to the described changes, we changed the approach to intersegment revenue recognition in relation to Zen and approach to intersegment allocation related to office rent expenses and administrative support services of our business units. Now we recognize payments of Zen to Yandex.Browser, Yandex Homepage and Yandex Search app as traffic acquisition costs rather than revenue elimination. Now we net office rent expenses and administrative support services expenses within Search and Portal segment at operating costs level as opposed to treating business units share of rent expenses as intersegment revenue of Search and Portal. These changes insure consistency with internal reporting.

Key Trends Impacting Our Results of Operations

Although the Russian economy has stabilized over the past three years, our results of operations have been impacted in recent periods by lower rates of GDP growth in Russia, which has negatively affected our rate of revenue growth. In 2019 the growth of the Russian economy weakened, reflecting a broad-based slowdown in industrial activity and global trade. The COVID-19 pandemic is adversely affecting the global and Russian economies. In addition to the impact of the current macroeconomic environment, the trends described below are key drivers of our results of operations.

Our business and revenues have grown rapidly since inception, and the effectiveness of performance-based advertising as a medium has contributed to the rapid growth of our business. Advertising spending continues to shift from offline to online as the internet evolves, and we expect that our business will continue to grow. However, we expect that our revenue growth rate will continue to decline over time as a result of a number of factors, including challenges in maintaining our growth rate as our revenues increase to higher levels, increasing competition, particularly on mobile devices, changes in the nature of queries, the evolution of the overall online advertising market and the declining rate of growth in internet users in Russia as overall internet penetration increases. We do not expect the rate of online advertising revenues growth in 2020 to be higher than in 2019.

Our operating margins, representing our income from operations as a percentage of revenues, may fluctuate in the future depending on the percentage of our online advertising revenues that we derive from the Yandex ad network compared with our own websites. The operating margin we realize on revenues generated from the websites of our partners in the Yandex ad network is significantly lower than the operating margin generated from our own websites. The percentage of our online advertising revenues derived from the Yandex ad network decreased from 25.5% in 2017 to 23.4% in 2018 and to 20.9% in 2019.

Growth in mobile search may also have an impact on our operating margins. The number of search queries from mobile devices, including smartphones and tablets, is growing more quickly than desktop queries. Queries from mobile devices represented 57.5% of our total search queries and 49.3% of our search revenues in Q4 2019. To date, growth in mobile usage has not had a material impact on our pricing and revenues. However, we have seen some evidence that this growth may exert modest downward pressure on our operating margins in the future due to the ongoing transition to mobile platforms and related distribution TAC.

Recent and future capital expenditures may also put pressure on our operating margins. Our capital expenditures increased from RUB 12,389 million in 2017 to RUB 28,323 million in 2018, with a decrease to RUB 20,543 million in 2019. We spent approximately 60% of our total capital expenditures in 2019 on servers and data center expansion to support growth in our current operations. Our depreciation and amortization expense decreased as a percentage of revenues from 11.9% in 2017 to 9.5% in 2018, and to 8.4% in 2019. We currently expect our capital expenditures in 2020 to be on par with 2019 as a percentage of revenues, excluding the effect of our new headquarters construction. However, if we decide to undertake any new capital projects, our capital expenditures may increase as a percentage of our revenues in 2020.

To support further brand enhancement and respond to competitive pressures, we spent larger amounts in 2017, 2018 and 2019 on advertising and marketing than we have spent historically, in absolute terms. A significant portion of our advertising and marketing expense in 2018 and 2019 relates to our efforts to promote our Yandex.Taxi and our Search services, as well as Classifieds and Media Services, and to support our brand in Russia and the other markets in which we operate. We expect to continue to invest in advertising and marketing. We currently expect our overall advertising and marketing costs in 2020 to remain roughly stable as a percentage of revenues in comparison to 2019 due to continuing investment to promote our services. This spending will not significantly impact our operating margin rate.

Our revenues are impacted by seasonal fluctuations in internet usage and in advertising expenditures. Internet usage and advertising expenditures generally slow down during the months when there are extended Russian public holidays and vacations, and are significantly higher in the fourth quarter of each year. Moreover, expenditures by advertisers tend to be cyclical, reflecting overall economic conditions, retail patterns and advertising budgeting and buying patterns.

Inflation in Russia has also impacted our results of operations and may continue to do so. According to the Russian Federal State Statistics Service, Rosstat, the consumer price index in Russia increased by 2.5% and 4.3% in 2017 and 2018, respectively, and by 3.0% in 2019. We can provide no assurance that the annual rate of inflation will not increase significantly in 2020. Higher rates of inflation may accelerate increases in our operating expenses and capital expenditures and reduce the value and purchasing power of our ruble-denominated assets, such as cash and cash equivalents.

Changes in the value of the U.S. dollar compared with the Russian ruble can also negatively affect our results of operations. See “Quantitative and Qualitative Disclosures About Market Risk—Foreign Currency Exchange Risk.”

Recent Acquisitions

Shkulev

In June 2017, we completed the acquisition of assets and assumption of liabilities of Hearst Shkulev Digital LLC (“Shkulev”), one of the biggest regional auto classifieds with the leading position in Sverdlovsk and Chelyabinsk regions of the Russian Federation, for cash consideration of RUB 401 million, including contingent consideration of RUB 52 million, subject to successful technical integration and client base transition. As of December 31, 2019, the total amount of contingent consideration was paid.

FoodFox

In December 2017, we completed the acquisition of a 100% ownership interest in Deloam Management Limited and its subsidiary (“FoodFox”), one of the leading food delivery operators in Moscow. The primary purpose of the acquisition of FoodFox was to enlarge the range of services we provided. The fair value of consideration transferred totaled RUB 595 million and consisted of cash consideration of RUB 541 million and deferred consideration of RUB 54 million. The deferred consideration arrangement requires us to pay the additional cash consideration to FoodFox’s former shareholders and convertible debt holders, when certain legal conditions are being met within a four-year period following the acquisition date. No deferred consideration has been paid to date.

Other Acquisition in 2017

During the year ended December 31, 2017, we completed another acquisition for total consideration of approximately RUB 66 million.

Uber

In February 2018, we and Uber International C.V. (“Uber”), a subsidiary of Uber Technologies Inc., completed the combination of Yandex.Taxi Holding B.V. with several Uber legal entities into MLU B.V., a Dutch private limited liability company. We and Uber each contributed our legal entities operating our ride-hailing and food delivery businesses in Russia, Azerbaijan, Armenia, Belarus, Georgia, Kazakhstan, Kyrgyzstan and Moldova and \$100.0 million (RUB 5,722 million as of the date of acquisition) and \$225.0 million (RUB 12,874 million as of the date of acquisition) in cash, respectively. The merger was accounted for as a business combination. A further description of the acquisition and its accounting implications can be found in Note 4 of our audited consolidated financial statements included elsewhere in this Annual Report.

Edadeal

In October 2018, we completed the acquisition of 90% in Edadeal LLC and its subsidiary (“Edadeal”), a daily deal and coupon aggregator, which is used to find deals for grocery stores, thus increasing our ownership from 10% to 100%. Cash consideration transferred totaled RUB 233 million. The key product of Edadeal is a mobile app for iOS and

Android aggregating information regarding discounts at nearby supermarkets and stores.

Other Acquisitions in 2018

During the year ended December 31, 2018, we completed other acquisitions for total consideration of approximately RUB 751 million.

TheQuestion

In March 2019, we completed the acquisition of assets and assumption of liabilities of Znanie Company Limited (Cyprus) and its two subsidiaries, Znanie Development Company Limited (Cyprus) and Znanie LLC (Russia) ("TheQuestion"). TheQuestion is an internet-based question-and-answer social network. The primary purpose of the acquisition of TheQuestion was to enlarge the database of answers to specific search queries and to enhance the quality of search results provided by Yandex's Search portal. The fair value of consideration transferred totaled RUB 384 million, including cash consideration of RUB 351 million and deferred consideration of RUB 33 million. The deferred consideration arrangement requires us to pay the additional cash consideration to the former investors within four-year period. No additional consideration has been paid to date.

A further description of the acquisitions and their accounting implications can be found in Note 4 of our audited consolidated financial statements included elsewhere in this Annual Report.

Formation of Yandex.Market joint venture in 2018

Yandex.Market

On April 27, 2018, we and Sberbank formed a joint venture based on the Yandex.Market platform. As a part of the deal, Sberbank subscribed for new ordinary shares of Yandex.Market for RUB 30,000 million (approximately \$500 million as of signing of the Subscription Agreement). Since that date, we and Sberbank each hold an equal number of the outstanding shares in Yandex.Market, with up to 10% of outstanding shares allocated to management and an equity incentive pool. We retained a noncontrolling interest and significant influence over Yandex.Market's business. Accordingly, Yandex.Market's results of operations before the transaction are classified within continuing operations.

A further description of the acquisitions, the joint venture formation and their accounting implications can be found in Note 4 of our audited consolidated financial statements included elsewhere in this Annual Report.

* Restated to reflect adoption of ASC 842 Leases, which requires the recognition of right-of-use assets and lease liabilities for operating leases. Prior periods have been adjusted accordingly.

Our consolidated income from operations increased from 13.7% in 2017 to 16.3% in 2018 and decreased to 14.1% in 2019. The lower margin in 2019 compared with 2018 was primarily due to an increase as a percentage of our total revenues of costs related to our experiments and low-profit segments, as well as costs related to Yandex.Drive and Media Services, which were partially offset by a decrease as a percentage of our total revenues in depreciation and amortization expenses. The increase in 2018 compared with 2017 was primarily due to a decrease as a percentage of our total revenues in depreciation and amortization expenses reflecting expiration of useful lives of part of our equipment and intangible assets. The other factor was a decrease as percentage of our total revenues in advertising and marketing expenses.

We expect our operating margin to decrease as a percentage of revenues in the near term as a result of the increasing contribution of our business units as a percentage of total revenues, given that their operating margins are lower than those of our core business, as well as due to investments in new initiatives in Search and Portal.

The following table presents our historical results of operations by reportable segment for the periods indicated:

Revenues

The following table presents our consolidated revenues, by source, in absolute terms and as a percentage of total revenues for the periods presented:

	Year ended December 31,					
	2017		2018		2019	
	RUB	% of Revenues	RUB	% of Revenues	RUB	% of Revenues

Total revenues	94,054	100.0 %	127,657	100.0 %	175,391	100.0 %

(1) We record revenue net of VAT, sales agency commissions and bonuses and discounts. Because it is impractical to track commissions, bonuses and discounts for online advertising revenues generated on our own websites and on those of our partners in the Yandex ad network separately, we have allocated commissions, bonuses and discounts between our own websites and those of our partners in the Yandex ad network proportionally to their respective revenue contributions.

Online advertising revenues. Total online advertising revenues increased by RUB 19,001 million, or 18.5%, from 2018 to 2019 and by RUB 15,337 million, or 17.5%, from 2017 to 2018. Our total online advertising revenues excluding Yandex.Market increased by RUB 20,606 million, or 20.4%, from RUB 101,132 million in 2018 to RUB 121,738 million in 2019, and increased by RUB 18,516 million, or 22.4%, from RUB 82,616 million in 2017 to RUB 101,132 million in 2018. Online advertising revenue growth over the periods under review resulted primarily from growth in sales of performance based online ads, driven by an increase in the number of paid clicks and an increase in average cost per click paid by our advertisers. We currently do not expect the rate of online advertising revenues growth in 2020 to be higher than in 2019.

Paid clicks on our own websites together with those of our Yandex ad network partners increased 17% from 2018 to 2019 and 10% from 2017 to 2018. The average cost per click on our own websites together with those of our partners in the Yandex ad network increased 1% from 2018 to 2019 and 7% from 2017 to 2018.

During the periods under review, the year-over-year rates of change in paid clicks and average cost-per-click on a quarterly basis were as follows:

Quarter	Year-over-year growth in paid	Year-over-year growth in
	clicks, %	cost-per-click, %
First Quarter 2017	12	10
Second Quarter 2017	10	9
Third Quarter 2017	6	12
Fourth Quarter 2017	10	9
First Quarter 2018	7	8
Second Quarter 2018	10	6
Third Quarter 2018	13	5
Fourth Quarter 2018	10	7
First Quarter 2019	11	7
Second Quarter 2019	17	2
Third Quarter 2019	22	(2)
Fourth Quarter 2019	20	(3)

The rate of change in paid clicks and average cost-per-click, and their correlation with the rate of increase in our revenues, may fluctuate from period to period based on such factors as seasonality, advertiser competition for keywords,

our ability to launch enhanced advertising products that seek to deliver increasingly targeted ads, the fees advertisers are willing to pay based on how they manage their advertising costs, and general economic conditions.

Revenues of Yandex.Taxi. Revenues of Yandex.Taxi mainly represent commissions for providing ride-hailing services related to our Yandex.Taxi and Uber services and commissions for food delivery services. For ride-hailing services provided to individual transportation services users, we are not a principal and report only Yandex.Taxi's commission fees as revenue. For services provided to corporate transportation services clients we act as the principal and revenue and related costs are recorded gross. For food delivery services provided to individual service users, we are not a principal and report only Yandex.Eats's commission fees as revenue. The increases of Yandex.Taxi revenues in both 2019 and 2018 are due to robust growth in the number of rides across our territories driven by aggressive investments in our existing markets as well as in geographical expansion and the effect of the business combination with Uber.

Other revenues. Other revenues principally represent our revenue from Yandex.Drive, our car-sharing service, and revenues from Media Services. Other revenues increased by RUB 10,015 million or 175.5%, from 2018 to 2019 and by RUB 3,944 million, or 223.7%, from 2017 to 2018.

Revenues by reportable segment. Our revenues attributable to the Search and Portal segment increased by RUB 20,813 million, or 20.6%, from 2018 to 2019 and by RUB 18,622 million, or 22.6%, from 2017 to 2018. The growth in this segment's revenues is in line with the growth in our overall online advertising revenues. Search and Portal revenues accounted for approximately 69.5% of total revenues in 2019, compared with 79.1% in 2018 and 87.6% in 2017.

Our revenues attributable to the Taxi segment increased by RUB 18,832 million, or 98.0%, from 2018 to 2019 and by RUB 14,322 million, or 292.8%, from 2017 to 2018. Taxi revenues accounted for approximately 21.7% of total revenues in 2019, compared with 15.1% in 2018 and 5.2% in 2017. The increase of this segment's share of total revenues in 2018 and 2019 is primarily due to growth of our ride-hailing business driven by an increase in the number of rides, solid performance of our corporate Taxi business, which we recognize on a gross basis, as well as the growing contribution of our food tech services.

Our revenues attributable to the Classifieds segment increased by RUB 1,673 million, or 45.0%, from 2018 to 2019 and by RUB 1,657 million, or 80.4%, from 2017 to 2018. Classifieds revenues accounted for approximately 3.1% of total revenues in 2019, compared with 2.9% in 2018 and 2.2% in 2017. The increase of this segment's share of total revenues in 2019 compared to 2018 and in 2018 compared to 2017 is primarily due to rapid growth in its mature markets as well as in the regions, supported by our increased marketing spend in Classifieds in 2018 and 2019, and also due to M&A deals in 2017.

Our revenues attributable to the Media Services segment increased by RUB 1,958 million, or 102.6%, from 2018 to 2019 and by RUB 722 million, or 60.8%, from 2017 to 2018. Media Services revenues accounted for approximately 2.2% of total revenues in 2019, compared with 1.5% in 2018 and 1.3% in 2017. The increase of this segment's share of total revenues in 2018 and 2019 is primarily due to growth in the number of subscriptions to Yandex Music service, KinoPoisk and tickets commission revenues.

Our revenues attributable to the Other Bets and Experiments category increased by RUB 9,457 million, or 168.1%, from 2018 to 2019 and by RUB 3,781 million, or 205.0%, from 2017 to 2018. Other Bets and Experiments revenues were primarily related to Yandex.Drive, Zen and Geolocation Services and increased to approximately 8.6% of total revenues in 2019, compared with 4.4% in 2018 and 2.0% in 2017, respectively.

Our revenues attributable to the E-commerce segment decreased by RUB 1,697 million, or 100.0%, from 2018 to 2019 and by RUB 3,271 million, or 65.8%, from 2017 to 2018 due to effect of deconsolidation of Yandex.Market in April 2018. E-commerce revenues were zero in 2019 and accounted for approximately 1.3% of total revenues in 2018, compared with 5.3% in 2017.

Operating Costs and Expenses

Our operating costs and expenses consist of cost of revenues; product development expenses; sales, general and administrative expenses, depreciation and amortization expense and goodwill impairment. In addition to the reasons discussed below with respect to each category, we generally expect our total operating costs and expenses to increase in

absolute terms and as a percentage of revenues in the near term; see “—Key Trends Impacting Our Results of Operations”.

Cost of revenues. Cost of revenues consists primarily of traffic acquisition costs, and the costs related to the Taxi segment and Yandex.Drive.

Traffic acquisition costs are the amounts paid to our partners in the Yandex ad network for serving our online ads on their websites and to our partners who distribute our products or otherwise direct search queries to our websites. These amounts are primarily based on revenue-sharing arrangements. Some of our distribution partners are compensated on the basis of the number of installations of Yandex browser or search bars and applications.

The agreements with our distribution partners provide for payment of fees to them on a non-refundable basis following the period in which the distribution fees are earned. We do not have a standard term or termination provision that applies to agreements with our distribution partners. Our largest distribution partner since 2012, Opera, accounted in aggregate for 18% of our distribution costs in 2019, and 23% and 18% in 2017 and 2018, respectively. The Opera agreement also provides for a 12-month “revenue tail” period should that agreement be terminated.

Cost of revenues related to the Taxi segment primarily consist of cost of corporate taxi services represented by amounts paid to taxi partners for providing services to corporate clients and various outsourced services associated with direct operations (for example, dispatch control, call center services, testing of software security, and logistics costs for the food delivery business).

Cost of revenues related to Yandex.Drive consists of costs of leasing cars, gasoline costs and outsourced services such as insurance, maintenance and other services.

Cost of revenues also includes the expenses associated with the operation of our data centers, including related personnel costs and share-based compensation expense, rent, utilities and telecommunications bandwidth costs, as well as content acquisition costs.

The following table presents the primary components of our cost of revenues in absolute terms and as a percentage of revenues for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Traffic acquisition costs:			
Traffic acquisition costs related to the Yandex ad network	12,907	14,785	15,702
Traffic acquisition costs related to distribution partners	4,438	5,713	7,622
Total traffic acquisition costs	17,345	20,498	23,324
<i>as a percentage of revenues</i>	18.4 %	16.1 %	13.3 %
Costs related to Taxi segment:	1,259	5,838	12,135
<i>as a percentage of revenues</i>	1.3 %	4.6 %	6.9 %
Other cost of revenues	5,348	9,557	20,329
<i>as a percentage of revenues</i>	5.7 %	7.5 %	11.6 %
Total cost of revenues	23,952	35,893	55,788
<i>as a percentage of revenues</i>	25.5 %	28.1 %	31.8 %

Cost of revenues increased by RUB 19,895 million, or 55.4%, from 2018 to 2019, primarily due to a RUB 10,772 million increase in other cost of revenue, which is mainly related to an increase in Yandex.Drive costs (principally for car leasing), as well as due to a RUB 6,297 million increase in Yandex.Taxi costs (principally cost of corporate taxi services and logistics) and to a RUB 2,826 million increase in traffic acquisition costs.

Cost of revenues increased by RUB 11,941 million, or 49.9%, from 2017 to 2018, primarily due to an increase of RUB 4,579 million in Yandex.Taxi costs and RUB 3,153 million increase in traffic acquisition costs.

The majority of our traffic acquisition costs relate to the Yandex ad network, with a smaller portion relating to distribution relationships. Traffic acquisition costs relating to the Yandex ad network increased by RUB 917 million from 2018 to 2019 and by RUB 1,878 million from 2017 to 2018, representing our Yandex ad network partners’ share in

the increased amount of Yandex ad network revenue for the period, which increased by RUB 1,439 million from 2018 to 2019 and by RUB 1,790 million from 2017 to 2018. Our network partner traffic acquisition costs as a percentage of network partner revenues increased to 61.6% in 2019 compared with 61.5% in 2018 and 58.0% in 2017. In addition, the amounts paid to our distribution partners increased by RUB 1,909 million from 2018 to 2019 and by RUB 1,275 million from 2017 to 2018 due to growth in our existing distribution relationships, as well as the additions of new distribution partners. As a percentage of total revenues, traffic acquisition costs decreased from 18.4% in 2017 to 16.1% in 2018 and to 13.3% in 2019, as a result of lower rate of partner revenue growth.

Costs related to the Taxi segment increased by RUB 6,297 million, or 107.9%, from 2018 to 2019, and by RUB 4,579 million, or 363.7%, from 2017 to 2018, primarily due to the expansion of our corporate ride-hailing business, where revenues and related costs are recorded on a gross basis, and Yandex.Eats' logistics services.

Other cost of revenues increased by RUB 10,772 million, or 112.7%, from 2018 to 2019, and by RUB 4,209 million, or 78.7%, from 2017 to 2018, primarily due to increases in Yandex.Drive costs of RUB 6,507 million and RUB 1,914 million, respectively. Other factors driving increases in these years include the increase of expenses in our Media Services business due to growing transactions in Yandex Music and content acquisition costs in KinoPoisk, as well as costs of sales of our IoT devices and remuneration paid to Zen publishers.

We anticipate that cost of revenues will continue to increase in absolute terms primarily as a result of increases in Yandex.Drive direct expenses, IoT devices production and logistics costs, and Yandex.Eats logistics services, as well as content and data center costs, and will continue to increase as a percentage of revenues in the near term, but will stabilize as a percentage of related segment revenues.

Product development. Product development expenses consist primarily of personnel costs incurred for the development, enhancement and maintenance of our search engine and other Yandex services and technology platforms. We also include rent and utilities attributable to office space occupied by development staff in product development expenses. We expense product development costs as they are incurred.

The following table presents our product development expenses in absolute terms and as a percentage of revenues for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Product development expenses	18,866	22,579	29,209
as a percentage of revenues	20.0 %	17.7 %	16.7 %

Product development expenses increased by RUB 6,630 million, or 29.4%, from 2018 to 2019, and by RUB 3,713 million, or 19.7%, from 2017 to 2018. These increases were primarily due to increases in headcount and salaries in 2019 and 2018, as well as increases in share-based compensation expense. Development personnel headcount increased from 4,290 as of December 31, 2017 to 4,582 as of December 31, 2018, and to 5,784 as of December 31, 2019. As a percentage of revenues, product development expenses slightly decreased by one percentage point from 2018 to 2019, and decreased by 2.3 percentage points from 2017 to 2018, primarily reflecting the slower growth in headcount in 2018.

We anticipate that product development expenses will increase in absolute terms but will not change materially as a percentage of revenues in 2020.

Sales, general and administrative. Sales, general and administrative expenses consist of compensation and office rent expenses for personnel engaged in customer service, sales, sales support, finance, human resources, facilities, information technology and legal functions; fees for professional services; and advertising and marketing expenditures.

The following table presents our sales, general and administrative expenses in absolute terms and as a percentage of revenues for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Sales, general and administrative expenses	27,155	36,206	50,155
as a percentage of revenues	28.9 %	28.4 %	28.6 %

Sales, general and administrative expenses increased by RUB 13,949 million, or 38.5%, from 2018 to 2019 and by RUB 9,051 million, or 33.3%, from 2017 to 2018. The increase in 2019 compared to 2018 was primarily due to an increase in personnel expenses by RUB 3,727 million which resulted from headcount and salary increases in 2018 and 2019. Personnel expenses increased by RUB 2,947 million in 2018 compared to 2017, primarily as a result of a headcount increase.

Additional factors contributing to the overall increase from 2018 to 2019 were increases in advertising and marketing expenses, mainly in Russia, by RUB 2,977 million, increases of RUB 1,627 million in bank and payment systems commission expenses mainly related to Yandex.Taxi, RUB 1,625 million in other professional and outsourced services, RUB 1,346 million in share-based compensation expense, RUB 737 million in recruiting and training services and business travel expenses, RUB 557 million in office rent and utilities expenses due to additional rent agreements, and RUB 427 million in office expenses.

Additional factors contributing to the overall increase from 2017 to 2018 were increases in advertising and marketing expenses, mainly in Russia, by RUB 2,318 million; increases of RUB 1,631 million in bank and payment systems commission expenses mainly related to Yandex.Taxi; RUB 1,028 million in other professional and outsourced services; RUB 556 million in office rent and utilities expenses due to additional rent agreements; RUB 519 million in recruiting and training services and business travel expenses; RUB 384 million in share-based compensation expense and RUB 376 million in office expenses. These increases were partially compensated by a decrease of RUB 404 million in certain provisions related to Ukraine that we provided for in 2017 following the imposition of sanctions in May 2017, and by RUB 354 million of certain allowances we provided for in 2018 compared to 2017 due to VAT provision accrued in 2017 related to the results of prior years' tax audits.

We anticipate that our sales, general and administrative expenses in 2020 will continue to increase in absolute terms in comparison to 2019, as we continue to invest in the promotion of our products and services.

Depreciation and amortization. Depreciation and amortization expense relates to the depreciation of our property and equipment, mainly servers and networking equipment, leasehold improvements, data center equipment and office furniture, and the amortization of our intangible assets with definite lives.

The following table presents our depreciation and amortization expense in absolute terms and as a percentage of revenues for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Depreciation and amortization expense	11,239	12,137	14,777
as a percentage of revenues	11.9 %	9.5 %	8.4 %

Depreciation and amortization expense increased by RUB 2,640 million, or 21.8%, from 2018 to 2019 and by RUB 898 million, or 8.0%, from 2017 to 2018. The increases in absolute terms for 2019 as compared to 2018 and for 2018 as compared to 2017 were primarily due to RUB 1,253 million and RUB 328 million increases, respectively, in depreciation expense related to server and network equipment and infrastructure systems; RUB 367 million and RUB 177 million increases, respectively, in office furniture and equipment; RUB 393 million and RUB 48 million increases, respectively, in depreciation expense related to Yandex.Drive's car-sharing fleet and RUB 309 million and RUB 196 million increases, respectively, in amortization expense related to technologies and licenses. The increases in depreciation and amortization expense in 2018 and 2019 were primarily the result of our investments in servers and data

center equipment and expansion of Yandex.Drive's car-sharing fleet, as well as by costs related to purchases of office equipment.

We have both operating and finance leases in Yandex.Drive. According to the ASC 842 rules, we divide lease payments under finance leases into the interest and amortization components and recognize the latter under D&A expense. In addition, we depreciate the cost of certain equipment that we install on Yandex.Drive's cars, such as infotainment systems and telematics. We anticipate that depreciation and amortization expense will increase in absolute terms as we continue to invest in our technology infrastructure and in business acquisitions, and slightly decrease as a percentage of revenues in the near term. Any depreciation of the Russian ruble may also result in a material increase in our capital expenditures and respective depreciation and amortization.

Share-based compensation. In our consolidated statements of income, share-based compensation expense is recorded in the same functional area as the expense for the recipient's cash compensation. As a result, share-based compensation expense is allocated among our cost of revenues, product development expenses and sales, general and administrative expenses.

The following table presents our aggregate share-based compensation expense in absolute terms and as a percentage of revenues for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Share-based compensation expense	4,193	6,552	9,855
as a percentage of revenues	4.5 %	5.1 %	5.6 %

Share-based compensation expense increased by RUB 3,303 million, or 50.4%, from 2018 to 2019, because of new equity-based awards to new and existing employees granted in 2018 and 2019.

Share-based compensation expense increased by RUB 2,359 million, or 56.3%, from 2017 to 2018, because of new equity-based awards to new and existing employees granted in 2017 and 2018.

The share based compensation expense for 2018 and 2019 includes RUB 564 million and RUB 355 million, respectively, related to Business Unit Equity Awards as described in Note 16 to our consolidated financial statements.

We anticipate that share-based compensation expense will increase in absolute terms in the near term because of new equity-based awards to new and existing employees.

Goodwill impairment. The goodwill impairment recorded in 2019 of RUB 762 million relates to Food Party and was a result of our annual goodwill impairment test. The impairment is the full amount of goodwill recognized at the Food Party acquisition date and allocated to the Taxi segment. The goodwill impairment is the result of the absence of expected synergies from the integration of the Food Party business model with the existing operations of our other businesses or technologies, resulting in a change of business model of Food Party. Fair value of the Food Party is considered to be equal to the carrying amount of the Food Party's net assets as of December 31, 2019.

Adjusted operating costs and expenses by reportable segments. Our adjusted operating costs and expenses attributable to the Search and Portal segment increased by RUB 13,841 million, or 22.1%, from 2018 to 2019 and by RUB 8,363 million, or 15.4%, from 2017 to 2018. These increases were primarily due to increases in personnel expenses and allocable office rent and utilities and traffic acquisition costs both in 2019 and 2018, as well as other costs of revenues mainly related to devices and depreciation and amortization expense in 2019 and advertising and marketing expenses in 2018.

Our adjusted operating costs and expenses attributable to the Taxi segment increased by RUB 13,760 million, or 58.0%, from 2018 to 2019 and by RUB 10,843 million, or 84.1%, from 2017 to 2018. The primary factor contributing to the overall increase both in 2019 and 2018 was the growth of our Yandex.Eats and corporate ride-hailing businesses (with growth in expenses in line with revenue growth), as well as investments in autonomous vehicles as we expanded our AV fleet. The other factors are increases in personnel expenses and allocable office rent and utilities resulting from

growth in headcount over the periods as we continue to invest in the development of the service. We anticipate that advertising and marketing expenses of the Taxi segment will increase in absolute terms but decrease as a percentage of revenues.

Our adjusted operating costs and expenses attributable to the Classifieds segment increased by RUB 1,171 million, or 29.9%, from 2018 to 2019 and by RUB 1,936 million, or 97.5%, from 2017 to 2018. These increases were primarily due to increases in advertising and marketing investments in both 2019 and 2018 as we continued to invest in the development of the service, as well as an increase in cost of vehicles purchased and resold in 2018 compared with 2017.

Our adjusted operating costs and expenses attributable to the Media Services segment increased by RUB 3,372 million, or 122.4%, from 2018 to 2019 and by RUB 1,060 million, or 62.6% from 2017 to 2018. These increases are mainly due to increases of content acquisition costs and advertising and marketing expenses, as well as increases of personnel expenses in both 2018 and 2019.

Our adjusted operating costs and expenses attributable to the Other Bets and Experiments category increased by RUB 11,892 million, or 121.7%, from 2018 to 2019, and increased by RUB 4,649 million, or 90.8%, from 2017 to 2018. The increase in both 2019 and 2018 was primarily due to rapid growth of Yandex.Drive and continued investment in Zen and Geolocation Services, as well as Yandex.Cloud, launched in 2018.

Our adjusted operating costs and expenses attributable to the E-commerce segment decreased by RUB 1,970 million, or 100.0%, from 2018 to 2019 and by RUB 1,442 million, or 42.3%, from 2017 to 2018. The decreases both in 2018 and 2019 were mainly due to deconsolidation of Yandex.Market in April 2018.

Interest Income

Interest income remained stable at RUB 3,382 million in 2018 and RUB 3,315 million in 2019. Interest income increased from RUB 2,909 million in 2017 to RUB 3,382 million in 2018 principally as a result of an increase of average amounts of our deposits during the year and an increase of average interest rates of our RUB and USD-nominated investments.

Interest Expense

Interest expense decreased from RUB 945 million in 2018 to RUB 74 million in 2019 mostly due to a decrease of amortization of debt discount related to our convertible notes which matured in Q4 2018 by 728 RUB million. Interest expense increased from RUB 897 million in 2017 to RUB 945 million in 2018 mostly due to an increase of amortization of debt discount related to our convertible notes by RUB 44 million.

Effect of Yandex.Market deconsolidation

On April 27, 2018, we deconsolidated Yandex.Market from our consolidated financial results and accounted for this investment under the equity method within investments in non-marketable equity securities on the consolidated balance sheets, initially at fair value of RUB 29,985 million. This resulted in a gain on the deconsolidation in the amount of RUB 28,244 million. Starting April 27, 2018, we record our share of Yandex.Market's financial results within the income/(loss) from equity method investments line in the consolidated statements of income.

Other (Loss)/Income, net

Our other (loss)/income, net primarily consists of foreign exchange losses and gains generally resulting from changes in the value of the U.S. dollar compared with the Russian ruble, and other non-operating gains and losses, including gains from the sale of equity securities and loss from repurchases of convertible notes.

The following table presents the components of our other (loss)/income, net in absolute terms and as a percentage of revenues, for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Foreign exchange (losses)/gains	(1,075)	1,169	(1,294)
Gain from sale of equity securities	33	—	—
Loss from repurchases of convertible debt	(6)	—	—
Other	(62)	(39)	94
Total other (loss)/income, net	(1,110)	1,130	(1,200)
<i>Total other income (loss)/income, net, as a percentage of revenues</i>	<i>(1.2)%</i>	<i>0.9 %</i>	<i>(0.7)%</i>

Because the functional currency of our operating subsidiaries in Russia is the Russian ruble, changes in the ruble value of these subsidiaries' monetary assets and liabilities that are denominated in other currencies (primarily the U.S. dollar) due to exchange rate fluctuations are recognized as foreign exchange gains or losses in our consolidated statements of income. In 2019 because of the material appreciation of the ruble, we recorded foreign exchange losses of RUB 1,304 million in our Russian subsidiaries as other loss, net, arising from changes in the value of the U.S. dollar compared with the Russian ruble during the year. In 2018 we recognized foreign exchange gain in our Russian subsidiaries in the amount of RUB 1,136 million due to depreciation of the Russian ruble against the U.S. dollar. In 2017 we recognized foreign exchange losses in our Russian subsidiaries in the amount of RUB 974 million due to appreciation of the Russian ruble against the U.S. dollar. Although the U.S. dollar values of our U.S. dollar denominated cash, cash equivalents and term deposits are not impacted by these currency fluctuations, they result in upward and downward revaluations of the ruble equivalent of these U.S. dollar denominated monetary assets.

In 2017, we repurchased \$12.0 million in principal amount of our outstanding convertible notes for \$11.6 million resulting in a loss of RUB 6 million. During 2018, we did not repurchase any convertible debt notes before the due date. In December 2018, the notes matured and we repaid in full the remaining amount of outstanding principal in respect of the notes in the face amount of \$321.3 million.

Items recognized as "Other" in "Other (loss)/income, net" include changes in the fair value of derivative instruments and other non-operating gains and losses.

Income Tax Expense

The following table presents our income tax expense and effective tax rate for the periods presented:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB, except percentages)		
Income tax expense	5,016	8,201	11,656
Effective tax rate	35.6 %	15.6 %	51.0 %

Our income tax expense increased by RUB 3,455 million from 2018 to 2019 and increased by RUB 3,185 million from 2017 to 2018, primarily as a result of increases in taxable income.

Our effective tax rate increased by 35.4 percentage points from 2018 to 2019. Our effective tax rate was higher in 2019 than in 2018 primarily due to the lower taxable base in 2018 following the effect of Yandex.Market deconsolidation which is non-taxable, an increase in stock-based compensation and certain losses from the share of Yandex.Market's financial results which are non-deductible, as well as goodwill impairment and certain tax provisions recognized. Adjusted for these effects, our effective tax rate would have been 29.8% and 26.6% in 2019 and 2018, respectively. The increase in the adjusted effective tax rate was primarily driven by certain additional valuation allowances provided in 2019.

Our effective tax rate decreased by 20.0 percentage points from 2017 to 2018. Our effective tax rate was lower in 2018 than in 2017 primarily due to the effect of Yandex.Market deconsolidation which is non-taxable, as well as due

to certain provisions related to the results of prior years' tax audits recognized in 2017 and reversed in 2018, partly offset by an increase in share-based compensation expense, which is non-deductible. Adjusted for these effects, our effective tax rate would have been 26.6% and 24.1% in 2018 and 2017, respectively. The increase in the adjusted effective tax rate was primarily driven by certain deferred tax asset valuation allowances provided in 2018 on operations of Uber and Food Delivery businesses acquired in 2018 and late 2017.

See "Critical Accounting Policies, Estimates and Assumptions—Tax Provisions" for additional information about our income tax expense.

A reconciliation of our statutory income tax rate to our effective tax rate is set forth in Note 11 of our audited consolidated financial statements included elsewhere in this Annual Report.

Liquidity and Capital Resources

As of December 31, 2019, we had RUB 88,306 million (\$1,120.0 million) in cash, cash equivalents and term deposits. Cash equivalents consist of bank deposits with original maturities of three months or less. We keep a sufficiently balanced currency basket depending on expected expenses in currencies different from the Russian ruble and aiming at foreign exchange risks mitigation. The certain currency split between the Russian ruble and the U.S. dollar is flexible and is subject to regular modification by management upon market conditions. We maintain our U.S. dollar-denominated accounts principally in the Netherlands and in Russia. Our U.S. dollar-denominated holdings as of December 31, 2019 accounted for approximately 71.1% of our cash, cash equivalents and term deposits.

The net proceeds to us in December 2013 and January 2014 from the sale of our 1.125% convertible senior notes due December 15, 2018, were approximately \$683.1 million. From time to time, we repurchased and retired outstanding notes. During 2017, we repurchased and retired an aggregate of \$12.0 million principal amount of the outstanding notes for \$11.6 million. During 2018, we did not repurchase outstanding notes before the due date. In December 2018, the notes matured and we repaid in full the remaining amount of outstanding principal in respect of the notes in the face amount of \$321.3 million when such amounts came due. As of December 31, 2018 and December 31, 2019 no notes remained outstanding.

The net proceeds from convertible notes were received by our parent company, a Dutch holding company that generates no operating cash flow itself.

Other than the proceeds from our convertible note offering, our principal source of liquidity has been cash flow generated from the operations of our Russian subsidiaries. Under current Russian legislation, there are no restrictions on our ability to distribute dividends from our Russian operating subsidiaries to our parent other than a requirement that dividends be limited to the cumulative net profits of our Russian operating subsidiaries, calculated in accordance with Russian accounting principles, which differs from the cumulative net profit calculated in accordance with U.S. GAAP primarily due to the treatment of accrued expenses (such as rent, sales agency commissions and bonuses, etc.), deferred taxes and differences arising from the capitalization and depreciation of property and equipment and amortization of intangible assets. In addition, these dividends cannot result in negative net assets in our Russian subsidiaries or render them insolvent. Pursuant to applicable Russian statutory rules, the amount that our principal Russian operating subsidiary would be permitted to pay as a dividend to our parent company as of December 31, 2019 was approximately RUB 99,431 million (\$1,261.0 million).

We are required to pay 5% withholding tax on all dividends paid from our Russian operating subsidiaries to our parent company. Starting in 2014, we began to accrue for a 5% dividend withholding tax on the portion of the current year profit of our principal Russian operating subsidiary that is considered not to be permanently reinvested in Russia. We also provided in 2017 for a 5% dividend withholding tax on the portion of the profit for 2013 of our principal Russian operating subsidiary that was considered not to be indefinitely reinvested in Russia. As of December 31, 2019, the cumulative amount of unremitted earnings upon which dividend withholding taxes have not been provided is approximately RUB 83,531 million (\$1,059.4 million). We estimate that the amount of the unrecognized deferred tax liability related to these earnings is approximately RUB 4,177 million (\$53.0 million). See "Risk Factors — Taxes payable on dividends from our Russian operating subsidiaries to our parent company might not benefit from relief under the Netherlands-Russia tax treaty."

As of December 31, 2019, we had no outstanding indebtedness. We do not currently use any line of credit or other similar source of liquidity.

On March 3, 2020, we issued \$1,250.0 million principal amount (RUB 82,909 million as of the issue date) 0.75% convertible notes due 2025, for net proceeds of \$1,237.0 million (RUB 82,050 million as of the issue date).

Cash Flows

In summary, our cash flows were:

	Year ended December 31,		
	2017	2018	2019
	(in millions of RUB)		
Net cash provided by operating activities	23,772	28,212	44,379
Net cash (used in)/provided by investing activities	(7,788)	25,959	(49,136)
Net cash used in financing activities	(587)	(32,804)	(2,394)
Effect of exchange rate changes on cash	(976)	4,288	(5,282)

Cash provided by operating activities. Cash provided by operating activities consists of net income adjusted for non-cash items, including depreciation and amortization expense, operating lease right-of-use (ROU) assets amortization, amortization of debt discount and issuance costs, share-based compensation expense, deferred income taxes, foreign exchange gains and losses, effect of deconsolidation of Yandex.Market, goodwill impairment, amortization of content assets, income/losses from equity method investments, and the effect of changes in working capital.

Cash provided by operating activities increased by RUB 16,167 million from 2018 to 2019. This increase was primarily due to an increase of RUB 16,556 million in net cash from operations before changes in working capital, slightly offset by a decrease in cash provided by changes in working capital of RUB 389 million. Cash used in working capital was RUB 9,956 million in 2019 and slightly increased between the periods primarily due to an increase in cash outflow related to a change in content assets, partly compensated by an increase in cash inflow from a change in content liabilities, as well as a decrease in cash outflow related to accounts receivable, net in 2019 compared to 2018.

Cash provided by operating activities increased by RUB 4,440 million from 2017 to 2018. This increase was primarily due to an increase of RUB 9,091 million in net cash from operations before changes in working capital, partly offset by an increase in cash used in working capital of RUB 4,651 million. Cash used in working capital was RUB 9,567 million in 2018 and increased between the periods primarily due to a significant increase in cash outflow related to prepaid expenses and other assets, primarily arising from funds receivable mainly related to the Yandex.Taxi business and VAT reclaimable, as well as accounts receivable, net in 2018 compared to 2017.

We believe that our existing cash, cash equivalents and cash generated from operations will be sufficient to satisfy our currently anticipated cash requirements through at least the next 12 months. To the extent that our cash, cash equivalents and cash from operating activities are insufficient to fund our future activities, we may be required to raise additional funds through equity or debt financings, including bank credit arrangements. Additional financing may not be available on terms favorable to us or at all.

Cash (used in)/provided by investing activities.

Cash used in investing activities in 2019 decreased by RUB 75,095 million compared to 2018 as a result of increases in investment in term deposits (net of maturities) of RUB 69,885 million, and a decrease in cash provided by new businesses combinations (net of cash used in acquisitions) of RUB 20,191 million related to the business combination with Uber in February 2018, which were partly offset by a decrease in capital expenditures of RUB 7,780 million and effect of deconsolidation of cash and cash equivalents of Yandex.Market of RUB 2,181 million in 2018.

Cash provided by investing activities in 2018 increased by RUB 33,747 million compared to 2017 as a result of increases in maturities of term deposits (net of investments) of RUB 34,228 million, and an increase in cash provided by new business combinations (net of cash used in acquisitions) of RUB 20,762 million related to the business combination with Uber, which were partly eliminated by increases in capital expenditures of RUB 15,934 million, a decrease in

proceeds from debt securities of RUB 2,887 million and effect of deconsolidation of cash and cash equivalents of Yandex.Market of RUB 2,181 million.

Our total capital expenditures were RUB 20,543 million in 2019 and RUB 28,323 million in 2018. Our capital expenditures have historically consisted primarily of the purchases of servers and networking equipment. In 2018 they included the acquisition cost of the property site for our new Moscow headquarters, which amounted to RUB 9.7 billion. We also incurred significant capital expenditures in 2018 and 2019 related to the construction of one of our large data centers. To manage enhancements in our search technology, expected increases in internet traffic, advertising transactions and new services, and to support our overall business expansion, we will continue to invest in data center operations, technology, corporate facilities and information technology infrastructure in 2020 and thereafter. Moreover, we may spend a significant amount of cash on acquisitions and licensing transactions from time to time.

Cash used in financing activities.

For 2019, cash outflow from financing activities was RUB 2,394 million, primarily reflecting RUB 1,422 million used for repurchase of ordinary shares, RUB 747 million used in purchase of redeemable noncontrolling interests, and RUB 240 million paid for finance leases.

For 2018, cash outflow from financing activities was RUB 32,804 million, primarily reflecting RUB 21,281 million used for repayment of our outstanding convertible notes, RUB 10,085 million used in repurchase of our ordinary shares and RUB 1,504 million paid as contingent consideration.

Off-Balance Sheet Items

We do not currently engage in off-balance sheet financing arrangements, and do not have any material interest or obligation, including a contingent obligation, arising out of a variable interest, in entities referred to as variable interest entities, which include special purpose entities and other structured finance entities.

Contractual Obligations

The following table sets forth our contractual obligations as of December 31, 2019:

	Payments due by period				
	Total	Through 2020	2021 through 2022	2023 through 2024	Thereafter
	(in millions of RUB)				
Long-term operating cars lease obligations	10,724	7,059	3,665	—	—
Other long-term operating lease obligations	17,395	7,341	7,957	1,745	352
Long-term finance lease obligations	2,485	687	1,121	60	617
Data centers related purchase obligations	171	154	9	1	7
Other purchase obligations	9,175	4,715	3,740	653	67
Payments related to business acquisitions	127	64	30	33	—
Total contractual obligations	40,077	20,020	16,522	2,492	1,043

The table above presents our long-term rent obligations for our office and data center facilities, cars, contractual purchase obligations related to data center operations and facility build-outs, as well as other purchase obligations primarily related to utilities fees, content assets, devices production and other services and obligations. For agreements denominated in U.S. dollars, the amounts shown in the table above are based on the U.S. dollar/Russian ruble exchange rate prevailing on December 31, 2019. All amounts shown include value added tax, where applicable.

Critical Accounting Policies, Estimates and Assumptions

Our accounting policies affecting our financial condition and results of operations are more fully described in our consolidated financial statements for the years ended December 31, 2017, 2018 and 2019, included elsewhere in this Annual Report. The preparation of these consolidated financial statements requires us to make judgments in selecting appropriate assumptions for calculating financial estimates, which inherently contain some degree of uncertainty. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the

circumstances, the results of which form the basis of making judgments about the carrying values of assets and liabilities and the reported amounts of revenues and expenses that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe our critical accounting policies that affect the more significant judgments and estimates used in the preparation of our consolidated financial statements are as follows:

Tax Provisions

Significant judgment is required in evaluating our uncertain tax positions and determining our income tax expense. FASB authoritative guidance on accounting for uncertainty in income taxes requires a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Although we believe we have adequately reserved for our uncertain tax positions, no assurance can be given that the final tax outcome of these matters will not be different. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different from the amounts recorded, such differences will impact the income tax expense in the period in which such determination is made. The income tax expense includes the impact of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest. Our actual Russian taxes may be in excess of the estimated amount expensed to date and accrued as of December 31, 2019, due to ambiguities in, and the evolution of, Russian tax legislation, varying approaches by regional and local tax inspectors, and inconsistent rulings on technical matters at the judicial level. See "Risk Factors—Risks Related to Tax Matters—Changes in the tax systems in the countries in which we operate, or unpredictable or unforeseen application of existing rules, may materially adversely affect our business, financial condition and results of operations."

In addition, significant management judgment is required in determining whether deferred tax assets will be realized. A valuation allowance is recognized to reduce deferred tax assets to amounts that are more likely than not to ultimately be utilized based on our ability to generate sufficient future taxable income. Establishing or reducing a tax valuation allowance requires us to make assessments about the timing of future events, including the probability of expected future taxable income and available tax planning strategies. If actual events differ from management's estimates, or to the extent that these estimates are adjusted in the future, any changes in the valuation allowance could materially impact our consolidated financial statements.

Recognition and Impairment of Goodwill and Intangible Assets

The FASB authoritative guidance requires us to recognize the assets of businesses acquired and respective liabilities assumed based on their fair values. Our estimates of the fair value of the identified intangible assets of businesses acquired are based on our expectations of the future results of operations of such businesses. The fair value assigned to identifiable intangible assets acquired is supported by valuations that involve the use of a large number of estimates and assumptions provided by management.

We assess the carrying value of goodwill arising from business combinations on an annual basis, or more frequently if events or changes in circumstances indicate that such carrying value may not be recoverable. Other than our annual review, factors we consider important that could trigger an impairment review include under-performance of our reporting units compared with our internal budgets or changes in projected results, changes in the manner of utilization of the asset, and negative market conditions or economic trends. We determine whether impairment has occurred by assigning goodwill to the reporting unit identified in accordance with the authoritative guidance, and comparing the carrying amount of the reporting unit to the fair value of the reporting unit. We generally measure the fair value of the reporting unit by considering discounted estimated future cash flows using an appropriate discount rate. Therefore, our judgment as to the future prospects of our business has a significant impact on our results and financial condition. If these future prospects do not materialize as expected or there is a future adverse change in market conditions, we may be unable to recover the carrying amount of an asset, resulting in future impairment losses.

Share-Based Compensation Expense

We estimate the fair value of share options and share appreciation rights (together, "Share-Based Awards") that are expected to vest using the Black-Scholes-Merton (BSM) pricing model and recognize the fair value ratably over the requisite service period using the straight-line method. We used the following assumptions in our option-pricing model when valuing Share-Based Awards for grants made in the year ended December 31, 2019:

	2018	2019
Dividend yield	—	—
Expected annual volatility	39.0 %	39.4-41.1 %
Risk-free interest rate	2.72-2.90 %	1.64-1.88 %
Expected life of the awards (years)	7.07-7.11	5.91-6.05
Weighted-average grant date fair value of awards (per share)	\$ 14.62	\$ 15.97

No share appreciation rights grants were made for the years ended December 31, 2017, 2018 and 2019.

To determine the expected option term, we use the "simplified method" as allowed under the SEC's accounting guidance, which represents the weighted-average period during which our awards are expected to be outstanding.

With respect to price volatility, for 2018 and 2019 grants we used historical volatility of our own shares.

We base the risk-free interest rate on the U.S. Treasury yield curve in effect at the grant date.

We did not declare any external dividends with respect to 2017, 2018 or 2019 and do not have any plans to pay dividends in the near term. We therefore use an expected dividend yield of zero in our option pricing model for awards granted in the years ended December 31, 2018 and 2019.

Recent Accounting Pronouncements

See Note 2 — "Summary of Significant Accounting Policies" in the Notes to our consolidated financial statements included elsewhere in this Annual Report.

Quantitative and Qualitative Disclosures About Market Risk**Foreign Currency Exchange Risk**

The functional currency of our Russian operating subsidiaries, which account for the significant majority of our operations, is the Russian ruble. Therefore, our reported results of operations are impacted by fluctuations in exchange rates to the extent that we recognize foreign exchange gains and losses on monetary assets and liabilities denominated in currencies other than the ruble, primarily the U.S. dollar. Total U.S. dollar denominated cash, cash equivalents and term deposits held in Russia amounted to RUB 32,034 million and RUB 14,327 million as of December 31, 2019 and 2018, respectively. If the U.S. dollar had been stronger/weaker by 15% relative to the value of the Russian ruble as of December 31, we would have recognized additional foreign exchange gains/losses before tax of RUB 3,120 million and RUB 115 million in 2019 and 2018, respectively.

Furthermore, the revenues and expenses of our Russian operating subsidiaries are primarily denominated in Russian rubles. However, a major portion of our capital expenditures, primarily servers, networking and engineering equipment imported by Russian suppliers, as well as a portion of expenses denominated in a currency other than the Russian ruble, can be materially affected by changes in the dollar-ruble and euro-ruble exchange rate. In the event of a material appreciation of the U.S. dollar against the ruble, such as that which occurred in 2015 or early 2020, the ruble equivalents of these U.S. dollar-denominated expenditures increase and negatively impact our net income and cash flows.

The lease of our Moscow headquarters currently entails outstanding commitments of approximately RUB 13,766 million as of December 31, 2019. The rent under some leases we entered into before 2017 is denominated in U.S. dollars, but payable in rubles at the then-current exchange rate quoted by the Central Bank of Russia. The leases protect the landlord against depreciation of the U.S. dollar against the ruble. There are also some leases we entered into in 2017

and 2018 which contain protection of us as the lessee against appreciation of the U.S. dollar against the ruble. The landlord's protection from U.S. dollar depreciation and our protection from U.S. dollar appreciation represent embedded derivatives that must be bifurcated and accounted for separately under U.S. GAAP. At the end of each period, we re-measure the fair value of these embedded derivatives and record any change in fair value as foreign exchange gains or losses in the statements of income. We estimate the fair value of these derivative instrument using a model that is sensitive to changes in the U.S. dollar to Russian ruble exchange rate. If the U.S. dollar had been weaker by 15% relative to the value of the Russian ruble as of December 31, 2019, we would have recognized additional foreign exchange gains before tax of RUB 2 million in 2019. If the U.S. dollar had been stronger by 15% relative to the value of the Russian ruble as of December 31, 2019, we would have recognized additional foreign exchange losses before tax of RUB 2 million in 2019. In March 2017, we designated a portion of our U.S. dollar-denominated term deposits with a third party bank as a hedging instrument to protect us from risk that our U.S. dollar-denominated Moscow headquarters rent expenses will be adversely affected by changes in the exchange rates and to avoid income statement volatility. As of December 31, 2018, this deposit was used in full amount. See Note 6 — "Derivative and non-derivative financial instruments" in the Notes to our consolidated financial statements included elsewhere in this Annual Report.

The functional currency of our Dutch parent company is the U.S. dollar. The functional currency of our subsidiaries incorporated in other countries is generally the respective local currency. The financial statements of these non-Russian entities have been translated into rubles using the current rate method, where balance sheet items are translated into rubles at the period-end exchange rate and revenue and expenses are translated using a weighted average exchange rate for the relevant period. The resulting translation gains and losses for the years ended December 31, 2017, 2018 and 2019 are included as a foreign currency translation adjustment recorded as part of accumulated other comprehensive income on our consolidated balance sheets. U.S. dollar cash, cash equivalents and term deposits comprise the largest portion of our assets in the Netherlands. Total U.S. dollar denominated cash, cash equivalents and term deposits held in the Netherlands amounted to RUB 29,212 million and RUB 30,315 million as of December 31, 2019 and 2018, respectively. If the U.S. dollar had been stronger/weaker by 15% relative to the value of the Russian ruble as of December 31, 2019 we would have recognized additional other comprehensive gains/losses of RUB 5,301 million and RUB 5,136 million in 2019 and 2018, respectively.

Subsequent to December 31, 2019, the Russian ruble remained volatile against foreign currencies, including the U.S. dollar. The currency exchange rate as of December 31, 2019 was RUB 61.9057 to \$1.00 and, during the period from December 31, 2019 to March 30, 2020, the exchange rate of the Russian ruble depreciated to RUB 77.7325 to \$1.00. The lowest rate reached during this period was RUB 80.8815 to \$1.00 as of March 24, 2020. The highest rate reached during this period was RUB 60.9474 to \$1.00 as of January 14, 2020.

Interest Rate Risk

We had cash, cash equivalents and term deposits of RUB 88,306 million as of December 31, 2019. We do not believe that we have any material exposure to changes in the fair value of our cash, cash equivalents and term deposits as a result of changes in interest rates. We do not enter into investments for trading or speculative purposes. Declines in interest rates, however, will reduce future investment income.

In December 2013 and January 2014, we issued and sold \$690.0 million in aggregate principal amount of 1.125% convertible senior notes due December 15, 2018. During 2015, we repurchased and retired an aggregate of \$119.4 million principal amount of the outstanding notes for \$102.3 million. During 2016, we repurchased and retired an aggregate of \$87.4 million principal amount of the outstanding notes for \$82.0 million. During 2017, we repurchased and retired an aggregate of \$12.0 million principal amount of the outstanding notes for \$11.6 million. We carried the convertible notes at face value less unamortized discount and debt issuance costs on our balance sheet. The fair value of the notes changed when the market price of our shares or interest rates fluctuate. During 2018 we repaid in full the remaining amount of outstanding principal in respect of convertible debt notes in the face amount of \$321.3 million and did not repurchase outstanding notes before the due date.

On March 3, 2020, we issued \$1,250.0 million principal amount (RUB 82,909 million as of the issue date) 0.75% convertible notes due 2025, for net proceeds of \$1,237.0 million (RUB 82,050 million as of the issue date).

Corporate Governance

The principal standing committees of our board of directors are an audit committee, a compensation committee, a nominating committee, a corporate governance committee, an investment committee and a public interest committee. We have adopted a charter for each of these committees.

Audit Committee

Our audit committee consists of three members, Messrs. Ryan (chairperson), Boynton and Strebulaev. Each member satisfies the “independence” requirements of the NASDAQ listing standards, and Mr. Ryan qualifies as an “audit committee financial expert,” as defined in Item 16A of Form 20-F and as determined by our board of directors. The audit committee oversees our accounting and financial reporting processes and the audits of our consolidated financial

statements. The audit committee is responsible for, among other things:

- making recommendations to our board of directors regarding the appointment by the shareholders of our independent auditors;
- coordinating our board's oversight of the internal control over financial reporting, disclosure controls and procedures and code of conduct;
- overseeing the work of the independent auditors, including resolving disagreements between management and the independent auditors relating to financial reporting;
- pre-approving all audit and non-audit services permitted to be performed by the independent auditors;
- reviewing the independence and quality control procedures of the independent auditors;
- discussing material off-balance sheet transactions, arrangements and obligations with management and the independent auditors;
- reviewing and approving all proposed related-party transactions;

- attending to such other matters as are specifically delegated to our audit committee by our board of directors from time to time.

Compensation Committee

Our compensation committee consists of three members, Messrs. Rijnja (chairperson), Boynton and Ms. Dyson. Each member satisfies the "independence" requirements of the NASDAQ listing standards. The compensation committee assists the board of directors in reviewing and approving or recommending our compensation structure, including all forms of compensation relating to our directors and management. Members of our management may not be present at any committee meeting while the compensation of our chief executive officer is deliberated. Subject to the terms of the remuneration policy approved by our general meeting of shareholders from time to time, as required by Dutch law, the compensation committee is responsible for, among other things:

- attending to such other matters as are specifically delegated to our compensation committee by our board of directors from time to time.

Corporate Governance Committee

Our corporate governance committee consists of three members, none of whom may be a designated director. The current members are Messrs. Boynton (chairperson), Rijnja and Voloshin, each of whom satisfies the “independence” requirements of the NASDAQ listing standards. The corporate governance committee is responsible for, among other things:

- considering, preparing and recommending to the board of directors a set of corporate governance guidelines applicable to the company;
- recommending to our board of directors persons to be appointed to each committee of the board of directors, other than the nominating committee and the public interest committee; and
- overseeing the board of directors’ annual review of its own performance and the performance of its committees.

Nominating Committee

Our nominating committee consists of five members and is divided into two subcommittees. The nominating committee is responsible for, among other things, selecting and recommending to the board of directors persons to be nominated for election or re-election as directors at any general meeting of the shareholders.

Subcommittee I consists of one designated director, one director with a Russian passport and residency, and one other director. Subcommittee I is responsible for the recommendation to our board of directors for nomination of four directors (the “Class I Directors”), who will then be subject to the approval of our board of directors as a whole. The designated director will have the right to veto any candidates for such slots, provided that the exercise of such veto has first been approved by the Public Interest Foundation. The initial Class I Directors are Herman Gref, Mikhail Parakhin, Charles Ryan and Ilya Strebulaev.

Subcommittee II consists of three directors who are not Class I Directors and will, by simple majority, recommend to our board of directors for nomination six directors (the “Class II Directors”); the designated directors will have no right of veto over candidates for these seats. Our board of directors must adopt the recommendations of candidates recommended by Subcommittee II, unless our board of directors votes by a supermajority of ten directors (subject to adjustment for board vacancies) to reject such recommendation.

Investment Committee

Our investment committee consists of Messrs. Ryan (chairperson), Boynton, Volozh and Ms. Dyson. The investment committee advises the board of directors and the company’s management regarding potential corporate transactions, including strategic investments, mergers, acquisitions and divestitures. - assisting management and the board of directors with the identification of opportunities of potential corporate transactions;
- reviewing, and providing guidance to management and the board of directors with respect to potential corporate transactions, including the structure, timing or other terms or conditions of such transactions;
- overseeing the due diligence process with respect to potential corporate transaction; and
- monitoring and reporting to the board of directors regarding the implementation of any potential corporate transaction and the integration of any completed transaction.

Public Interest Committee

Our public interest committee consists of three members comprised of the then-current Chief Executive Officer and both of the designated directors. The current members of our public interest committee are Messrs. Volozh (chairperson), Yakovitsky and Komissarov. The public interest committee has no decision-making power on ordinary course matters and is responsible for decisions on the following key sensitive matters deemed to be of public interest:

- transactions or other transfers resulting in the granting of direct access to Russian users' personal data owned by us and non-depersonalized big data owned by us to non-Russian persons;
- the adoption, modification, amendment, and cancellation of the Yandex internal policies on protection of personal data and non-depersonalized big data of Russian users (including storage procedures, and sale/provision of such information to foreign persons);
- entry by the Company into any agreement which concerns Russia with a non-Russian state or an international intergovernmental organization (or its bodies and agencies); and
- direct or indirect transfers or encumbrances of material intellectual property rights, including licensing such rights, if as a result of such license the Company would lose the ability to use such rights in Russia.

Our board of directors cannot act in respect of any of these specified matters prior to receiving a recommendation from the public interest committee. If the public interest committee does not approve the matter referred to it, our board of directors will follow the decision of the public interest committee, unless the board rejects such decision by either (i) a supermajority of eight votes (subject to adjustment for board vacancies), which must include the affirmative votes of the two designated directors; or (ii) a supermajority of eight votes (subject to adjustment for board vacancies) (not including the affirmative votes of the two designated directors), provided that the public interest foundation board has given its approval.

Employment Agreements

Substantially all of our employees are employed by our operating subsidiaries. Our employment agreements generally contain the minimum statutory notice periods required under Russian or other local law. The employment agreements between our subsidiaries and certain senior managers and other employees contain non-competition and non-solicitation provisions, although we understand that such provisions are generally unenforceable under Russian law.

Employees

The following table indicates the composition of our workforce as of December 31 each year indicated:

	2017	2018	2019
Russia	7,166	8,318	9,693
Other	279	449	399
Total	7,445	8,767	10,092
	2017	2018	2019
Product development	4,290	4,582	5,784
Sales, general and administration	2,716	3,712	3,808
Cost of sales	439	473	500
Total	7,445	8,767	10,092

The number of employees as of December 31, 2017 included employees of the Yandex.Market before its deconsolidation in April 2018, as described in Note 4 to our consolidated financial statements. This was partly compensated by a headcount reclassification from sales, general and administrative, which we implemented to ensure consistency in internal reporting for positions that we treat as outsourced labor.

We also typically employ several hundred contract workers on a part-time basis which are not reflected in the table above, and the numbers of such contract workers generally vary in line with the numbers of full-time staff.

Our employees are not represented by any collective bargaining agreements and we have never experienced a work stoppage. We believe our employee relations are good.

Employee Plans

We grant equity awards in the form of share options, share appreciation rights, restricted shares and restricted share units (or so called "deferred shares") under our Fourth Amended and Restated 2007 Equity Incentive Plan (the "2007 Plan") and our 2016 Equity Incentive Plan (the "2016 Plan" and together with the 2007 Plan, the "Plans") ("Company Awards"). Our 2016 Plan was approved at our 2016 annual general meeting of shareholders on May 27, 2016 and replaced our 2007 Plan. However, there remain unexercised grants under our 2007 Plan. The total number of shares available for issuance under the Plans is equal to 20% of the aggregate number of Class A and Class B shares outstanding from time to time.

Additionally, the 2016 Plan provides employees at certain of our business units, including Taxi, Classifieds and Market (the "Participating Subsidiaries"), the opportunity to receive equity awards in respect of such Participating Subsidiary (the "Business Unit Equity Awards"). Business Unit Equity Awards and any awards granted to management of the Participating Subsidiaries outside of the 2016 Plan are to not exceed 20% of such Participating Subsidiary's shares issued and outstanding from time to time. In the future, additional of our business units may become Participating Subsidiaries.

Plan administration. Our board of directors or its compensation committee administers our Plans. Although our Plans sets forth certain terms and conditions of our equity awards, our board of directors or its compensation committee determines the provisions and terms and conditions of each grant. These include, among other things, the vesting schedule, repurchase provisions, forfeiture provisions, and form of payment upon exercise.

Eligibility. We may grant Company Awards to employees and directors of and consultants to our company and its subsidiaries. With respect to Business Unit Equity Awards, we may grant awards in the equity of a Participating Subsidiary to employees, officers, members of the board of directors, advisors and consultants of such Participating Subsidiary.

Exercise price and term of equity awards. With respect to the Company Awards, the exercise price of options or measurement price of share appreciation rights awards is the average closing price per Class A share on the NASDAQ Global Select Market on the 20 trading days immediately following the grant date. With respect to Business Unit Equity Awards, the exercise price of options or measurement price of share appreciation rights shall be determined from time to

time by the Board (following consultation with an independent valuation expert). Restricted share unit awards have no exercise or measurement price. Equity awards are generally exercisable up until the tenth anniversary of the grant date so long as the grantee's relationship with us has not terminated.

Vesting schedule. The notice of grant specifies the vesting schedule. Awards generally vest over a four-year period, with four-sixteenths vesting on the first anniversary of grant and an additional one-sixteenth vesting each quarter thereafter. When a grantee's employment or service is terminated, the grantee may generally exercise his or her options that have vested as of the termination date within ninety days of termination or as determined by our plan administrator.

Class A and Class B Shares. Outstanding options granted prior to October 2008 may be exercised, pursuant to their terms and the terms of the 2007 Plan, as follows:

- In the event that an optionee intends to exercise an option and immediately sell the shares acquired, we will issue Class A shares upon such exercise.

- In the event that an optionee intends to exercise an option and hold the shares acquired for some period of time, we will issue Class B shares upon such exercise. Such Class B shares will be subject to the transfer and conversion provisions applicable to all Class B shares.

Equity awards granted since October 2008 are in respect of Class A shares only, in accordance with their terms and the terms of the Plans.

Amendment and Termination. Our board of directors may at any time amend, suspend or terminate our 2016 Plan. Prior to any such amendment, suspension or termination, our board of directors must first make a determination that share options already granted will not be adversely affected. Unless terminated earlier, our 2016 Plan will continue in effect until May 2026.

Equity Award Exchanges.

In February 2018, we made an offer to our senior employees of one of our Business units to exchange up to an aggregate of 425,230 of their outstanding Business Unit Equity Awards for an aggregate of 2,029,987 RSUs. The replacement RSUs are fully vested.

As of February 20, 2020, there was one holder of record of Class A shares (Cede & Co., as nominee for DTC) located in the United States, which held approximately 99.98% of our outstanding Class A shares by number, which represented approximately 44.15% of our outstanding shares by voting power.

Related Party Transactions

Shareholders' Agreement

Shareholders holding an aggregate of approximately 46 million Class A and Class B shares, representing approximately 55% of the voting power of our outstanding shares, are parties to a shareholders agreement, the principal terms of which are as follows:

Board composition. The parties have agreed to vote all of our shares held by them in favor of electing or re-electing those persons nominated by our board of directors for election or re-election as a director at any general meeting of our shareholders.

Compliance with foreign ownership laws. The parties have agreed to comply with any applicable laws from time to time in effect that regulate the owners of Yandex by non-Russian parties.

Amendments to articles of association. The parties have agreed that they will vote against any proposal to amend the articles of association in such a way as to eliminate:

- our multiple class share structure, with differential voting rights;
- the staggered three-year terms of our directors;
- the provision that our directors may only be removed by a two-thirds majority of votes cast representing at least 50% of our outstanding share capital;
- requirements that certain matters, including an amendment of our articles of association, may only be brought to our shareholders for a vote upon a proposal by our board of directors;
- the supermajority requirements for shareholder approval of certain significant corporate actions, including a legal merger or demerger of our company or the amendment of our articles of association;
- the right of our board of directors to approve the accumulation by a party, group of related parties or parties acting in concert of the legal or beneficial ownership of 10% or more, in number or by voting power, of our outstanding Class A and Class B shares (taken together); or
- the rights of the holder of the priority share.

Term and Amendment. The shareholders agreement will remain in effect so long as any Class B shares remain outstanding. The agreement may be terminated and amended, and any provision thereof waived, with the prior written consent of parties to the agreement holding shares representing two-thirds or more of the voting power of the outstanding share capital held by parties to the agreement. The agreement will terminate with respect to any particular shareholder upon its affirmative election if it no longer holds any Class B Shares, as a result of the transfer of all Class B shares held by it, or the voluntary or mandatory conversion of all Class B Shares held by it into Class A Shares.

Registration Rights Agreement

We are party to a registration rights agreement with our major shareholders that allows them to require us to register Class A shares held by them under the U.S. Securities Act of 1933, as amended (the "Securities Act"), under certain circumstances.

Demand registration rights. Shareholders party to the agreement together holding approximately 34 million Class A and Class B shares have the right to require that we register their securities for sale. Certain other shareholders have the right to join in a demand registration. We have the right not to effect a demand registration (a) if we have already effected one demand registration, (b) if the aggregate price, net of underwriters' discounts or commissions, of all registrable securities included in such registration is less than \$7,500,000, (c) if the initiating shareholders propose to register securities that may be immediately registered on Form F-3, or (d) in a jurisdiction where we would be required to qualify to do business or execute a general consent to service of process in effecting such a registration. We have the right to defer filing of a registration statement for up to 120 days if our board of directors determines in good faith that filing of a registration statement would be detrimental to us, but we cannot exercise such deferral right more than once in any 12-month period.

Piggyback registration rights. If we propose to file a registration statement for a public offering of our securities other than relating to an employee share option, share purchase or similar plan or pursuant to a merger, exchange offer, or similar transaction, then we must offer holders of registrable securities an opportunity to include in this registration all or any part of their registrable securities. We must use our best effort to cause the underwriters in any underwritten offering to permit the shareholders who so requested to include their shares on the same terms and conditions as our securities to be registered.

Form F-3 registration rights. When we are eligible to use Form F-3, one or more shareholders party to the agreement holding shares with an aggregate market value of at least \$50,000,000 have the right to request that we file a registration statement on Form F-3. We are not obligated to file a registration statement on Form F-3 if (a) we have already effected two registrations on Form F-3 for holders of registrable securities during the 12-month period preceding a registration request, (b) the aggregate price, net of underwriters' commissions or discounts, of registrable securities included in such registration is less than \$10 million, or (c) in a jurisdiction where we would be required to qualify to do business or execute a general consent to service of process in effecting such a registration. We have the right to defer filing of a registration statement for up to 120 days if our board of directors determines in good faith that filing of a registration statement would be detrimental to us, but we cannot exercise such deferral right more than once in any 12-month period.

Expenses of registration. We will pay all expenses relating to any demand, piggyback or F-3 registration, other than underwriting commissions and discounts.

Relationship with Sberbank

Sberbank is a major financial institution and the largest savings bank in the Russian Federation. Approximately 51% of its voting shares are held by the Central Bank of the Russian Federation. Herman Gref, the Chief Executive Officer and Chairman of the Executive Board of Sberbank, is a member of our Board of Directors.

Yandex.Money Joint Venture

In July 2013, we sold a 75 percent (less 1 ruble) interest in our Yandex.Money business to Sberbank for \$60 million in cash and entered into a joint venture arrangement with Sberbank in respect of the future operation of this business, which continues under the Yandex.Money brand. Our joint venture agreement with Sberbank provides for standard minority protections and addresses corporate governance matters such as veto rights, deadlock mechanisms and rights of first refusal and co-sale.

Following the sale of the controlling interest and the deconsolidation of Yandex.Money in July 2013, we retained a noncontrolling interest and significant influence over Yandex.Money's business. We continue to use Yandex.Money for payment processing and to provide other services. In 2018, we also subleased to Yandex.Money part of our premises. The amount of revenues from subleasing and other services was RUB 51 million and RUB 37 million (\$0.5 million) for the years ended December 31, 2018 and 2019, respectively. The amount of fees for online payment commissions was RUB 432 million and RUB 783 million (\$9.9 million) for the years ended December 31, 2018 and 2019 respectively. As of December 31, 2018 and 2019, the amount of accounts receivable from Yandex.Money was RUB 344 million and RUB 214 million (\$2.7 million) and the amount of accounts payable to Yandex.Money was nil and RUB 13 million (\$0.2 million), respectively. We believe that the terms of the agreements with Yandex.Money are comparable to the terms obtained in arm's-length transactions with unrelated similarly situated customers and suppliers

Yandex.Market Joint Venture

Following the formation of Yandex.Market joint venture with Sberbank and the deconsolidation of Yandex.Market in April 2018, we retained a noncontrolling interest and significant influence over Yandex.Market's business. We continue to provide advertising and other services and to sublease to Yandex.Market part of our premises. In 2019, we also acquired traffic and content from Yandex.Market. The amount of revenues from advertising services was RUB 469 million and RUB 805 million (\$10.2 million) for the years ended December 31, 2018 and 2019 respectively. The amount of revenues from subleasing and other services was RUB 1,001 million and RUB 1,738 million (\$22.0 million) for the years ended December 31, 2018 and 2019, respectively. The amount of related cost of revenues was RUB 29 million (\$0.4 million) for the year ended December 31, 2019. As of December 31, 2018 and 2019, the amount of accounts receivable from Yandex.Market was RUB 407 million and RUB 318 million (\$4.0 million) and the amount of accounts payable was RUB 70 million and RUB 11 million (\$0.1 million), respectively.

Internet-acquiring agreement with Sberbank

In October 2017, we entered into an internet-acquiring agreement with Sberbank. The amount of fees was RUB 844 million and RUB 1,760 million (\$22.3 million) for the years ended December 31, 2018 and 2019, respectively. As of December 31, 2018 and 2019, the amount of accounts receivable related to internet-acquiring was RUB 1,081 million and RUB 468 million (\$5.9 million).

Other agreements with Sberbank

The Company may from time to time in the ordinary course of business enter into other transactions with Sberbank group companies.

Loans granted to related parties

As of December 31, 2018 and 2019, we had loans outstanding in the aggregate principal amount of RUB 207 million and RUB 43 million (\$0.5 million), respectively, to the CEOs of our business units, principally in connection with their purchase of equity interests in those subsidiaries, and to certain senior employees. The interest rate on the loans is up to 12% per annum and they mature in 2020-2029.

Item 8. Financial Information.

See the financial statements beginning on page F-1.

Dividends

We do not have any present plan to pay cash dividends on our shares in the near term. Any future determination as to the declaration and payment of dividends, if any, will be at the discretion of our board of directors and will depend on then existing conditions, including our financial condition, operating results, contractual restrictions, capital requirements, business prospects and other factors our board of directors may deem relevant.

If and when we pay dividends in the future, they will be payable on a *pari passu* basis on the outstanding Class A and Class B shares and the priority share. Although our Class C shares are technically entitled to a maximum dividend of €0.01 per share when we declare dividends on our Class A and Class B shares, we intend to repurchase all Class C shares issued upon conversion of our Class B shares promptly following their issuance such that no dividends would be payable on our Class C shares. Cash dividends on our shares, if any, will be paid in U.S. dollars.

Item 9. The Listing.

currently listed in the Listing A Level 1, top quotation list on MOEX, under the symbol “YNDX”.

Item 10. Additional Information.

Memorandum and Articles of Association

We incorporate into this Annual Report the description of our amended articles of association contained in our F-1 registration statement (File No. 333-173766) originally filed with the SEC on April 28, 2011, as amended. Our articles of association were amended as of May 21, 2012, May 22, 2013, May 23, 2014, May 22, 2015 and June 1, 2016. Such amendments reduced the number of authorized shares upon the conversion of our Class B shares into Class A shares or were technical in nature to conform with changes in the requirements of Dutch law. On December 23, 2019, our articles of association were further amended in connection with our restructuring. See also “Item 4. Information on the Company – Governance Structure”.

Material Contracts

Convertible debt

In the first quarter of 2020 we issued and sold \$1.25 billion in aggregate principal amount of 0.75% convertible senior notes due 2025, to institutional investors that are not U.S. persons, outside the United States, in reliance on Regulation S under the U.S. Securities Act of 1933, as amended.

In connection with the offering of the notes, we entered into a Trust Deed, dated March 3, 2020, with BNY Mellon Corporate Trustee Services Limited, as trustee. The Trust Deed includes the terms and conditions upon which the notes are to be authenticated, issued and delivered. The notes are convertible into cash, our Class A shares or a combination of cash and our Class A shares, at our election, based on an initial conversion rate 47.5% premium above the reference share price of \$40.7289. The reference share price was calculated by taking the volume weighted average price of our Class A shares between opening and closing of trading on the NASDAQ Global Select Market on February 25, 2020. Accordingly, the corresponding initial conversion price is approximately \$60.0751 per Class A share, subject to adjustment on the occurrence of certain events. Prior to March 18, 2023, the notes are convertible only upon the occurrence of certain events and during certain periods, and thereafter, at any time until the close of business on the business day immediately preceding the maturity date of the notes.

The notes bear interest at a rate of 0.75% per year, payable semi-annually in arrears on September 3rd and March 3rd of each year, beginning on September 3rd, 2020. The notes mature on March 3, 2025, unless earlier repurchased, redeemed or converted in accordance with their terms. The notes are senior unsecured obligations and we do not have the right to redeem the notes prior to maturity, except in connection with certain changes in tax laws.

The net proceeds from the convertible note offering were approximately \$1.237 billion, after deducting the initial purchasers’ discount and estimated offering expenses.

Yandex.Taxi joint venture with Uber

Contribution Agreement with respect to Yandex.Taxi

On July 13, 2017, we entered into a Contribution Agreement (the “Contribution Agreement”) with Uber International C.V. (“Uber”), a wholly owned subsidiary of Uber Technologies, Inc., to combine Yandex.Taxi and the ride-hailing, food delivery and related logistics businesses of Uber in Russia and neighboring countries. On February 7, 2018, the transaction contemplated by the Contribution Agreement was closed.

As of December 31, 2019, the combined business operated in Russia, Armenia, Azerbaijan, Belarus, Côte d’Ivoire, Estonia, Finland, Georgia, Ghana, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Romania, Serbia and Uzbekistan.

Pursuant to the Contribution Agreement, the parties contributed their respective businesses within the territories to a newly formed Dutch company, MLU B.V. (“MLU”). In addition, Yandex contributed \$100 million in cash and Uber contributed \$225 million in cash to MLU at closing. Further, Yandex sold Uber an additional 2% stake in MLU in

exchange for shares of Class A common stock of Uber. As of December 2019, MLU is owned approximately 61.00% by Yandex, 37.96% by Uber and 1.04% by the employees based on the total number of outstanding shares.

The Contribution Agreement contains warranties, indemnities and covenants customary for a joint venture combination of this nature.

Both parties have licensed their respective brands to MLU for use in the territories. In addition, Yandex licensed its core maps, location-based services and related technology to MLU. The MLU business now operates on the existing Yandex.Taxi technology platform.

Uber granted Yandex a right to require Uber to repurchase the Uber Class A shares received by Yandex in respect of the secondary sale described above, and Uber has a right to require Yandex to sell such Uber shares back to Uber during such period, in each case at an agreed valuation and during an agreed time period.

At closing and in connection with the Contribution Agreement, Yandex and Uber entered into a deed of covenant, pursuant to which each agreed to accept certain restrictive covenants towards MLU in the ride-hailing, food delivery, and related logistics business in the territories for an agreed period, as well as certain non-solicitation restrictions with respect to employees of MLU.

Shareholders Agreement with respect to Yandex.Taxi

On February 7, 2018, Yandex and Uber entered into a shareholders agreement (the "Shareholders Agreement") in respect of the governance and operation of MLU. Pursuant to the Shareholders Agreement, Yandex has the right to appoint a majority of the members of the supervisory board of MLU. As a significant minority shareholder, Uber has protective rights customary for a joint venture of this nature. Both parties have agreed to customary restrictions on transfer of their shares in MLU, as well as customary rights of first refusal, tag-along, drag-along and public offering registration rights.

Yandex.Market joint venture with Sberbank

Subscription Agreement with respect to Yandex.Market

On December 12, 2017, we and our wholly owned subsidiary Yandex.Market B.V. entered into a subscription agreement (the "Subscription Agreement") with Public Joint Stock Company "Sberbank of Russia" ("Sberbank").

Pursuant to the Subscription Agreement, an affiliate of Sberbank subscribed for new ordinary shares of Yandex.Market for 30 billion rubles (approximately \$500 million as of signing). As a result of the transaction, Yandex and Sberbank each own approximately 45% of the issued shares in the capital of Yandex.Market; 10% is held by an equity incentive foundation to facilitate current and future equity ownership by management and employees of Yandex.Market. The Subscription Agreement contains warranties, indemnities and covenants customary for a transaction of this nature.

Yandex.Market engages in e-commerce, with a core focus on a B2C online retail marketplace. In the Russian Federation, other CIS states, Baltics states and Georgia, the principal shareholders can engage in the core business solely through Yandex.Market.

We continue to provide to Yandex.Market the rights to use the Yandex.Market brand, as well as technology, promotion and related services, all of which on arms' length terms. Sberbank has also entered into an agreement with Yandex.Market to provide promotion and related services on arms' length terms.

Shareholders Agreement with respect to Yandex.Market

At the closing of the Yandex.Market joint venture described above, we, Sberbank and Yandex.Market, among others, entered into a shareholders' agreement (the "Shareholders' Agreement") in respect of the governance and operation of Yandex.Market. Pursuant to the Shareholders' Agreement, the board of directors of Yandex.Market has seven members: three are appointed by Yandex.Market (one of whom is independent of Yandex); three are appointed by Sberbank (one of whom is independent of Sberbank); and the fourth is initially the Chief Executive Officer of

Yandex.Market. Each principal shareholder has protective rights customary for a joint venture of this nature. Both parties agreed to customary restrictions on transfer of their shares in Yandex.Market, as well as customary rights of first refusal, tag-along, drag-along and public offering initiation. Yandex and Sberbank also agreed to certain restrictive covenants in the exclusive territories, as well as certain non-solicitation restrictions with respect to employees of Yandex.Market. The transaction was closed on April 27, 2018.

Sale and Purchase Agreement with Respect to the Property Site for the New Moscow Headquarters

In December 2018, we announced the purchase of rights to a land plot of approximately 4 hectares situated at 15 Kosygina Street, Moscow, Russia ("Property Site").

In connection with the acquisition of the Property Site, we, directly and indirectly, entered into a series of agreements with Orlenok Hotel Complex OJSC, the owner of the principal facility on the Property Site, as well as a number of additional owners of smaller adjacent facilities and lease rights to the land. We have acquired the rights to the land, buildings and fixtures, including the underlying long-term land leases from the Moscow City government related to the land plot. In particular, on November 27, 2018 we entered into a sale and purchase agreement with a special purpose vehicle NAPA LLC which aggregated all the rights to the Property Site and the facilities on the Property Site.

The total aggregate acquisition cost of the Property Site is approximately US\$145 million (exclusive of 18% VAT). The transaction agreements contain representations, warranties and undertakings customary for a transaction of this nature, including a condition that all purchases and sales of individual facilities be completed simultaneously, as well as a condition that appropriate additional governmental approvals and permits be obtained.

Vezeet Transaction

On July 14, 2019, MLU B.V. entered into an agreement to purchase 100% of the issued share capital of Axelcroft Limited (the "SPA") from Fasten CY limited ("Fasten"). Fasten operates taxi business under a number of brands, including Vezeet and Rutaxi, in over 100 Russian cities.

In connection with the SPA, Fasten has undertaken to complete a pre-completion restructuring of the Vezeet business. As a result of the restructuring, Axelcroft Limited will become the holding company of the Vezeet group, which will be comprised of material intellectual property and call centers. Following completion of the transaction, the parties intend to fully integrate the Vezeet business operations into the operations of Yandex.Taxi.

Pursuant to the SPA, upon the completion of the transaction and subject to the parties' mutual integration obligations, Fasten will receive (i) up to \$71.5 million in cash and (ii) up to 3.6% of the issued share capital of MLU B.V., each (i) and (ii) subject to adjustments depending on operating and integration milestones and KPIs.

The SPA contains conditions precedent, warranties, indemnities and covenants customary for transactions of this nature. Completion of the transaction is conditional, among other things, on receipt of a merger control clearance by MLU B.V. from the Russian antitrust authority.

Exchange Controls

Under existing laws of the Netherlands, there are no exchange controls applicable to the transfer to persons outside of the Netherlands of dividends or other distributions with respect to, or of the proceeds from the sale of, shares of a Dutch company.

Taxation

Taxation in the Netherlands

General

The information set out below is a general summary of the material Dutch tax consequences in connection with the acquisition, ownership and transfer of our Class A shares. The summary does not purport to be a comprehensive description of all the Dutch tax considerations that may be relevant for a particular holder of our Class A shares, who

may be subject to special tax treatment under any applicable law, and this summary is not intended to be applicable in respect of all categories of holders of the Class A shares. In particular, this summary is not applicable in respect of any holder who is, is deemed to be or is treated as a resident of the Netherlands for Dutch tax purposes nor to a holder that holds, alone or together with his partner, whether directly or indirectly, the ownership of, or certain other rights over, shares representing 5% or more of our total issued and outstanding capital (or the issued and outstanding capital of any class of shares), or rights to acquire shares, whether or not already issued, that represent at any time 5% or more of our total issued and outstanding capital (or the issued and outstanding capital of any class of shares) or the ownership of, or certain other rights over, profit participating certificates that relate to 5% or more of the annual profit and/or to 5% or more of our liquidation proceeds. Such interest in our Class A shares is further referred to as a Substantial Interest (*aanmerkelijk belang*).

Please note that under Dutch tax law an individual is considered as a holder of Class A shares as well if he/she is deemed to hold an interest in the Class A shares pursuant to the attribution rules of article 2.14a of the Dutch Income Tax Act 2001, with respect to property that has been segregated, for instance in a trust or a foundation.

The summary is based upon the tax laws of the Netherlands as in effect on the date of this Annual Report, as well as regulations, rulings and decisions of the Netherlands and its taxing and other authorities available on or before such date and now in effect. All references in this summary to the Netherlands and Netherlands law are to the European part of the Kingdom of The Netherlands and its law, respectively, only. All of the foregoing is subject to change, which could apply retroactively and could affect the continuing validity of this summary. As this is a general summary, we recommend that investors or shareholders consult with their own tax advisors as to the Dutch or other tax consequences of the acquisition, ownership and transfer of our Class A shares, including, in particular, the application to their particular situations of the tax considerations discussed below.

The following summary does not address the tax consequences arising in any jurisdiction other than the Netherlands in connection with the acquisition, ownership and transfer of our Class A shares.

Our company currently takes the view that it is a resident of the Netherlands for tax purposes, including for purposes of tax treaties concluded by the Netherlands, and this summary so assumes. This summary further assumes that the holders of Class A shares will be treated for Dutch tax purposes as the absolute beneficial owners of those Class A shares and any dividends (as defined below) received or realized with respect to such shares.

Dividend Withholding Tax

General

Dividends paid on the Class A shares to a holder of such shares are generally subject to Dutch dividend withholding tax at a rate of 15%. The term “dividends” for this purpose includes, but is not limited to:

- distributions in cash or in kind, deemed and constructive distributions, and repayments of paid-in capital not recognized for Dutch dividend withholding tax purposes;
- liquidation proceeds, proceeds of redemption of shares or, generally, consideration for the repurchase of shares in excess of the average paid-in capital recognized for Dutch dividend withholding tax purposes;
- the par value of shares issued to a shareholder or an increase of the par value of shares, as the case may be, to the extent that it does not appear that a contribution to the capital recognized for Dutch dividend withholding tax purposes was made or will be made; and
- partial repayment of paid-in capital, recognized for Dutch dividend withholding tax purposes, if and to the extent that there are net profits (*zuivere winst*), within the meaning of the Dutch Dividend Withholding Tax Act 1965 (*Wet op de dividendbelasting 1965*), unless the general meeting of our shareholders has resolved in advance to make such a repayment and provided that the par value of the shares concerned has been reduced by a corresponding amount by way of an amendment of our articles of association.

Generally we are responsible for the withholding of taxes at source and the remittance of the amounts withheld to the Dutch tax authorities; the dividend withholding tax will not be for our account.

If we have received a profit distribution from a foreign subsidiary located (a) in a jurisdiction with which the Netherlands has concluded a treaty for the avoidance of double taxation or (b) in Bonaire, St. Eustatius, Saba, Aruba, Curacao or St. Maarten, in which subsidiary we hold at least 25% of the nominal paid-up capital or if the relevant tax treaty therein provides, we hold at least 25% of the voting rights, which distribution is exempt from Dutch corporate income tax and has been subject to a foreign withholding tax of at least 5%, we are not required to transfer to the Dutch tax authorities the full amount of Dutch dividend withholding tax in respect of dividends distributed by our company. The amount that does not have to be transferred to the Dutch tax authorities can generally not exceed the lesser of (i) 3% of the portion of the dividends distributed by our company that is subject to Dutch dividend withholding tax; and (ii) 3% of the profit distributions our company received from qualifying foreign subsidiaries in the calendar year in which our company distributes the dividends (up to the moment of such dividend distribution) and the two previous calendar years; further limitations and conditions apply.

The amount of Dutch withholding tax that we may retain reduces the amount of dividend withholding tax that we are required to pay to the Dutch tax authorities, but does not reduce the amount of tax we are required to withhold from dividends paid to a holder of our Class A shares. Upon request, a holder of our Class A shares will be notified by our company of the amount of the Dutch withholding tax that was retained by us.

Non-residents of the Netherlands (including but not limited to U.S. holders)

The following is a description of the material Dutch tax consequences of holders of our Class A shares who under certain circumstances may not be subject to the above described 15% Dutch dividend withholding tax.

Entities (i) that are resident in another EU Member State, in a State of the European Economic Area (the "EEA") i.e. Iceland, Norway and Liechtenstein, or a country outside the EU/EEA which has an arrangement for the exchange of tax information with the Netherlands; and (ii) that are not subject to taxation by reference to profits in such State, in principle have the possibility to obtain a full refund of Dutch dividend withholding tax, provided such entities would not have been subject to Dutch corporate income tax either had they been resident within the Netherlands, and provided further that such entities do not perform a similar function to that of a tax exempt investment institutions or fiscal investment institutions as referred to in the Dutch Corporate Income Tax Act 1969, and with respect to entities resident in a country outside the EU/EEA which has an arrangement for the exchange of tax information with the Netherlands, provided such entities hold their Class A shares as a portfolio investment, i.e. such shares are not held with a view to the establishment or maintenance of lasting and direct economic links between such holder of Class A shares and our company, and these shares do not allow such holder to effectively participate in the management or control of our company.

Further, a holder of Class A shares who is resident in another EU Member State or in a State of the EEA i.e. Iceland, Norway and Liechtenstein, in principle has the possibility to obtain a refund of Dutch dividend withholding tax, provided that (i) such dividends are not taxable with the holder of Class A shares for personal income tax purposes or corporate income tax purposes and (ii) insofar the Dutch dividend withholding tax exceeds the amount of personal income tax or corporate income tax that would have been due had the holder of Class A shares been resident in the Netherlands, and with respect to a holder of Class A shares resident in a country outside the EU/EEA which has an arrangement for the exchange of tax information with the Netherlands, provided the Class A shares are held by such holder as a portfolio investment, i.e. such shares are not held with a view to the establishment or maintenance of lasting and direct economic links between such holder of Class A shares and our company, and these shares do not allow such holder to effectively participate in the management or control of our company.

A holder of Class A shares who is considered to be a resident of the United States and is entitled to the benefits of the 1992 Double Taxation Treaty between the United States and the Netherlands ("U.S. holder"), as amended most recently by the Protocol signed March 8, 2004 (the "Treaty") will generally be subject to Dutch dividend withholding tax at the rate of 15% unless such U.S. holder is an exempt pension trust as described in article 35 of the Treaty, or an exempt organization as described in article 36 of the Treaty.

U.S. holders that are exempt pension trusts or exempt organizations as described in articles 35 and 36, respectively, of the Treaty may qualify for an exemption from Dutch withholding tax and may generally claim (i) in the case of an exempt pension trust full exemption at source by timely filing two completed copies of form IB 96 USA signed by the U.S. holder accompanied with U.S. form 6166 (as issued by the U.S. Internal Revenue Service and valid for the relevant tax year) or (ii) in the case of either an exempt pension trust or an exempt organization a full refund by

filing through the withholding agent as mentioned in article 9 of the Dutch Dividend Withholding Tax Act 1965 (which is generally the company) one of the following forms signed by the U.S. holder within three years after the end of the calendar year in which the withholding tax was levied:

- if the U.S. holder is an exempt pension trust as described in article 35 of the Treaty: two completed copies of Form IB 96 USA accompanied with U.S. Form 6166 as issued by the U.S. Internal Revenue Service valid for the relevant tax year and
- if the U.S. holder is an exempt organization as described in article 36 of the Treaty: two completed copies of Form IB 95 USA accompanied with U.S. Form 6166 as issued by the U.S. Internal Revenue Service, valid for the relevant tax year.

Taxes on Income and Capital Gains

General

The description of taxation set out in this section of this Annual Report is not intended for any holder of Class A shares who is:

- an individual for whom the income or capital gains derived from the Class A shares are attributable to employment activities the income from which is taxable in the Netherlands; or
- an individual who or an entity which holds, or is deemed to hold, a Substantial Interest in our company (as defined above).

Non-residents of the Netherlands (including, but not limited to, U.S. holders)

A Non-Resident of the Netherlands who holds Class A shares is generally not subject to Dutch income or corporate income tax (other than dividend withholding tax described above) on the income and capital gains derived from the Class A shares, provided that:

- such Non-Resident of the Netherlands does not derive profits from an enterprise or deemed enterprise, whether as an entrepreneur (*ondernemer*) or pursuant to a co-entitlement to the net worth of such enterprise (other than as an entrepreneur or a shareholder) which enterprise is, in whole or in part, carried on through a permanent establishment or a permanent representative in the Netherlands or effectively managed in the Netherlands and to which enterprise or part of an enterprise, as the case may be, the Class A shares are attributable or deemed attributable;
- in the case of a Non-Resident of the Netherlands who is an individual, (a) such individual does not carry out any activities in the Netherlands with respect to the Class A shares that exceed ordinary active asset management (*normaal vermogensbeheer*), (b) the benefits derived from such Class A shares are not intended as remuneration for activities performed by a holder of Class A shares or by a person connected to such holder as meant by article 3.92b paragraph 5 of the Dutch Income Tax Act 2001 and (c) such individual does not derive income or capital gains from the Class A shares that are taxable as benefits from "other miscellaneous activities" in the Netherlands (*resultaat uit overige werkzaamheden in Nederland*);
- in the case of a Non-Resident of the Netherlands which is an entity, it is neither entitled to a share in the profits of an enterprise effectively managed in the Netherlands, nor co-entitled to the net worth of such enterprise, other than by way of the holding of securities, to which enterprise the Class A shares or payments in respect of the Class A shares are attributable; and
- in the case of a Non-Resident of the Netherlands who is an individual, such individual is not entitled to a share in the profits of an enterprise effectively managed in the Netherlands, other than by way of the holding of securities or, through an employment contract, to which enterprise the Class A shares or payments in respect of Class A shares are attributable.

A U.S. holder that is entitled to the benefits of the Treaty and whose Class A shares are not attributable to a Dutch enterprise or deemed enterprise, will generally not be subject to Dutch taxes on any capital gain realized on the disposal of such Class A shares.

Gift, Estate or Inheritance Taxes

No Dutch gift, estate or inheritance taxes will arise on the transfer of Class A shares by way of a gift by, or on the death of, a holder of Class A shares who is neither resident nor deemed to be resident in the Netherlands, unless in the case of a gift of the Class A shares by an individual who at the date of the gift was neither resident nor deemed to be resident in the Netherlands (i) such individual dies within 180 days after the date of the gift, while being resident or deemed to be resident in the Netherlands; or (ii) the gift of the Class A shares is made under a condition precedent and the holder of these shares is resident, or is deemed to be resident, in the Netherlands at the time the condition is fulfilled.

For purposes of Dutch gift, estate and inheritance taxes, an individual who holds the Dutch nationality will be deemed to be resident in the Netherlands if he or she has been resident in the Netherlands at any time during the ten years preceding the date of the gift or his or her death. Additionally, for purposes of Dutch gift tax, an individual not holding the Dutch nationality will be deemed to be resident in the Netherlands if he or she has been resident in the Netherlands at any time during the twelve months preceding the date of the gift. Applicable tax treaties may override deemed residency.

Value-Added Tax

There is no Dutch value-added tax payable in respect of payments in consideration for the sale of the Class A shares (other than value added taxes on fees payable in respect of services not exempt from Dutch value added tax).

Other Taxes and Duties

There is no Dutch registration tax, capital tax, customs duty, stamp duty or any other similar documentary tax or duty other than court fees payable in the Netherlands by a holder of Class A shares in respect of or in connection with the execution, delivery and enforcement by legal proceedings (including any foreign judgment in the courts of the Netherlands) of the Class A shares.

Residence

Other than as set forth above, a holder of Class A shares will not become or be deemed to become a resident of the Netherlands, nor will a holder of Class A shares otherwise become subject to taxation in the Netherlands, solely by reason of holding the Class A shares.

Taxation in the United States

The following summary of the material U.S. federal income tax consequences of the acquisition, ownership and disposition of our Class A shares is based upon current law and does not purport to be a comprehensive discussion of all the tax considerations that may be relevant to a decision to purchase our Class A shares. This summary is based on current provisions of the Internal Revenue Code, existing, final, temporary and proposed United States Treasury Regulations, administrative rulings and judicial decisions, in each case as available on the date of this Annual Report. All of the foregoing are subject to change, which change could apply retroactively and could affect the tax consequences described below.

This section summarizes the material U.S. federal income tax consequences to U.S. holders, as defined below, of Class A shares. This summary addresses only the U.S. federal income tax considerations for U.S. holders that hold the Class A shares as capital assets. This summary does not address all U.S. federal income tax matters that may be relevant to a particular U.S. holder, nor does it address any state, local or foreign tax matters or matters relating to any U.S. federal tax other than the income tax. Each investor should consult its own professional tax advisor with respect to the tax consequences of the purchase, ownership and disposition of the Class A shares. This summary does not address tax

considerations applicable to a holder of Class A shares that may be subject to special tax rules including, without limitation, the following:

- certain financial institutions;
- insurance companies;
- dealers or traders in securities, currencies, or notional principal contracts;
- tax-exempt entities;
- regulated investment companies;
- persons that hold the Class A shares as part of a wash sale, hedge, straddle, conversion, constructive sale or similar transaction;
- persons that hold the Class A shares through partnerships or certain other pass-through entities;
- persons that own (or are deemed to own) 10% or more of our voting shares; and
- persons that have a “functional currency” other than the U.S. dollar.

Further, this summary does not address alternative minimum tax consequences or indirect effects on the holders of equity interests in entities that own our Class A shares. In addition, this discussion does not consider the U.S. tax consequences to non-U.S. holders of Class A shares.

For the purposes of this summary, a “U.S. holder” is a beneficial owner of Class A shares that is, for U.S. federal income tax purposes:

- an individual who is either a citizen or resident of the United States;
- a corporation, or other entity that is treated as a corporation for U.S. federal income tax purposes, created or organized in or under the laws of the United States or any state of the United States or the District of Columbia;
- an estate, the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust, if a court within the United States is able to exercise primary supervision over its administration and one or more “United States persons,” within the meaning of the Internal Revenue Code, have the authority to control all of the substantial decisions of such trust.

If a partnership holds Class A shares, the tax treatment of a partner will generally depend upon the status of the partner and upon the activities of the partnership.

We will not seek a ruling from the U.S. Internal Revenue Service (“IRS”) with regard to the U.S. federal income tax treatment of an investment in our Class A shares, and we cannot assure you that that the IRS will agree with the conclusions set forth below.

Distributions. Subject to the discussion under “*Passive Foreign Investment Company Considerations*” below, the gross amount of any distribution (including any amounts withheld in respect of Dutch withholding tax) actually or constructively received by a U.S. holder with respect to Class A shares will be taxable to the U.S. holder as a dividend to the extent paid out of our current or accumulated earnings and profits as determined under U.S. federal income tax principles. Distributions in excess of our current and accumulated earnings and profits will be non-taxable to the U.S. holder to the extent of, and will be applied against and reduce, the U.S. holder’s adjusted tax basis in the Class A shares. Distributions in excess of our current and accumulated earnings and profits and such adjusted tax basis will generally be taxable to the U.S. holder as capital gain from the sale or exchange of property. However, since we do not calculate our

earnings and profits under U.S. federal income tax principles, it is expected that any distribution will be reported as a dividend, even if that distribution would otherwise be treated as a non-taxable return of capital or as capital gain under the rules described above. The amount of any distribution of property other than cash will be the fair market value of that property on the date of distribution. The U.S. holder will not be eligible for any dividends-received deduction in respect of the dividend otherwise allowable to corporations.

Under the Internal Revenue Code, qualified dividends received by certain non-corporate U.S. holders (i.e. individuals and certain trusts and estates) currently are subject to a maximum income tax rate of 20%. This reduced income tax rate is applicable to dividends paid by “qualified foreign corporations” to such non-corporate U.S. holders that meet the applicable requirements, including a minimum holding period (generally, at least 61 days during the 121-day period beginning 60 days before the ex-dividend date). We believe that we are a qualified foreign corporation under the Internal Revenue Code. Accordingly, dividends paid by us to non-corporate U.S. holders with respect to Class A shares that meet the minimum holding period and other requirements are expected to be treated as “qualified dividend income.” However, dividends paid by us will not qualify for the 20% U.S. federal income tax rate cap if we are treated, for the tax year in which the dividends are paid or the preceding tax year, as a “passive foreign investment company” for U.S. federal income tax purposes, as discussed below. Dividends paid by us that are not treated as qualified dividends will be taxable at the normal (and currently higher) ordinary income tax rates, except to the extent that they are taxable otherwise if we are a passive foreign investment company as described below.

Dividends received by a U.S. holder with respect to Class A shares generally will be treated as foreign source income for the purposes of calculating that holder’s foreign tax credit limitation. Subject to applicable conditions and limitations, and subject to the discussion in the next two paragraphs, any Dutch income tax withheld on dividends may be deducted from taxable income or credited against a U.S. holder’s U.S. federal income tax liability. The limitation on foreign taxes eligible for the U.S. foreign tax credit is calculated separately with respect to specific classes of income. For this purpose, dividends distributed by us generally will constitute “passive category income” (but, in the case of some U.S. holders, may constitute “general category income”).

A “United States person,” within the meaning of the Internal Revenue Code, that is an individual, an estate or a nonexempt trust is generally subject to a 3.8% surtax on the lesser of (i) the United States person’s “net investment income” for the year and (ii) the excess of the United States person’s “modified adjusted gross income” for that year over a threshold (which, in the case of an individual, will be between \$125,000 and \$250,000, depending on the individual’s U.S. tax filing status). A U.S. holder’s net investment income generally will include, among other things, dividends on, and gains from the sale or other taxable disposition of, our Class A shares, unless (with certain exceptions) those dividends or gains are derived in the ordinary course of a trade or business. Net investment income may be reduced by deductions properly allocable thereto; however, the U.S. foreign tax credit may not be available to reduce the surtax.

Upon making a distribution to shareholders, we may be permitted to retain a portion of the amounts withheld as Dutch dividend withholding tax. See “—Taxation in the Netherlands—Dividend Withholding Tax—General.” The amount of Dutch withholding tax that we may retain reduces the amount of dividend withholding tax that we are required to pay to the Dutch tax authorities but does not reduce the amount of tax we are required to withhold from dividends paid to U.S. holders. In these circumstances, it is likely that the portion of dividend withholding tax that we are not required to pay to the Dutch tax authorities with respect to dividends distributed to U.S. holders would not qualify as a creditable tax for U.S. foreign tax credit purposes.

Sale or other disposition of Class A shares. A U.S. holder will generally recognize gain or loss for U.S. federal income tax purposes upon the sale or exchange of Class A shares in an amount equal to the difference between the U.S. dollar value of the amount realized from such sale or exchange and the U.S. holder’s tax basis for those Class A shares. Subject to the discussion under “*Passive Foreign Investment Company Considerations*” below, this gain or loss will be capital gain or loss and will generally be treated as from sources within the United States. Capital gain or loss will be long-term capital gain or loss if the U.S. holder held the Class A shares for more than one year at the time of the sale or exchange; in general, long-term capital gains realized by non-corporate U.S. holders are eligible for reduced rates of tax. The deductibility of losses incurred upon the sale or other disposition of capital assets is subject to limitations.

Passive foreign investment company considerations. A corporation organized outside the United States generally will be classified as a passive foreign investment company (“PFIC”) for U.S. federal income tax purposes in any taxable year in which, after applying the applicable look-through rules, either: (i) at least 75% of its gross income is passive income, or (ii) at least 50% of the average gross value of its assets is attributable to assets that produce passive

income or are held for the production of passive income. In arriving at this calculation, a pro rata portion of the income and assets of each corporation in which we own, directly or indirectly, at least a 25% interest by value, must be taken into account. Passive income for this purpose generally includes dividends, interest, royalties, rents and gains from commodities and securities transactions. We believe that we were not a PFIC for any prior tax year after 2013. Based on estimates of our gross income and the average value of our gross assets, and on the nature of the active businesses conducted by our “25% or greater” owned subsidiaries, we do not expect to be a PFIC in the current taxable year and do not expect to become one in the foreseeable future. However, because our status for any taxable year will depend on the composition of our income and assets and the value of our assets for such year, and because this is a factual determination made annually after the end of each taxable year, there can be no assurance that we will not be considered a PFIC for the current taxable year or any future taxable year. In particular, the value of our assets may be determined in large part by reference to the market price of our Class A shares, which may fluctuate considerably. If we were a PFIC for any taxable year during which a U.S. holder held Class A shares, gain recognized by the U.S. holder on a sale or other disposition (including a pledge) of the Class A shares would be allocated ratably over the U.S. holder’s holding period for the Class A shares. The amounts allocated to the taxable year of the sale or other disposition and to any year before we became a PFIC would be taxed as ordinary income. The amount allocated to each other taxable year would be subject to tax at the highest rate in effect for individuals or corporations, as appropriate, for that taxable year, and an interest charge would be imposed on the resulting tax liability for that taxable year. Similar rules would apply to the extent any distribution in respect of Class A shares exceeds 125% of the average of the annual distributions on Class A shares received by a U.S. holder during the preceding three years or the holder’s holding period, whichever is shorter. Elections may be available that would result in alternative treatments (such as a mark-to-market treatment) of the Class A shares. In addition, if we are considered a PFIC for the current taxable year or any future taxable year, U.S. holders will be required to file annual information returns for such year, whether or not the U.S. holder disposed of any Class A shares or received any distributions in respect of Class A shares during such year.

Backup Withholding and Information Reporting. U.S. holders generally will be subject to information reporting requirements with respect to dividends on Class A shares and on the proceeds from the sale, exchange or disposition of Class A shares that are paid within the United States or through U.S.-related financial intermediaries, unless the U.S. holder is an “exempt recipient.” In addition, certain U.S. holders who are individuals may be required to report to the IRS information relating to their ownership of the Class A shares, subject to certain exceptions (including an exception for shares held in an account maintained by a U.S. financial institution). U.S. holders may be subject to backup withholding (currently at 24%) on dividends and on the proceeds from the sale, exchange or disposition of Class A shares that are paid within the United States or through U.S.-related financial intermediaries, unless the U.S. holder provides a taxpayer identification number and a duly executed IRS Form W-9 or otherwise establishes an exemption. Backup withholding is not an additional tax and the amount of any backup withholding will be allowed as a credit against a U.S. holder’s U.S. federal income tax liability and may entitle such holder to a refund, provided that the required information is timely furnished to the IRS.

Evaluation of Disclosure Controls and Procedures

The company's management, with the participation of the company's chief executive officer and chief financial officer, evaluated the effectiveness of the company's disclosure controls and procedures as of December 31, 2019. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost benefit relationship of possible controls and procedures. Based on the evaluation of the company's disclosure controls and procedures as of December 31, 2019, the company's chief executive officer and chief financial officer concluded that, as of such date, the company's disclosure controls and procedures were effective at the reasonable assurance level.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate "internal control over financial reporting," as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. This rule defines internal control over financial reporting as a process designed by, or under the supervision of, a company's chief executive officer and chief financial officer and effected by its board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Management assessed the design and operating effectiveness of our internal control over financial reporting as of December 31, 2019. This assessment was performed under the direction and supervision of our chief executive officer and chief financial officer, and based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, we concluded that as of December 31, 2019, our internal control over financial reporting was effective.

There has been no change in the company's internal control over financial reporting occurred during the fiscal year ended December 31, 2019 that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

The effectiveness of our internal control over financial reporting as of December 31, 2019 has been audited by JSC KPMG, our independent registered public accounting firm. Their report may be found below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors
Yandex N.V.:

Opinion on Internal Control Over Financial Reporting

We have audited Yandex N.V. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2019, based on the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2019 and 2018, the related consolidated statements of income, comprehensive income, cash flows and shareholders' equity for each of the years in the three-year period ended December 31, 2019, and the related notes (collectively, the consolidated financial statements), and our report dated April 2, 2020 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors
Yandex N.V.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Yandex N.V. and subsidiaries (the Company) as of December 31, 2019 and 2018, the related consolidated statements of income, comprehensive income, cash flows and shareholders' equity for each of the years in the three-year period ended December 31, 2019, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2019, in conformity with U.S. generally accepted accounting principles.

The accompanying consolidated financial statements as of and for the year ended December 31, 2019 have been translated into United States dollars solely for the convenience of the reader. We have audited the translation and, in our opinion, the consolidated financial statements expressed in Russian rubles have been translated into United States dollars on the basis set forth in Note 2 "Summary of significant accounting policies – Foreign currency translation" to the consolidated financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2019, based on the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated April 2, 2020 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company has changed its method of accounting for leases as of January 1, 2019 due to the adoption of Accounting Standard Codification Topic 842, Leases.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used

and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgment. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of the fair value measurement of the redeemable noncontrolling interest

As discussed in Notes 2 and 15 to the consolidated financial statements, the redeemable noncontrolling interest amounted to RUB 14,246 million at December 31, 2019, associated with two business units. The redeemable noncontrolling interests are measured at the redemption value based on the fair value of these business units using a discounted cash flow model, which required the Company to make significant estimates and assumptions. The key assumptions relate to the future revenue growth rates, projected adjusted earnings margins and discount rates.

We identified the evaluation of the fair value measurement of the redeemable noncontrolling interest as a critical audit matter, because testing the key assumptions utilized within the discounted cash flow models used to estimate the fair value of the business units involved a high degree of subjective auditor judgement.

The primary procedures we performed to address this critical audit matter included the following. We tested certain internal controls over the Company's fair value evaluation process, including controls over the development of the key assumptions listed above used in estimating the fair value of the respective business units. We compared the historical forecasted future revenue and adjusted earnings margins for these business units to their actual results to assess the Company's ability to accurately forecast. We evaluated the Company's future revenue growth rates and projected adjusted earnings margins for these business units by comparing the forecasts to those of the Company's peers and publicly available data such as industry benchmarks. We performed a sensitivity analysis over the key assumptions listed above to assess the impact of changes to those assumptions on the Company's determination of fair value of the business units. We involved valuation professionals with specialized skills and knowledge, who assisted in:

- evaluating the discount rates by comparing them against discount rate ranges that were independently developed using publicly available market data for comparable entities, and
- developing an estimate of the business units' fair values using the business units' cash flow forecasts and independently developed discount rates, and compared the results to the Company's fair value estimates.

YANDEX N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

1. ORGANIZATION AND DESCRIPTION OF THE BUSINESS

Yandex N.V., together with its consolidated subsidiaries (together, the “Company”), is a technology company that builds intelligent products and services powered by machine learning. The Company generates a substantial part of its revenues from online advertising, while the share of other revenues, primarily represented by commission-based revenues of its Taxi business, continues to increase as a portion of the Company’s total revenues.

Yandex N.V. was incorporated under the laws of the Netherlands in June 2004 and is the holding company of Yandex LLC, incorporated in the Russian Federation in October 2000, and other subsidiaries.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**Basis of Presentation**

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The accompanying consolidated financial statements differ from the financial statements prepared by the Company’s individual legal entities for statutory purposes in that they reflect certain adjustments, not recorded in the accounting records of the Company’s individual legal entities, which are appropriate to present the financial position, results of operations and cash flows in accordance with U.S. GAAP. Distributable retained earnings of the Company are based on amounts reported in statutory accounts of individual entities and may significantly differ from amounts calculated on the basis of U.S. GAAP.

Principles of Consolidation

The consolidated financial statements include the accounts of the parent company and the entities it controls. All inter-company transactions and balances within the Company have been eliminated upon consolidation.

Noncontrolling interests in consolidated subsidiaries are included in the consolidated balance sheets as a separate component of equity. We report consolidated net income inclusive of both the Company’s and the noncontrolling interests’ share, as well as amounts of consolidated net income/(loss) attributable to each of the Company and the noncontrolling interests.

Use of Estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the consolidated financial statements and amounts of revenues and expenses for the reporting period. Actual results could differ from those estimates. The most significant estimates relate to impairment assessments of investments in non-marketable equity securities, redeemable noncontrolling interests, impairment assessments of goodwill and intangible assets, useful lives of property and equipment and intangible assets, accounts receivable allowance, fair values of share-based awards, deferred tax assets recoverability, operating lease incremental borrowing rate, fair values of financial instruments, income taxes and contingencies. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities.

Foreign Currency Translation

The functional currency of the Company’s parent company is the U.S. dollar. The functional currency of the Company’s operating subsidiaries is generally the respective local currency. The Company has elected the Russian ruble as its reporting currency. All balance sheet items are translated into Russian rubles based on the exchange rate on the balance sheet date and revenue and expenses are translated at monthly weighted average rates of exchange. Translation

gains and losses are recorded as foreign currency translation adjustments in other comprehensive income. Foreign exchange transaction gains and losses are included in other (loss)/income, net in the accompanying consolidated statements of income.

Convenience Translation

Translations of amounts from RUB into U.S. dollars for the convenience of the reader have been made at the exchange rate of RUB 78.8493 to \$1.00, the prevailing exchange rate as of March 25, 2020. March 25, 2020 is the most recent practicable date used for convenience translation of RUB amounts due to significant changes of exchange rate from RUB 61.9057 to \$1 as of December 31, 2019 (Note 19). No representation is made that the RUB amounts could have been, or could be, converted into U.S. dollars at such rate.

Certain Risks and Concentrations

The Company's revenues are substantially derived from online advertising, the market for which is highly competitive and rapidly changing. Significant changes in this industry or changes in users' internet preferences or advertiser spending behavior could adversely affect the Company's financial position and results of operations.

In addition, the Company's principal business activities are within the Russian Federation. Laws and regulations affecting businesses operating in the Russian Federation are subject to frequent changes, which could impact the Company's financial position and results of operations.

Other revenues, primarily represented by commission-based revenues of the Taxi business, continue to represent an increasing share of the Company's total revenues. Significant changes in the ride-hailing industry could adversely affect the Company's financial position and results of operations.

Approximately half of the Company's revenue is collected on a prepaid basis; credit terms are extended to major sales agencies and to larger loyal clients. Accounts receivable are typically unsecured and are primarily derived from revenues earned from customers located in the Russian Federation.

No individual customer or groups of affiliated customers represented more than 10% of the Company's revenues in 2017, 2018 and 2019.

Financial instruments that can potentially subject the Company to a significant concentration of credit risk consist, in addition to accounts receivable, primarily of cash, cash equivalents and term deposits. The primary focus of the Company's treasury strategy is to preserve capital and meet liquidity requirements.

The Company's treasury policy addresses the level of credit exposure by working with different geographically diversified banking institutions, subject to their conformity to an established minimum credit rating for banking relationships. To manage the risk exposure, the Company maintains its portfolio of investments in a variety of term deposits and money market funds.

Revenue Recognition

On January 1, 2018, the Company adopted Accounting Standards Update (the "ASU") on revenue from contracts with customers (Topic 606), using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with the Company's historic accounting under Topic 605. The adoption of Topic 606 did not have a material impact on the Company's consolidated financial statements and there was no adjustment to beginning retained earnings on January 1, 2018.

YANDEX N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

Revenue is recognized when the control of promised goods or services is transferred to the Company's customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company identifies its contracts with customers and all performance obligations within those contracts. The Company then determines the transaction price and allocates the transaction price to the performance obligations within the Company's contracts with customers, recognizing revenue when, or as, the Company satisfies its performance obligations. Revenue is recorded net of value added tax ("VAT").

The Company's principal revenue streams and their respective accounting treatments are discussed below:

Online Advertising Revenues

The Company's online advertising revenues are generated from serving online ads on its own websites and on Yandex ad network members' websites. Advance payments received by the Company from advertisers are recorded as deferred revenue on the Company's consolidated balance sheets and recognized as online advertising revenues in the period services are provided.

Advertising sales commissions and bonuses that are paid to agencies are accounted for as an offset to revenues and amounted to RUB 7,375, RUB 9,367 and RUB 10,576 (\$134.1) in 2017, 2018 and 2019, respectively.

In accordance with U.S. GAAP, the Company reports online advertising revenues gross of fees paid to Yandex ad network members, because the Company is the principal to its advertisers and retains collection risk. The Company records fees paid to ad network members as traffic acquisition costs, a component of cost of revenues.

The Company recognizes online advertising revenues based on the following principles:

The Company's Yandex.Direct service offers advertisers the ability to place performance-based ads on Yandex and Yandex ad network member websites targeted to users' search queries or website content. The Company recognizes as revenues fees charged to advertisers as "click-throughs" occur. A "click-through" occurs each time a user clicks on one of the performance-based ads that are displayed next to the search results or on the content pages of Yandex or Yandex ad network members' websites.

The Company recognized revenue for Yandex.Market services in the consolidated statements of income until the deconsolidation of Yandex.Market in April 2018 (Note 4). Yandex.Market services were priced on a cost per click (CPC) basis, similar to Yandex.Direct.

The Company recognizes revenue from brand advertising on its websites and on Yandex ad network member websites as "impressions" are delivered. An "impression" is delivered when an advertisement appears on pages viewed by users.

The Company may accept a lower consideration than the amount promised per the contract for certain revenue transactions and certain customers may receive cash-based incentives or credits, which are accounted for as variable consideration when estimating the amount of revenue to recognize. The Company believes that there will be no significant changes to the estimates of variable consideration.

Revenues of Taxi business

The revenues of the Taxi business primarily consist of commissions for providing ride-hailing services and commissions for food delivery services.

YANDEX N.V.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

For ride-hailing services provided to individual transportation services users, the Company is not a principal and reports only Yandex.Taxi and Uber's commission fees as revenue. For services provided to corporate transportation services clients the Company acts as the principal and revenue and related costs are recorded gross. In the regions, where revenues exceed promotional discounts to users and minimum fare guarantees to drivers, the discounts and guarantees are netted against revenues. In the regions, where discounts to users and minimum fare guarantees exceed the related revenues, the excess is presented in sales, general and administrative expenses in the consolidated statements of income.

For food delivery services provided to individual service users, the Company is not a principal and reports only Yandex.Eats's commission fees as revenue. In the regions, where revenues exceed promotional discounts to users, the discounts are netted against revenues. In the regions, where discounts to users exceed the related revenues, the excess is presented in sales, general and administrative expenses in the consolidated statements of income.

The Company recorded RUB 19,095 (\$242.2) of promotional discounts to users and minimum fare guarantees in 2019 (RUB 14,311 in 2018 and RUB 9,737 in 2017), of which RUB 17,202 (\$218.2) (RUB 11,574 in 2018 and RUB 4,606 in 2017) were netted against revenues and RUB 1,893 (\$24.0) (RUB 2,737 in 2018 and RUB 5,131 in 2017) were presented in sales, general and administrative expenses.

Other Revenue

The Company's other revenue primarily consists of revenues from the Company's car-sharing business and media services.

The Company's revenue from its car-sharing business and media services is recognized over the period when the respective services are provided to users.

Practical Expedients and Exemptions

The Company accounts for sales commissions and agency bonuses as incurred because the amortization period is one year or less.

The Company does not disclose the value of unsatisfied performance obligations as of period end for contracts with an original expected duration of one year or less and contracts for which the Company recognizes revenue at the amount to which the Company has the right to invoice for services performed.

Cost of Revenues

Cost of revenues primarily consists of traffic acquisition costs. Traffic acquisition costs consist of amounts ultimately paid to Yandex ad network members and to certain other partners ("distribution partners") who distribute the Company's products or otherwise direct search queries to the Company's websites. These amounts are primarily based on revenue-sharing arrangements with ad network members and distribution partners. Traffic acquisition costs are expensed as incurred. Cost of revenues also includes expenses associated with the operation of the Company's data centers, including personnel costs, share-based compensation, rent, utilities and bandwidth costs; cost of corporate taxi services; Yandex.Drive car leases, gasoline costs and outsourced services such as insurance, maintenance and other services; as well as content acquisition costs, cost of devices sold and other cost of revenues.

Product Development Expenses

Product development expenses consist primarily of personnel costs incurred for the development of, enhancement to and maintenance of the Company's search engine and other Company's websites and technology

(in millions of Russian rubles and U.S. dollars, except share and per share data)

platforms. Product development expenses also include rent and utilities attributable to office space occupied by development staff.

Software development costs, including costs to develop software products, are expensed before technological feasibility is reached. Technological feasibility is typically reached shortly before the release of such products and, as a result, development costs that meet the criteria for capitalization were not material for the periods presented.

Advertising and Promotional Expenses

The Company expenses advertising and promotional costs in the period in which they are incurred. For the years ended December 31, 2017, 2018 and 2019, promotional and advertising expenses totaled approximately RUB 13,054, RUB 15,372 and RUB 18,350 (\$232.7), respectively.

Social Security Contributions

The Company makes contributions to governmental pension, medical and social funds on behalf of its employees. In Russia, the amount was calculated using a regressive rate (from 14% to 4% for accredited IT companies and from 30% to 15% for other companies in 2019, 2018 and 2017) based on the annual compensation of each employee. These contributions are expensed as incurred.

Share-Based Compensation

The Company grants share options, share appreciation rights ("SARs"), restricted share units ("RSUs") and business unit equity awards (together, "Share-Based Awards") to its employees and consultants.

The Company estimates the fair value at the grant date of share options, SARs and business unit equity awards that are expected to vest using the Black-Scholes-Merton ("BSM") pricing model and recognizes the fair value on a straight-line basis over the requisite service period. The fair value of RSUs is measured based on the fair market values of the underlying share on the dates of grant.

The assumptions used in calculating the fair value of Share-Based Awards represent the Company's best estimates, but these estimates involve inherent uncertainties and the application of management judgment. As a result, if factors change and the Company uses different assumptions, the Company's share-based compensation expense could be materially different in the future. The Company accounts for forfeitures as they occur.

Cancellation of an award accompanied by the concurrent grant of a replacement award is accounted for as a modification of the terms of the cancelled award ("modification awards"). The compensation costs associated with the modification awards are recognized if either the original vesting condition or the new vesting condition has been achieved. Such compensation costs cannot be less than the grant-date fair value of the original award. The incremental compensation cost is measured as the excess of the fair value of the replacement award over the fair value of the cancelled award at the cancellation date. Therefore, in relation to the modification awards, the Company recognizes share-based compensation over the vesting periods of the new awards, which comprises (1) the amortization of the incremental portion of share-based compensation over the remaining vesting term and (2) any unrecognized compensation cost of the original award, using either the original term or the new term, whichever is higher for each reporting period.

Income Taxes

Current tax expense/(benefit) is calculated as the estimated amount expected to be recovered from or paid to the taxing authorities based on the taxable income for the period. Deferred tax assets and liabilities are recognized for the

future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and for carryforwards. Deferred tax assets, including those for operating loss carryforwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the deferred tax asset or liability is expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are classified as non-current. Deferred tax assets are reduced by a valuation allowance to the amount that is more likely than not to be realized. In making such a determination, management considers all available evidence, including future reversals of existing taxable temporary differences, projected future taxable income, limitations and enacted changes to the tax legislation in respective jurisdictions, tax-planning strategies, and results of recent operations.

The effects of tax positions are recognized in the consolidated financial statements if it is more likely than not that they will be sustained on examination by the taxing authorities, including resolution of related appeals or litigation processes, if any.

Recognized tax benefits are measured as the largest amount that is greater than 50 percent likely of being realized upon settlement.

The Company recognizes interest and penalties related to unrecognized tax benefits within the income tax expense line in the consolidated statements of income. Accrued interest and penalties are presented in the consolidated balance sheets within other accrued liabilities, non-current or income and non-income taxes payable together with unrecognized tax benefits based on the timing of expected resolution.

Comprehensive Income

Comprehensive income is defined as the change in equity during a period from non-owner sources. U.S. GAAP requires the reporting of comprehensive income in addition to net income. Comprehensive income of the Company includes net income and foreign currency translation adjustments. For the years ended December 31, 2017, 2018 and 2019 total comprehensive income included, in addition to net income, the effect of translating the financial statements of the Company's legal entities domiciled outside of Russia from these entities' functional currencies into Russian rubles.

Accumulated other comprehensive income of RUB 8,182 as of December 31, 2018 and RUB 4,841 (\$61.4) as of December 31, 2019 solely comprises cumulative foreign currency translation adjustment.

Noncontrolling Interests and Redeemable Noncontrolling Interests

Interests held by third parties in consolidated majority-owned subsidiaries are presented as noncontrolling interests, which represent the noncontrolling stockholders' interests in the underlying net assets of the Company's consolidated majority-owned subsidiaries. Noncontrolling interests that are not redeemable are reported in the equity section of the consolidated balance sheets. The net income attributable to noncontrolling interest reflects the share of the net income of the Company's consolidated subsidiaries, in which there are either noncontrolling interests or redeemable noncontrolling interests.

Ownership interests in the Company's consolidated subsidiaries held by the senior employees of these subsidiaries are considered redeemable as according to the terms of the business unit equity awards the employees have the right to redeem their interests for cash. Accordingly, such redeemable noncontrolling interests have been presented as mezzanine equity in the consolidated balance sheets. Adjustments to the redemption value of the redeemable noncontrolling interests are recorded through retained earnings.

Fair Value of Financial Instruments

Financial instruments carried on the balance sheets include cash and cash equivalents, term deposits, restricted cash, investments in equity securities, accounts receivable and funds receivable, loans to employees, accounts payable and accrued liabilities. The carrying amounts of cash and cash equivalents, short-term deposits, current restricted cash, accounts receivable and funds receivable, accounts payable and accrued liabilities approximate their respective fair values due to the short-term nature of those instruments.

Term Deposits

Bank deposits are classified depending on their original maturity as (i) cash and cash equivalents if the original maturities are three months or less; (ii) current term deposits if the original maturities are more than three months, but no more than one year; and (iii) non-current term deposits if the original maturities are more than one year.

Investments in Equity Securities

Investments in the stock of entities in which the Company can exercise significant influence but does not own a majority equity interest or otherwise control are accounted for using the equity method. The Company records its share of the results of these companies within the other (loss)/income, net line on the consolidated statements of income. Investments in the non-marketable stock of entities in which the Company can exercise little or no influence are accounted for using the cost method. Both equity and cost method accounted investments are included in investments in non-marketable equity securities line on the consolidated balance sheets.

The Company reviews its investments in equity securities for other-than-temporary impairment whenever events or changes in business circumstances indicate that the carrying value of the investment may not be fully recoverable. Investments identified as having an indication of impairment are subject to further analysis to determine if the impairment is other-than-temporary and this analysis requires estimating the fair value of the investment. The determination of fair value of the investment involves considering factors such as current economic and market conditions, the operating performance of the companies including current earnings trends and forecasted cash flows, and other company and industry specific information. Once a decline in fair value is determined to be other-than-temporary, an impairment charge is recorded to other (loss)/income, net and a new cost basis in the investment is established.

Variable Interest Entities

Entities that do not have sufficient equity at risk to allow the entity to finance its activities without additional financial support or in which the equity investors, as a group, do not have the characteristic of a controlling financial interest are referred to as variable interest entities ("VIE"). A VIE is consolidated by the variable interest holder that is determined to have the controlling financial interest (primary beneficiary) as a result of having both the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. The Company determines whether it is the primary beneficiary of an entity subject to consolidation based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose, and the Company's relative exposure to the related risks of the VIE on the date it becomes initially involved in the VIE. The Company reassesses its VIE determination with respect to an entity on an ongoing basis.

As of December 31, 2017, the Company held interests in a third party, Edadeal, a Russian limited liability company ("Edadeal"), through loans and a 10% equity interest. Edadeal was primarily financed by the Company's loans and operated an application for grocery shopping offers, coupons and cashback. The Company had treated Edadeal as a VIE since Edadeal did not have sufficient equity at risk. The Company had determined that it should not consolidate Edadeal as it was not the primary beneficiary and lacked power through voting or similar rights to direct the activities that most significantly affected Edadeal's economic performance. The Company's investments related to Edadeal included in investments in non-marketable equity securities and loans granted to third parties (Note 5) totaled RUB 361

as of December 31, 2017, representing the Company's maximum exposure to loss. In October 2018, the Company acquired the remaining 90% interest in Edadeal (Note 4).

Accounts Receivable, Net

Accounts receivable are stated at their net realizable value.

The Company provides an allowance for doubtful accounts based on management's periodic review for recoverability of accounts receivable from customers and other receivables. The Company evaluates the collectability of its receivables based upon various factors, including the financial condition and payment history of major customers, an overall review of collections experience of other accounts and economic factors or events expected to affect the Company's future collections.

Inventories

Inventories are valued at the lower of cost or net realizable value. The Company estimates the net realizable value of such inventories based on analysis and assumptions. A change to the carrying value of inventories is recorded to cost of goods sold.

Property and Equipment

Property and equipment are recorded at cost and depreciated over their useful lives. Capital expenditures incurred before property and equipment are ready for their intended use are capitalized as assets not yet in use.

Depreciation is computed under the straight-line method using estimated useful lives as follows:

	Estimated useful lives
Servers and network equipment	3.0-4.0 years
Infrastructure systems	3.0-10.0 years
Office furniture and equipment	3.0 years
Buildings	10.0-20.0 years
Land rights	50.0 years
Leasehold improvements	the shorter of 5.0 years or the remaining period of the lease term
Other equipment	2.0-5.0 years

Land is not depreciated.

Depreciation of assets included in assets not yet in use commences when they are ready for the intended use.

Leases

The Company determines if an arrangement is or contains a lease at inception by assessing whether the arrangement contains an identified asset and whether it has the right to control the identified asset. Right-of-use ("ROU") assets represent the Company's right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease. Lease liabilities are recognized at the lease commencement date based on the present value of future lease payments over the lease term. ROU assets are based on the measurement of the lease liability and also include any lease payments made prior to or on lease commencement and exclude lease incentives and initial direct costs incurred, as applicable.

As the implicit rate in the Company's leases is generally unknown, the Company uses its incremental borrowing rate based on the information available at the lease commencement date in determining the present value of future lease payments. The Company gives consideration to its credit risk, term of the lease, total lease payments and adjust for the

impacts of collateral, as necessary, when calculating its incremental borrowing rates. The lease terms may include options to extend or terminate the lease when it is reasonably certain the Company will exercise any such options. Lease costs for the Company's operating leases are recognized on a straight-line basis within operating expenses over the lease term. Finance lease assets are amortized on a straight-line basis over the shorter of the estimated useful lives of the assets or the lease term. The interest component of finance leases is included in interest expense and recognized using the effective interest method over the lease term.

The Company has elected to separately account for lease and non-lease components for any leases within its existing classes of assets based on the identifiable standalone price of such non-lease components and, as a result, allocates part of lease contract consideration to non-lease component and account for it separately. The Company has also elected to not apply the recognition requirement to any leases within its existing classes of assets with a term of 12 months or less.

Operating leases are included in the operating lease right-of-use assets and accounts payable and accrued liabilities lines for current leases and in the operating lease liabilities line for non-current leases in the Company's consolidated balance sheets. Finance leases are included in the property and equipment, net, accounts payable and accrued liabilities and other accrued liabilities lines in the Company's consolidated balance sheets.

Goodwill and Intangible Assets

Goodwill represents the excess of purchase consideration over the Company's share of fair value of the net assets of acquired businesses. During the measurement period, which may be up to one year from the acquisition date, the Company may prospectively apply adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Goodwill is not subject to amortization but is tested for impairment at least annually.

The Company performs a qualitative assessment to determine whether further impairment testing on goodwill is necessary. If the Company believes, as a result of its qualitative assessment, that it is more-likely-than-not that the fair value of a reporting unit is less than its carrying amount, a quantitative impairment test is required. Otherwise, no further testing is required. The quantitative impairment test is performed by comparing the carrying value of each reporting unit's net assets (including allocated goodwill) to the fair value of those net assets. If the reporting unit's carrying amount is greater than its fair value, the Company recognizes a goodwill impairment charge for the amount by which the carrying value of a reporting unit exceeds its fair value.

The Company did not recognize any goodwill impairment for the years ended December 31, 2017 and 2018. In 2019, the Company recognized goodwill impairment in the amount of RUB 762 (\$9.7) related to Food Party LLC acquisition as a result of the annual goodwill impairment test. The impairment is the full amount of goodwill recognized at the Food Party LLC acquisition date and allocated to the Taxi segment. The goodwill impairment is the result of the absence of expected synergies from integration of Food Party LLC business model with the existing operations of the Company's other businesses or technologies, resulting in a change of business model of Food Party LLC. Fair value of Food Party LLC is considered to be equal to the carrying amount of the Food Party's net assets as of December 31, 2019.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

The Company amortizes intangible assets using the straight-line method and estimated useful lives of assets ranging from 1.0 to 15.9 years, with a weighted-average life of 8.2 years:

	Estimated useful lives
Acquisition-related intangible assets:	
Content and software	1.0-10.0 years
Customer relationships	2.0-15.9 years
Patents and licenses	6.8 years
Non-compete agreements	2.0-5.0 years
Trade names and domain names	2.0-10.0 years
Workforce	4.0 years
Supplier relationships	1.0 year
Other technologies and licenses	the shorter of 5.0 years or the underlying license terms

Impairment of Long-lived Assets Other Than Goodwill

The Company evaluates the carrying value of long-lived assets other than goodwill for impairment whenever events or changes in circumstances indicate that the carrying amounts of the assets may not be recoverable. When such a determination is made, management's estimate of undiscounted cash flows to be generated by the assets is compared to the carrying value of the assets to determine whether impairment is indicated. If impairment is indicated, the amount of the impairment recognized in the consolidated financial statements is determined by estimating the fair value of the assets and recording a loss for the amount by which the carrying value exceeds the estimated fair value. This fair value is usually determined based on estimated discounted cash flows.

Content assets

The Company licenses and produces content, including original programming, in order to offer users unlimited viewing of TV series and films via subscription or ad-supported models. Most of our content license agreements are for a fixed fee and specific windows of availability. Payments for content assets, including additions to streaming assets and the changes in related liabilities, are classified within net cash provided by operating activities on the consolidated statements of cash flows. For licenses, the Company capitalizes the fee per title/package and records a corresponding liability at the gross amount of the liability when the license period begins, the cost of the title is known and the title is accepted and available for streaming. Content which is licensed for less than a year is recognized as current content assets, net within the other current assets line and content which is licensed for a period of more than one year is recognized as non-current content assets, net on the consolidated balance sheets.

For produced content, the Company capitalizes costs associated with content production, including development costs, direct costs and production overhead. These amounts are included in the non-current content assets, net line on the consolidated balance sheets.

For the advertising-supported programming channels, the Company's general policy is to amortize each program's costs on a straight-line basis over its license period. For over-the-top (OTT) services that are not advertising-supported, the Company's general policy is to amortize each program based on factors such as estimated viewing patterns. The Company amortizes content assets (licensed and produced) in the cost of revenues line on the consolidated statements of income. The Company reviews factors impacting the amortization of content assets on an ongoing basis.

For films and television programs predominantly monetized individually, the amortization of capitalized costs is based on the proportion of the film's (or television program's) revenues recognized for such period to the film's (or television program's) estimated remaining ultimate revenues (i.e., the total revenue to be received throughout a film's or television program's life cycle).

The Company's video business model is subscription-based, rather than based on revenues generated from individual programs. Main content assets, both licensed and produced, are reviewed in aggregate at a film group level when an event or change in circumstances indicates a change in the expected usefulness of the content asset or that the fair value may be less than unamortized cost. To date, the Company has not identified any such event or changes in circumstances. If such changes are identified in the future, these aggregated content assets will be stated at the lower of unamortized cost or fair value. In addition, unamortized costs for assets that have been, or are expected to be, abandoned are written off.

Recently Adopted Accounting Pronouncements

Effective January 1, 2019, the Company adopted Topic 842 "Leases", as amended, which supersedes the lease accounting guidance under Topic 840, and requires lessees to recognize leases on-balance sheet and disclose key information about leasing arrangements. The new standard establishes a ROU model that requires a lessee to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with a term longer than 12 months. Leases are classified as finance or operating, with classification affecting the pattern and classification of expense recognition in the consolidated statements of income. The Company adopted the new guidance using the modified retrospective transition approach by applying the new standard to all leases existing at the date of initial application (January 1, 2017). The Company elected to restate retrospectively comparative periods presented in the consolidated financial statements with the cumulative-effect adjustment recognized at the beginning of the earliest comparative period presented.

The new standard provides a number of optional practical expedients in transition. The Company elected the practical expedients to not reassess its prior conclusions about lease identification under the new standard, to not reassess lease classification, and to not reassess initial direct costs. The Company also elected not to apply the recognition requirements of ASC 842 to short-term leases.

The effect of the changes made to the comparative periods presented in the consolidated financial statements was as follows:

In the first quarter of 2019, the Company early adopted an ASU that clarifies accounting for content assets. The standard aligns the accounting for production costs of episodic television series with the accounting for production costs of films by removing the content distinction for capitalization. This ASU also requires that an entity reassesses estimates of the use of a film in a film group and accounts for any changes prospectively. In addition, it requires that an entity tests films and license agreements for program material for impairment at a film group level when the film or license agreements are predominantly monetized with other films and license agreements. The new standard was applied prospectively. There was no material impact on the Company's consolidated financial statements. See also Summary of Significant Accounting Policies – Content assets above and Note 12 – Content assets.

Effect of Recently Issued Accounting Pronouncements

In June 2016, the FASB issued an ASU which requires the measurement and recognition of expected credit

(in millions of Russian rubles and U.S. dollars, except share and per share data)

losses for financial assets held at amortized cost to be presented at the net amount expected to be collected. The ASU is effective for reporting periods beginning after December 15, 2019. Early adoption is permitted for reporting periods beginning after December 15, 2018. This ASU replaces the existing incurred loss impairment model with a forward-looking expected credit loss model which will result in earlier recognition of credit losses. It also eliminates the concept of other-than-temporary impairment and requires credit losses related to available-for-sale debt securities to be recorded through an allowance for credit losses rather than as a reduction in the amortized cost basis of the securities. The Company adopted the standard effective January 1, 2020, using modified retrospective method with a cumulative effect adjustment to be recognized in the opening balance of retained earnings in the period of adoption. Based on the composition of the Company's investment portfolio, current market conditions and historical credit loss activity, the Company expects to record a cumulative-effect adjustment to accumulated retained earnings of approximately RUB 500 (\$6.3) on January 1, 2020 in connection with the adoption of ASU. The adjustment reflects the expected allowance based on Company's current estimate.

In August 2018, the FASB issued an ASU which aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. This ASU is effective for reporting periods beginning after December 15, 2019, with early adoption permitted. The Company adopted the standard effective January 1, 2020, and is currently evaluating the impact that the guidance will have on the consolidated financial statements.

No other recent accounting pronouncements were issued by FASB and the SEC that are believed by management to have a material impact on the Company's present or future financial statements.

3. NET INCOME PER SHARE

Basic net income per Class A and Class B ordinary share for the years ended December 31, 2017, 2018 and 2019 is computed on the basis of the weighted average number of ordinary shares outstanding using the two class method. Basic net income per share is computed using the weighted average number of ordinary shares outstanding during the period, including restricted shares. Diluted net income per ordinary share is computed using the effect of the outstanding Share-Based Awards calculated using the "treasury stock" method.

The computation of the diluted net income per Class A share assumes the conversion of Class B shares, while the diluted net income per Class B share does not assume the conversion of those shares. The net income per share amounts are the same for Class A and Class B shares because the holders of each class are legally entitled to equal per share distributions whether through dividends or in liquidation. The number of Share-Based Awards excluded from the diluted net income per ordinary share computation, because their effect was anti-dilutive for the years ended December 31, 2017, 2018 and 2019, was 1,862,125, 3,016,826 and 4,305,674, respectively. The effects of Business Unit Equity Awards were excluded from the diluted net income per ordinary share computation for the year ended December 31, 2018, because the effects were anti-dilutive. The effects of Business Unit Equity Awards were excluded from the diluted net income per ordinary share computation for the year ended December 31, 2017, because the effects were not significant.

The Company's convertible notes due 2018 provided for a flexible settlement feature. In December 2018, the convertible debt matured and the Company repaid the convertible debt for cash. The convertible debt was anti-dilutive in the years ended December 31, 2017 and 2018.

Acquisitions in 2018

Uber

In February 2018, the Company and Uber International C.V. ("Uber"), a subsidiary of Uber Technologies Inc., completed the combination of Yandex.Taxi Holding B.V. with several Uber legal entities into MLU B.V., a Dutch private limited liability company. The Company and Uber each contributed their legal entities operating the ride-hailing and food delivery businesses in Russia, Kazakhstan, Azerbaijan, Armenia, Belarus and Georgia, and \$100.0 (RUB 5,722 as of the date of acquisition) and \$225.0 (RUB 12,874 as of the date of acquisition) in cash, respectively. The merger was accounted for as a business combination.

Immediately after the completion of the transaction, Uber Technologies Inc. transferred 1,527,507 of its Class A Common Shares to the Company in exchange for additional 2.03% in the share capital of MLU B.V. At the same time, Uber Technologies Inc. entered into an arrangement with the Company to hold an option to repurchase these shares after the 3-year period from the one-year anniversary of deal close, while the Company has an option to sell these shares to Uber. This option was exercised in the year 2019 (Note 5).

As a result of the above transactions, 61.00% of the share capital of the combined entity is held by the Company, 37.96% by Uber and 1.04% by the employees of the MLU business based on the total number of outstanding shares.

The acquisition-date fair value of the consideration transferred amounted to RUB 53,261, which consisted of cash consideration, in the amount of RUB 3,061 and non-cash consideration, represented by the fair value of noncontrolling interest in the Yandex.Taxi business contributed.

The fair value of non-cash consideration at the acquisition date was RUB 50,200, which was determined using a discounted cash flow model. This fair value measurement is based on significant unobservable inputs and thus represents a Level 3 measurement as defined by ASC 820.

The fair value of the noncontrolling interest was determined based on the fair value of the Uber business contributed. The fair value was estimated using a discounted cash flow model. 7. FAIR VALUE MEASUREMENTS

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value:

Level 1—observable inputs that reflect quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2—inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3—redeemable noncontrolling interests and deferred consideration that were measured on a recurring basis with a fair value. The fair value was determined based on significant unobservable inputs and thus represented a Level 3 measurement as defined by ASC 820.

13. COMMITMENTS AND CONTINGENCIES

Lease and Other Commitments

In December 2008, the Company signed an agreement for a ten-year lease of office space in Moscow. In April 2011, the Company entered into two more lease agreements to increase the size of its rented office space located in its headquarters complex in Moscow for the remaining period of the original lease. In April 2014, the Company further extended its headquarters complex signing a seven-year lease agreement for additional office space and extending the existing rent agreements to 2021. During the years 2017, 2018 and 2019 the Company signed additional agreements to rent additional office space in Moscow until the end of years 2021, 2022 and 2024.

For future minimum lease payments due under the Moscow offices leases and other non-cancellable operating leases for more than one year, please refer to Note 9.

Additionally, the Company has entered into purchase commitments for license content agreements, other goods and services and acquisition of businesses, which total RUB 4,933 (\$62.6) in 2020, RUB 2,887 (\$36.6) in 2021, RUB 892 (\$11.3) in 2022, RUB 430 (\$5.5) in 2023, and RUB 331 (\$4.2) in 2024 and thereafter. U.S. dollar amounts have been translated into RUB at a rate of RUB 61.9057 to \$1.00, the official exchange rate quoted as of December 31, 2019 by the Central Bank of the Russian Federation.

Legal Proceedings

In the ordinary course of business, the Company is a party to various legal proceedings, and subject to claims, certain of which relate to copyright infringement, as well as to the alleged breach of certain contractual arrangements. The Company intends to vigorously defend any lawsuit and believe that the ultimate outcome of any pending litigation, other legal proceedings or other matters will have no material adverse effect on financial condition, results of operations or liquidity of the Company.

As of December 31, 2019, the Company was subject to certain claims, which are denominated in U.S. dollars, in the aggregate claimed amount of approximately RUB 2,114 (\$26.8). The Company has not recorded a liability in respect of those claims as of December 31, 2019.

Environment and Current Economic Situation

The Company's operations are primarily located in the Russian Federation. Consequently, the Company is exposed to the economic and financial markets of the Russian Federation which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue to develop and are subject to interpretation and frequent changes.

Taxes are subject to review and investigation by a number of authorities authorized by law to impose fines and penalties. Although the Company believes it has provided adequately for all tax liabilities based on its understanding of the tax legislation, the above factors may create tax risks for the Company. In addition to the obligations shown in the lease commitments section above, approximately RUB 439 (\$5.6) of unrecognized tax benefits have been recorded as liabilities, and the Company is uncertain as to if or when such amounts may be settled (Note 11). Related to unrecognized tax benefits, the Company has also recorded a liability for potential penalties of RUB 108 (\$1.4) and interest of RUB 65 (\$0.8). As of December 31, 2019, except for the income tax contingencies described above, the Company accrued RUB 622 (\$7.9) for contingencies related to non-income taxes, including penalties and interest. Additionally, the Company has identified possible contingencies related to non-income taxes, which are not accrued. Such possible non-income tax contingencies could materialize and require the Company to pay additional amounts of

tax. As of December 31, 2019, the Company estimates such contingencies related to non-income taxes, including penalties and interest, to be up to approximately RUB 7,663 (\$97.2).

In the past three years the Russian economy growth has remained positive, but decelerated from 2.5% in 2018 to 1.3% in 2019 primarily on the back of the broad-based slowdown in the global trade (which caused turbulence in global financial markets), the lower-than-expected budget spending, as well as the weak real disposable income dynamic and the tight monetary policy in the first half of the year. Inflation has initially peaked at 5.3% in March 2019 (mostly due to the VAT rate hike from 18% to 20%, which took effect from January 1, 2019), but then started to decline and fell below the Bank of Russia' target of 4% in October 2019. Lower-than expected inflation resulted in five key rate cuts by the Bank of Russia from 7.75% to 6.25%. In the second half of the year the economy growth accelerated, underpinned by monetary easing, faster public spending and moderate recovery of consumption. Unemployment remained at historical lows of around 4.5%. These factors among others were supportive of the 20% growth in online advertising market in 2019 (based on the AKAR data).

The budget balance has been positive in 2019, reaching 1.8 percent of the country's Gross Domestic Product in 2019, down from 2.7 percent in the previous year.

Despite the crude oil price being 10% lower on average in 2019 compared to 2018, the Russian ruble demonstrated resilience and appreciated by 12% against the U.S. dollar in 2019. The Russian ruble appreciation was followed by decreasing inflation. In 2019 inflation was 3.0% compared to 4.3% in 2018.

In addition, the first few months of 2020 have seen significant global market turmoil triggered by the outbreak of the coronavirus. Together with other factors (such as OPEC+ agreement breakdown in early March 2020), this has resulted in a sharp decrease in oil prices and the stock market indices, as well as a depreciation of the Russian ruble. These developments are further increasing the level of uncertainty in the business environment.

The above mentioned developments may lead to reduced access of Russian businesses to international capital markets, increased inflation and other negative economic consequences. The impact of further economic developments on future operations and financial position of the Company is at this stage difficult to determine.

14. SHARE CAPITAL

The Company has three authorized classes of ordinary shares, Class A, Class B and Class C with €0.01, €0.10 and €0.09 par value, respectively. The principal features of the three classes of ordinary shares are as follows:

- Class A shares, par value €0.01 per share, entitled to one vote per share. The Class A shares share ratably with the Class B shares, on a *pari passu* basis, in any dividends or other distributions.
- Class B shares, par value €0.10 per share, entitled to ten votes per share. Class B shares may only be transferred to qualified holders. In order to sell a Class B share, it must be converted into a Class A share.
- Class C shares, par value €0.09 per share, entitled to nine votes per share. The Class C shares are entitled to a fixed nominal amount in the event of a dividend or distribution limited to €0.01 per share in any one financial year if any such shares were to be outstanding on the record date for a dividend declaration. The Class C shares are used for technical purposes related to the conversion of Class B shares into Class A shares. During the periods between conversion and cancellation, all Class C shares are held by Yandex Conversion Foundation (Stichting Yandex Conversion). Yandex Conversion Foundation was incorporated under the laws of the Netherlands in October 2008 for the sole purpose of facilitating the conversion of Class B shares into Class A shares. Yandex Conversion Foundation is managed by a board of directors appointed by the Company.

On September 21, 2009, the Company issued a Priority Share to Sberbank. In December 2019, the Priority Share was repurchased by the Company; the Company intends to transfer the Priority Share to a newly formed Public Interest Foundation, as described below. As amended, the Priority Share gives the holder (other than the Company) the right to veto the accumulation of stakes in the Company in excess of 10% by a single entity, a group of related parties or parties acting in concert, as well as the right to make binding nominations of two of the 12 members of the Company's Board of Directors. Transfer of the Priority Share requires the approval of the Board. The Priority Share was repurchased from Sberbank at its par value of €1, and is entitled to a normal pro rata dividend distribution. The Priority Share was held in treasury as of December 31, 2019, and therefore was issued but not outstanding as of such date.

The Company's articles of association previously authorized a special class of preference shares as a form of an anti-takeover defense. At the Extraordinary General Meeting which was held December 20, 2019 certain amendments to the Articles of Association regarding authorized capital were approved, which included cancellation of authorization of preference shares.

Class C shares held in treasury are not disclosed as such due to the technical nature of this class of shares.

The Company repurchases its Class A shares from time to time in part to reduce the dilutive effects of its Share-Based Awards to employees of the Company.

In June 2018, the Company's Board of Directors authorized a program to repurchase up to \$100 worth of Class A shares from time to time in open market transactions in effect for up to twelve months. In July 2018, the Company's Board of Directors authorized an increase in the existing program to approximately \$150 worth of Class A shares.

On November 18, 2019 we announced a share repurchase program of up to \$300 of Class A shares from time to time in open market transactions effective for up to the following twelve months.

There were no repurchases in the year ended December 31, 2017. Treasury stock is accounted for under the cost method. 15. REDEEMABLE NONCONTROLLING INTERESTS

Redeemable noncontrolling interests (RNCI) mainly relate to the equity incentive arrangements the Company has made available to the senior employees of the Taxi and Classifieds business units, pursuant to which such persons are eligible to acquire depository receipts, or receive options to acquire depository receipts (DRs), which entitle them to economic interests in the respective subsidiaries of the Company.

The redeemable noncontrolling interests as of December 31, 2018 and 2019 were measured at the redemption value and consisted of the following:

	2018	2019	2019
	RUB	RUB	\$
RNCI related to the DRs acquired by the senior employees	3,554	3,681	46.7
RNCI related to the options to acquire DRs	9,203	10,565	134.0
RNCI recognized in connection with the business combinations	278	—	—
Total redeemable noncontrolling interests	13,035	14,246	180.7

The changes in the redeemable noncontrolling interests are as follows:

	2018	2019	2019
	RUB	RUB	\$
Balance at the beginning of period	9,821	13,035	165.3
Change in redemption value	3,058	1,337	17.0
Additional recognition	4,201	956	12.1
Net loss attributable to redeemable noncontrolling interests	(65)	(99)	(1.3)
Other	(13)	(218)	(2.8)
Purchase of redeemable noncontrolling interests	—	(747)	(9.5)
Acquisition of redeemable noncontrolling interests	209	—	—
Exchange of noncontrolling interests	(4,226)	—	—
Foreign currency translation adjustment	50	(18)	(0.1)
Balance at the end of period	13,035	14,246	180.7

The fair value of the redeemable noncontrolling interests were measured at the redemption value using a discounted cash flow (“DCF”) methodology. The most significant quantitative inputs used to measure the redemption value are the future revenue growth rates, projected adjusted earnings margins, terminal growth rate and discount rates. The inputs are based on the Company’s past experience and best estimates of future cash flows (Note 7).

In February 2018, the Company offered the senior employees of one of its business units an opportunity to exchange up to an aggregate of 425,230 of their outstanding Business Unit Equity Awards for an aggregate of 2,029,987 RSUs, this exchange was completed in February 2018. The replacement RSUs are fully vested. The exchange was accounted for as a modification of the Business Unit Equity Awards resulting in additional RUB 195 recognized immediately upon modification (Note 16). The exchange effect of redeemable noncontrolling interests was RUB 4,226 in 2018.

In October 2018, the Company recognized RUB 209 of the redeemable noncontrolling interests arisen due to acquisition of Food Party LLC (“Food Party”). In October 2019, the Company signed an agreement for a repurchase of all outstanding shares of Food Party.

During the year ended December 31, 2019, the Company completed the purchase of redeemable noncontrolling interests in the amount of RUB 747.

16. SHARE-BASED COMPENSATION

Employee Equity Incentive Plan

The Company has granted Share-Based Awards to employees of the Company pursuant to its Fourth Amended and Restated 2007 Equity Incentive Plan (the “2007 Plan”) and the 2016 Equity Incentive Plan (the “2016 Plan,” and together with the 2007 Plan, the “Plans”).

On February 7, 2007, the Company’s Board adopted the 2007 Plan, which superseded the previous 2001 Employee Share Option Plan, and subsequently amended the 2007 Plan on October 11, 2007, October 14, 2008, November 10, 2011, February 10, 2012, and July 24, 2013. The 2016 Plan was approved at the 2016 annual general meeting of shareholders on May 27, 2016 and replaced the 2007 Plan. However, there remain unexercised grants under the 2007 Plan. A share option issued under the Plans entitles the holder to purchase an ordinary share at a specified exercise price. SARs issued under the Plans entitle the holder to receive a number of Class A shares determined by reference to appreciation from and after the date of grant in the fair market value of a Class A share over the measurement price. RSUs awarded under the Plans entitle the holder to receive a fixed number of Class A shares at no cost upon the satisfaction of certain time-based vesting criteria. The holders of RSUs have no rights to dividends or dividends equivalent. The 2016 Plan provides for the issuance of Share-Based Awards to employees, officers, advisors and consultants of the Company and members of the Board of the Company to acquire or, in regard to SARs, to benefit from the appreciation of ordinary shares representing in the aggregate a maximum of 20% of the issued share capital of the Company.

Under the Plans, the award exercise or measurement price per share is set at the “fair market value” and denominated in U.S. dollars on the date the Share-Based Awards are granted by the Company’s Board. For purposes of the Plans, “fair market value” means (A) at any time when the Company’s shares are not publicly traded, the price per share most recently determined by the Board to be the fair market value; and (B) at any time when the shares are publicly traded, (i) in the case of RSUs, the closing price per Class A Share (as adjusted to account for the ratio of shares to depository shares, if necessary) on the date of such determination; and (ii) in the case of Options and Share Appreciation Rights, the average closing price per Class A Share (as adjusted to account for the ratio of Class A Shares to such depository shares, if necessary) on the 20 trading days immediately following the date of determination. Share-Based Awards granted under the Plans generally vest over a four-year period. Approximately 25% of the Share-Based Awards vest after one year, with the remaining Share-Based Awards vesting in equal amounts on the last day of each quarter over the following three years. If a grantee ceases to be an eligible participant because of termination by the grantee for good reason or because of termination by the Company for any reason other than for cause within three months following the consummation of a change of control under 2007 Plan and nine months under 2016 Plan, the Share Based Award(s) held by such grantee shall become fully vested and immediately exercisable. The maximum term of a Share-Based Award granted under the Plans may not exceed ten years. The 2016 Plan expires at midnight on May 27, 2026. After its expiration, no further grants can be made under the 2016 Plan but the vesting and effectiveness of Share-Based Awards previously granted will remain unaffected.

The Company estimates the fair value of share options and SARs using the BSM pricing model. The weighted average assumptions used in the BSM pricing model for grants made under the 2016 Plan in the years ended December 31, 2018 and 2019 were as follows:

	2018	2019
Dividend yield	—	—
Expected annual volatility	39.0 %	39.4-41.1 %
Risk-free interest rate	2.72-2.90 %	1.64-1.88 %

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

No SARs grants were made for the years ended December 31, 2017, 2018 and 2019.

The Company used the following assumptions in the BSM pricing model when valuing its Share-Based Awards:

- *Expected volatility.* For 2018 and 2019 grants, the Company used historical volatility of the Company's own shares.
- *Expected term.* The expected term of awards granted has been calculated following the "simplified" method, using half of the sum of the contractual and vesting terms, because the Company has no historical pattern of exercises sufficient to estimate the expected term on a more reliable basis.
- *Dividend yield.* This assumption is measured as the average annualized dividend estimated to be paid by the Company over the expected life of the award as a percentage of the share price at the grant date. The Company did not declare any dividends with respect to 2017, 2018 or 2019. Currently, the Company does not have any plans to pay dividends in the near term. Because optionees were generally compensated for dividends and the Company has no plans to pay cash dividends in the near term, it used an expected dividend yield of zero in its option pricing model for awards granted in the years ended December 31, 2018 and 2019.
- *Fair value of ordinary shares.* The Company estimated the fair value of its ordinary shares using the closing price of its ordinary shares on the NASDAQ Global Select Market on the date of grant.
- *Risk-free interest rate.* The Company used the risk-free interest rates based on the U.S. Treasury yield curve in effect at the grant date.

In February 2018, the Company settled its liability in respect of contingent consideration related to the number of qualifying taxi trips following the RosTaxi acquisition in January 2015 by issuing 259,560 of its RSUs equivalent to RUB 500. These RSUs have the same vesting provisions as Share-Based Awards granted under the 2016 Plan. As of December 31, 2018, these RSUs are fully vested and exercisable.

As of December 31, 2019, there was RUB 21,435 (\$271.8) of unamortized share-based compensation expense related to unvested share options and RSUs which is expected to be recognized over a weighted average period of 2.86 years.

In February 2019, the Company granted share-based awards ("Synthetic Options") to the employees of the Zen and Geolocation Services operating segments, respectively, which entitle the participants to receive Synthetic Shares, which represent the participant's right to a Payout Amount (the value of Synthetic Shares) related to the appreciation in value of vested Synthetic Shares. The Company estimates the fair value of Synthetic Options using the Monte-Carlo pricing model.

The Company recognized share-based compensation expense in respect of such Synthetic Options in the amount of RUB 907 (\$11.5) for the year ended December 31, 2019. As of December 31, 2019, there was RUB 1,215 (\$15.4) of unamortized share-based compensation expense related to unvested Synthetic Options.

Business Unit Equity Awards

The Company finalized the process of restructuring certain of the business units into separate legal structures in its E-commerce, Taxi, Classifieds operating segments in 2016 and its Media Services segment in 2018 (together, the "Participating Subsidiaries"). In connection with this restructuring, and to align the incentives of the relevant employees with the operations of the Participating Subsidiaries, the Company granted 4.4 million equity incentive awards under the 2016 Plan to the senior employees of these business units in total in 2015-2019, which entitle the participants to receive options to acquire redeemable depository receipts of shares in the respective operating subsidiaries (Note 15) upon the satisfaction of defined vesting criteria (the "Business Unit Equity Awards"), of which 3.3 million remain outstanding as of December 31, 2019. The exercise price of the Business Unit Equity Awards is determined from time to time by the Board and the standard vesting schedule for Business Unit Equity Awards under the 2016 Plan is consistent with Share-Based Awards granted in the Company's shares. Business Unit Equity Awards and any awards granted to management of the Participating Subsidiaries outside of the 2016 Plan are not to exceed 20% of such Participating Subsidiary's shares issued and outstanding from time to time.

The Company has recorded share-based compensation expense in respect of Business Equity Awards in the amount of RUB 267, RUB 564 and RUB 421 (\$5.3) for the years ended December 31, 2017, 2018 and 2019, respectively.

MLU B.V. 2018 Equity Incentive Plan

MLU B.V., a subsidiary of the Company, grants options and restricted share units ("RSUs") to the employees of the MLU Group (MLU B.V. and its subsidiaries) pursuant to the MLU B.V. 2018 Equity Incentive Plan (the "2018 Plan"). The 2018 Plan was adopted by the Management Board of MLU B.V. on February 7, 2018. Options issued under the 2018 Plan entitle the holder to acquire depository receipts over Class A shares of MLU B.V. at a specified exercise price. RSUs awarded under the 2018 Plan entitle the holder to receive a fixed number of depository receipts over Class A shares of MLU B.V. at no cost upon the satisfaction of certain time-based vesting criteria.

The fair value of MLU B.V. RSUs is measured based on the fair market values of the underlying share on the dates of grant. Since the MLU Group's shares are not publicly traded, it estimated the fair value of its shares on the basis of valuations arrived at by employing the "income approach" and the "market approach" valuation methodologies.

Share-Based Awards granted under the MLU B.V. Plan generally vest over a four-year period. Approximately 25% of the Share-Based Awards vest after one year, with the remaining Share-Based Awards vesting in equal amounts on the last day of each quarter over the following three years. The maximum term of a Share-Based Award granted under the Plan may not exceed ten years.

MLU Group estimates the fair value of share options using the BSM pricing model. The weighted average assumptions used in the BSM pricing model for grants made under the 2018 Plan in the year ended December 31, 2019 were as follows:

	2019
Dividend yield	—
Expected annual volatility	50.00 %
Risk-free interest rate	7.76-8.88 %
Expected life of the awards (years)	6.06-6.10
Weighted-average grant date fair value of awards (per share)	\$ 131.25

FOR THE YEARS ENDED DECEMBER 31, 2017, 2018 AND 2019

(in millions of Russian rubles and U.S. dollars, except share and per share data)

MLU Group used the following assumptions in the BSM pricing model when valuing its Share-Based Awards:

- *Expected volatility.* MLU Group used historical volatility of Yandex N.V.'s shares.
- *Expected term.* The expected term of awards granted has been calculated following the "simplified" method, using half of the sum of the contractual and vesting terms, because the Group has no historical pattern of exercises sufficient to estimate the expected term on a more reliable basis.
- *Dividend yield.* This assumption is measured as the average annualized dividend estimated to be paid by the MLU Group over the expected life of the award as a percentage of the share price at the grant date. MLU Group did not declare any dividends with respect to 2019. Currently, MLU Group does not have any plans to pay dividends in the near term, therefore it used an expected dividend yield of zero in its option pricing model for awards granted in the year ended December 31, 2019.
- *Fair value of ordinary shares.* Since the MLU Group's ordinary shares are not publicly traded, it estimated the fair value of its ordinary shares on the basis of valuations arrived at by employing the "income approach" and the "market approach" valuation methodologies.
- *Risk-free interest rate.* MLU Group used the risk-free interest rates based on the Russian Ruble Interest Rate Swap yield curve in effect at the grant date.

17. INFORMATION ABOUT SEGMENTS, REVENUES & GEOGRAPHIC AREAS

Starting from 2015 and as further developed in May 2019, the Company's chief operating decision maker ("CODM") is the management committee including its CEO, deputy CEO, COO and a group of CEO and his deputy's direct reports. The Company reports its financial performance based on the following reportable segments: Search and Portal, Taxi, Classifieds, Media Services and E-commerce prior to deconsolidation of Yandex.Market on April 27, 2018. In 2019, Search and Portal segment also includes Yandex.Health and Yandex Data Factory, previously reported in Other Bets and Experiments. The results of the Company's remaining operating segments, including Zen, Yandex.Cloud, Yandex.Drive, Geolocation Services and Yandex.Education, that do not meet the quantitative or the qualitative thresholds for disclosure, are combined into the other category defined as Other Bets and Experiments which is shown separately from the reportable segments and reconciling items. Previously Yandex.Education was a part of Search and Portal segment. In addition to the described changes, the Company changed the approach to intersegment revenue recognition in relation to Zen and approach to intersegment allocation related to office rent expenses and administrative support services of the Company's business units. Now the Company recognizes payments of Zen to Yandex.Browser, Yandex Homepage and Yandex Search app as traffic acquisition costs rather than revenue elimination.

Now the Company nets office rent expenses and administrative support services expenses within Search and Portal segment at operating costs level as opposed to treating business units share of rent expenses as intersegment revenue of Search and Portal. These changes insure consistency with internal reporting. Segment results below have been restated for all periods presented to reflect these reclassifications.

Reportable segments derive revenues from the following services:

- Search and Portal, which includes all our services offered in Russia, Belarus and Kazakhstan (and, for periods prior to the imposition of sanctions on Yandex by the government of Ukraine in May 2017, all our services offered in Ukraine), among which are search, location-based, personalized and mobile services, that enable the Company's users to find relevant and objective information quickly and easily and to communicate and connect over the internet, from both their desktops and mobile devices;
- Taxi includes our Ride-hailing business (which consists of Yandex.Taxi and Uber in Russia and other countries), FoodTech business (including Yandex.Eats, Yandex.Chef and Yandex.Lavka, a hyper local convenience store delivery service) and our Self-Driving Cars ("SDC") division;
- Classifieds (including Auto.ru, Yandex.Realty and Yandex.Jobs) which derives revenues from online advertising and listing fees;
- Media Services (including KinoPoisk, Yandex Music, Yandex.Afisha, Yandex.TV program, our production center Yandex.Studio and our subscription service Yandex.Plus) which derives revenue from online advertising and transaction revenues, including music and video content subscriptions as well as event tickets sales; and
- E-commerce (the Company's Yandex.Market service for the period prior to April 27, 2018, the date of the completion of the Yandex.Market joint venture between Yandex and Sberbank of Russia. Following the completion of the joint venture, Yandex.Market was deconsolidated and is now treated as an equity investee under the equity method accounting).

The Company accounts for intersegment revenues as if the services were provided to third parties, that is, at the level approximating current market prices.

There is significant uncertainty as to the likely effects of this disease and governmental and social actions in response to it. The Company expects that the ultimate significance of the impact of COVID-19 on its businesses will vary, but will generally depend on the extent of governmental measures affecting day-to-day life and the length of time that such measures remain in place to respond to COVID-19. The Company has preliminarily analyzed the effect of COVID-19 and concluded that there was no significant impact on the Company's financial position up to the date of this report.

In March 2020, the Russian economy was negatively impacted by a significant drop in crude oil prices and a significant depreciation of the Russian ruble, from RUB 61.9057 to \$1 as of December 31, 2019 to RUB 77.7325 to \$1.00 as of March 30, 2020.

Within twenty (20) business days of its receipt of such notification, the Board of Directors shall (x) decide on its approval or rejection in relation to the proposed acquisition of Excess Shares by the Potential Acquiror and (y) inform the Potential Acquiror of its decision. Subsequently, provided that the Board of Directors has approved the proposed acquisition of Excess Shares by the Potential Acquiror, the Board of Directors shall provide a copy of the information package submitted by the Potential Acquiror to the Board of Directors, together with its approval thereof and its recommendation thereon, to the Priority. Upon receipt of a written proposal of the Board of Directors to this effect the General Meeting may transfer its aforesaid power to the Board of Directors for a period not exceeding five years. Such designation shall specify the number of Shares that may be issued and may also include the price (range) at which such Shares may be issued. The designation may be extended, from time to time, for periods not exceeding five years. Unless such designation provides otherwise, it may not be withdrawn.

For purposes hereof, a "commercial relationship" shall mean, in respect of such person or such person's close relatives (spouse, parents, spouse's parents, children, siblings or any person sharing the person's household) or entities controlled by such person or such person's close relatives or in which such person or his/her close relatives have a shareholding of more than one percent (1%) in the case of a publicly listed company or three percent (3%) in the case of a private company, any of the following: (i) employment, (ii) membership on the board of directors or equivalent body, (iii) any consulting relationship (whether paid or unpaid), or a shareholding in excess of one percent (1%) in the case of a publicly listed company or three percent (3%) in the case of a private company;

3. In the event that any duly appointed Director subsequently ceases to satisfy the criteria set forth in paragraph (2) above, as reasonably determined by the Board of Directors acting by simple majority, or the Board of Directors acting by simple majority revokes its Eligibility Waiver in respect of such Director, he or she shall be deemed to have automatically resigned from the Board of Directors, effective thirty (30) days following the date notice of such determination or revocation, as the case may be, has been provided by the Board of Directors to such Director. Notwithstanding the foregoing, if the duly appointed Director ceases to satisfy the criteria set forth in paragraph 2(e) as a result of the Company expanding its business or entering into a new line of business, such Director shall be deemed to continue to satisfy such criteria until the next annual General Meeting (or, if such conflict arises less than six months prior to the next annual General Meeting, until the next succeeding annual General Meeting). For purposes of the preceding sentence, the consolidated revenues threshold set forth in paragraph 2(e) above shall be five percent (5%), rather than one percent (1%).
 4. Subject to paragraph 5 of this Article, the Executive Directors and the Non-Executive Directors shall be appointed by the General Meeting for a maximum period of four (4) years, provided however, that, unless such director has resigned at an earlier date, a Director shall cease to hold office on the date of the first General Meeting held in the fourth year following the year in which he was appointed Director. With the exception of the first two (2) Designated Directors that are designated in accordance with the last sentence of this paragraph 6, the Priority shall have the right to make binding nominations in respect of two Designated Directors. The General Meeting may deprive the nomination of a candidate for Designated Director of its binding character by means of a resolution adopted by at least two-thirds (2/3) of the votes cast, such two thirds (2/3) majority representing more than fifty percent (50%) of the issued and outstanding capital of the Company. If the binding nomination is not deprived of its binding character, the person nominated will be deemed appointed. If the nomination is deprived of its binding character, the Priority will be allowed to make a new binding nomination. The first two (2) Designated Directors are designated as "Designated Director" by the Board of Directors from the Non-Executive Directors in office.
-

7. The Priority shall advise the Board of Directors not later than sixty (60) days in advance of a General Meeting if it wishes to make a binding nomination with full details of the nominee or nominees.
8. The Board of Directors shall have the power to appoint from its Executive Directors a Chief Executive Officer. A resolution of the Board of Directors to appoint or remove a Chief Executive Officer shall require a Special Majority (whereby for this purpose the Special Majority is calculated as if the member of the Board of Directors who is object of appointment or removal as CEO would not be in office).
9. The Board of Directors shall have the power to appoint from its Non-Executive Directors a Chairman.
10. The General Meeting shall adopt general guidelines in respect of the remuneration of the members of the Board of Directors and of the person(s) referred to in paragraph 3 of Article 13 (the "**Remuneration Policy**").
11. With due observation to the Remuneration Policy, the Board of Directors may establish a remuneration for the members of the Board of Directors in respect of the performance of their duties. 12. Notwithstanding the foregoing, if the Priority approves a resolution by the General Meeting to suspend or remove a Designated Director, such resolution of the General Meeting shall require only a simple majority of the votes cast on the matter. The Director concerned shall be given the opportunity to account for his conduct at the General Meeting. For that purpose he may have himself assisted by a legal adviser.

Each Director shall have one vote. If the voting for and against a proposal is equally divided, another vote shall be taken if so demanded by any Director.
 2. The Board of Directors shall draw up board rules to deal with matters that concern the Board of Directors internally and the division of duties within the Board of Directors and
-

its committees; the adoption and amendment of such internal rules shall require the unanimous approval of the Board of Directors.

The rules of the Board of Directors may *inter alia* include an allocation of tasks among the members of the Board of Directors and shall contain provisions concerning the matter in which meetings of the Board of Directors are called and held. The rules of the Board of Directors may stipulate that certain resolutions of the Board of Directors may validly be passed by one or more Directors, provided that the relevant resolutions are within the scope of the task(s) allocated to this or these particular Director(s).

The appointment of a substitute Director may be made at any time, including at the time of appointment of the original Director. When the appointment of a substitute Director in the context of this paragraph 3 of this Article 13 relates to the appointment of a substitute of a Designated Director, the Priority shall have the right to make a binding nomination for such appointment. The General Meeting may deprive such nomination of its binding character by means of a resolution adopted by at least two-thirds (2/3) of the votes cast, such two-thirds (2/3) majority representing more than fifty percent (50%) of the issued and outstanding capital of the Company. If the binding nomination is not deprived of its binding character, the person nominated will be deemed appointed as substitute for the absent or prevented Designated Director. If the nomination is deprived of its binding character, the Priority will be allowed to make a new binding nomination for appointment of a substitute for the absent or prevented Designated Director.

In the event that all Executive Directors or the sole Executive Director shall have ceased to hold office or be unable to execute their duties and responsibilities and no substitute Directors have been appointed, the Executive Director role in the management of the Company shall be temporarily entrusted to the person designated or to be designated for that purpose by the General Meeting.

The provisions of the Articles of Association concerning the Board of Directors and the Director(s) individually shall apply *mutatis mutandis* to the person referred to in this paragraph. Furthermore, that person shall be required to call a General Meeting as soon as possible, which General Meeting may decide on the appointment of one or several new Directors.

4. The Board of Directors may pass resolutions in writing, provided that all members of the Board of Directors have been consulted on the proposed resolution(s) and none of the members of the Board of Directors have objected against this form of resolution. A resolution in writing by the Board of Directors requires a simple majority of the members of the Board of Directors.
 5. Any Director with a conflict of interest in respect of the Company and/or its business shall refrain from participating in the deliberations and decision making of the Board of Directors in this particular matter. If as a direct result of the foregoing, no resolution can
-

be adopted by the Board of Directors, such resolution will be put before the General Meeting and subsequently the General Meeting can resolve on the matter.

Article 16.

- 1. The Board of Directors shall represent the Company. The power to represent the Company shall also vest in each Executive Director individually.
- 2. If an Executive Director performs any transaction in a private capacity to which transaction the Company also is a party, or if an Executive Director , acting in his private capacity, conducts any legal action against the Company other than as referred to in Section 15 of Book 2, each other Executive Director shall have the power to represent the Company.
- 3. The Board of Directors may grant power of attorney for signature to one or several persons and may alter or revoke such power of attorney.

Indemnity and Insurance.

Article 17.

- 1. To the extent permissible by law, the Company shall indemnify and hold harmless:
 - a. each member of the Board of Directors, both former members and members currently in office;
 - b. each person who is or was serving as an officer of the Company;
 - c. each person who is or was serving as a proxy holder of the Company;
 - d. each person who is or was a member of the board or supervisory board or officer of other companies or corporations, partnerships, joint ventures, trusts or other enterprises by virtue of their functional responsibilities with the Company and or its Subsidiaries,
- (each of them, for the purpose of this Article only, an "indemnified person"), against any and all liabilities, claims, judgments, fines and penalties ("claims") incurred by the indemnified person as a result of any threatened, pending or completed action, investigation or other proceeding, whether civil, criminal or administrative (each, a "legal action"), brought by any party other than the Company
-

2. Claims will include derivative actions brought on behalf of the Company or any Subsidiaries against the indemnified person and claims by the Company (or any Subsidiaries) itself for reimbursement for claims by third parties on the ground that the indemnified person was jointly liable toward that third party in addition to the Company.
 3. The indemnified person will not be indemnified with respect to claims insofar as they relate to the gaining in fact of personal profits, advantages or compensation to which he was not legally entitled, or if the indemnified person shall have been adjudged to be liable for willful misconduct (*opzet*) or intentional recklessness (*bewuste roekeloosheid*).
 4. Any expenses (including reasonable attorneys' fees and litigation costs) (collectively, "expenses") incurred by the indemnified person in connection with any legal action shall be settled or reimbursed by the Company, but only upon receipt of a written undertaking by that indemnified person that he shall repay such expenses if a competent court in an irrevocable judgment has determined that he is not entitled to be indemnified.  5. Also in case of a legal action against the indemnified person by the Company itself or any Subsidiary(s), the Company will settle or reimburse to the indemnified person his reasonable attorneys' fees and litigation costs, but only upon receipt of a written undertaking by that indemnified person that he shall repay such fees and costs if a competent court in an irrevocable judgment has resolved the legal action in favor of the Company or the relevant Subsidiary(s) rather than the indemnified person.
 6. Expenses incurred by the indemnified person in connection with any legal action will also be settled or reimbursed by the Company in advance of the final disposition of such action, but only upon receipt of a written undertaking by that indemnified person that he shall repay such expenses if a competent court in an irrevocable judgment has determined that he is not entitled to be indemnified.
Such expenses incurred by indemnified persons may be so advanced upon such terms and conditions as the Board of Directors decides.
 7. The indemnified person shall not admit any personal financial liability vis-a-vis third parties, nor enter into any settlement agreement, without the Company's prior written authorization.
The Company and the indemnified person shall use all reasonable endeavors to cooperate with a view to agreeing on the defense of any claims, but in the event that the Company and the indemnified person would fail to reach such agreement, the indemnified person shall comply with all reasonable directions given by the Company, in order to be entitled to the indemnity contemplated by this Article.
 8. The indemnity contemplated by this Article shall not apply to the extent claims and expenses are reimbursed by insurers.
 9. The Company will provide for and bear the cost of adequate insurance covering claims against the indemnified person, unless such insurance cannot be obtained at reasonable terms.
 10. This Article can be amended without the consent of the indemnified persons as such.
-

However, the indemnity provided herein shall nevertheless continue to apply to claims and/or expenses incurred in relation to the acts or omissions by the indemnified person during the periods in which this clause was in effect.

11. At its discretion, the Board of Directors may have the Company indemnify other members of the management team, not being members of the Board of Directors, or other employees, each in case of the Company or of a Subsidiary, comparable to the indemnification provided herein for the benefit of other indemnified persons.

GENERAL MEETING.

Notice and venue of the General Meeting.

Article 18.

1. Without prejudice to the provisions of Article 24, General Meetings shall be held as frequently as the Board of Directors may wish. The power to call the General Meeting shall vest in the Board of Directors, in each Executive Director individually and/or the Chairman.
2. The Board of Directors may determine a registration date for the purpose of registration of Shareholders who can attend the relevant Meeting and in order to establish the number of votes to be exercised at such General Meeting. In case the Board of Directors resolves to set a registration date for a General Meeting, any Shareholder who wishes to attend such General Meeting must inform the Board of Directors of its intent to attend the General Meeting. At the same time the registration date determines the number of votes that a Shareholder may cast in the General Meeting. The aforesaid registration date is set on the twenty-eighth (28th) day prior to the day of the relevant General Meeting. Should the Board of Directors resolve not to set a registration date, then all parties that can prove to hold Shares on the day of the General Meeting may attend the General Meeting and such Shareholders shall be able exercise votes on the basis of their Shares held on the day of the General Meeting.
3. The Board of Directors must call a General Meeting:
 - (a) if one or several Shareholders jointly representing at least one tenth of the issued capital so request the Board of Directors, that request to specify the subjects to be discussed and voted upon;
 - (b) if the Priority so requests the Board of Directors, solely for purposes of filling a vacancy in respect of one or both of the Designated Director positions by proposing by binding nomination a candidate or candidates for appointment by the General Meeting as Designated Director(s);
 - (c) within three months after the Board of Directors has considered it plausible that the equity capital of the Company has decreased to an amount equal to or less than one-half of the paid and called up part of the capital.

If the General Meeting is not held within six weeks after the request referred to under (a), the applicants themselves may call the General Meeting - with due observance of the applicable provisions of the law and the Articles of Association - provided that the President of the District Court has granted leave to such applicants for the convocation of a General Meeting (other than in the case of a request by the Priority referred to under

(b), in which case such leave shall not be required). The provisions of paragraph 2 of this Article shall apply *mutatis mutandis* to the procedure of calling a General Meeting referred to in the preceding sentence.

4. Any Shareholder(s) who hold at least three one-hundredths (3/100) of the issued capital of the Company may propose items for the agenda of the General Meeting. Such item for the agenda should together with an explanation be submitted to the Board of Directors at least sixty (60) days prior to the day of the General Meeting at which it shall be addressed. The Board of Directors will include such items for the agenda in an equal manner as items on the agenda proposed by the Board of Directors.
5. The Priority may propose the following items for the agenda of an annual General Meeting: (A) a proposal that the General Meeting removes a Designated Director from office, and (B) subject to and conditional upon the approval by the General Meeting of such removal, a binding nomination in respect of the appointment by the General Meeting of a replacement Designated Director. Such items for the agenda should together with an explanation be submitted to the Board of Directors at least sixty (60) days prior to the day of the annual General Meeting at which it shall be addressed. The Board of Directors will include such items for the agenda in an equal manner as items on the agenda proposed by the Board of Directors.
6. Without prejudice to paragraph 3 of this Article, once every calendar year the Priority may call a General Meeting for the sole purpose of (A) removal of a Designated Director from office, and (B) subject to the resolution by the General Meeting of such removal, a binding nomination in respect of the appointment by the General Meeting of a replacement Designated Director. For the avoidance of doubt, if the Priority calls a General Meeting in accordance with this paragraph 6, the provisions of this Article 18 in respect of the requirements for the convocation of a General Meeting shall apply accordingly.
7. Notice of the General Meeting must be given to each Shareholder. The term of notice must be at least fifteen (15) clear days before the day on which the meeting is held. Notice shall be given by means of letters, specifying the subjects to be discussed at the meeting. The notice should also contain information on a formal registration date (if applicable) for the registration of Shareholders who can attend the relevant Meeting and in order to establish the number of votes to be exercised at such General Meeting.
8. General Meetings shall be held in The Hague, Amsterdam, Rotterdam, Utrecht or at Schiphol Airport in the municipality of Haarlemmermeer. Entirely without prejudice to the provisions of paragraph 3 of this Article, any resolution passed at a General Meeting held elsewhere - in or outside the Netherlands - shall be valid only if the requirements of notice set out in paragraph 5 of this Article have been complied with and the entire issued and outstanding share capital is represented.

Admittance to and chairmanship of the General Meeting.

Article 19.

1. The Shareholders are entitled to admittance to the General Meeting. The Directors of the Company also are entitled to admittance, with the exception of any Director who has been suspended, and admittance shall further be granted to any person whom the chairman of

the meeting concerned has invited to attend the General Meeting or any part of that meeting.

2. If a Shareholder wishes to attend a General Meeting by proxy, he must issue a written power of attorney for that purpose, which power of attorney must be presented to the chairman of the meeting concerned.
3. The General Meeting shall be presided over by the Chairman. In case the Chairman is not available the Board of Directors shall appoint the chairman of the General Meeting.
4. Unless a notarial record of the business transacted at the meeting is drawn up, or unless the chairman of the General Meeting himself wishes to keep minutes of the meeting, the chairman shall designate a person charged with keeping the minutes.
The minutes shall be adopted by the General Meeting at the same meeting or at a subsequent meeting, in evidence of which the minutes shall be signed by the chairman of the General Meeting and the secretary of the meeting at which the minutes were adopted.

Each Class B Ordinary Share carries the right to cast ten (10) votes. Each Class C Ordinary Share carries the right to cast nine (9) votes. The Priority Share carries the right to cast one hundred (100) votes.

2. In determining the extent to which the Shareholders cast votes, are present or are represented, or the extent to which the share capital is represented the Shares in respect of which no votes may be cast shall not be taken into account.
3. Unless the Articles of Association stipulate a larger majority, all resolutions of the General Meeting shall be passed by a simple majority of the votes cast.
4. Blank votes and invalid votes shall not be counted as votes.
5. Votes on business matters - including proposals concerning the suspension, dismissal or removal of persons - shall be taken by voice or acclamation, but votes on the election of persons shall be taken by secret ballot, unless the chairman of the General Meeting decides on a different method of voting and none of the persons present at the meeting object to such different method of voting.
6. If at the election of persons the voting for and against the proposal is equally divided, another vote shall be taken at the same meeting; if then again the votes are equally divided, then - without prejudice to the provision in the following sentence of this paragraph - such person shall not be elected.

If at an election of persons the vote is taken between more than two candidates and none of the candidates receive the simple majority of votes, another vote - where necessary after an interim vote - shall be taken between the two candidates who have received the largest number of votes in their favor.

If the voting for and against any other proposal than as first referred to in this paragraph

is equally divided, that proposal shall be rejected.

7. The General Meeting may resolve to allow a Shareholder to attend and participate in the General Meeting by electronic means of communication, if and to the extent the identity of the thus attending Shareholder can be verified by the chairman of the General Meeting. Electronic votes submitted to the Board of Directors within twenty-eight (28) days of the General Meeting shall be considered to be issued at the General Meeting, provided the means of communication allows the chairman of the General Meeting to verify the identity of the voting Shareholder.

Shareholders' proxy. Shares belonging to any community of property or joint estate.

Article 21.

1. In respect of any or all of his Shares a Shareholder may give one or several persons written power of attorney to exercise any or all of the rights attached to those Shares. Such power of attorney may not be given in respect of one and the same Share to more than one person simultaneously. The powers referred to in this paragraph may also vest in usufructuaries and pledgees of Class A Ordinary Shares. The Board of Directors may invoke certain rules on the registration of proxies as referred to in this paragraph.
2. Joint owners of any community of property or joint estate comprising Shares or a limited right to Shares may only exercise their rights by giving one or several persons written power of attorney to exercise said rights. If power of attorney is given to several persons, such power of attorney must specify in respect of which number of Shares each proxy is authorised to exercise the rights attached thereto.

Decision-making outside a meeting.

Article 22.

Unless statutory provisions provide otherwise, any resolution which Shareholders entitled to vote can pass at a General Meeting may also be passed by them outside a meeting, provided that they all express themselves in writing in favor of the proposal concerned. We have three classes of authorized ordinary shares, which vote together as a single class unless otherwise provided by our articles of association or Dutch law: Class A shares, which have one vote per share; Class B shares, which have ten votes per share; and Class C shares, which have nine votes per share. The Class C shares are issued only to facilitate the conversion of Class B shares into Class A shares.

Under Dutch law, the voting power of shares is determined by reference to their par value. Our company's multiple class share structure is designed to give our principal shareholders increased voting power (without increasing their economic interest in our company), while also providing a means for them to convert their shares into Class A shares that can be transferred or sold, including in the public market.

Transfer and Conversion of Ordinary Shares

Because the conversion of a Class B share into a Class A share, with a lower par value, will result in a reduction of our share capital (an event which cannot occur without convening a formal shareholders' meeting), our articles of association provide that each Class B share converts (in defined circumstances) into both one Class A share and one Class C share. The Class C shares are intended to serve as a means of "storing" the additional par value of the converted Class B share until such time as we can repurchase and cancel the Class C share. To ensure that all such Class C shares are available for repurchase and cancellation, and to assure that they do not affect the outcome of any shareholder vote, all Class C shares are held by the Yandex Conversion Foundation (the "foundation"), a Dutch foundation managed by our board of directors. The foundation has agreed to sell any Class C shares it may hold, for no consideration, to us at any time, and not to sell or transfer such Class C shares to any other party. At the first general meeting of shareholders following any such repurchase, we seek shareholder approval for the cancellation of such Class C shares. The foundation has also agreed that it will vote any Class C shares it may hold in the same proportion as all other votes are cast at any general meeting of shareholders.

Our Class B shares are transferable only:

- To the foundation, upon which time each Class B share converts into one Class A share and one Class C share. The foundation is then obligated to transfer each converted Class A share to the original Class B shareholder, and to transfer the Class C share to us, as described above.
- To us for the purposes of repurchasing Class B shares.
- To Permitted Transferees (as defined in the articles of association).

Our Class A shares and Class C shares are not convertible into any other class of shares in our capital.

Voting Rights

At our shareholders' meetings, each Class A share is entitled to one vote, and each Class B share is entitled to ten votes. Each Class C share will be entitled to nine votes, but the foundation has agreed with us that it will vote any Class C shares it may hold at any time in the same proportion as all other votes are cast at any general meeting of our shareholders. The Class A, B and C shares vote together as a single class on all matters, including the election of directors, except as otherwise provided in our articles of association or Dutch law. The Priority Share carries the right to cast one hundred votes.

Our articles of association provide that a separate Class A shareholder approval will be required for:

- the transfer of our enterprise or substantially all of our enterprise to a third party;
- the conclusion or cancellation of any long-lasting cooperation by us or a subsidiary with any other legal person or company or as a fully liable general partner of a limited partnership or a general partnership, provided that such cooperation or the cancellation thereof is of essential importance to us;
- the acquisition or disposal of a participating interest in the capital of a company with a value of at least one-third of the sum of the assets according to the consolidated balance sheet in the most recently adopted set of our annual accounts, by us or a subsidiary;
- entering into of any transaction or series of related transactions by us or a subsidiary involving (i) the payment of an amount in excess of one-third of the sum of the assets according to the consolidated balance sheet in the most recently adopted set of our annual accounts, or (ii) the sale of assets with a value in excess of the amount set forth in (i) above; and
- the issuance of shares in excess of 20% of our issued share capital.

Board of Directors

Pursuant to our articles of association, the board of directors will consist of 12 members, of whom two will be designated directors. Other than in respect of designated directors, the members of our board of directors are appointed by the general meeting of shareholders in respect of which the board of directors shall make a non-binding nomination. If the person nominated by the board of directors is subsequently not appointed by the general meeting of shareholders, the board of directors will be allowed to make a new non-binding nomination.

The first two designated directors are designated as "Designated Director" by the board of directors from the non-executive directors in office. With exception of the first two designated directors that are designated in accordance with the previous sentence, the holder of the priority share has the right to make binding nominations in respect of two designated directors. The general meeting of shareholders may deprive the nomination of a candidate for designated director of its binding character by means of a resolution adopted by at least two-thirds of the votes cast, such two-thirds majority representing more than 50% of our issued and outstanding capital. If the binding nomination is not deprived of its binding character, the person nominated will be deemed appointed. If the nomination is deprived of its binding character, the holder of the priority share will be allowed to make a new binding nomination.

Directors may be removed and/or suspended from office by the general meeting of shareholders. A resolution to remove or suspend a director requires a two-thirds majority of the votes cast in a meeting, such two-thirds majority representing at least 50% of our issued and outstanding share capital. Notwithstanding the foregoing, if the holder of the priority share approves a resolution by the general meeting of shareholders to suspend or remove a designated director, such resolution of the general meeting of shareholders shall require only an absolute majority of the votes cast on the matter.

In the performance of its duties, the board of directors is required by Dutch law to consider the interests of Yandex, its shareholders, its employees and other stakeholders.

Dividends

The holders of our ordinary shares and the holder of the priority share are entitled to such part of our profits for any financial year as remains available after reservation of profits by our board of directors. The holders of our ordinary shares and the holder of the priority share shall be entitled *pari passu* to our profits, *pro rata* to the total number of Class A shares, Class B shares, and Class C shares and/or the priority share held, provided that out of the profit of any financial year, the holders of Class C shares and the priority share shall be entitled to a maximum amount equal to 1% of the nominal value of such shares. Although the holders of our Class C shares are technically entitled to such

maximum amount, when we declare dividends on our Class A and Class B shares, we intend to repurchase all Class C shares issued upon conversion of our Class B shares before the board of directors resolves to make any dividend distributions such that no dividends would be payable on our Class C shares.

Additionally, the board of directors has the right to declare interim dividends without the approval of the general meeting of shareholders. We may not pay dividends if the payment would reduce shareholders' equity to an amount less than the aggregate fully paid-up share capital plus the reserves that have to be maintained by law or our articles of association. The amounts available for dividends will be determined based on the statutory accounts of Yandex N.V. prepared under Dutch law, which may differ from our consolidated financial statements.

The board of directors may decide that dividends or other distributions are paid in the form of cash, shares or a combination of both.

Issue of Shares; Preemptive Rights

Our board of directors has the power to issue shares, if and to the extent that either the general meeting of shareholders or the articles of association has delegated such power to the board of directors to act as the authorized body for this purpose. A delegation of authority to the board of directors to issue shares remains effective for the period specified by the general meeting of shareholders, or specified in the articles of association, and may be up to five years from the date of delegation or the date of the articles of association. A general meeting of shareholders may renew annually this delegation and this delegation may also be renewed by the articles of association for additional periods of up to five years. Without this delegation, the general meeting of shareholders has the power to authorize the issuance of shares upon receipt of a written proposal of the board of directors to such effect.

Any resolution by the general meeting of shareholders to issue shares, other than Class C shares, in excess of 20% of our issued share capital (calculated by nominal value, excluding the Class C shares, on the date of such resolution) or any resolution by the general meeting of shareholders to delegate the authority to issue shares, other than Class C shares, in the excess of 20% of our issued share capital (calculated by nominal value, excluding the Class C Ordinary Shares, on the date of such resolution), requires prior approval from the meeting of holders of Class A Shares.

The holders of our ordinary shares have a pro rata (based on the number of shares held) preemptive right to subscribe for Class A shares and Class B Shares that we issue for cash, unless the general meeting of shareholders, or the board of directors (if either the general meeting of shareholders or the articles of association has delegated such power to the board of directors) limits or eliminates this right. If the general meeting of shareholders delegates its authority to the board of directors for this purpose, then the board of directors will have the power to limit or eliminate the preemptive rights of shareholders. In the absence of this delegation, the general meeting of shareholders will have the power to limit or eliminate these rights. Such resolution requires the approval of a two-thirds majority of the votes cast in a general meeting of shareholders if less than 50% of our issued share capital is present or represented. Delegations of authority to the board of directors may remain in effect for up to five years and may be annually renewed for additional periods of up to five years.

Repurchase of Shares

We may acquire our shares, subject to applicable provisions of Dutch law and of our articles of association, to the extent:

- our equity capital, reduced by the acquisition price, is not less than the sum of the issued and paid-up capital and the reserves to be maintained pursuant to Dutch law or our articles of association;
- after the repurchase, at least one issued share in the capital of the Company remains outstanding and is not held by us; and
- after the repurchase, we and our subsidiaries would not hold, or hold as pledgee, shares having an aggregate par value that exceeds 50% of the par value of our issued share capital.

Our board of directors may direct the company to repurchase shares only if the general meeting of shareholders has authorized the board of directors to repurchase shares. This authorization may be given for a maximum period of 18 months and should contain the maximum number of shares to be repurchased and a price range. The authorization may be renewed annually.

We regularly repurchase, for no consideration, any Class C shares that may be issued to the foundation promptly upon the conversion of Class B shares, in which case the above requirements do not apply.

Reduction of Share Capital

Upon receipt of a written proposal of the board of directors to this effect, at a general meeting of shareholders, our shareholders may vote to reduce the issued share capital by canceling shares held by us or by reducing the par value of our shares by amendment of the articles of association. In either case, this reduction would be subject to applicable statutory provisions. This includes that a resolution to cancel shares may only relate to (i) shares held by us, or (ii) to all the shares of a particular class, in respect of which the articles of association provide that the same may be cancelled against repayment of their par value.

A resolution for reduction of capital shall require a majority of at least two thirds of the votes cast, if less than 50% of our issued share capital is present or represented at the relevant meeting of shareholders. We seek shareholder approval on a regular basis for the cancellation of any Class C shares that may be issued from time to time following their repurchase by us.

Priority Share

We have authorized and outstanding one priority share with a nominal value of €1.00. Our articles of association provide that the priority share may only be held by the Public Interest Foundation or another party that is specifically nominated by our board of directors for this purpose, with a Special Majority (as defined in the articles of association), including the affirmative vote of at least one designated director. The priority share was held in treasury as of December 31, 2019 and is currently held by the Public Interest Foundation.

The key rights vested in the priority share are the rights to approve:

- the accumulation by a party, of shares representing 10% or more, in number or by voting power, of the outstanding Class A and Class B Shares (taken together), if the Board has otherwise approved such accumulation of shares.
- a decision of the Board to sell, transfer or otherwise dispose of all or substantially all of our assets to one or more third parties in any transaction or series of related transactions; and
- to make binding nominations of two designated directors.

As additional support for the protective rights of the Public Interest Foundation, the Public Interest Foundation holds a Special Voting Interest in Yandex Russia. The Special Voting Interest allows the Public Interest Foundation to temporarily replace the General Director of Yandex in certain exceptional circumstances.

 - (ii) YNV (or its Affiliate) shall be entitled to provide its offer in respect of placing such Company Advertising. In case a Promotion Channel can only be provided to the Company by YNV (or its Affiliate) in an agent capacity or through an advertising reseller, Sberbank (or its Affiliate), including in an agent capacity or through an advertising reseller, shall also be entitled to provide its offer in respect of placement of the Company Advertising through such Promotion Channel; and

 - (d) finally, the Chair shall promptly determine, by way of coin toss in the presence of at least one YNV Director and one Sberbank Director, which one of the remaining two candidates should be appointed as CEO or CFO (as applicable), and upon such determination, the Pre-Agreed Deputy shall be immediately removed from the position of CEO or CFO (as applicable) and the relevant candidate should be appointed to the relevant position.

30.6 Duration of confidentiality obligations

The obligations contained in this Clause 30 shall last indefinitely notwithstanding the termination of this Agreement or a person ceasing to be party to this Agreement.

PART I – GENERAL

31 General

31.1 Arbitration

- 31.1.1** The Parties agree that, in respect of any claim, dispute or difference or controversy of whatever nature arising out of, relating to, or in connection with this Agreement (including a claim, dispute, difference or controversy regarding its existence, termination, validity, interpretation, performance, breach, the consequences of its nullity or any non-contractual obligations arising out of or in connection with this Agreement) (each, a "**Dispute**"), they shall notify in writing the other parties and attempt in good faith to resolve such Dispute. If no such resolution can be reached during the ** following the date of such written notice, then such Dispute shall be referred upon the application of any party to, and finally settled by, arbitration in accordance with the London Court of International Arbitration ("**LCIA**") Rules (the "**Rules**") as in force at the date of this Agreement, which Rules, as amended by this Clause 31.1, are deemed to be incorporated into this Clause 31.1, and capitalised terms used in this Clause 31.1 which are not otherwise defined in this Agreement have the meaning given to them in the Rules.
- 31.1.2** The number of arbitrators shall be three, one of whom shall be nominated by the Claimant(s) between them, one by the Respondent(s) between them, and the third of whom, who shall act as presiding arbitrator of the tribunal, shall be nominated by the two party-nominated arbitrators, provided that if the third arbitrator has not been nominated within ** of the nomination of the second party nominated arbitrator, such third arbitrator shall be appointed by the LCIA.
- 31.1.3** The seat of arbitration shall be London, England and the language of arbitration shall be English. Sections 45 and 69 of the Arbitration Act 1996 shall not apply.
- 31.1.4** No party shall be required to give general discovery of documents but may be required only to produce specific, identified documents or classes of documents which are relevant to the Dispute.
- 31.1.5** Each party agrees that the arbitration agreement set out in this Clause 31.1 and the arbitration agreement contained in each other Transaction Document (other than the Ancillary Agreements and all documents entered into pursuant to the Ancillary Agreements) shall together be deemed to be a single arbitration agreement.
- 31.1.6** Each party consents to being joined to any arbitration commenced under any Transaction Document on the application of any other party if the Arbitral Tribunal so allows, and subject to and in accordance with the Rules. Before the constitution of the Arbitral Tribunal, any party to an arbitration commenced pursuant to this Clause 31.1 may effect joinder by serving notice on any party to any Transaction Document whom it seeks to join to the arbitration proceedings, provided that such notice is also sent to all other parties to the Dispute and the LCIA Court within ** of service of the Request for Arbitration. The joined party will become a claimant or respondent party (as appropriate) to the arbitration proceedings and participate in the arbitrator appointment process in Clause 31.1.2.
-

Certain information in this document has been omitted and filed separately with the Securities and Exchange Commission pursuant to Rule 24b-2 under the Securities Exchange Act of 1934. Confidential treatment has been requested with respect to the omitted portions. Double asterisks denote omissions.

- 31.1.7** An Arbitral Tribunal constituted under this Agreement may consolidate an arbitration hereunder with an arbitration under any other Transaction Document if the arbitration proceedings raise common questions of law or fact, and subject to and in accordance with the Rules. For the avoidance of doubt, this Clause 31.1.7 is an agreement in writing by all parties to any arbitrations to be consolidated for the purposes of Article 22.1(ix) of the Rules. If an Arbitral Tribunal has been constituted in more than one of the arbitrations in respect of which consolidation is sought pursuant to this Clause 31.1.7, the Arbitral Tribunal which shall have the power to order consolidation shall be the Arbitral Tribunal appointed in the arbitration with the earlier Commencement Date under Article 1.4 of the Rules (i.e. the first-filed arbitration). Notice of the consolidation order must be given to any arbitrators already appointed in relation to any of the arbitration(s) which are to be consolidated under the consolidation order, all parties to those arbitration(s) and the LCIA Registrar. Any appointment of an arbitrator in the other arbitrations before the date of the consolidation order will terminate immediately and the arbitrator will be deemed to be discharged. This termination is without prejudice to the validity of any act done or order made by that arbitrator or by any court in support of that arbitration before that arbitrator's appointment is terminated; his or her entitlement to be paid proper fees and disbursements; and the date when any claim or defense was raised for the purpose of applying any limitation bar or any similar rule or provision. If this clause operates to exclude a party's right to choose its own arbitrator, each party irrevocably and unconditionally waives any right to do so.
 - 31.1.8** To the extent permitted by applicable Laws, each party waives any objection, on the basis that a Dispute has been resolved in a manner contemplated by Clauses 31.1.6 to 31.1.7, to the validity and/or enforcement of any arbitral award.
 - 31.1.9** Each party agrees that any arbitration under this Clause 31.1 shall be confidential to the parties and the arbitrators and that each party shall therefore keep confidential, without limitation, the fact that the arbitration has taken place or is taking place, all non-public documents produced by any other party for the purposes of the arbitration, all awards in the arbitration and all other non-public information provided to it in relation to the arbitral proceedings, including hearings, save to the extent that disclosure may be requested by a regulatory authority, or required of it by legal duty, to protect or pursue a legal right or to enforce or challenge an award in bona fide legal proceedings before a state court or other judicial authority.
 - 31.1.10** The law of this arbitration agreement, including its validity and scope, shall be English law.
 - 31.1.11** This agreement to arbitrate shall be binding upon the parties, their successors and permitted assigns.
 - 31.2 Governing law and submission to jurisdiction**

 - 31.2.1** This Agreement and any non-contractual obligations arising out of or in connection with it shall be governed by English law.
 - 31.2.2** Each of the Parties irrevocably submits to the non-exclusive jurisdiction of the courts of England to support and assist the arbitration process pursuant to Clause 31.1,

including if necessary the grant of interlocutory relief pending the outcome of that process.

16. MISCELLANEOUS

- 16.1 **Settlements.** The Parties agree that settlements based on prepayment, advance payment, payment by installments or deferred payment hereunder (if applicable) are not a commercial loan in the meaning of Article 823 of the Civil Code, and in accordance with Article 317.1 of the Civil Code the lender is not entitled to demand interest from the debtor accrued on the amount of the debt during the period of use of the funds, unless expressly provided otherwise by this Agreement. Without limiting the foregoing, the Parties hereby confirm and agree that (a) the procedure of payment by the Purchaser of the Purchase Price stipulated herein is not a form of attraction by the Purchaser of financing from the Seller, and that the provisions of Article 823 of the Civil Code are not applicable to payment of the Purchase Price; and (b) unless expressly provided otherwise by this Agreement, interest may not accrue on any part of the Purchase Price (including in accordance with Article 317.1 of the Civil Code) during the period from the Execution Date to the due date of payment of the relevant amount in accordance with this Agreement.
- 16.2 **Waiver of claim.** The Purchaser's failure to submit a claim regarding any action or omission to act on the part of the Seller (including the failure to give notice regarding the waiver of the Agreement), irrespective of the period during which such action or omission to act continues, does not constitute waiver by the Purchaser of any rights provided to it by this Agreement. The express or implied waiver by the Purchaser at any time of any claim in respect of a breach of any term of this Agreement may not be construed as a waiver of the claim upon a breach of any other term of this Agreement or as consent to any subsequent breach of the same or any other term of this Agreement. If any action of the Seller requires the consent of or approval by the Purchaser, the Purchaser's consent to or approval of such action in any specific case may not be construed as consent or approval of the same action in any subsequent case or of any other action in that case or in any subsequent case.
- 16.3 **Set-off.** Unless expressly provided otherwise herein, or unless the Parties agree otherwise in writing: (i) all amounts payable under this Agreement by the Seller must be paid in full without any withholding or deduction, unless such withholding or deduction is required in accordance with Applicable Law; (ii) the Seller is not entitled to demand any set-off or to perform any set-off on the basis of a counterclaim against the Purchaser in order to justify withholding of payment of any amount, in full or in part.

- 16.5 **Partial invalidity.** If one or more provisions of this Agreement for any reason become invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will have no impact on the validity, legality and enforceability of the other provisions hereof. The Parties confirm that in accordance with Article 180 of the Civil Code the invalidity of one or several provisions of this Agreement will not render the Agreement invalid as a whole. The Parties agree to use their best efforts to replace any provision of this Agreement that is illegal, invalid or unenforceable in any respect with an appropriate legal, valid and enforceable provision, the effect of which will most closely approximate the desired effect of the illegal, invalid or unenforceable provision.
- 16.6 **Scope.** The scope of the transaction, its consequences, liability, rights and obligations, as well as provisions of Parts I and II of the Civil Code, including those expressly specified in this Agreement, are known and clear to the Parties. The Parties confirm that the transaction hereunder is not made under the influence of delusion, deception, violence, threat or adverse circumstances.
- 16.7 **Term of payments.** Unless this Agreement provides for a different timeframe for specific payments, a Party will make the appropriate payment to the settlement account of the other Party within ** Business Days upon receipt of the relevant request from the other Party.
- 16.8 **Rounding.** The amounts of payments received as a result of calculations in accordance with this Agreement are subject to mathematical rounding to two decimal places.
- 16.9 **Survival.** The Parties agree that Clauses 1, 3.10, 6.3, 7, 8, 11, 12, 14, 15 and 16 shall survive the termination of this Agreement.

- 16.11 **Amendments and addenda.** Any amendments and/or addenda to this Agreement shall be effective only if made in writing and signed by both of the Parties.
- 16.12 **Counterparts.** This Agreement is executed in the Russian language in three (3) original counterparts, each having equal legal force, one for the Seller, one for the Purchaser and one for the Registration Authority.

4.1 The Consideration Shares shall be credited as fully paid, issued to the Seller free from all Encumbrances and rank *pari passu* in all respects with the existing Class A ordinary shares of US\$0.10 each in the capital of the Buyer, including the right to receive all dividends declared, made or paid after the Completion Date (save that they shall not rank for any dividend or other distribution of the Buyer declared made, or paid by reference to a record date before the Completion Date).

4.2 For the purposes of this Agreement, the aggregate number of the Consideration Shares, as well as the number comprising each of the Completion Consideration Shares, the Application Integration Shares and the Integration Consideration Shares shall be calculated by the Buyer at Completion, based on the calculation of [***], provided that, with respect to the Integration Consideration Shares, such number shall be adjusted after Completion for any stock split, combination, recapitalization or similar event that occurs after Completion but before the Integration Consideration Shares are allotted and issued to the Seller. Following such calculation, and in any event not later than [***], the Buyer shall notify the Seller in writing of the number of Consideration Shares, as well as the number comprising each of the Completion Consideration Shares, the Application Integration Shares and the Integration Consideration

Shares prior to any adjustments that may be made to such number of Consideration Shares in accordance with this Agreement, and provide supporting documentation in respect of such calculation. The Seller shall be entitled to request the Buyer to provide such additional information and documents as may reasonably be required to confirm the calculation made by the Buyer.

- 4.3 The Buyer shall not be under any obligation to issue a fraction of a Consideration Share and accordingly the number of the Consideration Shares to be issued to the Seller shall be rounded down to the nearest whole number in order to give effect to this Clause 4.3.
- 4.4 The Seller undertakes to the Buyer that notwithstanding any release of the Seller from its lock-up obligations in respect of the Consideration Shares set out in the SHA Supplemental Deed:
- 4.4.1 it shall not, until [***] (the “**Initial Lock-in Period**”), Transfer [***] of the Consideration Shares (or any interest in them) to, or enter into any agreement to do so with, any Third Party;
- 4.4.2 following the Initial Lock-in Period, it shall not, until [***] (the “**Second Lock-in Period**”), Transfer [***] of the Consideration Shares (or any interest in them) to, or enter into any agreement to do so with, any Third Party; and
- 4.4.3 following the Second Lock-in Period, it shall not, until [***] (the “**Third Lock-in Period**” and, together with the Initial Lock-in Period and the Second Lock-in Period, the “**Lock-in Periods**”), Transfer [***] of the Consideration Shares (or any interest in them) to, or enter into any agreement to do so with, any Third Party,
- in each case, except in accordance with Clause 4.5.
- 4.5 Nothing in Clause 4.4 shall prevent the Seller from Transferring all or a portion of the Consideration Shares (or any interest in them) which are subject to the undertaking not to Transfer pursuant to Clause 4.4 during the relevant Lock-in Period:
- 4.5.1 in acceptance of a general offer made by any Third Party for all of the voting shares comprising the share capital of the Buyer (other than any ordinary share capital owned by the offeror or any concert party of the offeror) which is recommended by a majority of the Supervisory Board of the Buyer;
- 4.5.2 pursuant to an irrevocable commitment to accept any offer made for all of the voting shares comprising the share capital of the Buyer (other than any share capital owned by the offeror or any concert party of the offeror) which is recommended by a majority of the Supervisory Board of the Buyer;
- 4.5.3 where such disposal is made pursuant to an offer by the Buyer to purchase its own shares which is made on identical terms to all holders of voting shares in the Buyer and otherwise complies with Applicable Law;
- 4.5.4 pursuant to any scheme of reconstruction in relation to the Buyer in connection with its insolvency;
- 4.5.5 pursuant to any compromise or arrangement which is agreed by the requisite majority of the members of the Buyer and sanctioned by the court;
- 4.5.6 in the event of an intervening final and non-appealable court order or otherwise as required by Applicable Law;

- 4.5.7 to satisfy a Claim under this Agreement in accordance with Clause 7.4;
 - 4.5.8 in connection with [***]; or
 - 4.5.9 with the prior written consent of the Buyer.

- 4.6.1 any shares held by the Seller arising out of the consolidation, conversion or subdivision of any of the Consideration Shares; and
 - 4.6.2 any shares acquired by reference to the Consideration Shares, whether by way of a bonus or rights issue, pre-emption right or otherwise, or in exchange or substitution for any of the Consideration Shares.
- 4.7 [***].
- 4.8 [***]:
- 4.9 [***].

5. COMPLETION CONSIDERATION; ADJUSTMENT

5.1 Purchase Price Reduction

- 5.1.1 In the event that during the period from [***] to [***] (the “**Extended Operating Metrics Measurement Period**”) or, [***] (the “**Operating Metrics Measurement Period**”) the average of: (i) [***] and (ii) [***] (the “[***]”) is [***] as determined pursuant to the procedure set out in Clause 5.1.2 based on the calculations provided by the Seller to the Buyer pursuant to Clause 5.1.2, where [***];

then [***], the Adjustable Purchase Price payable to the Seller hereunder shall be reduced by [***] (with any such reduction applying proportionately to the Completion Consideration Cash [***]), the Completion Consideration Shares, the Application Integration Shares, the Deferred Cash, the Integration Consideration Cash and the Integration Consideration Shares). The calculation of any such Adjustable Purchase Price reduction (the “**Operating Metrics Reduction**”) shall be made by the Buyer and furnished to the Seller at least [***] prior to the date on which [***].

- 5.1.2 For purposes of calculating the Operating Metrics Reduction (if any):

- (a) [***];
- (b) during the Operating Metrics Measurement Period or the Extended Operating Metrics Measurement Period (as applicable), [***], the Seller shall provide to the Clean Team the calculation of (i) [***] and (ii) [***] (“**Weekly Metrics**”). At any time during the Operating Metrics Measurement Period or the Extended Operating Metrics Measurement Period (as applicable), at the Buyer’s request, the Seller shall grant access to the Group Companies and the Former Group Companies books, records, premises and IT systems to members of the Clean Team for purposes of verification of the data underlying the Weekly Metrics (“**Operating Metrics DD**”), provided that such Operating Metrics DD shall be conducted by the Clean Team in a manner that does not cause a material

interruption of the business of the relevant Group Companies or the Former Group Companies;

- (c) if the Clean Team disagrees with any Weekly Metrics or any item thereof, it shall give notice of such disagreement to the Seller within [***] of presentation to the Clean Team of the calculation of such Weekly Metrics by the Seller or within [***] of the completion of the Operating Metrics DD, and such notice shall state the reasons for the disagreement in reasonable detail and specify the adjustments which, in the Clean Team's opinion, should be made to the Weekly Metrics (the "**Metrics Disagreement Notice**"). In any event, the Metrics Disagreement Notice shall be provided by the Clean Team to the Seller no later than [***];
 - (d) if the Clean Team does not provide the Metrics Disagreement Notice by the time specified in Clause 5.1.2(c), then the Operating Metrics Reduction (if any) shall be calculated on the basis of the Weekly Metrics provided by the Seller;
 - (e) if during the Operating Metrics Measurement Period or the Extended Operating Metrics Measurement Period (as applicable) the Clean Team gives a Metrics Disagreement Notice to the Seller as contemplated by Clause 5.1.2(c), the Seller and the Buyer shall attempt in good faith to reach agreement in respect of the relevant Weekly Metrics as soon as reasonably practicable and the Weekly Metrics as revised by such agreement shall be utilised for purposes of calculation of the Operating Metrics Reduction, if any; and
 - (f) if the Parties are unable to resolve, or procure the resolution of, such disagreement or difference of opinion in respect of the relevant Weekly Metrics [***], then the Clean Team's calculation of Weekly Metrics specified in its Metrics Disagreement Notice shall be used for purposes of calculation of the Operating Metrics Reduction (if any).
- 5.2 On a date when all of the Conditions set out in Clause 8.1 (other than those Conditions that, by their nature, are to be satisfied at the Completion Date) shall have been satisfied in full or waived by the relevant Parties, the Buyer shall be entitled to reasonably request the Seller to grant (and the Seller shall grant) access to the Group Companies and the Former Group Companies books, records, premises and IT systems to the Representatives of the Buyer for purposes of continuing the Operating Metrics DD in respect of the Extended Operating Metrics Measurement Period, provided that (i) such Operating Metrics DD shall be conducted by the Buyer and its Representatives during the period of [***] and in a manner that does not cause a material interruption of the business of the relevant Group Companies or the Former Group Companies and (ii) the Seller shall continue to provide the Weekly Metrics as contemplated by Clause 5.1.2(b) and the procedure established in Clauses 5.1.2(b) to 5.1.2(f) shall continue to apply to the Extended Operating Metrics Measurement Period.
- 5.3 Following Completion, each of the Seller and the Buyer shall be entitled to further examine the data underlying the calculation of the Weekly Metrics provided by the Seller within the entire Extended Operating Metrics Measurement Period and re-calculate [***] based on the same principles as set out in Clause 5.1.1 as follows:
- 5.3.1 the Seller shall procure that upon the Buyer's reasonable request, the Former Group Companies promptly provide the Buyer and its Representatives access during normal business hours and upon reasonable advance notice to the work papers, books and records and IT systems of the Former Group Companies containing data

relating to the calculation of each of the Weekly Metrics for purposes of such examination;

- 5.3.2 the Buyer shall procure that upon the Seller's reasonable request, the Group Companies promptly provide the Seller and its Representatives access during normal business hours and upon reasonable advance notice to the work papers, books and records and IT systems of the Group Companies containing data relating to the calculation of each of the Weekly Metrics for purposes of such examination;
- 5.3.3 each of the Seller and the Buyer shall have the right to deliver a written notice to the other Party stating its disagreement (as well as the reasons for such disagreement in reasonable detail) and specifying the adjustments which, in the opinion of the Party giving notice, should be made to the calculation of each of the Weekly Metrics provided by the Seller during the entire Extended Operating Metrics Measurement Period and the resulting Operating Metrics Reduction (if any) determined in accordance with Clauses 5.1.2(d) to 5.1.2(f) and Clause 5.2 on the basis of such Weekly Metrics (the "**Completion Metrics Calculation**") within [***] (the "**Objection Notice**"). If, based on such further examination of the data underlying the calculation of the [***], in the opinion of the Buyer, either [***] or [***] is greater than [***] as determined pursuant to Clause 5.1.1, then within [***] following Completion the Buyer shall be entitled to give to the Seller an Objection Notice asserting a Material Adverse Change (the "**MAC Notice**"). If neither Party timely delivers an Objection Notice or the MAC Notice, the Completion Metrics Calculation shall be final and binding on the Parties.
- 5.4 If either Party timely delivers an Objection Notice (or in the case of the Buyer, the MAC Notice), then the Parties shall attempt in good faith to reach agreement on the disputed portions of the Completion Metrics Calculation. If, using their respective reasonable endeavours, the Buyer and the Seller are able to resolve the disagreements regarding the Completion Metrics Calculation within [***] of the receipt of the Objection Notice or the MAC Notice, as applicable, the Parties shall be deemed to have accepted the Completion Metrics Calculation as revised by such resolution as accurate and final and binding on the Parties (the "**Revised Metrics Calculation**"). If the Parties are unable to reach agreement within fifteen (15) Business Days, they shall proceed to resolve such Dispute as set out in Clause 21.2.
- 5.5 If the Revised Metrics Calculation is agreed or all claims arising out of disagreement over the Completion Metrics Calculation are Determined:
- 5.5.1 and pursuant to such agreement or Determination of the Revised Metrics Calculation the [***] is [***] as determined pursuant to Clause 5.1.1, then the Adjustable Purchase Price (including for the avoidance of doubt each of the Adjustable Cash Component and the Consideration Shares) shall be increased or reduced so as to ensure that the aggregate Adjustable Purchase Price (as otherwise adjusted pursuant to other provisions of Clause 5 and Clause 6) received by the Seller at Completion and within [***] is equal to the Adjustable Purchase Price that the Seller would have been entitled to under this Agreement if the Revised Metrics Calculation instead of the Completion Metrics Calculation were used for purposes of determining the Operating Metrics Reduction (if any) (the "**Metrics Adjustment**");
- 5.5.2 and pursuant to such agreement or Determination of the Revised Metrics Calculation:

- (a) either [***] or the [***] is greater than [***] as determined pursuant to Clause 5.1.1, then the Adjustable Purchase Price payable to the Seller hereunder shall be [***]; and
 - (b) to the extent the [***] is above [***], and after making a reduction to the Adjustable Purchase Price pursuant to Clause 5.1.1 and Clause 5.5.2(a), [***], the Adjustable Purchase Price payable to the Seller hereunder shall be [***]; and
- 5.5.3 the Adjustable Purchase Price increase calculated pursuant to this Clause 5.5 shall apply proportionately to the Deferred Cash, the Integration Consideration Cash, and the Integration Consideration Shares. In the event that, as the result of the calculations pursuant to this Clause 5.5, the Adjustable Purchase Price shall be reduced, the Buyer shall be entitled to set off the amount of the Metrics Adjustment proportionately against the Deferred Cash, the Integration Consideration Cash, and the Integration Consideration Shares. If the amount of the Metrics Adjustment exceeds the aggregate amount of the Deferred Cash, the Integration Consideration Cash, and the Completion Value of all Integration Consideration Shares, then the Seller shall pay the amount of such excess to the Buyer in cash and otherwise in accordance with Clause 1.2.9 within [***] of such calculation, unless the Seller makes an election to satisfy such Claim by [***].
- 5.6 Subject to Clause 5.12, the Completion Consideration Cash shall be adjusted after Completion in accordance with the remaining provisions of this Clause 5 and the process set out in **Error! Reference source not found.** (*Completion Statement Principles*).
- 5.7 The Draft Completion Statement as agreed or determined pursuant to paragraph 3 of **Error! Reference source not found.** (*Completion Statement Principles*) shall constitute the Agreed Completion Statement for the purposes of this Agreement and shall be final and binding on the Parties.
- 5.8 [***] and [***] shall be derived from the Agreed Completion Statement.
- 5.9 The Completion Consideration Cash shall be adjusted as follows:
- 5.9.1 in the event that [***], the amount of the excess shall be payable by the Buyer to the Seller in accordance with Clause 5.10;
 - 5.9.2 in the event that [***], the amount of the deficit shall be payable by the Seller to the Buyer in accordance with Clause 5.10;
 - 5.9.3 in the event that [***], the amount of the excess shall be payable by the Seller to the Buyer in accordance with Clause 5.10;
 - 5.9.4 in the event that the [***], the amount of the excess shall be payable by the Buyer to the Seller in accordance with Clause 5.10; and
 - 5.9.5 in the event that the [***], the amount of the deficit shall be payable by the Seller to the Buyer in accordance with Clause 5.10.
- 5.10 The Buyer and the Seller agree that the sums that the Buyer or the Seller, as the case may be, is respectively obliged to pay to the Seller or the Buyer pursuant to Clauses 5.9.1 to 5.9.5 (inclusive) shall be aggregated and set off against each other. The amount that the Buyer or the Seller, as the case may be, is still obliged to pay to the Seller or the Buyer respectively after such set-off shall be referred to in this Agreement as the “**Net Adjustment**”. Subject to

Clause 5.12, the Net Adjustment shall be paid in cash within [***] of agreement or determination of the Agreed Completion Statement and otherwise in accordance with Clause 1.2.9.

5.11 A/R Adjustment

- 5.11.1 On or before the date that is [***] following the Completion Date, the Buyer shall deliver a written statement (the “**A/R Statement**”) to the Seller setting forth the aggregate amount of the Completion Date A/R actually collected by the Company or any of its Subsidiaries as of the end of business on the date that is [***] following the Completion Date (the “**Collected A/R**”), including a calculation of the amount, if any, by which the Completion Date A/R exceeds the Collected A/R (such amount, if any, the “**A/R Shortfall**”). Following the delivery of the A/R Statement, the Buyer shall procure that upon the Seller’s reasonable request, the Group Companies provide the Seller and its Representatives access during normal business hours and upon reasonable advance notice to the work papers and books and records relating to the preparation of the A/R Statement for the purpose of assisting the Seller and its Representatives in their review of the A/R Statement and the calculation of the A/R Shortfall (if any) contained therein. If the Seller does not timely dispute the calculation of the A/R Shortfall contained in the A/R Statement, such amount shall be final and binding.
- 5.11.2 If the Seller disagrees with the calculation of the A/R Shortfall (if any) contained in the A/R Statement, the Seller shall notify the Buyer of such disagreement in writing within [***] after receipt by the Seller of the A/R Statement, which notice (the “**A/R Dispute Notice**”) will set forth in reasonable detail the Seller’s alternative calculation of the A/R Shortfall and the provisions of Clause 5.11.3 shall apply to resolving such dispute.
- 5.11.3 In the event any such A/R Dispute Notice is timely provided:
- (a) the Seller and the Buyer shall use commercially reasonable efforts for a period of [***] (or such longer period as they may mutually agree) to resolve any disagreements with respect to the calculation included in the A/R Statement that were disputed in the A/R Dispute Notice. If, at the end of such period, the Seller and the Buyer remain unable to resolve the dispute in its entirety, then the unresolved items and amounts thereof in dispute shall be submitted to an internationally recognized accounting firm or expert arbitrator that is reasonably acceptable to the Seller and the Buyer, which shall not be the independent accountants of the Seller or the Buyer (the “**Dispute Auditor**”).
 - (b) The Dispute Auditor shall determine, based solely on the provisions of this Clause 5.11 and the written submissions by the Seller and the Buyer, and not by independent review, only those items and amounts that remain then in dispute as set forth in the A/R Dispute Notice. The Seller and the Buyer shall, and shall cause their respective Affiliates and Representatives to, cooperate in good faith with the Dispute Auditor, and shall give the Dispute Auditor access to all data and other information it reasonably requests for purposes of such resolution. The Dispute Auditor’s determination shall be made within [***] after the dispute is submitted for its determination and shall be set forth in a written statement delivered to the Seller and the Buyer.
 - (c) The Dispute Auditor shall have exclusive jurisdiction over, and resorting to the Dispute Auditor as provided in this Clause 5.11.3 shall be the only

recourse and remedy of the Parties against one another with respect to, those items and amounts that remain in dispute under this Clause 5.11, and neither the Seller nor the Buyer shall be entitled to seek indemnification or recovery of any attorneys' fees or other professional fees incurred by such Party or its Affiliates in connection with any dispute governed by this Clause 5.11.3.

- (d) The Dispute Auditor shall not be permitted to propose its own calculations to resolve any disputed item, instead, the Dispute Auditor must select between the calculation of such item as proposed by the Buyer and the Seller and shall allocate its fees and expenses between the Seller and the Buyer in the same proportion to which it selects the positions of the respective Parties. Any determinations made by the Dispute Auditor pursuant to this Clause 5.11.3 shall be final, non-appealable and binding on the Parties, absent manifest error or fraud.
- 5.11.4 Within [***] of the final determination of the A/R Shortfall (if any) in accordance with this Clause 5.11, the Seller shall pay to the Buyer or one of its designees an amount in cash equal to the A/R Shortfall and otherwise in accordance with Clause 1.2.9 in consideration of the Buyer assigning (or procuring the assignment) of any and all rights in relation to the Completion Date A/R constituting the A/R Shortfall to the Seller (or its designee) in exchange for the payment of [***].
- 5.12 In the event the Seller is under the obligation to pay the Net Adjustment to the Buyer pursuant to Clause 5.10 and the Integration Consideration (other than the Application Integration Shares) has not become due and payable by the Buyer to the Seller pursuant to Clause 3.2.2:
- 5.12.1 the Buyer shall be entitled (but not obliged) to withhold and set off against the Integration Consideration Cash the amount of such Net Adjustment;
- 5.12.2 if the amount of the Integration Consideration Cash is less than the amount of the Net Adjustment payable by the Seller to the Buyer pursuant to Clause 5.9, the Buyer will have a right (but not an obligation) to withhold and set off the amount of such deficit by reducing the number of the Integration Consideration Shares which the Seller is entitled to receive in accordance with **Error! Reference source not found.** (*Post-Completion Integration*). The value of any Integration Consideration Share which is subject to this Clause 5.12.2 shall be the Completion Value; and
- 5.12.3 if total amount of the reduction required under Clause 5.12.2 exceeds the aggregate value of the Integration Consideration Shares, the Buyer will have a right (but not an obligation) to require the Seller to [***]. [***].
6. **INTEGRATION CONSIDERATION ADJUSTMENT; INTEGRATION PERIOD**
- 6.1 Integration Consideration; Adjustment
- The Buyer shall pay the Integration Consideration to the Seller as set out in Clauses 3.2.1(b) at Completion and as set out in Clause 3.2.2 within [***] of the Integration Settlement Date, and the Integration Consideration shall be adjusted in accordance with **Error! Reference source not found.** (*Post-Completion Integration*).
- 6.2 Conduct of Business During the Integration Period
- 6.2.1 The Buyer undertakes to the Seller that for the duration of the Integration Period it shall not take any action (or cause or permit anything to be done) in bad faith with the purpose of distorting the financial performance of the Company or the

Subsidiaries, or otherwise avoiding, reducing or adversely affecting the amount of the Integration Consideration.

6.2.2 The Buyer shall procure that during the Integration Period:

- (a) no Top Manager is removed from the office or stripped of its control over, or functions related to, the Integration other than for cause or with the prior written consent of the Seller; and
- (b) no Top Manager's employment or service agreement is varied other than in accordance with its terms or with the prior written consent of such Top Manager.

6.2.3 The Buyer covenants with the Seller that during the Integration Period:

- (a) the Buyer shall retain the beneficial ownership of the whole of the issued share capital of the Company and each other Group Company; and
- (b) the Buyer shall not commence a winding up or bankruptcy of any Group Company and shall procure that no Group Company changes its place of business.

7. WITHHOLDING AND SET-OFF; CONSIDERATION SHARES

7.1 Except as otherwise expressly provided in this Agreement, all sums payable under or pursuant to this Agreement shall be paid free of:

7.1.1 any counterclaim or set-off of any kind; and

7.1.2 any other deduction or withholding (other than any deduction or withholding of Tax required by Applicable Law),

provided that at the time when the Integration Consideration Cash would otherwise be payable to the Seller, the Buyer shall be entitled to withhold and set off against the payment of the Integration Consideration Cash:

- (a) the amount payable by the Seller to the Buyer on account of a Claim that has been Determined in favour of the Buyer; and
- (b) the amount of a Notified Claim which is not yet Determined subject to the terms of Clause 7.3.

7.2 If any deductions or withholdings are required by Applicable Law to be made from the Purchase Price, the Net Adjustment or any other adjustment to the Purchase Price payable by one Party to the other Party under or pursuant to this Agreement, the payor shall pay to the payee any sum as will, after the deduction or withholding is made, leave the payee with the same amount as it would have been entitled to receive without that deduction or withholding. The Parties hereby acknowledge that no withholding or deduction of VAT is required to be made from the Purchase Price under Applicable Law.

7.3 If prior to making the payment of the Integration Consideration Cash, the Buyer has notified the Seller of a Claim in accordance with Clause 13.1 but such Claim has not been Determined prior to the date of such payment (including that the Buyer and the Seller do not agree on either the Claim or the amount thereof):

- 7.3.1 the Buyer may withhold a reasonable estimate of the amount of the Notified Claim (including any reasonable costs and expenses associated with such Notified Claim) (the “**Withheld Amount**”) from the Integration Consideration Cash;
- 7.3.2 if the Buyer and the Seller do not agree on either the validity of the Claim or the amount of the Withheld Amount, any Party, by serving written notice on the other, may refer the Notified Claim to the Independent Counsel (and in the event of a failure by the Parties to agree on the identity of the Independent Counsel within [***] of the notice, appointed by the Chairman of the Bar Council from time to time) to determine whether in that Independent Counsel’s opinion that Claim has a reasonable prospect of success and/or that the Withheld Amount by the Buyer is a reasonable estimate of the amount of the Claim (including reasonable costs and expenses), as appropriate;
- 7.3.3 if the Independent Counsel determines in his reasonable opinion that the Claim does not have a reasonable prospect of success then the Buyer shall pay the Withheld Amount to the Seller (the “**Released Amount**”) as part of the Integration Consideration Cash payment;
- 7.3.4 subject to Clause 7.3.8, if the Independent Counsel determines in his reasonable opinion that the Withheld Amount is not a reasonable estimate of the amount of the Claim (including costs and expenses) then the Parties shall jointly instruct the Independent Counsel to determine what he considers to be a reasonable amount. Such reasonable amount as determined by the Independent Counsel shall be deemed the “**Disputed Amount**” and the Buyer may withhold such Disputed Amount from the Integration Consideration Cash. The Buyer shall pay any excess of the Withheld Amount over the Disputed Amount so determined by the Independent Counsel to the Seller (the “**Excess**”); provided that if the Independent Counsel provides a range of values, the simple average of all values shall be used for the purposes of the calculation. The Independent Counsel shall be instructed to assess the values in a way that the top end of the range shall not be greater than the mid-point of the range by more [***];
- 7.3.5 if the Independent Counsel determines that the Withheld Amount is a reasonable estimate of the amount of the Claim and that the Claim has a reasonable prospect of success, then the costs of the Independent Counsel shall be borne by the Seller; if the Independent Counsel determines that the Withheld Amount is not a reasonable estimate of the amount of the Claim and that the Claim does not have a reasonable prospect of success, then the costs of the Independent Counsel shall be borne by the Buyer; in all other cases, the costs of the Independent Counsel shall be borne equally by the Buyer and the Seller;
- 7.3.6 if, after the date on which the Integration Consideration Cash is to be paid by the Buyer to the Seller hereunder, a Notified Claim by the Buyer with respect to all or a portion of a Disputed Amount, if any, is Determined in favour of the Seller, then, within [***] thereafter, the Buyer shall cause such part of the Disputed Amount (if any) as is being withheld in relation to such Notified Claim to be paid in accordance with Clause 1.2.9, to the Seller (which the Seller and the Buyer acknowledge shall be treated as a payment of a portion of the corresponding Integration Consideration Cash);
- 7.3.7 if, after the date on which the Integration Consideration Cash is to be paid by the Buyer to the Seller hereunder, a Claim by the Buyer with respect to all or a portion of a Disputed Amount, if any, is Determined in favour of the Buyer, then the Buyer shall keep such part of the Disputed Amount. If the amount of such Claim

Determined in favour of the Buyer is greater than the Disputed Amount in respect of such Claim, the Seller shall pay the amount of the difference to the Buyer within [***] and otherwise in accordance with Clause 1.2.9; and

- 7.3.8 for the avoidance of any doubt, nothing in Clauses 7.3.1 to 7.3.7 (inclusive) shall restrict the Buyer's or the Seller's right to (i) resolve any Disputes arising out of Claims through the procedure set out in Clause 21 (*Governing Law and Dispute Resolution*) simultaneously with Independent Counsel's procedure set out in Clause 7.3 or (ii) challenge any determination that the Independent Counsel may make in accordance with Clauses 7.3.1 to 7.3.7 (inclusive).
- 7.4 The Seller may, in its sole discretion, by sending a written notice to the Buyer elect to satisfy any Claim (or a portion of any Claim) by forfeiting the relevant number of the Completion Consideration Shares or the Application Integration Shares, as applicable; the relevant number of the Consideration Shares held by the Seller will be cancelled without any entitlement to compensation. In order to comply with clause 12.2 of the Articles of Association of the Buyer, the Seller hereby consents (in advance) to the cancellation of any Consideration Shares in accordance with this Clause 7.4. The value of any Consideration Shares which are subject to this Clause 7.4 shall be calculated as follows:
- 7.4.1 [***];
- 7.4.2 [***].
- 7.5 Supervisory Board Determination; Engagement of the Expert
- 7.5.1 Where the Parties fail to agree on the value of the Consideration Shares (on a per-share basis) as set out in Clause 7.4 within [***] from the receipt of the notice of the Seller described in Clause 7.4, the Supervisory Board of the Buyer shall use all reasonable endeavours to determine value of the Consideration Shares, including by appointing an Expert to determine such value.
- 7.5.2 In the event the Supervisory Board of the Buyer elects to appoint an Expert, such Expert shall determine the value of the Consideration Shares as at the date when the relevant Claim is Determined, based on the following assumptions and principles:
- (a) valuing the Consideration Shares as on an arm's length sale between a willing seller and a willing buyer;
 - (b) if the Buyer is then carrying on business as a going concern, on the assumption that it will continue to do so;
 - (c) assuming that the Consideration Shares are capable of being transferred without restriction; and
 - (d) valuing the Consideration Shares as a rateable proportion of the total value of all shares in the share capital of the Buyer without any premium or discount being attributable to the percentage of the share capital of the Buyer which they represent.
- 7.5.3 In determining the value of the Consideration Shares as of the relevant date the Expert may take into account any other factors which the Expert reasonably believes should be taken into account, including the assets and liabilities, financial performance, current status, business plans and projected future cash flows of the Buyer and the value of the Buyer's enterprise value as a whole, acting in accordance

with international best practice for such valuations. If any difficulty arises in applying any of these assumptions or principles, then the Expert shall resolve that difficulty in such manner as it thinks fit in its absolute discretion. The Expert shall notify the Parties of its determination as promptly as possible and in any event within [***] from the date of its appointment.

- 7.5.4 The Expert shall act as an expert and not as an arbitrator and its determination shall be final and binding on the parties (in the absence of fraud or manifest error). The Expert shall have access to the relevant financial and accounting records, business plans or other relevant documents of the Buyer, subject to any applicable confidentiality obligations to third parties; and the Parties shall act reasonably and co-operate to give effect to the provisions of this Clause 7.5 and shall not otherwise do anything to hinder or prevent the Expert from reaching his determination.

- 21.1 This Agreement and any Dispute shall be governed by and construed in accordance with the laws of England.
- 21.2 Any Dispute shall be referred to and finally resolved by arbitration under the Arbitration Rules of the London Court of International Arbitration ("LCIA") then in force (the "**Rules**"), which are deemed to be incorporated by reference into this Clause 21 (*Governing Law and Dispute resolution*), and capitalised terms used in this Clause 21 (*Governing Law and Dispute resolution*) which are not otherwise defined in this Agreement have the meaning given to them in the Rules.
- 21.3 There shall be three (3) arbitrators, one of which shall be nominated by the claimant(s) and one of which shall be nominated by the respondent(s) in accordance with the Rules and the third, who shall be the Chairman of the tribunal, shall be nominated by the two party nominated arbitrators within fourteen (14) days of the last of their appointments. In the event of any failure to nominate an arbitrator within the designated time period, the LCIA shall, at the written request of any party, make the remaining appointments forthwith. Notwithstanding any provision to the contrary in the Rules, the parties and arbitrators may nominate and the LCIA may appoint arbitrators (including the Chairman of the tribunal) from among the nationals of any country, whether or not a party is a national of that country.
- 21.4 The seat, or legal place, of arbitration shall be London, England, at a location to be determined by the tribunal. The language to be used in the arbitral proceedings shall be English. Where testimony or a document is provided in a language other than English, a translation of such testimony or document shall be provided in the English language, and shall be certified as a true, complete and accurate translation by a recognised translator.
- 21.5 Any such award shall be final and binding on the Parties and judgment upon the award may be entered in any court having jurisdiction and any right of appeal under the Arbitration Act 1996 or otherwise or reference of points of law to the courts is hereby waived, to the extent that such waiver can be validly made.
- 21.6 Each Party retains the right to seek interim, provisional or conservatory measures and to confirm and enforce any arbitral award, and any such request shall not be deemed incompatible with the agreement or a waiver of the right to arbitrate. The courts of England, Cyprus, the Netherlands or the Russian Federation shall have non-exclusive jurisdiction in respect of any such interim, provisional or conservatory measure. A Party may seek confirmation or enforcement of an arbitral award in any court having jurisdiction.
- 21.7 Each Party hereby consents generally in respect of any arbitration proceedings arising out of, or in connection with, this Agreement or a Dispute hereunder to the giving of any relief or the issue of any process in connection with such proceedings including the making, enforcement or execution against any property (irrespective of its use or intended use) of any order or judgment which may be made or given in such proceedings.
- 21.8 Each Party agrees that the arbitration agreement set out in this Clause 21 (*Governing Law and Dispute resolution*) and the arbitration agreement contained in each other Transaction Document (other than the SHA Supplemental Deed and the Local Services Agreements and all

documents entered into pursuant to the Local Services Agreements) shall together be deemed to be a single arbitration agreement.

- 21.9 Each Party consents to being joined to any arbitration commenced under any Transaction Document on the application of any other Party if the Arbitral Tribunal so allows, and subject to and in accordance with the Rules. Before the constitution of the Arbitral Tribunal, any party to an arbitration commenced pursuant to this Clause 21 (*Governing Law and Dispute resolution*) may effect joinder by serving notice on any party to any Transaction Document whom it seeks to join to the arbitration proceedings, provided that such notice is also sent to all other parties to the Dispute and the LCIA Court within twenty-eight (28) days of service of the Request for Arbitration. The joined party will become a claimant or respondent party (as appropriate) to the arbitration proceedings and participate in the arbitrator appointment process set out in Clause 21.3.
- 21.10 An Arbitral Tribunal constituted under this Agreement may consolidate an arbitration hereunder with an arbitration under any other Transaction Document if the arbitration proceedings raise common questions of law or fact, and subject to and in accordance with the Rules. For the avoidance of doubt, this Clause 21.10 is an agreement in writing by all parties to any arbitrations to be consolidated for the purposes of Article 22.1(ix) of the Rules. If an Arbitral Tribunal has been constituted in more than one of the arbitrations in respect of which consolidation is sought pursuant to this Clause 21.10, the Arbitral Tribunal which shall have the power to order consolidation shall be the Arbitral Tribunal appointed in the arbitration with the earlier Commencement Date under Article 1.4 of the Rules (i.e., the first-filed arbitration). Notice of the consolidation order must be given to any arbitrators already appointed in relation to any of the arbitration(s) which are to be consolidated under the consolidation order, all parties to those arbitration(s) and the LCIA Registrar. Any appointment of an arbitrator in the other arbitrations before the date of the consolidation order will terminate immediately and the arbitrator will be deemed to be discharged. This termination is without prejudice to the validity of any act done or order made by that arbitrator or by any court in support of that arbitration before that arbitrator's appointment is terminated; his or her entitlement to be paid proper fees and disbursements; and the date when any claim or defence was raised for the purpose of applying any limitation bar or any similar rule or provision. If this clause operates to exclude a Party's right to choose its own arbitrator, each Party irrevocably and unconditionally waives any right to do so.
- 21.11 To the extent permitted by Applicable Law, each Party waives any objection, on the basis that a Dispute has been resolved in a manner contemplated by Clauses 21.9 to 21.10, to the validity and/or enforcement of any arbitral award.
- 21.12 Each Party agrees that any arbitration under this Clause 21 (*Governing Law and Dispute resolution*) shall be confidential to the Parties and the arbitrators, and that each Party shall therefore keep confidential, without limitation, the fact that the arbitration has taken place or is taking place, all non-public documents produced by any other Party for the purposes of the arbitration, all awards in the arbitration and all other non-public information provided to it in relation to the arbitral proceedings, including hearings, save to the extent that disclosure may be requested by a regulatory authority, or required of it by legal duty, to protect or pursue a legal right or to enforce or challenge an award in bona fide legal proceedings before a state court or other judicial authority.
- 21.13 The law of this arbitration agreement, including its validity and scope, shall be English law.
- 21.14 This arbitration agreement shall be binding upon any person who acquires rights under this Agreement by operation of law or otherwise. Any such person who intends to commence legal proceedings in relation to a Dispute arising out of or in connection with this Agreement shall, as a precondition of commencing such proceedings, give prior written notice to all the Parties

to this Agreement that it agrees to be bound by this Clause 21 (*Governing Law and Dispute resolution*).

- 4.2 **Change of Taxing Jurisdiction:** If the Issuer becomes subject generally to the taxing jurisdiction of any territory or any authority of or in that territory having power to tax other than or in addition to the Netherlands or the United States then the Issuer will (unless the Trustee otherwise agrees) give to the Trustee an undertaking satisfactory to the Trustee in terms corresponding to the terms of Condition 9 with the substitution for, or (as the case may require) the addition to, the references in that Condition to the Netherlands and the United States of references to that other territory or authority or additional territory or authority to whose taxing jurisdiction the Issuer has become so subject (provided that such undertaking shall be subject to such exceptions as reflect exceptions under the law of the relevant taxing jurisdiction and as are similar in scope and effect to those exceptions set out in Condition 9) and in such event this Trust Deed and the Notes will be read accordingly.

 - 5.2 **Means of Constitution:** Any Further Notes created and issued pursuant to the provisions of Clause 5.1 so as to form a single series with the Original Notes and/or

The Issuer shall, prior to the issue of any Further Notes to be so constituted, execute and deliver to the Trustee a deed supplemental to this Trust Deed and containing a covenant by the Issuer in the form *mutatis mutandis* of Clause 2 of this Trust Deed in relation to such Further Notes and such other provisions (corresponding to any of the provisions contained in this Trust Deed) as the Trustee shall require.

5.3 Noting of Supplemental Deeds: A memorandum of every such supplemental deed shall be endorsed by the Trustee on this Trust Deed and by the Issuer on the duplicate(s) of this Trust Deed.

6 Application of Moneys received by the Trustee

6.1 Declaration of Trust: All moneys received by the Trustee in respect of the Original Notes and any Further Notes forming a single series with the Original Notes or amounts payable under this Trust Deed will, regardless of any appropriation of all or part of them by the Issuer, be held by the Trustee upon trust to apply them (subject to Clause 6.2):

6.1.4 fourthly, in payment of the balance (if any) to the Issuer for itself.

If the Trustee holds any moneys in respect of Original Notes and any Further Notes forming a single series with the Original Notes which have become void or in respect of which claims have become prescribed under the Conditions, the Trustee will hold them upon these trusts.

6.2 Accumulation: If the amount of the moneys at any time available for payment in respect of the Notes under Clause 6.1 is less than 10 per cent. of the principal amount of the Notes then outstanding, the Trustee may, at its discretion, invest such moneys. The Trustee may retain such investments and accumulate the resulting

income until the investments and the accumulations, together with any other funds for the time being under the control of the Trustee and available for such payment, amount to at least 10 per cent. of the principal amount of the Notes then outstanding whereupon such investments, accumulations and funds (after deduction of, or provision for, any applicable taxes) will be applied as specified in Clause 6.1.

- 6.3 Investment:** Moneys held by the Trustee may be invested in the name, or under the control, of the Trustee in any investments or other assets anywhere, for the time being authorised by English law for the investment by trustees of trust monies, whether or not they produce income, or placed on deposit in the name or under the control of the Trustee at such bank or other financial institution and in such currency as the Trustee may, in its absolute discretion, think fit. If that bank or institution is the Trustee or a subsidiary, holding company or associated company of the Trustee, it need only account for an amount of interest equal to the standard amount of interest payable by it on such a deposit to an independent customer. The Trustee may at any time vary or transpose any such investments or assets for or into other such investments or assets or convert any moneys so deposited into any other currency, and will not be responsible to any person whatsoever for any loss occasioned thereby, whether by depreciation in value, fluctuation in exchange rates or otherwise.

7 Covenant to Comply

The Issuer hereby covenants with the Trustee that it will comply with and perform and observe all the provisions of this Trust Deed which are expressed to be binding on it. The Conditions shall be binding on each of the Issuer and the Noteholders. The Trustee shall be entitled to enforce the obligations of the Issuer under the Notes and the Conditions as if the same were set out and contained in this Trust Deed which shall be read and construed as one document with the Notes. - 11.2 Extra Remuneration:** At any time after the occurrence of an Event of Default or Potential Event of Default, the Issuer hereby agrees that the Trustee shall be entitled to be paid additional remuneration calculated at its normal hourly rates in force from time to time. Where there are any inconsistencies between the Trustee Acts and the provisions of this Trust Deed, the provisions of this Trust Deed shall prevail to the extent allowed by law. In the case of an inconsistency with the Trustee Act 2000, the provisions of this Trust Deed shall take effect as a restriction or exclusion for the purposes of that act.

13.2 Consequential loss: Any liability of the Trustee arising under the Transaction Documents shall be limited to the amount of actual loss suffered (such loss shall be determined as at the date of default of the Trustee or, if later, the date on which the loss arises as a result of such default) but without reference to any special conditions or circumstances known to the Trustee at the time of entering into the Transaction Documents, or at the time of accepting any relevant instructions, which increase the amount of the loss. In no event shall the Trustee be liable for any loss of profits, goodwill, reputation, business opportunity or anticipated saving, or for indirect, special, punitive or consequential damages, whether or not the Trustee has been advised or was aware of the possibility of such loss or damages and regardless of whether the claim for loss or damage is made in negligence, for breach of contract or otherwise.

14 Enforcement, Waiver and Proof of Default

14.1 Waiver: The Trustee may, without the consent of the Noteholders and without prejudice to its rights in respect of any subsequent breach, from time to time and at any time, if in its opinion the interests of the Noteholders will not be materially prejudiced thereby, waive or authorise, on such terms and conditions as seem expedient to it, any breach or proposed breach by the Issuer of the Conditions or any of the provisions of this Trust Deed, any trust deed supplemental to this Trust Deed, the Agency Agreement and any agreement supplemental to the Agency Agreement or the Notes or determine without any such consent as aforesaid that any Event of Default or Potential Event of Default will not be treated as such provided that the Trustee will not do so in contravention of any express direction

Any such waiver, authorisation or determination will be binding on the Noteholders and will be notified by the Issuer to the Noteholders as soon as practicable.

14.2 Proof of Default: If it is proved that as regards any specified Note the Issuer has made default in paying any sum due to the relevant Noteholder, such proof will (unless the contrary be proved) be sufficient evidence that the same default has been made as regards all other Notes which are then payable.

14.3 Enforcement: The Trustee may, at any time at its discretion and without further notice, take such steps, actions or proceedings against the Issuer as it may think fit to recover any amounts due in respect of the Notes and to enforce the provisions of this Trust Deed or the Conditions, but it will not be bound to take any such steps, actions or proceedings unless (a) it shall have been so directed by an Extraordinary Resolution or so requested in writing by the holders of at least one quarter in principal amount of the Notes then outstanding and (b) it shall have been indemnified and/or secured and/or pre-funded to its satisfaction and provided that the Trustee shall not be held liable for the consequence of taking or refraining from taking any such action, step or proceedings and may take such action, step or proceedings without having regard to the effect of such action on individual Noteholders. - 16.5 No Obligations to Act**
- The Trustee shall not be obliged to agree to any such substitution and/or any related or consequential amendments or any other amendment referred to in the foregoing provisions of this Clause 16 which, in the sole opinion of the Trustee, would have the effect of (a) exposing the Trustee to any liability against which it has not been indemnified and/or secured and/or prefunded to its satisfaction or (b) increasing the obligations or duties, or decreasing the protections, of the Trustee in the Transaction Documents and/or the Conditions.
- 17 Appointment, Retirement and Removal of the Trustee**

For the avoidance of doubt, the parties to this Trust Deed irrevocably agree, for the purpose of Article 8.1 of the Rules, that the claimant(s), irrespective of number, and the respondent(s), irrespective of number, shall constitute two separate sides for the formation of the arbitral tribunal.

21.2.3 In the event that the claimant(s) or the respondent(s) fail to nominate an arbitrator in accordance with the Rules within the time period stipulated, such arbitrator shall be nominated by the LCIA within 15 days of a written request from any party.

- 21.2.4 The seat of arbitration shall be London, England and the language of the arbitration shall be English.
- 21.2.5 If more than one arbitration is commenced under this Trust Deed, the Notes and/or the Conditions, and any party to any such arbitration contends that two or more such arbitrations are so closely connected that it is expedient for them to be resolved in one set of proceedings, the arbitral tribunal appointed in the first filed of such proceedings (the "**First Tribunal**") shall have the power to determine, provided no date for the hearing on the merits of the Dispute in any such arbitrations has been fixed, that the proceedings shall be consolidated. Each party to this Trust Deed hereby irrevocably agrees and consents to being joined in such consolidated proceedings with any other party to this Trust Deed, and/or with any party to the Notes and/or the Conditions irrespective of whether they are also a party to this Trust Deed.
- 21.2.6 The tribunal in such consolidated proceedings shall be selected as follows:
- (i) the parties to the consolidated proceedings shall agree on the composition of the tribunal; or
 - (i) failing such agreement within 30 days of consolidation being ordered by the First Tribunal, the LCIA shall appoint all members of the tribunal within 30 days of a written request by any of the parties to the consolidated proceedings.
- 1.2.1 The parties hereby exclude the jurisdiction of the courts under Sections 45 and 69 of the Arbitration Act 1996.
- 1.3 To the extent that the Issuer may now or hereafter be entitled, in any jurisdiction in which any legal action or proceeding may at any time be commenced pursuant to or in accordance with this Trust Deed, to claim for itself or any of its undertaking, properties, assets or revenues present or future any immunity (sovereign or otherwise) from suit, jurisdiction of any court, attachment prior to judgment, attachment in aid of execution of a judgment, execution of a judgment or award or from set-off, banker's lien, counterclaim or any other legal process or remedy with respect to its obligations under this Trust Deed and/or to the extent that in any such jurisdiction there may be attributed to the Issuer any such immunity (whether or not claimed), the Issuer hereby irrevocably agrees not to claim, and hereby waives, any such immunity.
- 1.4 The Issuer irrevocably and generally consents in respect of any proceedings anywhere to the giving of any relief or the issue and service on it of any process in connection with those proceedings including, without limitation, the making, enforcement or execution against any assets whatsoever (irrespective of their use or intended use) of any order or judgment which may be made or given in those proceedings.]

22 Counterparts

This Trust Deed and any trust deed supplemental hereto may be executed in any number of counterparts, and by each party on separate counterparts. Each counterpart is an original, but all counterparts shall together constitute one and the

same instrument. Delivery of a counterpart of this Trust Deed or any trust deed supplemental hereto by email attachment or telecopy shall be an effective mode of delivery.

23 Contracts (Rights of Third Parties) Act 1999

A person who is not a party to this Trust Deed has no right under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Trust Deed except and to the extent (if any) that this Trust Deed expressly provides for such Act to apply to any of its terms. Subject to the provisions of this Trust Deed, the parties to this Trust Deed shall have the right to amend, vary or rescind any provision of this Trust Deed without the consent of any such third party.

24 Power of Attorney

If the Issuer is represented by an attorney or attorneys in connection with the signing and/or execution and/or delivery of this Trust Deed, the Global Notes, the Definitive Registered Notes or any agreement or document referred to herein or made pursuant hereto and the relevant power or powers of attorney is or are expressed to be governed by the laws of a particular jurisdiction, it is hereby expressly acknowledged and accepted by the other parties to this Trust Deed that such laws shall govern the existence and extent of such attorney's or attorneys' authority and the effects of the exercise thereof.

The Notes in respect of which this Global Note is issued form part of the series designated as specified in the title (the "**Notes**") of Yandex N.V. (the "**Issuer**"), with its corporate seat in Schiphol, the Netherlands.

The Issuer hereby certifies that The Bank of New York Depository (Nominees) Limited is, at the date hereof, entered in the register of Noteholders as the holder of Notes in the principal amount of

(ONE THOUSAND TWO HUNDRED AND FIFTY MILLION US DOLLARS)

or such other amount as is shown on the register of Noteholders as being represented by this Global Note and is duly endorsed (for information purposes only) in the third column of Schedule A to this Global Note. For value received, the Issuer promises to pay the person who appears at the relevant time on the register of Noteholders as holder of the Notes in respect of which this Global Note is issued, such amount or amounts as shall become due and payable from time to time in respect of such Notes and otherwise to comply with the Conditions referred to below. Each payment will be made to, or to the order of, the person whose name is entered on the Register as holder at the close of business on the record date which shall be on the Clearing System Business Day immediately prior to the date for payment, where "**Clearing System Business Day**" means Monday to Friday inclusive except 25 December and 1 January.

The Notes are constituted by a trust deed dated 3 March 2020 (the "**Trust Deed**") between the Issuer, and BNY Mellon Corporate Trustee Services Limited as trustee (the "**Trustee**") and are subject to the Trust Deed and the terms and conditions (the "**Conditions**") set out in Schedule 1 to the Trust Deed, as modified by the provisions of this Global Note. Terms defined in the Trust Deed have the same meaning when used herein.

This Global Note is evidence of entitlement only.

Title to the Notes passes only on due registration on the register of Noteholders and only the duly registered holder is entitled to payments on Notes in respect of which this Global Note is issued.

Exchange for Definitive Registered Notes

This Global Note is exchangeable in whole but not in part (free of charge to the holder) for Definitive Registered Notes if this Global Note is held on behalf of Euroclear or Clearstream, Luxembourg or the Alternative Clearing System (each as defined under "Notices" below) and any such clearing system is closed for business for a continuous period of 14 days or more (other than by reason of legal holidays) or announces an intention permanently to cease business or does in fact do so by such holder giving notice to the Principal Paying, Transfer and Conversion Agent. On or after the Exchange Date the holder of this Global Note may surrender this Global Note to or to the order of the Registrar and, upon such surrender of this Global Note, the Paying, Transfer and Conversion Agent shall annotate Schedule A hereto. In exchange for this Global Note, the Issuer shall deliver, or procure the delivery of, an equal aggregate principal amount of duly executed and authenticated Definitive Registered Notes.

"Exchange Date" means a day falling not less than 60 days after that on which the notice requiring exchange is given and on which banks are open for business in the city in which the specified office of the Registrar is located and in the cities in which Euroclear and Clearstream, Luxembourg or, if relevant, the Alternative Clearing System (each as defined under "Notices" below) are located.

Except as otherwise described herein, this Global Note is subject to the Conditions and the Trust Deed and, until it is exchanged for Definitive Registered Notes, its holder shall be entitled to the same benefits as if it were the holder of the Definitive Registered Notes for which it may be exchanged and as if such Definitive Registered Notes had been issued on the date of this Global Note.

The Conditions shall be modified with respect to Notes represented by this Global Note by the following provisions:

Notices

So long as this Global Note is held on behalf of Euroclear Bank SA/NV ("**Euroclear**") or Clearstream Banking S.A. ("**Clearstream, Luxembourg**") or such other clearing system as shall have been approved by the Trustee (the "**Alternative Clearing System**"), notices required to be given to Noteholders may be given by their being delivered to Accountholders (as defined below) through Euroclear and Clearstream, Luxembourg or, as the case may be, the Alternative Clearing System, rather than by notification to Noteholders as required by the Conditions in which case such notices shall be deemed to have been given to Noteholders on the date of delivery to Accountholders through Euroclear and Clearstream, Luxembourg or, as the case may be, the Alternative Clearing System.

Prescription

Any claim in respect of principal, interest and other amounts payable in respect of this Global Note will become void unless it is presented for payment within a period of 10 years (in the case of principal) and five years (in the case of interest or any other amounts) from the appropriate Relevant Date (as defined in Condition 3).

Conversion

For so long as this Global Note is held on behalf of any one or more of Euroclear, Clearstream, Luxembourg or the Alternative Clearing System, Conversion Rights (as defined in the Conditions) may be exercised as against the Issuer at any time during the conversion period, as provided in Condition 6(a), by the delivery to or to the order of the Principal Paying, Transfer and Conversion Agent in accordance with the standard procedures of Euroclear, Clearstream, Luxembourg or the Alternative Clearing System of one or more Conversion Notices duly completed by or on behalf of a holder of a book-entry interest representing entitlements to the Global Note (each such person, an "**Accountholder**"). Upon exercise of any Conversion Rights, the Paying, Transfer and Conversion Agent shall annotate Schedule A hereto accordingly.

Trustee's Powers

In considering the interests of Noteholders while the Global Note is held on behalf of a clearing system, the Trustee may have regard to any information provided to it by such clearing system or its operator as to the identity (either individually or by category) of its Accountholders and may consider such interests, and treat such Accountholders, as if such Accountholders were holders of the Global Note.

Redemption at the Option of Noteholders

The option of the Noteholders provided for in Condition 7(e), may be exercised by the delivery by an Accountholder of a duly completed notice to the Principal Paying, Transfer and Conversion Agent in accordance with the standard procedures of Euroclear, Clearstream, Luxembourg or the Alternative Clearing System within the time limits set out in Condition 7(e), substantially in the form

of the Put Exercise Notice, available from the Principal Paying, Transfer and Conversion Agent and stating the principal amount of the Notes in respect of which the option is exercised. Upon exercise of such option, the Paying, Transfer and Conversion Agent shall annotate Schedule A hereto accordingly.

Redemption at the Option of the Issuer

The options of the Issuer provided for in Condition 7(b)] and Condition 7(c) shall be exercised by the Issuer giving notice to the Accountholders through Euroclear and Clearstream, Luxembourg or, as the case may be, the Alternative Clearing System within the time limits set out in, and containing the information required by, Condition 7(b) or, as the case may be, Condition 7(c). Upon exercise of such option and, in the case of Condition 7(c), subject to the option of the Noteholders provided for in Condition 7(c), the Paying, Transfer and Conversion Agent shall annotate Schedule A hereto accordingly.

Purchase and Cancellation

Cancellation of any Note represented by this Global Note which is required by the Conditions to be cancelled will be effected by reduction in the principal amount of this Global Note on its presentation to or to the order of the Principal Paying, Transfer and Conversion Agent for notation in Schedule A hereto.

Noteholder's Tax Option

The option of the Noteholders provided for in Condition 7(c) shall be exercised by the delivery by an Accountholder of a duly completed Noteholder's Tax Exercise Notice in accordance with the standard procedures of Euroclear, Clearstream, Luxembourg or the Alternative Clearing System within the time limits set out in and containing the information required by Condition 7(c) to the Principal Paying, Transfer and Conversion Agent. Upon exercise of such option, the Principal Paying, Transfer and Conversion Agent shall annotate Schedule A hereto accordingly.

The statements set forth in the legend above are an integral part of the Notes in respect of which this Global Note is issued and by acceptance thereof each holder or beneficial owner agrees to be subject to and bound by the terms and provisions set forth in such legend.

This Global Note shall not be valid or become obligatory for any purpose until authenticated by or on behalf of the Registrar.

This Global Note and any non-contractual obligations arising out of or in connection with it are governed by and shall be construed in accordance with English law.

In witness whereof the Issuer has caused this Global Note to be signed on its behalf.

 - 1.3 **"Written Resolution"** means a resolution in writing signed by or on behalf of Noteholders representing in aggregate not less than 75 per cent. of the aggregate principal amount of the Notes outstanding.

 - 1.3 Any proxy appointed pursuant to paragraph 2.1 above or representative appointed pursuant to paragraph 2.2 above shall so long as such appointment remains in force be deemed, for all purposes in connection with any meeting or proposed meeting of Noteholders specified in such appointment, to be the holder of the Notes to which such appointment relates and the holder of the Notes shall be deemed for such purposes not to be the holder. The Issuer and the Trustee shall be entitled to assume that any proxy has been validly appointed and that such appointment remains in effect unless notice of revocation is given to the Issuer at its registered office not less than 24 hours prior to the time fixed for the meeting or, thereafter, to the chairman of the meeting.
 - 1.4 Forms of proxy shall be valid for so long as the relevant Notes shall be duly registered in the name(s) of the registered holder(s) certified in the name of the appointor but not otherwise and notwithstanding any other provision of this Schedule 4 and during the validity thereof the proxy shall, for all purposes in connection with any meeting of holders of Notes, be deemed to be the holder of the Notes to which such form of proxy relates.
 - 1 Each of the Issuer and the Trustee at any time may, and the Trustee (subject to its being indemnified and/or secured and/or pre-funded to its satisfaction) upon a request in writing of Noteholders holding not less than one-tenth in principal amount of the Notes for the time being outstanding shall, convene a meeting of Noteholders. Whenever any such party is about to convene any such meeting, it shall forthwith give notice in writing to each other party of the day, time and place of the meeting and of the nature of the business to be transacted at it. Every such meeting shall be held at such time and place as the Trustee may approve.
-

- 1 At least 21 days' notice (exclusive of the day on which the notice is given and of the day on which the meeting is held) specifying the day, time and place of meeting shall be given to the Noteholders. A copy of the notice shall in all cases be given by the party convening the meeting to each of the other parties. Such notice shall also specify, unless the Trustee otherwise agrees, the nature of the resolutions to be proposed.
 - 1 A meeting that has been validly convened in accordance with paragraph 4 above, may be cancelled by the person who convened such meeting by giving at least 7 days' notice (exclusive of the day on which the notice is given or deemed to be given and of the day of the meeting) to the Noteholders (with a copy to the Trustee where such meeting was convened by the Issuer or to the Issuer where such meeting was convened by the Trustee). Any meeting cancelled in accordance with this paragraph 5 shall be deemed not to have been convened.
 - 1 A person (who may, but need not, be a Noteholder) nominated in writing by the Trustee may take the chair at every such meeting but if no such nomination is made or if at any meeting the person nominated shall not be present within 15 minutes after the time fixed for the meeting, the Noteholders present shall choose one of their number to be chairman, failing which the Issuer may appoint a chairman. The chairman of an adjourned meeting need not be the same person as was chairman of the original meeting.
 - 1 At any such meeting any one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than one tenth in principal amount of the Notes for the time being outstanding shall (except for the purpose of passing an Extraordinary Resolution) form a quorum for the transaction of business and no business (other than the choosing of a chairman) shall be transacted at any meeting unless the requisite quorum be present at the commencement of business. The quorum at any such meeting for passing an Extraordinary Resolution shall (subject as provided below) be one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate a clear majority in principal amount of the Notes for the time being outstanding; provided that at any meeting the business of which includes any of the matters specified in the proviso to paragraph 17.8, the quorum shall be one or more persons present in person holding Notes or being proxies or representatives and holding or representing in the aggregate not less than two-thirds of the aggregate principal amounts of the Notes outstanding.
 - 1 If within 15 minutes from the time fixed for any such meeting a quorum is not present, the meeting shall, if convened upon the requisition of Noteholders, be dissolved. In any other case it shall stand adjourned (unless the Issuer and the Trustee agree that it be dissolved) for such period, not being less than 14 days nor more than 42 days, and to such place, as may be decided by the chairman. At such adjourned meeting one or more persons present in person holding Notes or voting certificates or being proxies or representatives (whatever the principal amount of the Notes so held or represented) shall form a quorum and may pass any resolution and decide upon all matters which could properly have been dealt with at the meeting from which the adjournment took place had a quorum been present at such meeting; provided that at any adjourned meeting at which is to be proposed an Extraordinary Resolution for the purpose of effecting any of the modifications specified in the proviso to paragraph 17.8, the quorum shall be one or more persons so present holding Notes or being proxies or representatives and holding or representing in the aggregate not less than one-half in principal amount of the Notes for the time being outstanding. If a quorum is not present within 15 minutes from the time fixed for a meeting so adjourned, the meeting shall be dissolved.
-

- 1 The chairman may with the consent of (and shall if directed by) any meeting adjourn such meeting from time to time and from place to place but no business shall be transacted at any adjourned meeting except business which might lawfully have been transacted at the meeting from which the adjournment took place.
 - 1 At least 10 days' notice (exclusive of the day on which the notice is given and of the day of the adjourned meeting) of any meeting adjourned through want of a quorum shall be given in the same manner as for an original meeting and such notice shall state the quorum required at such adjourned meeting. It shall not, however, otherwise be necessary to give any notice of an adjourned meeting.
 - 1 Every question submitted to a meeting shall be decided in the first instance by a show of hands and in case of equality of votes the chairman shall both on a show of hands and on a poll have a casting vote in addition to the vote or votes (if any) which he may have as a Noteholder or as a proxy or representative.
 - 1 At any meeting, unless a poll is (before or on the declaration of the result of the show of hands) demanded by the chairman, the Issuer, the Trustee or by one or more persons holding one or more Notes or being proxies or representatives and holding or representing in the aggregate not less than one-fiftieth in principal amount of the Notes for the time being outstanding, a declaration by the chairman that a resolution has been carried or carried by a particular majority or lost or not carried by any particular majority shall be conclusive evidence of the fact without proof of the number or proportion of the votes recorded in favour of or against such resolution.
 - 1 If at any meeting a poll is so demanded, it shall be taken in such manner and (subject as provided below) either at once or after such an adjournment as the chairman directs and the result of such poll shall be deemed to be the resolution of the meeting at which the poll was demanded as at the date of the taking of the poll. The demand for a poll shall not prevent the continuation of the meeting for the transaction of any business other than the question on which the poll has been demanded.
 - 1 Any poll demanded at any meeting on the election of a chairman or on any question of adjournment shall be taken at the meeting without adjournment.
 - 1 The Issuer and the Trustee (through their respective representatives) and their respective financial and legal advisers may attend and speak at any meeting of Noteholders. No one else may attend at any meeting of Noteholders or join with others in requesting the convening of such a meeting unless he is the holder of a Note or is a proxy or a representative.
 - 1 At any meeting on a show of hands every person who is present in person and who produces a Note or is a proxy or a representative shall have one vote and on a poll every person who is so present shall have one vote in respect of each U.S.\$1 (or, in the case of meetings of holders of Notes denominated in another currency, as the Trustee in its absolute discretion may decide) in principal amount of the Notes so produced or represented or in respect of which he is a proxy or a representative. Without prejudice to the obligations of proxies, any person entitled to more than one vote need not use all his votes or cast all the votes to which he is entitled in the same way.
 - 1 A meeting of Noteholders shall, subject to the Conditions, in addition to the powers given above, but without prejudice to any powers conferred on other persons by this Trust Deed, have power exercisable by Extraordinary Resolution:
-

- 1.1 to sanction any proposal by the Issuer or the Trustee for any modification, abrogation, variation or compromise of, or arrangement in respect of, the rights of the Noteholders against the Issuer or against any of its property whether such rights shall arise under this Trust Deed, the Agency Agreement or otherwise;
- 1.2 to sanction any scheme or proposal for the exchange, substitution or sale of the Notes for, or the conversion of the Notes into, or the cancellation of the Notes in consideration of, shares, stock, notes, Notes, debentures, debenture stock and/or other obligations and/or securities of the Issuer or any other body corporate formed or to be formed, or partly for or into or in consideration of such shares, stock, notes, bonds, debentures, debenture stock and/or other obligations and/or securities as aforesaid;
- 1.3 to assent to any modification of this Trust Deed or the Conditions that relate to the rights appertaining to the Notes which shall be proposed by the Issuer or the Trustee;
- 1.4 to authorise anyone to concur in and do all such things as may be necessary to carry out and to give any authority, direction or sanction which under this Trust Deed or the Notes is required to be given by Extraordinary Resolution;
- 1.5 to appoint any persons (whether Noteholders or not) as a committee or committees to represent the interests of the Noteholders and to confer upon such committee or committees any powers or discretions which the Noteholders could themselves exercise by Extraordinary Resolution;
- 1.6 to approve a person proposed to be appointed as a new Trustee and to remove any Trustee;
- 1.7 to approve the substitution of any entity for the Issuer (or any previous substitute) as principal debtor under this Trust Deed (for the avoidance of doubt, nothing in this paragraph shall be interpreted to mean that the consent of the Bondholders is required in relation to any substitution that the Trustee may otherwise agree to under Clause 16.2 of the Trust Deed); and
- 1.8 to discharge or exonerate the Trustee from any liability in respect of any act or omission for which it may become responsible under this Trust Deed or the Notes;

provided that the special quorum provisions contained in the proviso to paragraph 7 and, in the case of an adjourned meeting, in the proviso to paragraph 8 shall apply in relation to any Extraordinary Resolution for the purpose of paragraph 17.2 or 17.7 (unless, in the case of paragraph 17.7, such substitution is made in compliance with Clause 16 of the Trust Deed) or for the purpose of making any modification to the provisions contained in this Trust Deed, the Conditions or the Notes which would have the effect of:

- 1.8.1 changing the Final Maturity Date, the Call Date (other than deferring the Call Date), the End of Period Restricted Date (other than bringing forward the End of Period Restricted Date) or any dates for payment of interest or any other amount in respect of the Notes; or
 - 1.8.2 modifying the circumstances in which the Issuer or Noteholders are entitled to redeem the Notes pursuant to Condition 7(b), 7(c) or 7(e) (other than removing the right of the Issuer to redeem the Notes pursuant to Condition 7(b) or (c)); or
 - 1.8.3 reducing or cancelling the principal amount of, or interest on, the Notes or to reduce the amount payable on redemption of the Notes; or
-

- 1.8.4 modifying the basis for calculating the interest or any other amount payable in respect of the Notes; or
- 1.8.5 modifying the provisions relating to, or cancelling, the Conversion Rights including the circumstances in which Conversion Rights may be exercised or the rights of Noteholders to receive Class A Shares and/or the Cash Conversion Amount and/or the Alternative Settlement Cash Amount on exercise of Conversion Rights pursuant to the Conditions (other than pursuant to or as a result of any amendments to the Conditions or the Trust Deed made pursuant to and in accordance with the provisions of Condition 6(n) in order to effect a Conversion Right Transfer or Condition 11(g) following or as part of a Newco Scheme ("**Newco Scheme Modification**") and other than a reduction to the Conversion Price or an increase in the number of Class A Shares and/or Cash Conversion Amount and/or Alternative Settlement Cash Amount to be issued or paid to Noteholders on exercise of Conversion Rights); or
- 1.8.6 increasing the Conversion Price (other than in accordance with the Conditions or pursuant to a Newco Scheme Modification) or to reduce the number of Class A Shares to be issued, or reduce the Cash Conversion Amount and/or the Alternative Settlement Cash Amount payable, to Noteholders on exercise of Conversion Rights; or
- 1.8.7 changing the currency or denomination of the Notes or of any payment in respect of the Notes; or
- 1.8.8 changing the governing law of the Notes, the Trust Deed, the Agency Agreement or the Calculation Agency Agreement (other than in the case of a substitution of the Issuer (or any previous substitute or substitutes) under Condition 14(c)), or
- 1.8.9 modifying the provisions concerning the quorum required at any meeting of Noteholders or the majority required to pass an Extraordinary Resolution; or
- 1.8.10 amending this proviso.

No consent or approval of Noteholders shall be required in connection with any Conversion Right Transfer effected in accordance with Condition 6(n) or any Newco Scheme Modification.

- 1 An Extraordinary Resolution passed at a meeting of Noteholders duly convened and held in accordance with this Trust Deed shall be binding upon all the Noteholders, whether or not present at such meeting and whether or not they vote in favour, and each of the Noteholders shall be bound to give effect to it accordingly. The passing of any such resolution shall be conclusive evidence that the circumstances of such resolution justify the passing of it.
 - 1 Minutes of all resolutions and proceedings at every such meeting shall be made and entered in the books to be from time to time provided for that purpose by the Issuer or the Trustee and any such minutes, if purporting to be signed by the chairman of the meeting at which such resolutions were passed or proceedings transacted or by the chairman of the next succeeding meeting of Noteholders, shall be conclusive evidence of the matters contained in them and until the contrary is proved every such meeting in respect of the proceedings of which minutes have been so made and signed shall be deemed to have been duly convened and held and all resolutions passed or proceedings transacted at it to have been duly passed and transacted.
 - 1 Subject to the following sentence, a Written Resolution may be contained in one document or in several documents in like form, each signed by or on behalf of one or more of the Noteholders.
-

For so long as the Notes are in the form of a Global Note registered in the name of a common depository for Euroclear, Clearstream, Luxembourg or another clearing system, or a nominee of any of the above then, in respect of any resolution proposed by the Issuer or the Trustee:

- 1.1** *Electronic Consent:* where the terms of the resolution proposed by the Issuer or the Trustee (as the case may be) have been notified to the Noteholders through the relevant clearing system(s) as provided in sub-paragraphs (i) and/or (ii) below, each of the Issuer and the Trustee shall be entitled to rely upon approval of such resolution given by way of electronic consents communicated through the electronic communications systems of the relevant clearing system(s) to the Principal Paying, Transfer and Conversion Agent or another specified agent and/or the Trustee in accordance with their operating rules and procedures by or on behalf of the Noteholder(s) of not less than 75 per cent. of the aggregate principal amount of the Notes outstanding (the "**Required Proportion**") ("**Electronic Consent**") by close of business on the Relevant Date. Any resolution passed in such manner shall be binding on all Noteholders even if the relevant consent or instruction proves to be defective. Neither the Issuer nor the Trustee shall be liable or responsible to anyone for such reliance;
- (i) When a proposal for a resolution to be passed as an Electronic Consent has been made, at least 10 days' notice (exclusive of the day on which the notice is given and of the day on which affirmative consents will be counted) shall be given to the Noteholders through the relevant clearing system(s). The notice shall specify, in sufficient detail to enable Noteholders to give their consents in relation to the proposed resolution, the method by which their consents may be given (including, where applicable, blocking of their accounts in the relevant clearing system(s)) and the time and date (the "**Relevant Date**") by which they must be received in order for such consents to be validly given, in each case subject to and in accordance with the operating rules and procedures of the relevant clearing system(s).
 - (ii) If, on the Relevant Date on which the consents in respect of an Electronic Consent are first counted, such consents do not represent the Required Proportion, the resolution shall, if the party proposing such resolution (the "**Proposer**") so determines, be deemed to be defeated. Such determination shall be notified in writing to the other party or parties to the Trust Deed. Alternatively, the Proposer may give a further notice to Noteholders that the resolution will be proposed again on such date and for such period as shall be agreed with the Trustee (unless the Trustee is the Proposer). Such notice must inform Noteholders that insufficient consents were received in relation to the original resolution and the information specified in sub-paragraph (i) above. For the purpose of such further notice, references to "Relevant Date" shall be construed accordingly.

For the avoidance of doubt, an Electronic Consent may only be used in relation to a resolution proposed by the Issuer or the Trustee which is not then the subject of a meeting that has been validly convened in accordance with paragraph 3 above, unless that meeting is or shall be cancelled or dissolved; and

- 2.1** *Written Resolution:* where Electronic Consent is not being sought, for the purpose of determining whether a Written Resolution has been validly passed, the Issuer and the Trustee shall be entitled to rely on consent or instructions given in writing directly to the Issuer and/or the Trustee, as the case may be, (a) by accountholders in the clearing system with entitlements to such Global Note or, (b) where the accountholders hold any such entitlement on behalf of another person, on written consent from or written instruction by the person identified by that accountholder as the person for whom such entitlement is held. For
-

the purpose of establishing the entitlement to give any such consent or instruction, the Issuer and the Trustee shall be entitled to rely on any certificate or other document issued by, in the case of (a) above, Euroclear, Clearstream, Luxembourg or any other relevant alternative clearing system (the "**relevant clearing system**") and, in the case of (b) above, the relevant clearing system and the accountholder identified by the relevant clearing system for the purposes of (b) above. Any resolution passed in such manner shall be binding on all Noteholders, even if the relevant consent or instruction proves to be defective. Any such certificate or other document shall be conclusive and binding for all purposes. Any such certificate or other document may comprise any form of statement or print out of electronic records provided by the relevant clearing system (including Euroclear's EUCLID or Clearstream, Luxembourg's CreationOnline system) in accordance with its usual procedures and in which the accountholder of a particular principal or nominal amount of the Notes is clearly identified together with the amount of such holding. Neither the Issuer nor the Trustee shall be liable to any person by reason of having accepted as valid or not having rejected any certificate or other document to such effect purporting to be issued by any such person and subsequently found to be forged or not authentic.

A Written Resolution and/or Electronic Consent shall take effect as an Extraordinary Resolution. A Written Resolution and/or Electronic Consent will be binding on all Noteholders, whether or not they participated in such Written Resolution and/or Electronic Consent.

- 1** Subject to all other provisions contained in this Trust Deed the Trustee may without the consent of the Noteholders prescribe such further regulations regarding the holding of meetings of Noteholders and attendance and voting at them as the Trustee may in its sole discretion determine including particularly (but without prejudice to the generality of the foregoing) such regulations and requirements as the Trustee thinks reasonable:
 - 1.1** so as to satisfy itself that persons who purport to requisition a meeting in accordance with paragraph 3 or who purport to make any requisition to the Trustee in accordance with this Trust Deed are in fact Noteholders; and
 - 1.2** so as to satisfy itself that persons who purport to attend or vote at any meeting of Noteholders are entitled to do so in accordance with this Trust Deed.
