Material changes to the Fund

The following material changes to the Fund were undertaken during the period ended 30 June 2017, having received prior approval from the Board of Directors, the Commission de Surveillance du Secteur Financier ('CSSF') and where required Shareholders. Where appropriate, notices were sent to Shareholders notifying them of the respective changes:

Sub-Fund launches

- Latin American Investment Grade Corporate Debt Fund launched on 30 May 2017.
- Global Total Return Credit Fund launched on 8 June 2017.

Sub-Fund liquidations

- Liquidation of the Emerging Markets Short Duration Fund on 9 March 2017.

Other material changes

- Investment Policy changes to the Emerging Markets Investment Grade Corporate Debt Fund and Latin American Investment Grade Corporate Debt Fund to provide that the investment grade debt securities, money market instruments and cash held or deposited with bodies who are rated as investment grade, will total at least 90% of the Sub-Funds' assets from 31 May 2017.
- Amendment to the definition of Investment Grade and Non-Investment Grade to include securities which are unrated but are determined by the Investment Manager to be of comparable quality to those which are rated Investment Grade or Non-Investment Grade (as relevant) from 31 May 2017.
- Update to the smoothing policy to clarify that, where distributions are smoothed over financial years, the final distribution payment of the financial year will normally comprise of all remaining income for that year, which may be more or less than the smoothed interim distributions paid to investor during that year from 31 May 2017.
- Amendments to Prospectus to comply with the disclosure requirements contained in the Securities Financing Transaction Regulations from 31 May 2017.
- Restructure to Appendix 4 of the Prospectus to disclose an expected levels of leverage, using the sum of notionals approach, based on averages. The Prospectus no longer discloses maximum expected leverage levels, using the sum of the notionals approach, or leverage levels calculated using the commitment approach from 31 May 2017.
- A reduction of F Share Class distribution fee by 0.15% from 1 June 2017 in:
 - Asia Local Currency Bond Fund;
 - Emerging Markets Blended Debt Fund;
 - Emerging Markets Corporate Debt Fund;
 - Emerging Markets Hard Currency Debt Fund;
 - Emerging Markets Local Currency Debt Fund;
 - Latin American Corporate Debt Fund;
 - Latin American Investment Grade Corporate Debt; and
 - Emerging Markets Investment Grade Corporate Debt Fund.

- A reduction of management fee by 0.15% across A, C, E1-E4 and F Share Classes of the Emerging Markets Investment Grade Corporate Debt Fund and the Latin American Investment Grade Debt Fund from 1 June 2017.
- A reduction of F Share Class distribution fee by 0.25% in the Emerging Markets Multi-Asset Fund from 1 June 2017.
- Appointment of Investec Asset Management North America, Inc. as a sub-investment manager on 1 June 2017 for:
 - Global Franchise Fund;
 - Global High Yield Bond Fund;
 - Global Quality Equity Income Fund; and
 - Investment Grade Corporate Bond Fund.

Past performance should not be taken as a guide to the future. Performance would have been lower had any initial charge been included. Performance will vary between different Share Classes reflecting the fee levels of those Share Classes. As with any investment it is possible to lose capital and any yields will vary over time. Investment benefits to individual Shareholders will vary in accordance with personal circumstances.

Morningstar category percentage averages are those of relevant Morningstar category filtered to include only the funds on the Morningstar Offshore Mutual Funds (Major Offshore Domiciles) database. Source: Morningstar, NAV based, gross income reinvested (with the exception of Global Gold Fund which has no income reinvested), measured in Sub-Fund reference currency as indicated. All periods and measures to 30.06.17 based on the prices issued to the market at that date. All market indicators are total return. Three year volatility is annualised volatility as measured by standard deviation of monthly returns.

The Fund

The Fund

Investec Global Strategy Fund (the 'Fund') was initially established in Guernsey on 5 January 1984 and was re-domiciled to Luxembourg on 1 July 2008. The Fund is authorised under Part I of the Luxembourg law of 17 December 2010 relating to collective investment undertakings (loi concernant les organismes de placement collectif) (the 'Law of 2010'). The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities ('UCITS') under Article 1 paragraph 2, points a) and b) of the Directive 2009/65/EC of 13 July 2009 of the European Parliament and the Council (the 'Directive 2009/65/EC'), and may therefore be offered for sale in European Union ('EU') Member States (subject to registration in EU Member States other than Luxembourg). In addition, applications to register the Fund may be made in other countries. The Fund has appointed Investec Asset Management Luxembourg S.A. (the 'Management Company') on 30 November 2014, to serve as its designated management company in accordance with the Law of 2010. The Management Company is a public limited company (societe anonyme) incorporated on 8 July 2011 under registration number B 162485. The Management Company has been authorised by the CSSF to manage the business and affairs of the Fund pursuant to Chapter 15 of the Law of 2010.

The Fund consisted of the following 48 Sub-Funds as at 30 June 2017:

Money Sub-Funds

Sterling Money Fund
U.S. Dollar Money Fund

Bond Sub-Funds

All China Bond Fund
Asia Local Currency Bond Fund
Emerging Markets Blended Debt Fund
Emerging Markets Corporate Debt Fund
Emerging Markets Hard Currency Debt Fund

Notes forming part of the financial statements

1. Principal accounting policies

The following accounting principles have been applied consistently in dealing with items which are considered material in relation to the financial statements of the Fund:

a) Basis of preparation

The financial statements are presented in US Dollars and rounded to the nearest thousand. Where the reference currency of the Sub-Fund is not US Dollars, the presentation is in the reference currency of the Sub-Fund. The financial statements have been prepared in accordance with the Luxembourg law on Undertakings for Collective Investment. The preparation of financial statements requires management to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

b) Presentation of combined totals

The combined totals presented in the financial statements represent the aggregation of all the Sub-Funds net assets and operations in US Dollars. Cross-holdings between Sub-Funds within the Fund have not been eliminated from these totals. On 30 June 2017, the cross Sub-Fund investments represent x.xx% of the combined net assets.

c) Foreign currency translation

Items are recorded in the Fund's records in the relevant reference currency of each Sub-Fund, which includes British Pound Sterling, Euro and US Dollars. These currencies are identified in the Prospectus.

The Fund is presented in US Dollars and the results of the Sub-Funds have been aggregated into US Dollars using the exchange rate ruling at the period-end date for the Statement of Assets and Liabilities and the average rate for the Statement of Operations and the Statement of Changes in Share-holders' Equity. The adjustment in US dollar terms arising from this aggregation is classified as a currency adjustment in the Statement of Changes in Shareholders' Equity. This adjustment has no effect on the value of the net assets allocated to individual Sub-Funds.

Transactions in foreign currencies are translated into the reference currency of the relevant Sub-Fund at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the reference currency of the relevant Sub-Fund at the closing exchange rate ruling at the Statement of Assets and Liabilities date. Foreign

currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Operations. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the reference currency of the relevant Sub-Fund at the foreign exchange rate ruling at the dates the values were determined.

Foreign currency exchange differences relating to investments are included in gains and losses on investments. All other foreign currency exchange differences relating to monetary items, including cash and cash equivalents, are presented separately in the note 6 - Net gains/(losses) on investments under caption 'Net realised gain/(loss) on foreign currencies and forward currency contracts'.

d) Valuation of financial Instruments

The value of any cash on hand or on deposit, bills and demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared and accrued as aforesaid, and not yet received, shall be deemed to be the full amount thereof. If the above is unlikely to be paid or received in full, the value thereof shall be determined after making such discount as the Board of Directors may consider appropriate, to reflect the true value thereof.

The value of Transferable Securities and Money Market Instruments and any other assets which are quoted or dealt in on any stock exchange is based on the latest available price. Each Transferable Security and Money Market Instrument and any other assets traded on any Other Regulated Market shall be valued in a manner as similar as possible to that provided for quoted securities.

The fair value of investments is based on their quoted market prices at the Statement of Assets and Liabilities date. Financial assets are priced at current market prices. If a quoted market price is not available on a recognized stock exchange or from a broker/dealer for a non exchange-traded financial instrument, the fair value of the instrument is estimated using valuation techniques. If none of the above methods of valuation are appropriate for any investment or if in any case a particular value is not ascertainable, or if the Directors shall, having first sought appropriate advice, consider that some other method of valuation better reflects the fair value of the relevant investment then in any such case the method of valuation of the relevant investment shall be such as the Directors shall decide having regard to the circumstances and/or the nature of the investment.

Swaps, comprising Interest Rate Swaps and Total Return Swaps, are contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s). Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparties.

The value of a credit default swap shall be determined by comparing it to the prevailing market price.

Contracts for Difference are valued based on the closing market price of the underlying security, less any financing charges attributable to each contract. Upon entering into Contracts for Difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margin' are made or received by the Fund periodically, depending on fluctuations in the value of the underlying security. During the period the contracts are open, changes in the value of the contracts are recognised as unrealised gains and losses by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses upon closure of the contract are equal to the difference between the value of the contract at the time it was opened including financial charges and the value at the time it was closed.

The fair value of the forward contracts and futures contracts is estimated as the amount the Sub-Fund would receive or pay to terminate the contract at the Statement of Assets and Liabilities date.

Shares or units of underlying open-ended Undertakings for Collective Investment (UCIs) are valued at their last determined and available Net Asset Value.

Money market instruments with a remaining maturity of less than ninety days are valued at cost plus accrued interest. Money market instruments with a remaining maturity of more than ninety days are valued at their market price.

The liquidation value of futures, forward and options contracts not traded on exchanges or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Board of Directors. The liquidating value of futures, forward and options contracts traded on exchanges or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and/or Regulated Markets on which the particular futures, forward or options contracts are traded by the Sub-Fund.

e) Fair value adjustments

Events may occur between the determination of an investment's last available price and the determination of a Sub-Fund's Net Asset per Share at the valuation point that may, in the opinion of the Directors, mean that the last available price does not truly reflect the true market value of the investment. In such circumstances, a fair value

adjustment factor is applied to the price of such investments in accordance with applicable trigger rules.

f) Swing Pricing

Frequent subscriptions and redemptions can potentially have a dilutive effect on the Fund's NAV per Share and be detrimental to the long term investors as a result of the transaction costs that are incurred by the Fund and/or as a result the acquisition and disposal of shares (price/offer margins, market-appropriate brokerages, commissions, charges etc.) which are included in the calculation of the Net Asset Value. The net amount resulting from the difference between subscriptions and redemptions determines the adjustment of the portfolio and thus the resulting expenses. The transaction costs incurred on the day of trading for subscriptions and redemptions will be paid by the investors who commission these transactions.

As detailed in the Prospectus, in order to mitigate the effect of dilution the Directors may at their discretion adjust the Net Asset Value per Share in the Sub-Funds to take into account the possible effects of dilution. Such adjustment will be made in accordance with criteria set by the Directors from time to time including whether the costs of investing or divesting the net inflows into or outflows from a Sub-Fund on a Business Day will create in their opinion a material dilutive impact. Such adjustments may only be exercised for the purpose of reducing dilution in the Sub-Funds. A periodical review is undertaken in order to verify the appropriateness of the dilution factor being applied.

Swing pricing as at the period-end, if any, is recorded under the Swing adjustment caption of the Statement of Assets and Liabilities and of the Statement of Changes in Shareholders' Equity.

g) Cash and cash equivalents

Cash comprises current accounts as well as term deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value.

h) Interest income

Interest income is recognised in the Statement of Operations as it accrues, using the interest rate of the instrument calculated at the period-end on an effective interest rate basis. Interest income also includes the amortisation of any discount or premium with regards to zero coupon bonds and money market instruments valued at amortised cost, transaction costs or other differences between the initial carrying amount of an interest bearing instrument and its amount at maturity.

i) Dividend income

Dividend income is recognised in the Statement of Operations on the ex-dividend date.

In some cases, the Sub-Fund may receive dividends in the form of additional shares rather than cash. In such cases the Sub-Fund recognises the value of the cash dividend alternative as dividend income.

Notes forming part of the financial statements continued

j) Expenses

All expenses are recognised in the Statement of Operations on an accruals basis. Where formation costs have been incurred, these are capitalised and amortised over a period not exceeding five years.

k) Income and expense allocation

The allocation of income and expenses to each Share Class is based upon the proportion of the Sub-Fund's net assets of each Share Class on the day the income is earned or the expense is incurred.

l) Taxation

The Fund is not subject to any Luxembourg income tax, nor are dividends paid by the Fund subject to any withholding tax.

However, the Fund is liable in Luxembourg to a subscription tax (taxe d'abonnement) of 0.05% per annum, such tax being payable quarterly and calculated on the total Net Asset Value of the respective Class of Share at the end of the relevant quarter.

A reduced tax rate of 0.01% per annum of the net assets will be applicable to the I, J and S Share Classes which are only sold to and held by Institutional Investors and to all Classes of the U.S. Dollar Money Fund, the Sterling Money Fund and the Euro Money Fund. Such tax is payable quarterly and calculated on the net assets of such Class at the end of the relevant quarter.

m) Performance Fees

An annual performance fee in respect of the A, C, E, F, I, IX, J, JX and Z Share Classes of the Active Commodities Fund, depending on performance of that Share Class.

The amount of Performance Fee Payable (if any) is calculated and accrued in the Net Asset Value per Share on each Valuation Day, one day in arrears. The accrual can rise as well as fall during a Crystallisation Period, depending on the daily performance of the Share Class in relation to its Hurdle and High Water Mark/Extended Hurdle. The Performance Fee (if any) will become payable by the Share Class annually at the end of the Crystallisation Period. A Crystallisation Period corresponds to the financial year ending 31 December. If a Crystallisation Period commences after 1 January, the Crystallisation Period will be less than 12 months.

The Investment Manager will not refund performance fees to the Sub-Fund(s) after they have been paid at any Crystallisation Point. Performance fees payable as at the period-end, if any, are recorded under the creditor balance of the Statement of Assets and Liabilities and under the Performance Fees caption of the Statement of Operations as disclosed in note 7.

No performance fees were charged during the year for Active Commodities Fund.

2. Equalisation

The Net Asset Value per Share of each Income Share includes a payment for equalisation representing undistributed income accrued since the last ex-dividend date.

Equalisation is a payment by a person who subscribes for Shares, and is calculated by dividing the relevant proportion of the net undistributed income of the Share Classes, by the number of such Shares in issue at the date on which the sub-scription is made. Equalisation is repaid to the Shareholders on the occurrence of the redemption of the Shares or on the payment of a dividend.

3. Currency exchange rates

The currency exchange rates against the US Dollar as at the following period-end dates were as follows:

	30 JUNE 2017	31 DECEMBER 2016	30 JUNE 2016
British Pound Sterling	0.7690	0.8112	0.7557

9. Material contracts

The following material contracts have been entered into by the Fund:

- a. A management company services agreement (as amended) between the Fund and the Management Company pursuant to which the Management Company has been appointed as the management company for the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice.
- b. An investment management agreement between the Fund, the Management Company and Investec Asset Management Limited pursuant to which the latter acts as investment manager of the Fund. This agreement was entered into for an unlimited period and is terminable by either party upon 90 days' written notice. According to an agreement entered into between the Investment Manager (in its capacity as an RQFII) and Hong Kong and Shanghai Banking Corporation Limited ('HSBC') on or about 22 April 2015 (the 'RQFII Schedule'), the latter has been appointed by the Investment Manager as its directly contracted agent. The RQFII Schedule shall apply in full to all actions taken by HSBC under the RQFII Schedule which are performed by HSBC as the investment manager's directly contracted agent.
- c. An agreement between the Fund and State Street Bank Luxembourg S.C.A. pursuant to which the latter was appointed Depositary of the assets of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice provided that no such notice shall take effect until the appointment of a successor to the Depositary. According to the RQFII Schedule entered into between the Investment Manager (in its capacity as an RQFII) and HSBC on or about 22 April 2015, the latter has been appointed by the Investment Manager as the sub-custodian of the assets of the All China Equity Fund, the Asia Local Currency Bond Fund, the Onshore Renminbi Bond Fund and the All China Bond Fund Sub-Funds in China. However, the depositary agreement between the Fund and State Street Bank Luxembourg S.C.A. shall apply in full to all actions taken by HSBC under the RQFII Schedule acting in its capacity as sub-custodian of the assets of the above-mentioned Sub-Funds, notwithstanding the direct appointment of HSBC by the Investment Manager of the Fund.
- d. An agreement between the Fund, the Management Company and State Street Bank Luxembourg S.C.A. pursuant to which the latter was appointed Administrator and Domiciliary Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice.
- e. An agreement between the Fund, the Management Company and Investec Asset Management Guernsey Limited pursuant to which the latter was appointed Global Distributor and Service Provider of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice.
- f. An agreement between the Fund, the Management Company and RBC Investor Services Bank S.A. pursuant to which the latter was appointed Registrar and Transfer Agent of the Fund. The agreement was entered into for an unlimited period and may be terminated by either party upon 90 days' written notice.

Annual Management Fee

10. Transactions with connected persons

There have been no transactions with connected persons except as detailed below:

- a. Grant David Cameron and Kim Mary McFarland, Directors of the Fund, are also Directors of the Global Distributor and Service Provider of the Fund. Kim Mary McFarland, Director of the Fund, is also a Director of both the Investment Manager and the Management Company. Transactions with the Investment Manager, Global Distributor and Service Provider are detailed in note 9.
- b. Claude Niedner, a Director of the Fund, is a Partner at Arendt & Medernach, who are contracted as Legal Advisers to the Fund. During the period under review, Arendt & Medernach has provided legal services totalling 74,339.38 EUR to the Fund (inclusive of VAT). As at 30 June 2017, 74,339.38 EUR was outstanding and due to be paid.

- c. Gregory David Cremen, a Director of the Fund, provides consultancy services to the Fund, effective 1 January 2016, for which he receives 40,000 EUR per annum (exclusive of VAT).
- d. With the exception of the above (note 10a, 10b and 10c), there were no additional service contracts proposed or in existence between any of the Directors and the Fund.
- e. With the exception of the above (note 10a, 10b and 10c), there were no contracts of significance during or at the end of the period in which a Director of the Fund is or was initially interested.
- f. Transactions detailed in point 10a, 10b and 10c have been entered into in the ordinary course of business and on normal commercial terms.

11. Dealing commissions arrangements

The Investment Manager subscribes to the rules drawn up by the Financial Conduct Authority governing the perceived conflict of interest between investment managers and their clients to accomplish the following goals:

- Limit investment managers' use of dealing commissions to the purchase of 'execution' and 'research' services;
- Require investment managers to disclose to their customers details of how these commission payments have been spent and what services have been acquired with them;
- Embed in the commercial relationship between investment managers and brokers incentives to secure value for clients for execution and research spend; and
- Promote a more level playing field in the production of research, whether within investment banks or by third parties.

The Investment Manager will enter into commission sharing arrangements with carefully chosen brokers to enable them to receive research and execution related services from third-party providers.

A full list of research and execution services paid for with equity broker commission is available upon request.

12. Ongoing charges

The method for calculation is Total Operating Expenses (not including negative investment income) divided by the average Net Asset Value for the period. This is calculated on a Share Class basis.

Ongoing charges were calculated in accordance with the ESMA's guidelines on the methodology for calculation of the ongoing charges figure in the Key Investor Information Document CESR/10-674, as well as with the ALFI (Association of the Luxembourg Fund Industry) guidelines.

Distribution policy

In determining the distribution policy for any Class of Income Share (whether Inc, Inc-2 or Inc-3), the Board of Directors may determine, as permitted under Luxembourg Law, the extent to which expenses of that Class may be deducted from its income and/or capital account. In particular, the Board of Directors may determine that the distribution policy of any Class of Income Share is to distribute the whole of the income attributable to that Class to Shareholders after the deduction of the Management Fee (as defined in the Prospectus Section 9.1), the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class of Income Share, or is to distribute the whole of the income attributable to that Class and potentially a portion of capital to Shareholders before deduction of the Management Fee, the Administration Servicing Fee, the Distribution Fee where relevant, the Depositary Fee and all other expenses attributable to that Class of Income Share.

The Board of Directors may also determine if and to what extent distributions may include distributions from both net realised and net unrealised capital gains. Where Classes pay distributions that include net realised capital gains or net unrealised capital gains, or, in the case of Share Classes' which distribute income gross of expenses, dividends may include initially subscribed capital. Shareholders should note that dividends distributed in this manner may be taxable as income, depending on the local tax legislation, and should seek their own professional tax advice in this regard.

As at the May 2017 Prospectus, the Board of Directors has determined that for any Inc Share Class, the distribution policy is to distribute net income. Accordingly, the expenses related to such a Share Class will be deducted from its income account. Where the income generated is insufficient to cover the expenses, the residual expenses shall be deducted from the relevant Share Class' capital account.

As at the May 2017 Prospectus, the Board of Directors has determined that for any Inc-2 Share Class, the distribution policy is to distribute gross income. Accordingly, the expenses related to such a Share Class will be deducted from its capital account. This will have the effect of increasing that Share Class' distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

As at the May 2017 Prospectus, the Board of Directors has determined that for an Inc-3 Share Class, the distribution policy is to distribute the long term expected level of gross income. The distribution will be calculated at the discretion of the Board of Directors on the basis of the expected gross income over a given period (such period to be at the Board of Director's discretion) with a view to providing a consistent monthly distribution to Shareholders during such period. The distribution rate for each Inc-3 Share Class will typically be reviewed on a quarterly basis, but at least semi-annually, but may be adjusted more frequently to reflect changes in the portfolio's expected yield. The expenses related to such a Share Class will be deducted from its capital account and may include net realised and net unrealised capital gains. This will have the effect of increasing that Share Class' distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.

For the All China Bond Fund, the Board of Directors has determined that its distributable income may also include any implied yield accrued by certain investments the purchase of which is driven by an income-generating objective (e.g. foreign exchange forward contracts).

The frequency of distributions varies across the different Sub-Funds and Share Classes, the detail of which can be found in the Fund's Prospectus.

14. Contingent liabilities

There were no contingent liabilities as at 30 June 2017.

15. Bank overdrafts

Any bank overdraft is secured against the assets of the Sub-Fund.

16. Commitments on futures

As of 30 June 2017, the commitments on futures were:

SUB-FUND	TOTAL COMMITMENT USD
Asia Local Currency Bond Fund	4,660,922
Emerging Markets Blended Debt Fund	18,650,245
Emerging Markets Hard Currency Debt Fund	9,899,500
Emerging Markets Local Currency Debt Fund	2,484,813
Emerging Markets Local Currency Dynamic Debt Fund	209,466,283
Emerging Markets Local Currency Total Return Debt Fund	40,449,823
Investment Grade Corporate Bond Fund	80,432,088
Target Return Bond Fund	507,571,989
Emerging Markets Multi-Asset Fund	12,006,064
Global Diversified Growth Fund	133,835,921
Global Diversified Growth Fund (Euro)	444,457,434
Global Multi-Asset Income Fund	60,479,898
Global Strategic Managed Fund	96,778,044

17. Commitments on contracts for difference

SUB-FUND	TOTAL COMMITMENT USD
Enhanced Natural Resources Fund	2,760,779

18. Collateral

As of 30 June 2017, the following cash is held with brokers as collateral on derivatives instruments:

SUB-FUND	CURRENCY	VALUE OF COLLATERAL
Emerging Markets Blended Debt Fund	USD	910,000
Emerging Markets Local Currency Debt Fund	USD	2,090,000
Emerging Markets Local Currency Dynamic Debt Fund	USD	11,360,000
Emerging Markets Local Currency Total Return Debt Fund	USD	1,350,000
Emerging Markets Multi-Asset Fund	USD	240,000
Global Diversified Growth Fund	USD	730,000
Global Diversified Growth Fund (Euro)	USD	460,000
Global Multi-Asset Income Fund	USD	3,070,000
Global Strategic Managed Fund	USD	2,530,000

As of 30 June 2017, no cash collateral has been reinvested.

Investment objectives and policy

Money Sub-Funds

Sterling Money Fund

The Sub-Fund aims to give holders of the relevant Shares access to income at wholesale Eurocurrency market interest rates in Sterling. This Sub-Fund is a short term money market fund and while the Sub-Fund aims to preserve capital, this is not guaranteed.

The Sub-Fund normally comprises deposits repayable within six months and other short-term financial instruments available on the Eurocurrency markets and on the relevant domestic markets (where interest is earned free of withholding tax) having a life to maturity of less than twelve months. The average life to maturity of the deposits is generally unlikely to exceed ninety days. The Sub-Fund's portfolio consists of short-term deposits placed in the Eurocurrency inter-bank markets (maximum maturity six months) and certificates of deposit and other negotiable money market instruments (including bank acceptances, commercial paper, liquid short-term debt securities including treasury bills, bonds, floating rate notes and other debt securities) (maximum maturity twelve months) and short-term fixed interest securities. For the purposes of efficient portfolio management, the Sub-Fund may hold or engage in repurchase agreements and securities lending in respect of assets held by the Sub-Fund. However, when, in the opinion of the Investment Manager, interest rates either appear or are judged stable or likely to rise, a shorter average life to maturity may be selected and the converse may apply when there is a prospect of a general fall in interest rates.

A conservative and rigorous approach to credit assessment is adopted and specific limits are established for each bank and institution with which deposits in respect of the Sub-Fund are made.

Although the investments comprising the Sub-Fund are usually denominated in Sterling, investments may be made which are denominated in another currency provided that a forward currency sale into the relevant currency of the principal amount of the investment, plus the expected interest to maturity, is undertaken. In this way, advantage may be taken of opportunities to maximise the return in a particular currency, whilst adhering to the principle that there should be no currency risk outside the currency of denomination within the Sub-Fund.

The Sub-Fund will also be allowed to use derivatives for the purposes of hedging and/or efficient portfolio management.

U.S. Dollar Money Fund

The Sub-Fund aims to give holders of the relevant Shares access to income at wholesale Eurocurrency market interest rates in U.S. Dollars. This Sub-Fund is a short term money market fund and while the Sub-Fund aims to preserve capital, this is not guaranteed.

The Sub-Fund normally comprises deposits repayable within six months and other short-term financial instruments available on the Eurocurrency markets and on the relevant domestic markets (where interest is earned free of withholding tax) having a life to maturity of less than twelve months. The average life to maturity of the deposits is generally unlikely to exceed ninety days. The Sub-Fund's portfolio consists of short-term deposits placed in the Eurocurrency inter-bank markets (maximum maturity six months) and certificates of deposit and other negotiable money market instruments (including bank acceptances, commercial paper, liquid short-term debt securities including treasury bills, bonds, floating rate notes and other debt securities) (maximum maturity twelve months) and short-term fixed interest securities. For the purposes of efficient portfolio management, the Sub-Fund may hold or engage in repurchase agreements and securities lending in respect of assets held by the Sub-Fund. However, when, in the opinion of the Investment Manager, interest rates either appear or are judged stable or likely to rise, a shorter average life to maturity may be selected and the converse may apply when there is a prospect of a general fall in interest rates.

A conservative and rigorous approach to credit assessment is adopted and specific limits are established for each bank and institution with which deposits in respect of the Sub-Fund are made.

Although the investments comprising the Sub-Fund are usually denominated in U.S. Dollars, investments may be made which are denominated in another currency provided that a forward currency sale into the relevant currency of the principal amount of the investment, plus the expected interest to maturity, is undertaken. In this way, advantage may be taken of opportunities to maximise the return in a particular currency, whilst adhering to the principle that there should be no currency risk outside the currency of denomination within the Sub-Fund.

The Sub-Fund will also be allowed to use derivatives for the purposes of hedging and/or efficient portfolio management.

Bonds Sub-Funds

All China Bond Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth primarily through investment in a portfolio of debt securities (e.g. bonds) which are issued by Chinese borrowers. The Sub-Fund may also hold debt securities issued outside or inside Mainland China on any eligible market, including, without limitation, the China Interbank Bond Market. The exposure to debt securities issued on any one eligible market will not be limited. The Sub-Fund's debt securities may be denominated in Renminbi and/or hard currencies (globally traded major currencies). For any security which is not denominated in Renminbi, the returns of such security shall be hedged into Renminbi at the discretion of the Investment Manager.

The Sub-Fund may invest in Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

Asia Local Currency Bond Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth primarily through investment in a regionally diversified portfolio of debt securities (e.g. bonds) issued by Asian Borrowers and derivatives which offer exposure to such debt securities. These securities will be primarily denominated in the currencies of Asian market countries. The Sub-Fund may invest in Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities.

The exposure to debt securities issued in Mainland China shall be limited to a maximum of 20% of the assets of the Sub-Fund.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

Emerging Markets Blended Debt Fund

The Sub-Fund aims to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Borrowers and derivatives which offer exposure to such debt securities. These securities may be denominated in either local currencies or hard currencies (globally traded major currencies).

The Sub-Fund will primarily invest in a diversified portfolio of Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities. The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

Emerging Markets Corporate Debt Fund

The Sub-Fund aims to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Corporate Borrowers and derivatives which offer exposure to such debt securities.

The Sub-Fund may also invest in debt securities issued by Emerging Markets Sovereign Borrowers and derivatives which offer exposure to such debt securities.

These securities may be denominated in local currencies as well as hard currencies (globally traded major currencies).

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund.

Investment objectives and policy continued

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Emerging Markets Hard Currency Debt Fund

The Sub-Fund aims to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Borrowers and derivatives which offer exposure to such debt securities. These securities will be primarily denominated in hard currencies (globally traded major currencies).

The Sub-Fund will invest primarily in a diversified portfolio of Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities. The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits, units or shares in other collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Emerging Markets Investment Grade Corporate Debt Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth, primarily through investment in a diversified portfolio of Investment Grade debt securities (e.g. bonds) issued by Emerging Markets Corporate Borrowers and derivatives which offer exposure to such debt securities.

The Sub-Fund may also invest in debt securities issued by Emerging Markets Sovereign Borrowers and derivatives which offer exposure to such debt securities.

These securities may be denominated in hard currencies (globally traded major currencies) as well as local currencies.

The Sub-Fund's Investment Grade debt securities and money market instruments and cash held or deposited with bodies who are rated as investment grade, will total at least 90% of the Sub-Fund's assets.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

When investing its remaining assets in non-investment grade debt securities, the Sub-Fund will however not invest in debt securities which have a minimum credit rating (or an equivalent credit rating by a reputable credit rating agency, where coverage by S&P, Fitch or Moody's is not available) at the time of investment below (i) B- by S&P or Fitch; or (ii) B3 by Moody's (or as such ratings may be amended from time to time). If any debt security held by the Sub-Fund is downgraded to a credit rating below these levels, the Sub-Fund will be permitted to continue holding such security for a period of up to six months, provided that the aggregate value of any such holdings comprises no more than 3% of the Sub-Fund's total net assets. If, following the end of this six month period, the security has not been upgraded to a minimum credit rating specified above, it shall be sold, provided there is sufficient liquidity in the market to achieve fair market value.

Emerging Markets Local Currency Debt Fund

The Sub-Fund aims to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Borrowers and derivatives which offer exposure to such debt securities. These securities will be primarily denominated in the currencies of emerging market countries.

The Sub-Fund will invest at least two-thirds of its assets in a diversified portfolio of Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities.

The Sub-Fund may also invest up to one-third of its assets in other fixed interest securities, including bonds issued by borrowers based in non-emerging markets, deposits, cash and near cash.

The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

Emerging Markets Local Currency Dynamic Debt Fund

The Sub-Fund aims to provide income and generate capital gains over the long-term, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Borrowers and derivatives which offer exposure to such debt securities.

The Sub-Fund will primarily invest in what the Investment Manager believes to be more liquid (i.e. relatively higher tradability in the market) and/or strategic investment opportunities in a portfolio of Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities.

Whilst the Sub-Fund will focus on more liquid and/or strategic investments, these will not form restrictions in respect of the securities in which the Sub-Fund may invest.

The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

Emerging Markets Local Currency Total Return Debt Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth, primarily through investment in a diversified portfolio of debt securities (e.g. bonds) issued by Emerging Markets Borrowers and derivatives which offer exposure to such debt securities. These investments may be denominated in local currencies or hard currencies (globally traded major currencies).

The Sub-Fund is not managed with reference to any index and will be unconstrained by any particular regional, currency or sector weighting, while factoring in downside risk.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

The Sub-Fund will not invest in debt securities which have a minimum credit rating (or an equivalent credit rating by a reputable credit rating agency, where coverage by S&P, Fitch or Moody's is not available) at the time of investment below (i) B- by S&P or Fitch; or (ii) B3 by Moody's (or as such ratings may be amended from time to time). If any debt security held by the Sub-Fund is downgraded to a credit rating below these levels, the Sub-Fund will be permitted to continue holding such security for a period of up to six months, provided that the aggregate value of any such holdings comprises no more than 3% of the Sub-Fund's total net assets. If, following the end of this six month period, the security has not been upgraded to a minimum credit rating specified above, it shall be sold, provided there is sufficient liquidity in the market to achieve fair market value.

European High Yield Bond Fund

The Sub-Fund aims to provide an income and capital return in excess of that which is generated by prevailing European high yield bond indices over the long term.

The Sub-Fund seeks to achieve its objective by investing primarily in a diversified portfolio of higher interest rate bearing fixed interest securities (which may be Investment Grade and Non-Investment Grade) issued by European Borrowers and derivatives which offer exposure to such securities. The currency mix of denominations may be varied, reflecting the Investment Manager's assessment of likely exchange rate movements at any time.

The Investment Manager will aim to achieve diversification by taking into consideration factors such as credit quality, liquidity, geographic as well as sectoral exposure as part of the portfolio construction process.

Any exposure to mortgage-backed securities, asset-backed securities, contingent convertibles (CoCos) and distressed debt combined will not represent more than 20% of the assets of the Sub-Fund.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, deposits and units in other collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Investment objectives and policy continued

The securities purchased will be primarily hedged or denominated in the Sub-Fund's reference currency.

Global High Yield Bond Fund

The Sub-Fund aims to generate an income and capital return in excess of that which is generated by prevailing global high yield bond indices over the long term.

The Sub-Fund seeks to achieve its objective by investing primarily in a diversified portfolio of Non-Investment Grade fixed income securities, issued by governments, government agencies, supranational bodies, local authorities, national public bodies, institutions and corporations across the world, with the relevant currency exposure hedged back into U.S. Dollars.

The Investment Manager will aim to achieve diversification by taking into consideration factors such as credit quality, liquidity, geographic as well as sectoral exposure as part of the portfolio construction process.

Any exposure to mortgage-backed securities, asset-backed securities, contingent convertibles (CoCos) and distressed debt combined will not represent more than 20% of the assets of the Sub-Fund.

The Sub-Fund may also invest in other transferable securities, money market instrument, cash and near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Global Total Return Credit Fund

The Sub-Fund aims to generate long term total returns, comprising income and capital gains, by investing primarily in a diversified portfolio of fixed and floating rate credit securities.

These instruments may be (i) denominated in any currency (ii) deposits, bills, notes, bond or derivatives thereof (iii) fixed or variable coupon instruments (iv) issued by companies, institutions, governments, government agencies, supranational bodies or local authorities around the world (including but not limited to Emerging Markets) (v) of any duration (vi) investment grade and non-investment grade.

The Investment Manager will take into consideration factors such as credit quality, duration, issuer type, liquidity, geographic and sectoral exposure as part of the portfolio construction process. Currency exposures will be hedged back to US Dollars.

The Sub-Fund may invest up to 20% of its assets in structured credit instruments, including collateralised loan obligations, mortgage-backed securities and asset backed securities. Combined investments in Contingent Convertible securities (CoCos) and distressed debt will not represent more than 20% of the Sub-Fund's assets. Investment in distressed debt will not exceed more than 10% of the Sub-Fund's assets.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, fixed income related derivatives (including, without limit, exchange traded and over-the-counter options, futures, forward contracts and swaps (including total return swaps, credit default swaps and interest rate swaps) or any combination(s) of these), deposits or units in collective investment schemes.

The Sub-Fund may use derivatives for hedging, efficient portfolio management and/or investment purposes. This may include derivatives on fixed income instruments and currencies, and can be used to achieve both long and short positions.

Investment Grade Corporate Bond Fund

The Sub-Fund aims to generate a high level of income, with the opportunity for capital gain, from a diversified portfolio of fixed and floating rate securities, normally denominated in U.S. Dollars and issued by governments, institutions and corporations in both developing and developed countries. When judged appropriate, the portfolio may be held in fixed interest securities denominated in currencies other than U.S. Dollars, with the relevant currency exposure hedged back into U.S. Dollars.

Careful attention is paid to the quality and marketability of the securities held by the Sub-Fund.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging, efficient portfolio management and/or investment purposes.

When investing its remaining assets in non-investment grade debt securities, the Sub-Fund will however not invest in debt securities which have a minimum credit rating (or an equivalent credit rating by a reputable credit rating agency, where coverage by S&P, Fitch or Moody's is not available) at the time of investment below (i) B- by S&P or Fitch; or (ii) B3 by Moody's (or as such ratings may be amended from time to time). If any debt security held by the Sub-Fund is down-graded to a credit rating below these levels, the Sub-Fund will be permitted to continue holding such security for a period of up to six months, provided that the aggregate value of any such holdings comprises no more than 3% of the Sub-Fund's total net assets. If, following the end of this six month period, the security has not been upgraded to a minimum credit rating specified above, it shall be sold, provided there is sufficient liquidity in the market to achieve fair market value.

Latin American Corporate Debt Fund

The Sub-Fund will aim to achieve a high level of income, with the opportunity for capital gain, from a diversified portfolio of debt securities (e.g. bonds) issued by Latin American Borrowers. These securities may be denominated in Latin American local currencies as well as hard currencies (globally traded major currencies).

The Sub-Fund will invest primarily (at least two-thirds) in debt securities issued by Latin American Corporate Borrowers and will actively manage the currency and interest rate exposures to enhance the returns achieved by the Sub-Fund.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging only.

Latin American Investment Grade Corporate Debt Fund

The Sub-Fund aims to provide income, with the opportunity for long-term capital gain, from a diversified portfolio of debt securities (e.g. bonds) issued by Latin American Borrowers. These securities may be denominated in Latin American local currencies as well as hard currencies (globally traded major currencies).

The Sub-Fund will invest primarily (at least two-thirds) in Investment Grade debt securities issued by Latin American Corporate Borrowers and will actively manage the currency and interest rate exposures to enhance the returns achieved by the Sub-Fund.

The Sub-Fund may also invest in debt securities issued or guaranteed by governments; government agencies; supranational bodies or institutions in Latin America.

The Sub-Fund's Investment Grade debt securities and money market instruments and cash held or deposited with bodies who are rated as investment grade, will total at least 90% of the Sub-Fund's assets.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Onshore Renminbi Bond Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth primarily through investment in a portfolio of debt securities (e.g. bonds) which are issued in Mainland China, including debt securities issued on the China Interbank Bond Market or any other eligible market. The Sub-Fund may also hold debt securities which are issued outside of Mainland China. The Sub-Fund's debt securities may be denominated in Renminbi and/or hard currencies (globally traded major currencies). Where a security is not denominated in Renminbi, the issuer of such security shall be a Chinese Borrower. For any security which is not denominated in Renminbi, the returns of such security shall be hedged into Renminbi at the discretion of the Investment Manager.

The Sub-Fund may invest in Investment Grade and Non-Investment Grade debt securities and derivatives which offer exposure to such debt securities.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes (which, in the case of the Sub-Fund's use of foreign exchange forward contracts, may result in net long or short positions in relation to certain currencies with reference to the Sub-Fund's Reference Currency).

Target Return Bond Fund

The Sub-Fund aims to produce a positive total return, consisting of both income and capital gains, over rolling

Investment objectives and policy continued

3 year periods, regardless of market conditions, by investing primarily in fixed interest bearing instruments and related derivatives.

While the Sub-Fund aims to achieve a positive total return there is no guarantee this will be achieved over rolling 3 year periods, or any time period, and invested capital is at risk. The Sub-Fund aims to meet its objectives by investing in a diversified portfolio of fixed interest bearing instruments and that may be (i) denominated in any currency (ii) deposits, bills, notes and bonds (iii) issued by companies, institutions, governments, government agencies or supranational bodies around the world (including but not limited to emerging markets) (iv) of any duration (v) Investment Grade and/or Non-Investment Grade (including high yield securities).

The Sub-Fund's exposure to mortgage-backed securities, asset-backed securities, Contingent Convertibles and distressed debt combined will not represent more than 20% of its assets.

The Sub-Fund may also invest in related derivatives including but not limited to forward currency contracts and interest rate, currency or credit derivatives, which may be held either with the purpose of reducing risk or of seeking to enhance prospective returns. The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, other derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund will also be allowed to use derivatives for the purposes of hedging, efficient portfolio management and/or investment purposes.

Multi-Asset Sub-Funds

Emerging Markets Multi-Asset Fund

The Sub-Fund aims to provide long-term total returns primarily through investing in a balanced portfolio of emerging markets investments.

The Sub-Fund aims to meet its investment objective by taking investment exposure to equities, bonds, property, commodities, money market instruments, cash or near cash, deposits, and other eligible transferable securities and

money market instruments (as permitted under Article 41 paragraph (2) of the Law of 2010) where the issuers are domiciled in emerging markets or outside emerging markets but carry out a significant proportion of their economic activities in emerging markets. Any such exposures may be gained directly, other than in property or commodities, or indirectly through investment in other financial instruments (such as derivatives). The Sub-Fund will not invest directly in property and/or commodities but will make indirect investment via units in eligible UCIs and/or UCITs, exchange traded products and other eligible financial instruments (e.g. shares in listed property companies, ETCs or other transferable securities on commodities that do not embed a derivative).

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

Normally, the Sub-Fund's maximum equity exposure will be limited to 75% of its assets.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Global Diversified Growth Fund

The Sub-Fund aims to provide long-term real returns*, through a combination of income and capital growth, primarily by investing in a globally diversified portfolio of assets. The Sub-Fund aims to meet its investment objective by taking investment exposure to global equities, fixed interest instruments, property, commodities, money market instruments, cash or near cash, deposits and other eligible transferable securities and money market instruments (as permitted under Article 41 paragraph (2) of the Law of 2010). Any such exposures may be gained directly, other than in property or commodities, or indirectly through investment in other financial instruments (such as derivatives). For exposures to property and/or commodities, the Sub-Fund will make indirect investment via units in eligible UCIs and/or UCITs, exchange traded products and other eligible financial instruments (e.g. shares in listed property companies, ETCs or other transferable securities on commodities that do not embed a derivative).

The proportion of the Sub-Fund allocated to each asset class will be actively managed.

Fixed interest instruments held may be (i) issued by companies, institutions, governments, government agencies or supranational bodies around the world (including but not limited to emerging and frontier type markets), (ii) of any duration, and (iii) of Investment Grade and/or Non-Investment Grade. The Sub-Fund may invest up to 100% of its assets in units in UCIs and/or UCITS as detailed in Section 10.1 of the Prospectus.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes.

*For these purposes, real returns are returns that are superior to US inflation (currently measured by the annual change in the US Consumer Price Index), which the Sub-Fund aims to provide over the long-term and not necessarily every year.

Global Diversified Growth Fund (Euro)

The Sub-Fund aims to provide long-term returns in excess of the Euro deposit rates, through a combination of income and capital growth, primarily by investing in a globally diversified portfolio of assets.

The Sub-Fund aims to meet its investment objective by taking investment exposure to global equities, fixed interest instruments, property, commodities, money market instruments, cash or near cash, deposits and other eligible transferable securities and money market instruments (as permitted under Article 41 paragraph (2) of the Law of 2010). Any such exposures may be gained directly, other than in property or commodities, or indirectly through investment in other financial instruments (such as derivatives). For exposures to property and/or commodities, the Sub-Fund will make indirect investments via units in eligible UCIs and/or UCITS, exchange traded products and other eligible financial instruments (e.g. shares in listed property companies, ETCs or other transferable securities on commodities that do not embed a derivative).

The proportion of the Sub-Fund allocated to each asset class will be actively managed.

Fixed interest instruments held may be (i) issued by companies, institutions, governments, government agencies or supranational bodies around the world (including but not limited to emerging and frontier type markets), (ii) of any duration, and (iii) of Investment Grade and/or Non-Investment Grade. The Sub-Fund may invest up to 100% of its assets in units in UCIs and/or UCITS as detailed in Section 10.1 of the Prospectus.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

The exposure to Contingent Convertibles (CoCos) will not represent more than 10% of the assets of the Sub-Fund. The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes.

Global Multi-Asset Income Fund

The Sub-Fund aims to provide income with the opportunity for long-term capital growth.

The Sub-Fund will invest primarily in a diversified portfolio of fixed interest instruments, equities and derivatives, the underlying assets of which are fixed interest instruments and equities. Normally, the Sub-Fund's maximum equity exposure will be limited to 50% of its assets.

Fixed interest instruments held may be (i) issued by companies, institutions, governments, government agencies or supranational bodies around the world (including but not limited to emerging and frontier type markets), (ii) of any duration, and (iii) of Investment Grade and/or Non-Investment Grade. The Sub-Fund's exposure to Contingent Convertibles (Co-Cos) will not represent more than 10% of the assets of the Sub-Fund.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Global Strategic Managed Fund

The Sub-Fund aims to provide long-term income and capital growth through investment in a diversified and actively managed portfolio consisting of any combination of cash instruments, fixed income securities, convertible securities, equity securities and derivatives on an international basis. Normally, the maximum equity content will be limited to 75% of the Sub-Fund.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, other derivatives, deposits and units in collective investment schemes.

The Sub-Fund may invest in aggregate up to 30% of its assets in units or shares of other UCITS or other UCIs as further detailed in Section 10.1 C. (a) (12) of the Prospectus.

The Sub-Fund may use derivatives for the purposes of hedging, efficient portfolio management and/or investment purposes.

Investment objectives and policy continued

Equity Sub-Funds

All China Equity Fund

The Sub-Fund aims to provide long term capital growth primarily through investment in equities or equity-related securities issued by Chinese Companies. Investment exposure to the equities issued by these companies may be gained directly through investment in such equities or indirectly through investment in other transferable securities (including equity linked notes), derivatives or units in collective investment schemes.

The Sub-Fund's equity holdings in Mainland China companies may consist of China A Shares which may include but is not limited to those traded via Stock Connect.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives transactions for efficient portfolio management and/or hedging purposes.

American Equity Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in companies either listed and/or domiciled in the United States of America, or established outside of the United States of America but carrying out a significant portion of their business activities in the United States of America.

The Sub-Fund will be unrestricted in its choice of companies either by size or industry.

The Sub-Fund may also hold other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Asia Pacific Equity Fund

The Sub-Fund aims to provide long-term capital growth primarily through investment in equities of companies

established and listed on a recognised exchange in Asia Pacific, excluding Japan. The Sub-Fund may invest primarily in the markets of Australia, Hong Kong, Singapore, Malaysia, Thailand, Taiwan, South Korea, the Philippines, Indonesia, China, India and New Zealand.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Asian Equity Fund

The Sub-Fund aims to provide long-term capital growth primarily through investment in equities of companies established and listed on a recognised exchange in Asia, excluding Japan. The Sub-Fund will invest primarily in the markets of Hong Kong, Singapore, Malaysia, Thailand, Taiwan, South Korea, The Philippines, Indonesia, China and India, but may also invest in the region's other markets such as Australia and New Zealand.

The stock selection process will be research driven, taking into account both macroeconomic developments and stock specific factors. Country, economic sector and stock selection are likely to be important drivers of the Sub-Fund's performance over time. Where investments are made in assets not denominated in U.S. Dollars, efficient portfolio management techniques may be used to minimise any currency risk. At least two-thirds of the investments shall be made in the equities described above.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Emerging Markets Equity Fund

The Sub-Fund will aim to achieve long-term capital growth primarily through investment in equities or equity-related securities of companies established and/or listed on an exchange in emerging markets, or companies which are established and/or listed on exchanges outside

emerging markets but which carry out a significant proportion of their economic activity in emerging markets and/or are controlled by entities established and/or listed in emerging markets.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Enhanced Natural Resources Fund

The Sub-Fund will aim to achieve long-term capital growth, primarily through investment in a globally diversified portfolio of securities of commodity and natural resource related assets. Investments may include shares in companies involved in exploration, development, production, extraction, refining, processing, distribution, marketing, transport or other activity relating to commodity and natural resources products and sources and/or derivatives where the underlying asset is linked to the above companies and derivatives where the underlying reference asset is linked to commodity indices (e.g. ETCs).

The Sub-Fund will be allowed to hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes or instruments that offer short exposure to the above assets. The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

European Equity Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in companies either listed and/or domiciled in Europe, or established outside of Europe but carrying out a significant portion of their business activities in Europe.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Dividend Fund

The Sub-Fund aims to provide income and long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will focus its investments in companies with attractive dividend yields.

The Sub-Fund will be unrestricted in its choice of companies either by size or industry, or in the geographical makeup of the portfolio.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management, hedging and/or investment purposes.

Global Dynamic Fund

The Sub-Fund aims to provide long-term capital growth primarily through investment in global equities. The Sub-Fund will be managed actively and at least two-thirds of its investments will be in equity instruments.

The Sub-Fund will be unrestricted in its choice of companies either by size or industry, or in the geographical makeup of the portfolio.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Endurance Equity Fund

The Sub-Fund aims to achieve long-term capital growth with lower volatility and a higher dividend yield than the global equities market. This will be achieved primarily through investment in shares of companies around the world.

The Sub-Fund will be unrestricted in its choice of companies either by size or industry, or in the geographical makeup of the portfolio.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Energy Fund

The Sub-Fund aims to achieve capital growth by investing in the equity instruments of internationally quoted companies throughout the world involved in the exploration, production or distribution of oil, gas and other energy sources. In addition, investments may also be made in companies which service the energy industry.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

Investment objectives and policy continued

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Equity Fund

The Sub-Fund aims to achieve capital growth by primarily investing in shares of companies on a global basis.

The Sub-Fund will be unrestricted in its choice of companies either by size or industry, or in the geographical makeup of the portfolio.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Franchise Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will have a blend of investments and will be unrestricted in its choice of companies either by size or industry, or in terms of the geographical make-up of the portfolio. The Sub-Fund will focus investment on stocks deemed to be of high quality which are typically associated with global brands or franchises.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Gold Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in equities issued by companies around the globe involved in gold mining. The Sub-Fund may also invest, up to one-third, in companies around the globe that are involved in mining for other precious metals and other minerals and metals.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash,

derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Natural Resources Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in equities issued by companies around the globe that are expected to benefit from a long-term increase in the prices of commodities and natural resources. At least two-thirds of the companies invested in will be involved in mining, extracting, producing, processing or transporting a natural resource or commodity or will be companies which provide services to such companies.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Quality Equity Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will have a blend of investments and will be unrestricted in its choice of companies either by size or industry, or the geographical make-up of the portfolio. The Sub-Fund will focus investment on stocks deemed by the Investment Manager to be of high quality.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for efficient portfolio management and/or hedging.

Global Quality Equity Income Fund

The Sub-Fund aims to provide income and long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will have a blend of investments and will be unrestricted in its choice

of companies either by size or industry, or the geographical make-up of the portfolio. The Sub-Fund will focus investment on stocks deemed by the Investment Manager to be of high quality. The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives, deposits and units in collective investment schemes. The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Real Estate Securities Fund

The Sub-Fund aims to provide income and long-term capital growth. The Sub-Fund will invest primarily in a diversified portfolio of securities of real estate, and real estate-related, issuers. The Sub-Fund aims to achieve its investment objective by investing directly in equities, other transferable securities (e.g. closed-ended Real Estate Investment Trusts), debt securities (e.g. bonds) and/or investing indirectly through units in eligible UCIs and/or UCITS.

An issuer will be regarded as a real estate, or real estate-related, issuer if a significant proportion of its assets, revenues or net income is attributable to ownership, construction, management or sale of residential, commercial or industrial real estate.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, derivatives and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

The exposure to mortgage-backed securities and asset-backed securities combined will not represent more than 20% of the assets of the Sub-Fund.

Global Strategic Equity Fund

The Sub-Fund aims to provide long-term capital growth primarily through investment in shares of companies around the world that are believed to offer above average opportunities for capital gains.

At least two-thirds of the Sub-Fund's investments will be in shares of companies that are believed to be of high quality (meaning they have potential high returns relative to their cost of capital) or offer good value (meaning they are undervalued within the market), or that are expected to benefit from increases in profit expectations, or that are currently or expected to receive increased investor demand. Opportunities may also be sought for investments in companies that are expected to see their profits benefit over time from operational and structural improvements.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Global Value Equity Fund

The Sub-Fund aims to achieve long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will have a blend of investments and will be unrestricted in its choice of companies either by size or industry, or in terms of the geographical make-up of its portfolio. The Sub-Fund will use a value approach in selecting investments and will focus on companies deemed by the Investment Manager to be of high quality. The primary idea behind the value approach is to isolate potential investments with relatively unattractive market sentiment which are then, in turn, placed under further scrutiny in order to identify investment opportunities.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Latin American Equity Fund

The Sub-Fund will aim to achieve long-term capital growth primarily through investment in equities or equity-related securities of companies incorporated in Latin America, companies incorporated outside of Latin America but which carry out a significant proportion (more than 50%) of their operations in Latin America and/or companies incorporated outside of Latin America which are controlled by entities established in Latin America.

The Sub-Fund may hold other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging only.

Latin American Smaller Companies Fund

The Sub Fund aims to achieve long-term capital growth typically (at least 80%) through investment in equities or equity-related securities of small companies incorporated in Latin America, companies incorporated outside of Latin America but which carry out a significant proportion (at least 50%) of their operations through small companies in Latin America and/or companies incorporated outside of Latin America which are controlled by small companies established in Latin America.

For the purposes of this Sub-Fund, a 'small company' shall mean any company that, at the time of investment, has a

Investment objectives and policy continued

market capitalisation equal to or less than any constituent company of the MSCI Emerging Markets Latin American Small Cap Index.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging only.

U.K. Alpha Fund

The Sub-Fund aims to achieve capital growth and provide income over the long term primarily through investment in equities issued by UK companies.

The Sub-Fund will focus on equities believed to offer above average opportunities for total returns.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash or near cash, derivatives, deposits and units in collective investment schemes.

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

Specialist Sub-Funds

Active Commodities Fund

The Sub-Fund aims to achieve long-term capital growth primarily by gaining exposure to a range of commodity sectors, including energy, agriculture, base metals, bulk metals and precious metals.

The Investment Manager will actively manage the Sub-Fund's assets with the aim of outperforming the Sub-Fund's comparison index, the Bloomberg Commodity Total Return Index. While, the Sub-Fund is not managed to track any index, and the Investment Manager is free to choose how the Sub-Fund is invested, the Bloomberg Commodity Total Return Index is currently taken into account when the Sub-Fund's investments are selected.

The Sub-Fund's investments may consist of commodity related derivative instruments (including total return swaps) whose underlying assets consist of (i) exchange traded products (such as ETCs); and/or (ii) eligible diversified commodity indices (in compliance with the ESMA Guidelines 2012/832). The Sub-Fund will not acquire physical commodities directly, nor will it invest directly in any derivative that has physical commodities as an underlying asset.

The exposure of the Sub-Fund to any single commodity will not exceed 20% of the Sub-Fund's net assets (or 35% in the case of one commodity under exceptional market conditions, as may be the case for highly correlated commodities in the energy sector). The Sub-Fund's overall exposure to any single commodity (when calculated on a net basis) will be long.

Any investment by the Sub-Fund in exchange traded products, and in particular ETCs, will be made in compliance with the Grand Ducal Regulation of 8 February 2008.

The Sub-Fund may invest up to 100% of its assets in eligible diversified commodity indices. These indices are diversified indices composed of futures contracts on commodities and are sufficiently diversified for the purposes of Article 53 of the UCITS Directive. The sub-components of each diversified commodity index will be rebalanced on a monthly basis.

The Sub-Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and forward transactions, deposits and units in collective investment schemes.

The Sub-Fund will also be allowed to use derivatives for efficient portfolio management, hedging and/or investment purposes.

The costs and fees relating to the implementation of the Sub-Fund's investment strategy (including the use of eligible diversified commodity indices) are not expected to be material. These costs and fees will be fully reflected in the Sub-Fund's Ongoing Charges figure.

Risk considerations

All investments risk the loss of capital. Before making an investment in the Fund, investors should consider carefully the information contained in the Prospectus. Investors should consider their own personal circumstances including their level of risk tolerance, financial circumstances and investment objectives. The value of an investment in the Fund, and any income generated from them, will be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which the Fund invests.

Past performance should not be taken as a guide to the future and there is no guarantee that any investment will make profits or that losses may not be incurred. No assurance is given that a Sub-Fund's objective will be achieved, investors should therefore ensure that they are satisfied with the risk profile of the Sub-Fund. With exception to the Money Sub-Funds, all Sub-Fund investments should be considered medium to long term.

Only risks that are considered material and that are currently known have been disclosed. Risks may arise in the future which could not have been anticipated in advance. Risk factors may apply to each Sub-Fund to varying degrees, and this exposure will also vary over time. The Prospectus will be updated at regular intervals to reflect any changes to the Risk Factors detailed in the Appendix 2 of the Prospectus.

The following General Risks apply to all Sub-Funds, whereas Specific Risks detailed as at the date of the Prospectus apply only to certain Sub-Funds as set out in the Specific Risks warning table.

If you are in any doubt about the suitability of an investment in any of the Sub-Funds, or if you are not confident you understand the risks involved, please contact your financial or other professional advisor for further information.

Part A – General Risks

Risks Associated with Investments

Accounting Risk	Accounting, auditing and financial reporting standards, practices and disclosure requirements vary between countries and can change and this can be a source of uncertainty in the true value of investments and can lead to a loss of capital or income.
Active Management Risk	The Investment Manager has discretion to purchase and sell assets of the Sub-Funds in accordance with each Sub-Fund's investment policy which is further described in Appendix 1 of the Prospectus. It may be as a consequence of the Investment Manager actively electing to deviate from the constituents of any related market index that a Sub-Fund may not participate in the general upward move as measured by that market's index and that a Sub-Fund's value may decline even while any related index is rising.
Exchange Rate Fluctuation Risk	Currency fluctuations may adversely affect the value of a Sub-Fund's investments and the income thereon. Currency fluctuations may also adversely affect the profitability of an underlying company in which a Sub-Fund invests.
Income Yield Risk	The level of any yield arising from interest and/or dividend payments, and other such sources of income, for a Sub-Fund may be subject to fluctuations and is not guaranteed. Therefore the related distribution amount paid, or deemed to be paid, from any Sub-Fund's Share Class may also fluctuate over time and is not guaranteed.

Risk considerations continued

Part A – General Risks continued

Risks Associated with Investments continued

Inflation & Deflation Risk	<p>Inflation erodes the real value of all investments and changes in the anticipated rate of inflation could lead to capital losses in the Sub-Fund's investments.</p> <p>Deflation risk is the risk that prices throughout an economy may decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of a Sub-Fund's portfolio.</p>
Initial Public Offerings (IPO) & Placement Risk	<p>When a Sub-Fund subscribes for an IPO or a placing there is a (potentially lengthy) period between the Sub-Fund submitting its application and finding out whether the application has been successful. If the Sub-Fund is not allocated the full amount subscribed for due to oversubscription or the security is listed at lower than the issue price (in respect of an IPO only), this may result in a sudden change in the Sub-Fund's price. There is also the opportunity cost of having cash committed to the subscription (and therefore out of the market), and not receiving the full allocation. The price of securities involved in initial public offerings are often subject to greater and more unpredictable price changes than more established securities.</p>
Political & Regulatory Risk	<p>Expropriation by the state, social or political instability, or other restrictions on the freedom of the Sub-Fund to deal in its investments, may all lead to investment losses. It should also be noted that there may be occasions when a government imposes restrictions on a company's operations and / or the free movement of cash.</p> <p>The regulatory environment is evolving and changes therein may adversely affect the ability of the Fund to pursue its investment strategies. In addition, the regulatory or tax environment for derivative and related instruments is evolving and may be subject to modification by government or regulatory authorities which may adversely affect the value of the investments held by the Fund. The effect of any future regulatory or tax change on the Fund is impossible to predict. The regulatory environment within which the Fund operates may be different to the regulatory requirements of the investors' home countries.</p>
<h4>Risks Associated with Share Classes</h4>	
Charges to Capital Risk	<p>Where the income on a Sub-Fund is not sufficient to offset the charges and expenses of a Sub-Fund they may instead be deducted from the capital of the Sub-Fund. This will constrain the rate of capital growth.</p> <p>For the Inc-2 and Inc-3 Share Classes, the Management Fee, the Management Company Fee, the Administration Servicing Fee, the Distribution Fee (if applicable), the Depositary Fee and all other expenses attributable to that Share Class will be charged against the capital account of that Share Class. This has the effect of increasing the Share Class' distributions (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.</p>
Currency Denomination Risk	<p>The Currency Denomination of a Share Class in a Sub-Fund may not necessarily be an indicator of the currency risk to which its Shareholders are exposed. Currency risk derives from the currency exposures of the underlying assets of a Sub-Fund, while the Currency Denomination of a Share Class only indicates the currency in which the Net Asset Value of that Share Class is valued in.</p> <p>It is also particularly important to be aware of the difference between a Share Class that is denominated in a given currency and a Share Class that is hedged into that currency. For a full overview of the different Share Classes available please refer to Section '5' of the Prospectus.</p>

Part A – General Risks continued**Risks Associated with Share Classes** continued

Distribution from Capital Risk	<p>Inc-2 and Inc-3 Shares may make distributions from capital as well as from net realised and unrealised capital gains before deduction of fees and expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital and the potential for long-term capital and income growth. In addition, this distribution policy may have tax implications for your investment in such Income Shares. If in doubt, please consult your tax adviser.</p> <p>Additionally, Inc-3 Share Classes aim to provide a fixed distribution rate which is set based on the Investment Manager's expectation of the long term (3 year rolling periods) income to be received by the fund. To achieve this they may make short term distributions from capital within a calendar year or carry over excess income from one calendar year to the next. As the distribution rates for both Inc-2 and Inc-3 Share Classes are based on a forecast, there is a risk of these distributions being increased or decreased or being taken from capital which could also further constrain long-term capital and income growth.</p>
Initial Charges Risk	<p>Where an Initial Charge is made, investors who sell their Shares may not, even in the absence of a fall in the value of the Shares, recover the total amount originally subscribed.</p>
IRD Share Class Risk	<p>Investors should be aware that, as the IRD Share Classes make use of currency hedging transactions, the risks associated with Reference Currency Hedged Share Classes are also applicable to the IRD Share Classes. Please see 'Reference Currency Hedged Share Class Risk' below and Section 5.2 of the Prospectus for further details.</p> <p>Investors should be aware that the IRD Share Classes are intended for investors whose currency of investment is the Currency Denomination of the relevant IRD Share Class in which they are investing. Therefore, IRD Share Classes shall only be issued to investors whose currency of subscription is the Currency Denomination of the relevant IRD Share Class. Similarly, redemption payments in respect of IRD Share Classes shall only be made in the Currency Denomination of the relevant IRD Share Class. Investors who measure their investment returns in a currency other than that of the Currency Denomination of the relevant IRD Share Class should be aware of the foreign exchange risk that would exist.</p> <p>IRD Share Classes will normally pay dividends on a monthly basis. The dividend payments will normally be made in the Currency Denomination of the relevant IRD Share Class.</p> <p>All costs and expenses incurred in relation to the Investment Manager's currency hedging transactions will be borne on a pro rata basis by the IRD Share Classes. The expenses for the IRD Share Classes will be charged to its capital account, which has the effect of increasing dividends (which may be taxable) whilst reducing its capital to an equivalent extent. This could constrain future capital and income growth.</p> <p>Investors should be aware that IRD Share Classes give priority to dividends, rather than capital growth, and will typically distribute more than the income received by the relevant Sub-Fund. Inclusion of any interest rate differential resulting from the Investment Manager's currency hedging transactions in the IRD Share Classes' dividends will be considered a distribution from capital or capital gains. As such, dividends will typically be paid out of capital, which may result in erosion of the capital invested. Shareholders should note further that, where the dividend rate is in excess of the investment income of the Share Class, dividends will be paid out of the capital attributed to the relevant IRD Share Class, as well as from realised and unrealised capital gains. This may be tax inefficient for investors in certain countries. Investors should consult their local tax adviser about their own position.</p> <p>Investors should be aware of the uncertainty of interest and foreign exchange forward rates which are subject to change. This will have an impact on the returns of the IRD Share Classes. If the interest rate of the Currency Denomination of the IRD Share Class is equal to or lower than the interest rate of the relevant Sub-Fund's Reference Currency, the interest rate differential is likely to be negative. Such a negative interest rate differential will be deducted from the estimated gross yield for the IRD Share Class. This will have an impact on the dividend paid by this Share Class, which could ultimately result in no dividend being paid.</p>

Risk considerations continued

Part A – General Risks continued

Risks Associated with Share Classes continued

IRD Share Class Risk (cont.)	<p>The interest rate differential distributed may not equal, and therefore may be less, than the difference in interbank interest rates between the Currency Denomination of the IRD Share Class and the relevant Sub-Fund's Reference Currency.</p> <p>The Net Asset Value per Share of IRD Share Classes may fluctuate more than other Share Classes due to a more frequent distribution of dividends and the fluctuation of the interest rate differential.</p>
Portfolio Currency Hedged Share Class Risk	<p>For any PCHSC, the Investment Manager (or its delegate) will use hedging transactions to reduce the impact of exchange rate movements between the currency denomination of the PCHSC and the primary currency exposures in the relevant Sub-Fund's portfolio. However, there can be no assurance that the strategy implemented by the Investment Manager will be successful.</p> <p>The currency hedging transactions will be entered into regardless of whether the primary currency exposures are declining or increasing in value relative to the currency denomination of the PCHSC. Consequently, while such hedging will largely protect investors against a decline in the value of the relevant the primary currency exposures relative to the currency denomination of the PCHSC, it will also mean that investors will not benefit from an increase in the value of those primary currency exposures relative to the currency denomination of the PCHSC.</p> <p>Due to the impossibility of forecasting future market values and the primary currency exposures in the relevant Sub-Fund's portfolio the currency hedging will not be perfect and the returns of PCHSC may be impacted by exchange rate movements.</p> <p>Please see Section 5.2 of the Prospectus for further details on the types of hedging transactions implemented by the Investment Manager (or it delegate) and the risks associated with the PCHSCs.</p>
Reference Currency Hedged Share Classes Risk	<p>For the Reference Currency Hedged Share Classes, the Investment Manager will implement a currency hedging strategy to limit exposure to the currency position of the relevant Sub-Fund's Reference Currency relative to the Currency Denomination of the relevant Reference Currency Hedged Share Class ('RCHSC Currency'). However, there can be no assurance that the strategy implemented by the Investment Manager will be successful.</p> <p>The currency hedging transactions will be entered into regardless of whether the Reference Currency is declining or increasing in value relative to the RCHSC Currency. Consequently, while such hedging will largely protect investors against a decline in the value of the relevant Reference Currency relative to the RCHSC Currency, it will also mean that investors will not benefit from an increase in the value of that Reference Currency relative to the RCHSC Currency.</p> <p>Due to the impossibility of forecasting future market values the currency hedging will not be perfect and the returns of the RCHSC Currency, measured in the RCHSC Currency, will not be exactly the same as the returns of an equivalent Share Class denominated in and measured in the relevant Reference Currency.</p> <p>Shareholders should also note that liabilities arising from one Share Class in a Sub-Fund may affect the Net Asset Value of the other Share Classes in that Sub-Fund.</p>

Part A – General Risks continued**Risks Associated with Share Classes** continued

Transactional Risks Arising From The Hedged Share Classes	<p>There is a risk that where a Sub-Fund has Share Classes that operate a hedge as well as Share Classes that do not, the returns of the latter may be affected, positively or negatively, by inaccuracies and imperfections in the operation of the hedge. This risk arises because Share Classes are not separate legal entities. Hedged Share Classes and un-hedged Share Classes of the same Sub-Fund participate in the same pool of assets and/or liabilities of the same Sub-Fund.</p> <p>Shareholders should also note that assets and/or liabilities arising from one Share Class in a Sub-Fund may affect the Net Asset Value of the other Share Classes in that Sub-Fund.</p>
---	--

Risks Associated with Shareholder Dealing and Portfolio Transactions

Conflicts of Interest Risk	<p>The Management Company, the Global Distributor and Service Provider, the Investment Manager and other companies within the Investec Group may, from time to time, act as management company, investment manager or adviser to other funds, sub-funds or other client mandates which are competitors to this Fund because they follow similar investment objectives to the Sub-Funds of the Fund. It is therefore possible that the Management Company, the Global Distributor and Service Provider and the Investment Manager may in the course of their business dealings have potential conflicts of interest with the Fund or a particular Sub-Fund. Each of the Management Company, the Global Distributor and Service Provider and the Investment Manager will, however, have regard in such event to their regulatory and contractual obligations and to their overall duty to act in a commercially reasonable manner to act in the best interests of all customers and to treat all customers fairly when undertaking any investment business where potential conflicts of interest may arise.</p>
Counterparty Risk - Trading	<p>The Sub-Funds may enter into transactions with counterparties, thereby exposing them to the counterparties' credit worthiness and their ability to perform and fulfil their financial obligations (including the timely settlement of trades). This risk may arise at any time the Sub-Funds' assets are deposited, extended, committed, invested or otherwise exposed through actual or implied contractual agreements.</p> <p>When entering derivatives transactions and making use of efficient portfolio management techniques, the Sub-Funds may be adversely impacted by conflicts of interest arising from the relationship of the counterparties to the relevant investment manager or another member of the relevant Investment Manager's group of companies.</p>
Dilution	<p>In certain circumstances a dilution adjustment may be made on the purchase or sale of Shares (see Section 5 of the Prospectus). In the case of purchases this will reduce the number of Shares acquired, in the case of sales this will reduce the proceeds. Where a dilution adjustment is not made, existing investors in the Sub-Fund in question may suffer dilution which will constrain capital growth.</p>
Risk of Market Closure	<p>Certain markets in which a Sub-Fund invests may not open every Business Day. The consequence is that the prices at which the Shares may be bought or sold will be based on prices for the underlying investments that are out of date to a greater or lesser extent. This will cause the returns of the Sub-Fund to be affected if purchases or sales of Shares are followed immediately by increases or decreases in the prices of the underlying investments. Causes of market closures can be either from differences in normal market trading days, national or localised public holidays or from non-standard market closures imposed as emergency measures.</p>
Liquidity Risk – Sub-Fund investments	<p>A Sub-Fund may invest in certain securities that subsequently become difficult to sell because of reduced liquidity which would have an adverse impact on market price or the ability to realise the asset. Reduced liquidity for such securities may be driven by a specific economic or market event, such as the deterioration in the creditworthiness of an issuer.</p>
Risk of Suspension	<p>In certain circumstances, Shareholders' right to redeem, switch or convert sell Shares (including a sale by way of conversion) may be suspended (see Section 6.7 of the Prospectus). This will mean that on a temporary basis Shareholders will not have access to their money.</p>

Risk considerations continued

Part A – General Risks continued

Risks Associated with Shareholder Dealing and Portfolio Transactions continued

Risk of Remittance Restrictions	In some countries, the proceeds from the sale of a security, or dividends or other income, which is due to foreign investors, may not be payable, in full or in part, due to governmental or other restrictions. Any such restrictions will reduce the profit potential of a Sub-Fund and may lead to losses. Other such risks may include the introduction of unexpected taxation rules. In some circumstances, governmental or regulatory controls may be imposed affecting the efficient movement of capital (e.g. exchange limitations or currency movements/repatriation).
Risk of Deferred Settlement on Redemptions	The Board of Directors may decide that the settlement of redemption requests may be deferred with the approval of the affected Shareholder. In addition, in the case of individual or collective redemptions and/or conversions which are in aggregate 10% or more of the net asset value of a Sub-Fund or a Class of Shares within that Sub-Fund on a Business Day, the Board of Directors may decide without Shareholder approval to defer settlement of redemptions for a period not exceeding 30 days (see section 5.5 of the Prospectus). Shareholders should note that deferred settlement means that Shareholders will need to wait for a time period before they can receive their redemption proceeds.

Risks Associated with Sub-Fund Operations

Depositary Risk	<p>The Fund's assets are safe kept by the Depositary or its sub-custodians (which may not be part of the same group of companies as the Depositary) and Shareholders are exposed to the risk of the Depositary its sub-custodian not being able to fully meet its obligation to return in a short time frame all of the assets of the Fund held at the Depositary or a sub-custodian in the case of its insolvency. Securities of the Fund will normally be identified in the Depositary's or sub-custodian's books as belonging to the Fund and will be segregated from the Depositary or the sub-custodian's assets. This provides protection for the Fund's assets in the event of the insolvency of either the Depositary or its sub-custodian, but does not exclude the risk that the assets will not be returned promptly in the event of insolvency.</p> <p>The Fund's assets may also be pooled with the securities of other clients of the Depositary or sub-custodian. In this circumstance, if there were problems with the settlement or custody of any security in the pool then, subject to the Law of 2010, the loss would be spread across all clients in the pool and would not be restricted to the client whose securities were subject to loss.</p> <p>In addition, a Sub-Fund may be required to place assets outside of the Depositary and the sub-custodian's safekeeping network in order for the Fund to trade in certain markets. In such circumstances the Depositary remains responsible for the proper selection and supervision of the persons safekeeping such assets in the relevant markets in accordance with the Law of 2010.</p> <p>In such markets, Shareholders should note that there may be delays in settlement and/or uncertainty in relation to the ownership of a Sub-Fund's investments which could affect the Sub-Fund's liquidity and which could lead to investment losses.</p> <p>The Depositary is liable to the Fund for the loss of an asset held in custody by the Depositary and its sub-custodians. However, the Depositary may have no liability for the loss of an asset where the Depositary can prove that the loss is due to an event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary by the Depositary.</p>
-----------------	--

Part A – General Risks continued**Risks Associated with Sub-Fund Operations** continued

Depository Risk (cont.)	Cash held on deposit with a Depository or its sub-custodian is not segregated from the assets of the Depository or its sub-custodian and is held at the risk of the Sub-Funds.
Fair Value Pricing Risk	Fair value pricing adjustments may be made to the price of an underlying asset of a Sub-Fund, at the absolute discretion of the Board of Directors, to reflect predicted changes in the last available price between the market close and the Valuation Point. There is, however, a risk that this predicted price is not consistent with the subsequent opening price of that security.
Fraud Risk	<p>The Sub-Fund's assets may be subject to fraud. This includes but is not limited to fraudulent acts at the sub-custodian level such that the sub-custodian does not maintain books and records that reflect the beneficial ownership of the Fund to its assets. Fraud may also arise with regards to counterparty default and/or fraudulent acts of other third parties.</p> <p>The Depository is liable to the Fund for the loss of an asset held in custody by the Depository and its sub-custodians. However, the Depository may have no liability for the loss of an asset where the Depository can prove that the loss is due to an event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary by the Depository.</p>
Fund Legal Action Risk	There is no certainty that any legal action taken by the Fund against its Service Providers, agents, counterparties or other third parties will be successful and Shareholders may not receive compensation in full or at all for any losses incurred. Recourse through the legal system can be lengthy, costly and protracted. Depending on the circumstances, the Fund may decide not to take legal action and/or the Fund may decide to enter into settlement negotiations which may or may not be successful.
Liabilities of the Fund and the Sub-Funds	Each Sub-Fund of the Fund is a segregated portfolio of assets and those assets can only be used to meet the liabilities of, or claims against, that Sub-Fund. Whilst the provisions of Luxembourg Law provide for segregated liability between Sub-Funds, where claims are brought by local creditors in foreign courts or under foreign law contracts, it is not known whether a foreign court would give effect to the segregated liability provisions contained in Luxembourg Law. Therefore, it is not possible to be certain that the assets of a Sub-Fund will always be completely insulated from the liabilities of another Sub-Fund in every circumstance.
Liquidity Risk – Shareholder Activity	<p>Subscriptions, conversions or redemptions of Shares in a Sub-Fund may have an impact on the other Shareholders of that Sub-Fund, which is commonly known as dilution or concentration.</p> <p>To match subscriptions, conversions and redemptions of shares from a Sub-Fund, assets may be bought or sold and such transactions may incur costs that the Sub-Fund must meet. Where a Sub-Fund is forced to buy or sell a significant volume of assets relative to the liquidity normally available in the market, it may affect the price at which those assets are bought or sold (and this may be different from the price at which they are valued), therefore having a dilutive or concentrative impact for the other Shareholders. In addition, the weighting of different holdings within the portfolio may change, therefore altering the construction and composition of the Sub-Fund. The impact will vary to a lesser or greater extent depending on the volume of transactions, the purchase and sale price of the assets and valuation method used to calculate Net Asset Value per Share of the Sub-Fund.</p> <p>The Board of Directors may at its discretion, but always acting in the best interests of Shareholders, in times of severe illiquidity, utilise liquidity management tools including, without limitation, the power to defer settlement of redemptions (see section 5.5 of the Prospectus) and suspend the calculation and publication of the Net Asset Value per Share and/or, where applicable, the issue, redemption and conversion of Shares of any Class in any Sub-Fund on temporary basis, in the circumstances described under section 6.7 of the Prospectus.</p>

Risk considerations continued

Part A – General Risks continued

Risks Associated with Sub-Fund Operations continued

Securities Lending Risk	<p>Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, a Sub-Fund engaged in securities lending transactions may lose money and there may be a delay in recovering the lent securities. The Sub-Fund could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of assets purchased with re-invested cash collateral.</p> <p>A Sub-Fund's portfolio exposure to market risk will not change by engaging in securities lending. However, securities lending carries the specific market risk of the counterparty defaulting. To mitigate this risk, the Fund will receive collateral relating to its securities lending transactions in accordance with the ESMA Guidelines 2012/832. This collateral shall take any of the forms described under the ESMA Guidelines 2012/832.</p> <p>In the event of default by the counterparty to a securities lending transaction, the collateral provided will need to be sold and the lent securities repurchased at the prevailing price, which may lead to a loss in value for the relevant Sub-Fund. There can therefore be no assurance that the relevant Sub-fund's investment objectives will be achieved.</p> <p>Securities lending also carries operational risks such as the non-settlement of instructions associated with securities lending. Such operational risks are managed by means of procedures, controls and systems implemented by the securities lending agent and the Fund.</p> <p>A stock lending agent may be appointed to enter into securities lending transactions for and on behalf of the Fund with certain borrowers. In this event the borrowers will be required to transfer collateral to the stock lending agent. The stock lending agent will be required to hold the collateral in safekeeping for and on behalf of the Fund. The Fund may be exposed to risk in circumstances where the stock lending agent holds collateral in a client pooled account. This risk arises when the stock lending agent is subject to insolvency proceedings or otherwise fails to fulfil its obligations and the client pooled account suffers a shortfall. In such circumstances the Fund may be subject to potential losses.</p> <p>When engaging in securities lending, the Fund may be adversely impacted by conflicts of interest arising from the relationship of the counterparties to such transactions with the relevant investment manager or another member of the relevant investment manager's group of companies.</p>
Tax Risk	<p>Tax laws may change without notice and may impose taxes on a retrospective basis. Taxes may be deducted at source without notice to the Fund and/or the Investment Manager. Tax charged may vary between Shareholders.</p>
Third-Party Operational Risk (including Counterparty Risk – Service Providers)	<p>The Sub-Fund's operations depend on third parties, either for the purpose of segregating duties, or due to delegation/outsourcing of functions by the Investment Manager. Investors in the Sub-Fund may suffer disruption or financial loss in the event of third-party operational failure.</p>
Economically Viable Risk	<p>If a Sub-Fund does not reach a sustainable size, this will constrain the Investment Manager from implementing all of the investment decisions that it would like to for the Fund and/or the effect of charges and expenses may be higher than anticipated and the value of the investment consequently reduced. Also, in accordance with the Fund's Articles of Incorporation, a Sub-Fund may be liquidated if it does not reach assumed sustainable size and is no longer viable to operate.</p>

Part B – Specific Risks

Risks Associated with Investment Strategy

Concentration Risk	Sub-Funds which invest in a concentrated portfolio of holdings may be more volatile than more broadly diversified funds.
Fixed Maturity Risk	<p>The Global Fixed Maturity Bond 2021 Fund is intended to mature and be liquidated on the Maturity Date. Upon Termination of the Sub-Fund, including termination before or after the Maturity Date, the Sub-Fund will return to Shareholders their pro-rata interest in the assets of the Sub-Fund. It is possible that at the time of sale or distribution, certain investments held by the Sub-Fund may be worth less than the initial cost of those investments, resulting in a loss to Shareholders.</p> <p>If a Shareholder redeems their Shares in the Sub-Fund on a date prior to the Maturity Date, this is a greater risk of loss on their investment compared to a Shareholder holding the Sub-Fund until the end of the term. Shareholders should also be aware that early redemptions may pose risks to the Sub-Fund as a result of transaction costs caused by additional trading activity to the extent these are not fully offset by a price adjustment. Shareholders should also be aware that the Maturity Date may change and this may have an impact on the expected investment horizon.</p> <p>Certain of the fixed income securities held by the Sub-Fund may be subject to call risk. Call risk refers to the possibility that an issuer may exercise its right to redeem a fixed income security earlier than expected (a call). Issuers may call outstanding securities prior to their maturity for a number of reasons (e.g. declining interest rates, changes in credit spreads and improvements in the issuer's credit quality). If an issuer calls a security in which the Sub-Fund has invested, the Sub-Fund may not recoup the full amount of its initial investment and may be forced to reinvest in lower-yielding securities, securities with greater credit risks or securities with other, less favourable features, thus reducing the return on the Sub-Fund.</p>
Income Priority Risk	Where a Sub-Fund gives priority to income over capital growth this may constrain the rate of future capital and income growth. It should be noted that the distribution of the implied yield may cause greater fluctuations in a Sub-Fund's Net Asset Value. In addition, this distribution policy may have tax implications for your investment in the Shares. If in doubt, please consult your tax adviser.
Implied Yield Risk	Distributable income for Income Shares in some Sub-Funds may include an implied yield accrued from certain investments (e.g. foreign exchange forward transactions). This may constrain long-term capital and income growth for such Income Shares. In addition, this distribution policy may have tax implications for your investment in such Income Shares. If in doubt, please consult your tax adviser.
Multi-Asset Investment Risk	Losses may be made due to adverse movements in equity, bond, commodity, currency and other market prices and to changes in the volatility of any of these.
Risk of higher Ongoing Charges when investing in funds	Where a Sub-Fund invests in other UCITS and/or UCIs, there may be additional costs of investing in these UCITS/UCIs which may increase the Ongoing Charges.
Sector and / or Geographical Risk	<p>Sub-Funds that restrict investment to a small number of related sectors and / or geographical locations may decline even while broader based market indices are rising.</p> <p>Furthermore, investments which offer exposure to commodities may include additional risks e.g. political risk, natural events or terrorism. This may influence the production and trading of commodities and the value of financial instruments offering exposure to such commodities.</p>

Risks Associated with Equity Investments

Discount / Premium Risk	From time to time the prices of closed ended investment company shares can trade at either a premium or discount to their underlying value. This can create volatility in the price of a Sub-Fund that invests in closed ended investment company shares in excess of the volatility of the underlying markets in which the investment trust invests in and this consequently poses a greater risk to capital.
-------------------------	--

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Equity Investments continued

Equity Investment Risk	The value of equities and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default, the owners of their equity rank last in terms of any financial payment from that company.
Real Estate Securities Risk	Investing in real estate companies and Real Estate Investment Trusts ('REITs') may result in risks similar to those associated with the direct ownership of real estate, including losses from casualty or condemnation, changes in local and general economic conditions, vacancy rates, interest rates, zoning laws, regulatory limitations on rents, property taxes, and operating expenses in addition to acts that destroy real property. Some REITs may invest in a limited number of properties, in a narrow geographic area or in a single property type, which increases the risk that a fund could be unfavourably affected by the poor performance of a single investment or investment type. These companies are also sensitive to the management skill and creditworthiness of the issuer. Many issuers of real estate related securities are highly leveraged, which increases the risk to holders of such securities. The value of the securities the Fund buys will not necessarily track the value of the underlying investments of the issuers of such securities. In addition, REITs may also be affected by tax and regulatory requirements in that a REIT may not qualify for preferential tax treatments or exemptions.
Smaller Company Risk	Smaller company shares may be less liquid and more volatile than the shares of larger companies, due to the smaller number of shares in issue and the frequently less diversified and less established nature of the business. These factors can create a greater potential for significant capital losses.

Risks Associated with Debt Investments

Contingent Convertibles or CoCos	<p>A Sub-Fund may invest in contingent convertibles (CoCos). CoCos are Tier 1 and Tier 2 subordinated debt securities issued by financial institutions. CoCos generally contain loss absorption mechanisms, or 'bail-in' clauses, to avoid public sector intervention to keep the issuer of such securities from insolvency or bankruptcy. Additionally, CoCos investors may suffer losses prior to investors in the same financial institution holding equities or bonds ranking pari passu or junior to the CoCo bond holders. CoCos terms may vary from issuer to issuer and bond to bond and may expose investors to:</p> <p><i>Trigger risk</i></p> <p>Under the terms of the CoCos, the instruments become loss absorbing upon certain triggering events, including events under the control of the management of the CoCos issuer which could cause the permanent write-down to zero of principal investment and / or accrued interest, or a conversion to equity. These triggering events may include (i) a deduction in the issuing bank's Core Tier 1 / Common Equity Tier 1 (CT1 / CET1) ratio (or other capital ratios) below a pre-set limit, (ii) a regulatory authority, at any time, making a subjective determination that an institution is 'non-viable', i.e., a determination that the issuing bank requires public sector support in order to prevent the issuer from becoming insolvent, bankrupt, unable to pay a material part of its debts as they fall due or otherwise carry on its business and requiring or causing the conversion of the CoCos into equity in circumstances that are beyond the control of the issuer or (iii) a national authority deciding to inject capital. Furthermore, the trigger event calculations may also be affected by changes in applicable accounting rules, the accounting policies of the issuer or its</p>
----------------------------------	--

Part B – Specific Risks continued**Risks Associated with Debt Investments** continued

Contingent Convertibles or CoCos (cont.) group and the application of these policies. Any such changes, including changes over which the issuer or its group has a discretion, may have a material adverse impact on its reported financial position and accordingly may give rise to the occurrence of a trigger event in circumstances where such a trigger event may not otherwise have occurred, notwithstanding the adverse impact this will have on the position of holders of the CoCos. Upon such occurrence, there is a risk of a partial or total loss in nominal value or conversion into the common stock of the issuer which may cause a Portfolio as a CoCo bondholder to suffer losses (i) before both equity investors and other debt holders which may rank *pari passu* or junior to CoCo investors and (ii) in circumstances where the bank remains a going concern.

Extension risk

As there may be no incentive, in the form of a coupon step-up, for the issuer to redeem the securities issued. This would cause the securities' duration to lengthen and to expose investors to higher Interest Rate risk.

Unknown risk

Shareholders should be aware that the structure of CoCos is yet to be tested and there is some uncertainty as to how they may perform in a stressed environment. Depending on how the market views certain triggering events, as outlined above, there is the potential for price contagion and volatility across the entire asset class. Furthermore, this risk may be increased depending on the level of underlying instrument arbitrage and in an illiquid market, price formation may be increasingly difficult.

Yield/valuation risk

It is possible in certain circumstances, e.g., issuer discretion not to pay and / or insufficient distributable profits to pay interest in full or in part, for interest payments on certain CoCos to be cancelled in full or in part by the issuer, without prior notice to bondholders. Therefore, there can be no assurances that investors will receive payments of interest in respect of CoCos. Unpaid interest may not be cumulative or payable at any time thereafter, and bondholders shall accordingly have no right, whether in a liquidation, dissolution or winding-up or otherwise, to claim the payment of any foregone interest which may impact the value of the Portfolio.

Notwithstanding that interest not being paid or being paid only in part in respect of CoCos or that the principal value of such instruments may be written down to zero, there may be no restriction on the issuer paying dividends on its ordinary shares or making pecuniary or other distributions to the holders of its ordinary shares or making payments on securities ranking *pari passu* with the CoCos resulting in other securities by the same issuer potentially performing better than CoCos.

Capital structure inversion risk

CoCos generally rank senior to common stock in an issuer's capital structure and are consequently higher quality and entail less risk than the issuer's common stock; however, the risk involved in such securities is correlated to the solvency and / or the access of the issuer to liquidity of the issuing financial institution.

Conversion risk/write-down risk

The value of such instrument may be impacted by the mechanism through which the instruments are converted into equity or written-down, which may vary across different securities which may have varying structures and terms. CoCo structures may be complex and terms may vary from issuer to issuer and bond to bond.

In equity convertible CoCos, the conversion share price is important as this determines the economic loss that a Sub-Fund, as a holder of such instruments will suffer upon conversion and may not be pre-determined. For principal write-down CoCos, write-down can be immediate and in many cases there may be a full loss with no expectation of any return of principal. Only some CoCos may be written-back up to par and even then would do so over a potentially long period of time; however even if this is possible, the issuer may be able to call such investment prior to such write-up to par resulting in a loss to the bondholder.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Debt Investments continued

Contingent Convertibles or CoCos (cont.) CoCos are valued relative to other debt securities in the issuer's capital structure, as well as equity, with an additional premium for the risk of conversion or write-down. The relative riskiness of different CoCos will depend on the distance between the current capital ratio and the effective trigger level, which once reached would result in the CoCo being automatically written-down or converted into equity. There are a number of factors which could increase the likelihood of a trigger event occurring, some of which may be outside an issuer's control. CoCos may trade differently to other subordinated debt of an issuer which does not include a write-down or equity conversion feature which may result in a decline in value or liquidity in certain scenarios. At present, the CoCo market is volatile which may impact the value of the asset.

Coupon payment risk

Whereby coupon payments may be indefinitely deferred or cancelled with no interest accumulation and potentially no restriction on the issuer to pay dividends to equity holders or coupons to bond holders which rank pari passu or junior to the CoCo bond holders. Coupon cancellation may be at the option of the issuer or its regulator but may also be mandatory under the European Capital Requirements Directive (CRD IV) and related applicable laws and regulation. This mandatory deferral may be at the same time that equity dividends and bonuses may also be restricted, but some CoCo structures allow the bank at least in theory to keep on paying dividends whilst not paying CoCo holders. Mandatory deferral is dependent on the amount of required capital buffers a bank is asked to hold by regulators.

Liquidity risk

CoCos tend to have higher price volatility and greater liquidity risk than other securities which do not expose investors to the aforementioned risks.

Industry concentration risk

Concentration in investments at certain times in large positions and in a relatively limited number of securities, sectors or regions will make the Sub-Fund more subject to the risks associated with such concentration. The Sub-Fund could be subject to significant losses if it holds a relatively large position in a single strategy, issuer, industry, market or a particular type of securities that declines in value and the losses could increase even further if the investments cannot be liquidated without adverse market reaction or are otherwise adversely affected by changes in market conditions or circumstances.

Credit Risk

Where the value of an investment depends on a party (which could be a company, government or other institution) fulfilling an obligation to pay, there exists a risk that the obligation will not be satisfied. This risk is greater the weaker the financial strength of the party. The Net Asset Value of a Sub-Fund could be affected by any actual or feared breach of the party's obligations, while the income of the Sub-Fund would be affected only by an actual failure to pay, which is known as a default.

Distressed Debt

A Sub-Fund may invest in distressed debt securities. Investment in such distressed debt securities (which qualify as transferable securities) involves purchases of obligations of companies that are experiencing significant financial or business distress, including companies involved in bankruptcy or other reorganisation and liquidation proceedings. Acquired investments may include senior or subordinated debt securities, bank loans, promissory notes and other evidences of indebtedness,

Part B – Specific Risks continued**Risks Associated with Debt Investments** continued

Distressed Debt (cont.) as well as payables to trade creditors. Although such purchases may result in significant investor returns, they involve a substantial degree of risk and may not show any return for a considerable period of time. In fact, many of these investments ordinarily remain unpaid unless and until the company reorganises and/or emerges from bankruptcy proceedings, and as a result may have to be held for an extended period of time. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial distress is unusually high. There is no assurance that the Investment Manager will correctly evaluate the nature and magnitude of the various factors that could affect the prospects for a successful reorganisation or similar action. In any reorganisation or liquidation proceeding relating to a company in which a Sub-Fund invests, an investor may lose its entire investment or may be required to accept cash or securities with a value less than the original investment. Under such circumstances, the returns generated from the investment may not compensate a Sub-Fund adequately for the risks assumed.

Investing in distressed debt can also impose duties on the Investment Manager which may conflict with duties which it owes to a Sub-Fund. A specific example of where the Investment Manager may have a conflict of interest is where it invests the assets of a Sub-Fund in a company in serious financial distress and where that investment leads to the Investment Manager investing further amounts of the Sub-Fund's assets in the company or taking an active role in managing or advising the company, or one of the Investment Manager's employees becomes a director or other officer of the company. In such cases, the Investment Manager or its employee may have duties to the company and/or its members and creditors which may conflict with, or not correlate with, the interests of the Shareholders of that Sub-Fund. In such cases, the Investment Manager may also have discretion to exercise any rights attaching to the Sub-Fund's investments in such a company. The Investment Manager will take such steps as it considers necessary to resolve such potential conflicts of interest fairly.

High Yield Debt Securities Risk High yield debt securities, that is those that are rated BB+ by Standard & Poor's or Ba1 by Moody's or lower, or are unrated, are subject to greater risk of loss of income and principal due to default by the issuer than are higher-rated debt securities. It may also be more difficult to dispose of, or to determine the value of, high yield debt securities.

High yield debt securities rated BB+ or Ba1 or lower are described by the ratings agencies as 'predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposures to adverse conditions'.

Interest Rate Risk The earnings or market value of a Sub-Fund may be affected by changes in interest rates. This risk can be particularly relevant for Sub-Funds holding fixed-rate debt securities (such as bonds), since their values may fall if interest rates rise. Furthermore, Sub-Funds holding fixed-rate debt securities with a long time until maturity may be more sensitive to changes in interest rates than shorter-dated debt securities, for example a small rise in long-term interest rates may result in a more than proportionate fall in the price of a long-dated debt security.

Investment Grade Risk Investment Grade debt securities, like other types of debt securities, involve credit risk. Investment Grade debt securities also face the risk that their ratings can be downgraded by the ratings agencies during when these securities are invested by a particular Sub-Fund.

Money Market Instrument Risk Money market instruments in which a Sub-Fund invests are subject to the solvency of the underlying issuer. The buying and selling of money market instruments is exposed to liquidity constraints in the market.

While every effort will be made to maintain the capital value of the Sub-Fund, there is no guarantee that this will be the case as a loss made on an instrument held by the Sub-Fund could reduce the capital value of the Sub-Fund.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Debt Investments continued

Mortgage Backed and Other Asset Backed Securities Risk *Mortgage Backed*
 A mortgage-backed security is a generic term for a debt security backed or collateralised by the income stream from an underlying pool of commercial and/or residential mortgages. This type of security is commonly used to redirect the interest and principal payments from the pool of mortgages to investors. A mortgage-backed security is normally issued in a number of different classes with varying characteristics depending on the riskiness of the underlying mortgages assessed by reference to their credit quality and term and can be issued at a fixed or a floating rate of securities. The higher the risk contained in the class, the more the mortgage-backed security pays by way of income.

Asset Backed

Traditional debt securities typically pay a fixed rate of interest until maturity, when the entire principal amount is due. By contrast, payments on asset-backed securities (ABS) typically include both interest and partial payment of principal. Principal may also be prepaid voluntarily, or as a result of refinancing or forced repayment. The Fund may have to invest the proceeds from prepaid investments under less attractive terms and yields. Compared to other debt, ABS are less likely to increase in value during periods of declining interest rates and have a higher risk of decline in value during periods of rising interest rates and they can increase the volatility of the Fund.

Some ABS receive only portions of payments of either interest or principal of the underlying debt. The yields and values of these investments are extremely sensitive to changes in interest rates and in the rate of principal payments on the underlying mortgages. The market for these investments may be volatile and illiquid, which may make it difficult to buy or sell them, and the secondary market may be smaller than that for more traditional debt securities.

CDOs/CLOs

Collateralised Debt Obligations (CDOs) represent a participation in, or are secured by, a pool of fixed or floating rate debt obligations. CDOs are issued in separate classes with different stated maturities that may have different credit and investment profiles. As the debt pool experiences prepayments, the pool pays off investors in classes with shorter maturities first. Prepayments may cause the actual maturity of a CDO to be substantially shorter than its stated maturity. Conversely, slower than anticipated prepayments can extend the effective maturities of CDOs, subjecting them to a greater risk of decline in market value in response to rising interest rates than traditional debt securities, and, therefore, potentially increasing their volatility. CDOs and other instruments with complex or highly variable prepayment terms generally entail greater market, prepayment and liquidity risks than other asset backed securities (ABS). CDOs are generally subject to each of the risks discussed under asset-backed (ABS) securities.

Risks Associated with Derivative Investments

Cash Flow Risk A Sub-Fund may have insufficient cash to meet the margin calls necessary to sustain its position in a derivatives contract. This may result in the Sub-Fund having to close a position (or sell other securities to raise the cash) at a time and / or on terms that it may otherwise not have done. This could lead to capital losses for the Sub-Fund.

Part B – Specific Risks continued**Risks Associated with Derivative Investments** continued

Derivative Basis Risk	The value of a derivative typically depends on the value of an underlying asset. The value of the derivative may not be 100% correlated with the value of the underlying asset and therefore a change in the value of the asset may not be matched by a proportionate corresponding change in the value of the derivative.
Derivative Risk	The use of derivatives may lead to large changes in the value of a Sub-Fund and includes the potential for large financial loss.
Exchange Derivatives Risk	Futures contracts may have restricted liquidity due to certain exchanges limiting fluctuations in certain futures contract prices during a single day by regulations referred to as 'daily price fluctuation limits' or 'daily limits'. These prevent trades from being executed at prices beyond the daily limits during a single trading day. Also, once the price of a contract for a futures contract has increased or decreased by an amount equal to the daily limit, positions in the future can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit.
Leverage Risk	Where a Sub-Fund uses derivatives to create aggregate exposure that is greater than its net assets, this may lead to potentially large financial loss. This also creates the effect that the Sub-Fund will have greater exposure to certain risks that are associated with the use of derivatives (e.g. Counterparty Risk – Trading, OTC Derivatives Risk and market risk).
OTC Derivative Instruments Risk	<p>In general, there is less government regulation and supervision of transactions in OTC markets than of transactions entered into on organised exchanges. OTC derivatives are executed directly with the counterparty rather than through a recognised exchange and clearing house. Counterparties to OTC derivatives are not afforded the same protections as may apply to those trading on recognised exchanges, such as the performance guarantee of a clearing house.</p> <p>Investments in OTC derivatives may be subject to the risk of differing valuations arising out of different permitted valuation methods. Although the Fund has implemented appropriate valuation procedures to determine and verify the value of OTC derivatives, certain transactions are complex and valuation may only be provided by a limited number of market participants who may also be acting as the counterparty to the transactions.</p> <p>OTC derivatives expose a Sub-Fund to the risk that the counterparty will not settle a transaction in accordance with its terms, or will delay the settlement of the transaction, because of a dispute over the terms of the contract (whether or not bona fide) or because of the insolvency, bankruptcy or other credit or liquidity problems of the counterparty. Investors should also refer to the risk factor Counterparty Risk – Trading.</p> <p>Counterparty risk is generally mitigated by the transfer or pledge of collateral in favour of the relevant Sub-Fund. The value of the collateral may fluctuate, however, and it may be difficult to sell, so there are no assurances that the value of collateral held will be sufficient to cover the amount owed to the relevant Sub-Fund.</p> <p>The Sub-Funds may enter into OTC derivatives cleared through a clearing house that serves as a central counterparty. Central clearing is designed to reduce counterparty risk and increase liquidity compared to bilaterally-cleared OTC derivatives, but it does not eliminate the risk completely. The central counterparty will require margin from the clearing broker which will in turn require margin from the relevant Sub-Fund. There is a risk of loss by a Sub-Fund of its initial and variation margin deposits in the event of default of the clearing broker with which the Sub-Fund has an open position or if margin is not identified and correctly reported to the relevant Sub-Fund, in particular where margin is held in an omnibus account maintained by the clearing broker with the central counterparty. In the event that the clearing broker becomes insolvent, the Sub-Fund may not be able to transfer or 'port' its positions to another clearing broker.</p> <p>EU Regulation 648/2012 on OTC derivatives, central counterparties and trade repositories (also known as the European Market Infrastructure Regulation or EMIR) requires certain eligible OTC derivatives to be submitted for clearing to regulated central clearing counterparties and the</p>

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Derivative Investments continued

OTC Derivative Instruments Risk (cont.)	<p>reporting of certain details to trade repositories. In addition, EMIR imposes requirements for appropriate procedures and arrangements to measure, monitor and mitigate operational and counterparty risk in respect of OTC derivatives which are not subject to mandatory clearing. Ultimately, these requirements are likely to include the exchange and segregation of collateral by the parties, including by the Fund. While some of the obligations under EMIR have come into force, a number of the requirements are subject to phase-in periods and certain key issues have not been finalised by the date of the Prospectus.</p> <p>It is as yet unclear how the over-the-counter financial derivative instruments market will adapt to the new regulatory regime. The collateral, reporting and clearing requirements under EMIR, compliance with rules, regulations promulgated and other legislation in other jurisdictions may increase costs to the Sub-Funds and may impact performance. The full impact that such legislation will ultimately have on the Sub-Funds and the markets in which they trade and invest is not fully known. Such uncertainty may itself be detrimental to the efficient functioning of the markets and the success of certain investment strategies. Any changes to current regulations or any new regulations applicable to the Sub-Funds could have a materially adverse effect on the Sub-Funds.</p>
Short Exposure Risk	<p>Where a Sub-Fund uses derivatives to create short exposure there is potential for gains to be made when the underlying securities are falling in value, but a loss could be incurred when the underlying security is rising in value. This means the Sub-Fund's performance will be less closely related to the performance of the type of assets in which it will ordinarily invest.</p>
Credit Default Swaps and Other Synthetic Securities Risk	<p>A portion of a Sub-Fund's investments may consist of credit default swaps and other synthetic securities the reference obligations of which may be leveraged loans, high-yield debt securities or similar securities. Investments in such types of assets through the purchase of credit default swaps and other synthetic securities present risks in addition to those resulting from direct purchases of such investments. With respect to each synthetic security, the Sub-Fund will usually have a contractual relationship only with the counterparty of such synthetic security, and not the reference obligor on the reference obligation. The Sub-Fund generally will have no right directly to enforce compliance by the reference obligor with the terms of the reference obligation nor any rights of set-off against the reference obligor, may be subject to set-off rights exercised by the reference obligor against the counterparty or another person or entity, and generally will not have any voting or other contractual rights of ownership with respect to the reference obligation. In addition, the Sub-Fund will not directly benefit from any collateral supporting the reference obligation and will not have the benefit of the remedies that would normally be available to a holder of such reference obligation. In addition, in the event of the insolvency of the counterparty, the Sub-Fund will be treated as a general creditor of such counterparty, and will not have any claim with respect to the reference obligation. Consequently, the Sub-Fund will be subject to the credit risk of the counterparty as well as that of the reference obligor. As a result, concentrations of synthetic securities entered into with anyone counterparty will subject the Sub-Fund to an additional degree of risk with respect to defaults by such counterparty as well as by the reference obligor.</p> <p>Additionally, while the Investment Manager expects that the returns on a synthetic security will generally reflect those of the related reference obligation, as a result of the terms of the synthetic security and the assumption of the credit risk of the synthetic security counterparty, a synthetic security may have a different expected return, a different (and potentially greater)</p>

Part B – Specific Risks continued**Risks Associated with Derivative Investments** continued

Credit Default Swaps and Other Synthetic Securities Risk (cont.) probability of default and expected loss characteristics following a default, and a different expected recovery following default. Additionally, when compared to the reference obligation, the terms of a synthetic security may provide for different maturities, distribution dates, interest rates, interest rate references, credit exposures, or other credit or non-credit related characteristics. Upon maturity, default, acceleration or any other termination (including a put or call) other than pursuant to a credit event (as defined therein) of the synthetic security, the terms of the synthetic security may permit or require the issuer of such synthetic security to satisfy its obligations under the synthetic security by delivering to the relevant Sub-Fund securities other than the reference obligation or an amount different than the then current market value of the reference obligation.

Risks Associated with Emerging Market Investments

Emerging Market Risk Emerging Markets investments may be more volatile and less liquid than investments in developed markets and the investments of the Sub-Funds in such markets may be considered speculative and subject to significant delays in settlement. In addition, there may be a higher than usual risk of exchange rate, political, economic, social and religious instability and of adverse changes in government regulations. Some of these markets may not be subject to accounting, auditing and financial reporting standards and practices comparable to those of more developed countries and the securities markets of such markets may be subject to unexpected closure. In addition, there may be less government supervision, legal regulation and less well defined tax laws and procedures than in countries with more developed securities markets.

Investment in China Risk To the extent that a Sub-Fund invests in securities issued in Mainland China, it will be subject to risks inherent in the Chinese market as described in more detail below.

Chinese political and social risks:

Any political changes, social instability and adverse diplomatic developments which may take place in or in relation to China could result in the imposition of additional governmental restrictions including expropriation of assets, confiscatory taxes or nationalisation of some or all of the Sub-Fund assets. Investors should also note that any change in the policies of the government and relevant authorities of China may adversely impact the securities markets in China as well as the performance of the Sub-Fund.

Chinese economic risks:

The economy in China has experienced significant and rapid growth in the past twenty years. However, such growth may or may not continue, and may not apply evenly across different geographic locations and sectors of the Chinese economy. Economic growth has also been accompanied by periods of high inflation. The Chinese government has implemented various measures from time to time to control inflation and restrain the rate of economic growth. Furthermore, the government has carried out economic reforms to achieve decentralisation and utilisation of market forces to develop the economy of China. These reforms have resulted in significant economic growth and social progress. There can, however, be no assurance that the government will continue to pursue such economic policies or, if it does, that those policies will continue to be successful. Any such adjustment and modification of those policies may have an adverse impact on the Chinese markets and therefore on the performance of the Sub-Fund.

Chinese legal system risks:

The Chinese legal system is based on written laws and regulations. However, because many of these laws and regulations, especially those that affect the securities market, are relatively new and evolving, the enforceability of such laws and regulations is uncertain. Such regulations also empower the CSRC and the SAFE to exercise discretion in their respective interpretation of the regulations, which may result in increased uncertainties in their application. In addition, as the legal system develops, there can be no assurance that changes in such laws and regulations, their interpretation or their enforcement will not have a material adverse effect on the business operations of Chinese companies which may impact the value of investments held by the Sub-Fund.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

Investment in
China Risk
(cont.)

Risk of government control of currency conversion and future movements in exchange rates:

The conversion of onshore RMB in China into another a currency is subject to SAFE approvals and the conversion rate is based on a managed floating exchange rate system which allows the value of onshore RMB to fluctuate within a regulated band based on market supply and demand and by reference to a basket of currencies. There can be no assurance that the onshore RMB exchange rate will not fluctuate widely against the US dollar or any other foreign currency in the future.

Chinese accounting and reporting standards risks:

Chinese companies which may issue securities to be invested by the Sub-Fund are required to follow Chinese accounting, audit and reporting standards and practices. These may be less rigorous than international equivalents, and there may be significant differences between financial statements prepared in accordance with Chinese standards and those prepared in accordance with international accounting standards. For example, there are differences in the valuation methods of properties and assets and in the requirements for disclosure of information to investors.

Chinese financial markets risks:

Investors should note that the financial markets in China are at a developing stage and trading volumes may be lower than those in more developed financial markets. Market volatility and potential lack of liquidity due to low trading volumes may result in prices of securities fluctuating significantly, which could result in substantial volatility in the Net Asset Value of the Sub-Fund. The regulatory and legal framework for capital markets and securities in China is still developing when compared with those of developed countries.

Risks linked to intervention of the government in financial markets:

The Chinese government and regulators may intervene in the financial markets in China, such as by imposing trading restrictions, a ban on 'naked' short selling or suspending short selling for certain securities. This intervention may affect the activities of the Sub-Fund, and may have an unpredictable impact on the Sub-Fund. Furthermore, this intervention may have a negative impact on overall market sentiment, which may in turn affect the performance of the Sub-Fund.

Chinese brokerage risks:

The execution and settlement of transactions or the transfer of any funds or securities in China may be conducted by brokers ('PRC Brokers') appointed by the Investment Manager. There is a risk that the Sub-Fund may suffer losses, whether direct or indirect, from the default or bankruptcy of a PRC Broker or disqualification of the same from acting as a broker. This may adversely affect the Sub-Fund in the execution or settlement of any transaction or in the transfer of any funds or securities. Reasonably competitive commission rates and prices of securities will generally be sought to execute the relevant transactions in Chinese markets. It is possible that, in circumstances where only a single PRC Broker is appointed, where it is considered appropriate to do so by the Investment Manager, the Sub-Fund may not necessarily pay the lowest commission or spread available, but the transaction execution will be consistent with best execution standards and in the best interest of the Shareholders. Notwithstanding the foregoing, the Investment Manager will seek to obtain the best net results for the Sub-Fund, taking into account such factors as prevailing market conditions, price (including the applicable brokerage commission or dealer spread), size of order, difficulties of execution and operational facilities of the PRC Broker involved and the PRC Broker's ability to position efficiently the relevant block of securities.

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continued

Investment in
China Risk
(cont.)

In its selection of PRC Brokers, the Investment Manager will have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. If the Investment Manager considers it appropriate, it is possible that a single PRC Broker will be appointed and the RQFII Sub-Fund may not necessarily pay the lowest commission available in the market.

Risks linked with dealing in securities in China:

Investments in China are currently subject to certain additional risks, particularly regarding the ability to deal in securities in Mainland China. Dealing in certain Chinese securities is restricted to licensed investors and the ability of the investor to repatriate its capital invested in those securities may be limited at times. Due to issues relating to liquidity and repatriation of capital, the Investment Manager may determine from time to time that making direct investments in certain securities may not be appropriate for the relevant Sub-Fund. As a result, the Investment Manager may choose to gain exposure to Chinese securities indirectly (for example, by way of derivatives or promissory notes which qualify as transferable securities) and may be unable to gain full exposure to the Chinese markets.

Risks linked to debt securities issued by Chinese companies on offshore markets:

For Sub-Funds which are permitted to invest in debt securities issued by Chinese companies on offshore markets, investors should be aware that certain structures are typically put in place to enable such transactions. Usually the Chinese company ('sponsor company') will raise debt capital by creating a special purpose offshore debt fund ('OSDF') which issues debt securities to foreign investors. The OSDF then uses the proceeds of such debt issuance to participate in the capital of the sponsor company through the subscription of equity securities. The OSDF usually has no direct security over the underlying assets of the sponsor company and the OSDF is therefore likely to suffer losses in the event of a failure of the sponsor company. Furthermore, the sponsor company can only transfer money to the OSDF in the form of after-tax dividends and only with the approval of the relevant Chinese regulatory authorities. Dividends can only be paid when the sponsor company is making a profit. In order to meet the obligations arising upon the debt issue maturing the OSDF may need to seek further injections of capital by way of issuing new debt.

Risk of cash holdings and indirect investments impacting investment performance:

Due to the operational requirements of the RQFII regime, and in order to manage subscriptions, conversions and redemptions in the Sub-Fund, the Investment Manager may (i) hold higher levels of cash in the Sub-Fund; and/or (ii) hold investments that provide indirect exposure to securities issued in China. These two methods may negatively impact the Sub-Fund's investment performance.

Other applicable risks:

Investors should also note the following risk factors, which may be applicable to the Sub-Fund, each of which is described in more detail in this section: China A Shares Risk, China Bond Market Liquidity Risk, China Credit Rating Risk, China Interbank Bond Market Risk, China Tax Risk, Renminbi Currency Risk and RQFII Risk.

China A Shares Risk

Risk of volatility:

The existence of a liquid trading market for China A Shares may depend on whether there is supply of, and demand for, China A Shares. The price at which securities may be purchased or sold by the Sub-Fund and the Net Asset Value of the Sub-Fund may be adversely affected if trading markets for China A Shares are limited or absent. The China A Share market may be more volatile and unstable (for example, due to the risk of suspension of a particular stock or government intervention). Market volatility and settlement difficulties in the China A Share markets may also result in significant fluctuations in the prices of the securities traded on such markets and thereby may affect the value of the Sub-Fund.

Risk of trading limitations:

Securities exchanges in China typically have the right to suspend or limit trading in any security traded on the relevant exchange. In particular, trading band limits are imposed by the stock exchanges on China A Shares, where trading in any China A Share security on the relevant stock exchange may be suspended if the trading price of the security has increased or decreased to the extent beyond the trading band limit. A suspension will render it impossible for the Investment Manager to liquidate positions and could thereby expose the Sub-Fund to significant losses.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

China A Shares Risk (cont.)	<p>Further, when the suspension is subsequently lifted, it may not be possible for the Investment Manager to liquidate positions at a favourable price, which could thereby expose the Sub-Fund to significant losses.</p> <p>China A Shares may only be bought from, or sold to, the Sub-Fund from time to time where the relevant China A Shares may be sold or purchased on the Shanghai Stock Exchange or the Shenzhen Stock Exchange, as appropriate.</p> <p>Given that the China A Share market is considered volatile and unstable (with the risk of suspension of a particular stock or government intervention), the subscription and redemption of Shares may also be disrupted.</p>
China Bond Market Liquidity Risk	<p>China's bond market is still in a stage of development and the bid and offer spread of fixed income securities may be high. The Sub-Fund may therefore incur significant trading costs and may even suffer losses when selling such investments. In the absence of a regular and active secondary market, the Sub-Fund may not be able to sell its bond holdings at prices the Investment Manager considers advantageous and may need to hold the bonds until their maturity date. If sizeable redemption requests are received, the Sub-Fund may need to liquidate its listed bonds at a discount in order to satisfy such requests and the Sub-Fund may suffer losses.</p>
China Credit Rating Risk	<p>Some of the debt securities held by the Sub-Fund may have been assigned a credit rating by a local Chinese credit rating agency. The rating criteria and methodology used by these agencies may be different from those adopted by most of the established international credit rating agencies (e.g. S&P, Moody's or Fitch). Therefore, the rating systems of these agencies may not provide an equivalent standard for comparison with securities rated by international credit rating agencies.</p> <p>In selecting the Sub-Fund's debt securities, the Investment Manager may refer to credit ratings assigned by local Chinese credit rating agencies but will primarily rely on its own internal analysis to evaluate each debt security independently.</p> <p>Investors who base their decision to investment in a Sub-Fund on credit ratings should pay special attention to the above risk warning.</p>
China Interbank Bond Market Risk	<p>The China Interbank Bond Market ('CIBM') is an OTC market outside the two main stock exchanges in China. On the CIBM, institutional investors trade sovereign, government and corporate bonds on a one-to-one quote-driven basis. The CIBM accounts for more than 95% of outstanding bond values of total trading volume in China.</p> <p>The main debt instruments traded on the CIBM include government bonds, bond repo, bond lending, People's Bank of China ('PBOC') bills, and other financial debt instruments.</p> <p>The CIBM is regulated and supervised by the PBOC. The PBOC is responsible inter alia for establishing listing, trading, functioning rules applying to the CIBM and supervising the market operators of the CIBM.</p> <p>The CIBM facilitates two trading models: (i) bilateral negotiation; and (ii) click-and-deal.</p> <p>Under the China Foreign Exchange Trading System' system, which is the unified trading platform for the CIBM, negotiation is applied to all inter-bank products while one-click trading is only applied to cash-bonds and interest rate derivatives.</p>

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continued

China Interbank
Bond Market Risk
(cont.)

The market-maker mechanism, whereby an entity ensures bilateral quotations for bonds, was officially introduced in 2001 to improve market liquidity and enhance efficiency. Deals through market making can enjoy benefits such as lower trading and settlement costs.

Bond transactions must be conducted by way of bilateral trading through independent negotiations and be concluded on a transaction by transaction basis. Bid and ask prices for primary bond transactions and repurchase interest rates must be determined independently by the parties to the transaction.

Both parties to a transaction shall typically, in accordance with the contract, promptly send instructions for delivery of bonds and funds, and shall have sufficient bonds and funds for delivery on the agreed delivery date.

The CSDCC will deliver bonds on time according to the instructions matching with elements sent by both parties to a transaction. Fund clearing banks will handle the appropriation and transfer of bond transaction funds on behalf of participants in a timely manner.

Investors should be aware that trading on the CIBM exposes the Sub-Fund to increased counterparty and liquidity risks.

Settlement risk:

There are various transaction settlement methods in the CIBM, such as the delivery of security by the counterparty after receipt of payment by the Sub-Fund, payment by the Sub-Fund after delivery of the relevant security by the counterparty or simultaneous delivery of security and payment by each party. Although the Investment Manager may be able to negotiate terms which are favourable to the Sub-Fund (e.g. requiring simultaneous delivery of security and payment), there is no assurance that settlement risks can be eliminated. Where the counterparty does not perform its obligations under a transaction, the Sub-Fund will sustain losses.

The Sub-Fund may also invest in the Chinese bond market via the exchange market and all bond trades will be settled through the CSDCC. The CSDCC is China's only securities depository and clearing agency, registered with the State Administration for Industry and Commerce, and operates under the supervision of the relevant Chinese authorities. As at the date of the May 2017 Prospectus, although CSDCC has a registered share capital of RMB 600 million, and a total capital of RMB 1.2 billion, there is a risk that CSDCC may go into liquidation. The Shanghai Stock Exchange and Shenzhen Stock Exchange currently each hold 50% of the registered share capital of CSDCC, respectively.

CSDCC has established a designated escrow account to retain securities to be delivered to a receiving participant or funds payable to a delivering participant before settlement.

If a participant defaults in payment of any sum payable to the CSDCC, the CSDCC has the power to apply the funds available towards the satisfaction of any amount due to CSDCC either from (i) cash collateral provided by the defaulting participant; (ii) cash held in the joint guarantee fund contributed by the defaulting participant; or (iii) cash generated by the sale of securities. The defaulting party will be responsible for the expenses and any price differences resulting from the sale of the securities.

If a participant defaults in delivering securities, the CSDCC is entitled to delay the payment due to the delivering participant until the outstanding obligation is satisfied. In addition, the CSDCC may apply all or any securities (in lieu of the securities that are the subject of the delivery obligations) from the following sources to satisfy the obligations and liabilities of such participant to the CSDCC:

- (i) securities furnished by the defaulting party;
- (ii) securities purchased using the funds in the designated escrow account; or
- (iii) securities available to the CSDCC from other alternative sources.

Although it is the intention of CSDCC that it will deliver payment and securities to delivering participant and receiving participants, respectively, a delay may occur if either party fails to fulfil its payment or delivery obligation.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

China Tax Risk

In common with other Sub-Funds, income and gains derived from China may be subject to withholding tax and capital gains tax. The interpretation and applicability of existing Chinese tax laws may not be as consistent and transparent as those of more developed nations, and may vary from region to region. There is a possibility that the current tax laws, regulations, and practice in China may be changed with retrospective effect in the future. Moreover, there is no assurance that tax incentives currently offered to foreign companies, if any, will not be abolished and the existing tax laws and regulations will not be revised or amended in the future. Any of these changes may reduce the income from, and/or value of, the Sub-Fund's investments. The Chinese government has implemented a number of tax reform policies in recent years. The current tax laws and regulations may be revised or amended in the future. Any revision or amendment in tax laws and regulations may affect the after-tax profit of Chinese companies and foreign investors in such companies, such as the Sub-Fund. There can be no guarantee that new tax laws, regulations, and practice in China that may be promulgated in the future will not adversely impact the tax exposure of the Sub-Fund and/or its Shareholders.

The Fund considers that the Sub-Fund should be regarded as a Luxembourg tax resident and should be able to enjoy a tax exemption on capital gains under the Luxembourg-China double tax treaty.

As at the date of the Prospectus, the Chinese tax authorities have issued two tax circulars clarifying, amongst other things, the tax treatment in relation to Stock Connect and RQFII:

Stock Connect

The Chinese tax authorities have clarified that:

- an exemption from business tax and income tax on capital gains applies to trading on Stock Connect (this is stated to be a temporary exemption, but no expiry date is provided);
- normal Chinese stamp duty is payable; and
- a 10% dividend withholding tax will be applied.

RQFII

The Chinese tax authorities have clarified, in relation to RQFII, that a corresponding exemption from business tax and income tax on capital gains in relation to equity securities and other equity investments applies, effective from 17 November 2014. Further, it is anticipated that normal Chinese stamp duty will be payable and dividend withholding taxes may be applied.

In light of the legal and regulatory uncertainties in China, the Fund reserves the right to make any provision for taxes or to deduct or to withhold an amount on account of taxes (which may be payable by the Sub-Fund to the Chinese tax authorities in respect of its investments in China) from assets of the Sub-Fund. The amount of provision (if any) will be disclosed in the financial statements of the Fund. In this regard, the Fund has, as at the date of the Prospectus, determined that no tax provision will be made on the capital gains derived from PRC investments. Any provision for taxes made by the Fund may be more or less than the Sub-Fund's actual Chinese tax liabilities. If the Sub-Fund does not set aside enough to meet these tax obligations, then the shortfall may be debited from the Sub-Fund's assets to meet its actual Chinese tax liabilities. As a result, the income from, and/or the performance of the Sub-Fund may be reduced/adversely affected and the impact/degree of impact on the individual Shareholders may vary, depending on factors such as the level of the Sub-Fund's provision for taxes and the amount of the shortfall at the relevant time and when the relevant Shareholders subscribed for and/or redeemed their Shares in the Sub-Fund.

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continuedCIBM Direct
Access Risk*Risks in relation to RMB Fixed Income Securities using the CIBM Direct Access*

The CIBM Direct Access is the PRC investment program revised in 2016 under which certain foreign institutional investors such as the Fund and its Sub-Funds may invest, without particular license or quota, directly in RMB Fixed Income Securities dealt on the CIBM via an onshore bond settlement agent (the '**Bond Settlement Agent**'), which will have the responsibility for making the relevant filings and account opening with the relevant PRC authorities in particular the PBOC.

CIBM Direct Access rules and regulations

Participation in the CIBM Direct Access by foreign institutional investors (such as the Fund) is governed by rules and regulations as promulgated by the Mainland Chinese authorities, i.e. the PBOC and SAFE. Such rules and regulations may be amended from time to time (with retrospective effect) and include (but are not limited to):

- i. the 'Announcement (2016) No 3' issued by the PBOC on 24 February 2016;
- ii. the 'Implementation Rules for Filing by Foreign Institutional Investors for Investment in Interbank Bond Markets' issued by the Shanghai Head Office of PBOC on 27 May 2016;
- iii. the 'Circular concerning the Foreign Institutional Investors' Investment in Interbank bond market in relation to foreign currency control' issued by SAFE on 27 May 2016; and
- iv. any other applicable regulations promulgated by the relevant authorities.

The CIBM Direct Access rules and regulations are relatively new. The application and interpretation of such investment regulations are therefore relatively untested and there is no certainty as to how they will be applied as the PRC authorities and regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. In addition, there can be no assurance that the CIBM Direct Access rules and regulations will not be abolished in the future. A Sub-Fund(s), which invests in the PRC markets through the CIBM Direct Access, may be adversely affected as a result of any such changes or abolition.

Restrictions to Remittances and Repatriations Risk

Foreign investors (such as the Fund) may remit investment principal in RMB or foreign currency into the PRC for investing in the CIBM under the CIBM Direct Access. A Sub-Fund using the CIBM Direct Access will need to remit investment principal matching at least 50% of its anticipated investment size within nine (9) months after filing with the PBOC, or else an updated filing will need to be made through the onshore Bond Settlement Agent.

Where a Sub-Fund repatriates funds out of the PRC, the ratio of RMB to foreign currency ('**Currency Ratio**') should generally match the original Currency Ratio when the investment principal was remitted into PRC, with a maximum permissible deviation of 10%. However, to the extent an outward repatriation is in the same currency as the inward remittance the Currency Ratio restriction will not apply.

Certain restrictions may be imposed by the PRC authorities on investors participating in the CIBM Direct Access and/or the Bond Settlement Agent which may have an adverse effect on the Sub-Fund's liquidity and performance. Repatriations conducted in RMB are currently permitted daily and are not subject to repatriation restrictions (such as lock-up periods) or prior approval, although authenticity and compliance reviews will be conducted, and reports on remittances and repatriations will be submitted to the relevant PRC authorities by the Bond Settlement Agent. There is no assurance, however, that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Furthermore, as the Bond Settlement Agent's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the Bond Settlement Agent in case of non-compliance with the CIBM Direct Access rules and regulations. Any restrictions imposed in the future by the PRC authorities, or rejection or delay by the Bond Settlement Agent, on repatriation of the invested capital and net profits may impact on the Sub-Fund's ability to meet redemption requests from the shareholders. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the Investment Manager's control.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

CIBM Direct
Access Risk (cont.)

In order to participate in the CIBM Direct Access, the Investment Manager filed an application through the Bond Settlement Agent to the PBOC, specifying among other things the anticipated volume of investment to be made through the CIBM Direct Access. In the event the anticipated volume of investment is reached, a further filing for an increase will need to be made through the Bond Settlement Agent with the PBOC. There can be no assurance that such increase will be accepted by the PBOC which may result in a need to close any Sub-Fund investing through the CIBM Direct Access to further subscriptions.

Securities and cash accounts

Onshore PRC securities are registered in the name of 'the full name of the investment manager – the name of the Sub-Fund' in accordance with the relevant rules and regulations, and maintained by the Bond Settlement Agent in electronic form via a securities account with the China Central Depository & Clearing Co (CCDC)/Shanghai Clearing House (SCH) and onshore cash will be maintained on a cash account with the Bond Settlement Agent.

A separate filing per Sub-Fund wishing to invest through the CIBM Direct Access will be made to the PBOC to allow the individual beneficial ownership of a Sub-Fund to be identified. Beneficial ownership of RMB securities acquired through CIBM Direct Access has been acknowledged in the FAQ published by the PBOC on 30 May 2016, and by the PRC authorities in the context of RQFII and Stock Connect in the past in relation to other products. Beneficial ownership is however an untested concept in the PRC.

Investors should note that cash deposited in the cash account of the Sub-Fund with the Bond Settlement Agent will not be segregated but will be a debt owing from the Bond Settlement Agent to the Sub-Fund as a depositor. Such cash will be co-mingled with cash belonging to other clients of the Bond Settlement Agent. In the event of bankruptcy or liquidation of the Bond Settlement Agent, the Sub-Fund will not have any proprietary rights to the cash deposited in such cash account, and the Sub-Fund will become an unsecured creditor, ranking *pari passu* with all other unsecured creditors, of the Bond Settlement Agent. The Sub-Fund may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the Sub-Fund will suffer losses.

Bond Settlement Agent Risk

There is a risk that the Sub-Fund may suffer losses, whether direct or consequential, from: (i) the acts or omissions in the settlement of any transaction or in the transfer of funds or securities by the Bond Settlement Agent; or (ii) the default or bankruptcy of the Bond Settlement Agent; or (iii) the disqualification of the Bond Settlement Agent from acting in such capacity either on a temporary or permanent basis. Such acts, omissions, default or disqualification may also adversely affect a Sub-Fund in implementing its investment strategy or disrupt the operations of a Sub-Fund, including causing delays in the settlement of any transaction or the transfer of any funds or securities in the PRC or in recovering assets, which may in turn adversely impact the net asset value of a Sub-Fund.

In addition, the PBOC is vested with the power to impose regulatory sanctions if the Bond Settlement Agent violates any provision of the CIBM Direct Access rules. Such sanctions may adversely impact on the investment by the Fund through the CIBM Direct Access.

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continued

Renminbi Currency Risk The Renminbi is not a freely convertible currency and is subject to foreign exchange control policies of and repatriation restrictions imposed by the Chinese government. Exchange control regulations or any changes thereto may cause difficulties in the repatriation of funds, and the performance of the Sub-Fund's investments, in particular, may be affected. Renminbi convertibility is subject to foreign exchange control policies of and repatriation restrictions. Converting foreign currencies into Renminbi is carried out on the basis of the rate applicable to offshore Renminbi ('CNH'). The daily trading price of CNH against other major currencies in the inter-bank foreign exchange market is floating in a band around the central parity published by the People's Bank of China ('PBC'). The value of the CNH may differ, perhaps significantly, from the value of onshore RMB ('CNY') due to a number of factors including without limitation those foreign exchange control policies and repatriation restrictions applied by the Chinese government from time -to -time as well as other external factors and market forces.

The CNH market is in early development and there may be periods in which it is difficult for market participants to obtain or dispose of CNH. Furthermore, government or regulatory intervention in the CNH market may impact the availability and/or convertibility of CNH. In such situations, the exchange rate may fluctuate substantially and it may not be possible to obtain an exchange rate through any customary channel.

RQFII Risk Certain Sub-Funds (the 'RQFII Sub-Funds') may invest in securities issued in Mainland China in accordance with their investment objective and policies. Other than risks involved in investments made on a worldwide basis and in emerging markets, as well as other risks of investments generally as described elsewhere in Appendix 2 of the Prospectus which are applicable to investments in China, investors in the RQFII Sub-Funds should note the additional specific risks below.

Concentration risk:

Some of the RQFII Sub-Funds (in particular the All China Equity Fund, the Onshore Renminbi Bond Fund and the All China Bond Fund, as at the date of the Prospectus) might be concentrated in securities issued by companies either incorporated in Mainland China, or which derive most of their revenue from Mainland China or which have substantial exposure to Mainland China. As such, the performance of the RQFII Sub-Funds may be subject to price volatility, and more susceptible to the effects of any single economic, market, political or regulatory occurrence.

Depositary risk for investment in China:

The Investment Manager (in its capacity as an RQFII) and the Depositary have appointed HSBC China (the 'RQFII Local Custodian') as custodian to maintain the RQFII Sub-Funds' assets in custody in China, pursuant to relevant laws and regulations. Chinese securities are registered in accordance with these rules and regulations, and maintained by the RQFII Local Custodian in electronic form via a securities account with the CSDCC and cash shall be maintained in a cash account with the RQFII Local Custodian. The Depositary will make arrangements to ensure that the RQFII Local Custodian has appropriate procedures in place to properly safe-keep the RQFII Sub-Fund's assets including maintaining records that clearly show that such RQFII Sub-Fund's assets are recorded in the name of that RQFII Sub-Fund and segregated from the other assets of the RQFII Local Custodian.

Investors should note that cash deposited in the cash account of a RQFII Sub-Fund with the RQFII Local Custodian will not be segregated but will be a debt owing from the RQFII Local Custodian to that RQFII Sub-Fund as a depositor. Such cash will be co-mingled with cash that belongs to other clients or creditors of the RQFII Local Custodian. In the event of bankruptcy or liquidation of the RQFII Local Custodian, a RQFII Sub-Fund will not have any proprietary rights to the cash deposited in such cash account, and that RQFII Sub-Fund will become an unsecured creditor, ranking pari passu with all other unsecured creditors, of the RQFII Local Custodian. The RQFII Sub-Fund may face difficulty and/or encounter delays in recovering such debt, or may not be able to recover it in full or at all, in which case the RQFII Sub-Fund will suffer losses.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

RQFII Risk (cont.)

RQFII regime risk:

Under current Chinese laws and regulations, the RQFII Sub-Fund's investments in the Chinese securities can only be made by or through an RQFII, within certain investment quota as approved under and subject to applicable Chinese regulatory requirements. The RQFII regime is governed by rules and regulations as promulgated by the Mainland Chinese authorities.

Neither the Fund nor the RQFII Sub-Funds are themselves RQFIIs, but they may obtain access to the Chinese domestic securities market using the Investment Manager's RQFII quota. The Board of Directors may decide to close an RQFII Sub-Fund to further subscriptions without any prior or further notice if the total subscription amount reaches the relevant RQFII quota made available for that Sub-Fund by the Investment Manager.

Investors should note that RQFII status could be suspended or revoked at any time, which may have an adverse effect on an RQFII Sub-Fund's performance as the Sub-Fund may be required to dispose of its securities holdings over a short period. In addition, certain restrictions imposed by the Chinese government on RQFIIs may have an adverse effect on an RQFII Sub-Fund's liquidity and performance.

SAFE regulates and monitors the repatriation of funds out of China by an RQFII. Repatriations by RQFIIs in respect of an open-ended fund (such as the RQFII Sub-Funds) conducted in Renminbi are currently not subject to repatriation restrictions or prior approval, although authenticity and compliance reviews will be conducted, and monthly reports on remittances and repatriations will be submitted to SAFE by the RQFII Local Custodian. There is no assurance, however, that the Chinese rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Any restrictions on repatriation of the invested capital and net profits may impact on an RQFII Sub-Fund's ability to meet redemption requests from Shareholders. Furthermore, as the RQFII Local Custodian's review on authenticity and compliance is conducted on each repatriation, the repatriation may be delayed or even rejected by the RQFII Local Custodian in case of non-compliance with the RQFII rules and regulations. In such case, it is expected that redemption proceeds will be paid to the redeeming Shareholder as soon as practicable and after the completion of the repatriation of funds concerned. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the Investment Manager's control.

RQFII quotas are generally granted to an RQFII. The rules and restrictions under the RQFII regulations generally apply to the RQFII as a whole and not simply to the investments made by an RQFII Sub-Fund. It is provided in the RQFII Measures that the size of the quota may be reduced or cancelled by the SAFE if the RQFII is unable to use its RQFII quota effectively within one year following the quota being granted. If the SAFE reduces the RQFII's quota, it may affect the Investment Manager's ability to effectively pursue the investment strategy of an RQFII Sub-Fund. The SAFE may impose regulatory sanctions if the RQFII or the RQFII Local Custodian violates any provision of the RQFII Measures. Any violations could result in the revocation of the RQFII's quota or other regulatory sanctions and may adversely impact on the portion of the RQFII's quota made available for investment by an RQFII Sub-Fund.

Investors should note that there can be no assurance that an RQFII will continue to maintain its RQFII status or to make available its RQFII quota, or that an RQFII Sub-Fund will be allocated a sufficient portion of RQFII quota from a RQFII to meet all applications for subscription into an

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continued

RQFII Risk (cont.) RQFII Sub-Fund, or that redemption requests can be processed in a timely manner due to repatriation restrictions or adverse changes in relevant laws or regulations. Such factors may restrict the ability to process subscriptions and/or redemptions in a timely manner. In extreme circumstances, an RQFII Sub-Fund may incur significant losses due to insufficiency of RQFII quota, limited investment capabilities, or inability to fully implement or pursue its investment objective or strategy due to RQFII investment restrictions, illiquidity of the Chinese domestic securities market, and/or delay or disruption in execution of trades or in settlement of trades.

The current RQFII regulations are subject to change, which may take retrospective effect. In addition, there can be no assurance that the RQFII regulations will not be abolished. An RQFII Sub-Fund, which invests in the Chinese domestic securities markets, may be adversely affected as a result of such changes.

Stock Connect Risk *Sub-Funds investing in RMB Securities through the Stock Connect Regime*
 Stock Connect is the mutual market access programme through which foreign investors can deal in selected securities listed on a PRC stock exchange through the Hong Kong Stock Exchange (SEHK) and the clearing house in Hong Kong, i.e. the Hong Kong Securities and Clearing Company (HKSCC). The securities which can be accessed through the Stock Connect programme are, for the time being, all constituent stocks of the SSE 180 Index, the SSE 380 Index and all SSE-listed China A Shares, as well as certain other securities, and it is anticipated that selected securities listed on the Shenzhen Stock Exchange (SZSE) including any constituent stock of the SZSE Component Index and SZSE Small/Mid Cap Innovation Index which has a market capitalisation of RMB6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and H Shares will be included in the programme on or around the end of the year 2016 (the 'Stock Connect Shares'). At the initial stage of the Northbound Shenzhen Trading Link, investors eligible to trade shares that are listed on the ChiNext Board of SZSE may be limited. It is expected that the list of eligible securities which may be accessed through the Stock Connect programme will develop over time. In addition to the Stock Connect Shares described in this paragraph, a Sub-Fund may, subject to its investment policy, invest in any other security listed on the SSE or SZSE which is made available in the future through the Stock Connect Programme.

Risks linked with dealing in securities in China via Stock Connect:

To the extent that the Sub-Fund's investments in China are dealt via Stock Connect, such dealing may be subject to additional risk factors. In particular, Shareholders should note that Stock Connect is a new trading programme. The relevant regulations are untested and subject to change. Stock Connect is subject to quota limitations which may restrict the Sub-Fund's ability to deal via Stock Connect on a timely basis. This may impact the Sub-Fund's ability to implement its investment strategy effectively. Shareholders should note further that under the relevant regulations a security may be recalled from the scope of Stock Connect. This may adversely affect the Sub-Fund's ability to meet its investment objective, e.g. when the Investment Manager wishes to purchase a security which is recalled from the scope of Stock Connect.

Beneficial owner of the SSE Shares

Stock Connect comprises the Northbound link, through which Hong Kong and overseas investors like the Fund may purchase and hold Stock Connect Shares and the Southbound link, through which investors in Mainland China may purchase and hold shares listed on the SEHK. The Fund trades Stock Connect Shares through a broker affiliated to the Fund sub-custodian who is SEHK exchange participant. These Stock Connect Shares will be held following settlement by brokers or custodians as clearing participants in accounts in the Hong Kong Central Clearing and Settlement System ('CCASS') maintained by the Hong Kong Securities and Clearing Corporation Limited ('HKSCC') as central securities depository in Hong Kong and nominee holder. HKSCC in turn holds these Stock Connect Shares of all its participants through a 'single nominee omnibus securities account' in its name registered with ChinaClear, the central securities depository in Mainland China.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

Stock Connect Risk
(cont.)

Because HKSCC is only a nominee holder and not the beneficial owner of these Stock Connect Shares, in the unlikely event that HKSCC becomes subject to winding up proceedings in Hong Kong, investors should note that these Stock Connect Shares will not be regarded as part of the general assets of HKSCC available for distribution to creditors even under Mainland China law. However, HKSCC will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in these Shares in Mainland China. Foreign Investors like the concerned Sub-Funds of the Fund investing through the Stock Connect holding the Stock Connect Shares through HKSCC are the beneficial owners of the assets and are therefore eligible to exercise their rights through the nominee only.

Not protected by Investor Compensation Fund

Investors should note that any Northbound or Southbound trading under Stock Connect will not be covered by Hong Kong's Investor Compensation Fund nor the China Securities Investor Protection Fund and thus investors will not benefit from compensation under such schemes.

Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

Quotas used up

Dealing on Stock Connect is subject to daily quota limitations. Once the daily quota is used up, acceptance of the corresponding buy orders will also be immediately suspended and no further buy orders will be accepted for the remainder of the day. Buy orders which have been accepted will not be affected by the using up of the daily quota, while sell orders will be continued to be accepted. Therefore, quota limitations may restrict the relevant Fund's ability to invest in Stock Connect Shares on a timely basis, and the relevant Fund may not be able to effectively pursue its investment strategy.

Difference in trading day and trading hours

Due to differences in public holiday between Hong Kong and Mainland China or other reasons such as bad weather conditions, there may be a difference in trading days and trading hours in the markets accessible through Stock Connect. Stock Connect will only operate on days when both markets are open for trading and when banks in those markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for the Mainland China market but it is not possible to carry out any Stock Connect Shares trading in Hong Kong. The investment manager should take note of the days and the hours during which Stock Connect is open for business and decide according to its own risk tolerance capability whether or not to take on the risk of price fluctuations in Stock Connect Shares during the time when Stock Connect is not trading.

The recalling of eligible stocks and trading restrictions

A stock may be recalled from the scope of eligible stocks for trading via Stock Connect for various reasons, and in such event the stock can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the Investment Manager. The Investment Manager should therefore pay close attention to the list of eligible stocks as provided and renewed from time to time by the PRC and Hong Kong authorities.

Part B – Specific Risks continued**Risks Associated with Emerging Market Investments** continued

Stock Connect Risk
(cont.)

Under Stock Connect, the Investment Manager will only be allowed to sell Stock Connect Shares but restricted from further buying if: (i) the Stock Connect Share subsequently ceases to be a constituent stock of the relevant indices; (ii) the Stock Connect Share is subsequently under ‘risk alert’; and/or (iii) the corresponding H share of the Stock Connect Share subsequently ceases to be traded on SEHK. The Investment Manager should also note that price fluctuation limits would be applicable to Stock Connect Shares.

Trading costs

In addition to paying trading fees and stamp duties in connection with Stock Connect Shares trading, the Sub-Funds carrying out trading via Stock Connect should also take note of any new portfolio fees, dividend tax and tax concerned with income arising from stock transfers which would be determined by the relevant authorities.

Local market rules, foreign shareholding restrictions and disclosure obligations

Under Stock Connect, China A Shares listed companies and trading of China A Shares are subject to market rules and disclosure requirements of the China A Shares market. Any changes in laws, regulations and policies of the China A Shares market or rules in relation to Stock Connect may affect share prices. The Investment Manager should also take note of the foreign shareholding restrictions and disclosure obligations applicable to China A Shares.

The Investment Manager will be subject to restrictions on trading (including restriction on retention of proceeds) in China A Shares as a result of its interest in the China A Shares. The Investment Manager is solely responsible for compliance with all notifications, reports and relevant requirements in connection with its interests in China A Shares.

Under the current Mainland China rules, once an investor holds up to 5% of the shares of a company listed in Mainland China, the investor is required to disclose his interest within three working days and during which he cannot trade the shares of that company. The investor is also required to disclose any change in his shareholding and comply with related trading restrictions in accordance with the Mainland China rules.

According to existing Mainland China practices, the Sub-Fund as beneficial owners of China A Shares traded via Stock Connect cannot appoint proxies to attend shareholders’ meetings on its behalf.

Currency risks

Northbound investments by the Sub-Fund in the Stock Connect Shares will be traded and settled in RMB. If the Sub-Fund holds a class of shares denominated in a local currency other than RMB, the Sub-Fund will be exposed to currency risk if the Sub-Fund invests in a RMB product due to the need for the conversion of the local currency into RMB. During the conversion, the Sub-Fund will also incur currency conversion costs. Even if the price of the RMB asset remains the same when the Sub-Fund purchases it and when the Sub-Fund redeems / sells it, the Sub-Fund will still incur a loss when it converts the redemption / sale proceeds into local currency if RMB has depreciated.

The above may not cover all risks related to Stock Connect and any above mentioned laws, rules and regulations are subject to change.

Risk of ChinaClear default

ChinaClear has established a risk management framework and measures that are approved and supervised by the CSRC. Pursuant to the General Rules of CCASS, if China Clear (as the host central counterparty) defaults, HKSCC will, in good faith, seek recovery of the outstanding Stock Connect securities and monies from ChinaClear through available legal channels and through ChinaClear’s liquidation process, if applicable.

HKSCC will in turn distribute the Stock Connect Shares and/or monies recovered to clearing participants on a pro-rata basis as prescribed by the relevant Stock Connect authorities. Although the likelihood of a default by ChinaClear is considered to be remote, the Sub-Fund should be aware of this arrangement and of this potential exposure before engaging in Northbound Trading.

Risk considerations continued

Part B – Specific Risks continued

Risks Associated with Emerging Market Investments continued

Stock Connect Risk
(cont.)

Risk of HKSCC default

A failure or delay by the HKSCC in the performance of its obligations may result in a failure of settlement, or the loss, of Stock Connect securities and/or monies in connection with them and the Fund and its investors may suffer losses as a result. Neither the Fund nor the Investment Manager shall be responsible or liable for any such losses.

Ownership of Stock Connect securities

Stock Connect securities are uncertificated and are held by HKSCC for its account holders. Physical deposit and withdrawal of Stock Connect Shares are not available under the Northbound Trading for the Sub-Fund.

The Sub-Fund's title or interests in, and entitlements to Stock Connect Shares (whether legal, equitable or otherwise) will be subject to applicable requirements, including laws relating to any disclosure of interest requirement or foreign shareholding restriction. It is uncertain whether the Chinese courts would recognise the ownership interest of the investors to allow them standing to take legal action against the Chinese entities in case disputes arise. This is a complex area of law and the Client should seek independent professional advice.

*1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12 Investors should please note that the Sub-Fund's investment exposure to securities listed and bonds issued in Mainland China shall be limited to a maximum of 20% of its net assets. As at the date of this Prospectus, the Investment Manager does not currently intend the Sub-Fund's investment exposure to securities listed and bonds issued in Mainland China to exceed 10% of its net assets. If in the future the Investment Manager does intend the Sub-Fund's investment exposure to securities listed and bonds issued in Mainland China to exceed 10% of its net assets, investors will be given prior written notice of this and the Sub-Fund's Key Investor Information Documents will be updated. Furthermore the Prospectus will be updated as soon as reasonably practicable thereafter. Those Sub-Funds investing in debt securities issued in Mainland China may do so through the RQFII license and quotas of the Investment Manager and/or the CIBM Direct Access.

*11 Investors should note that the Sub-Fund's holdings in securities traded via Stock Connect shall be limited to a maximum of 10% of its net assets.

*13, 14, 15 The Sub-Fund's investments in debt securities issued in Mainland China may be through the RQFII license and quotas of the Investment Manager and/or the CIBM Direct Access.

Additional information for investors in the Federal Republic of Germany

J.P. Morgan AG, Junghofstraße 14, D-60311 Frankfurt am Main has undertaken the function of Paying and Information Agent for the Company in the Federal Republic of Germany (the 'German Paying and Information Agent').

Applications for the redemption and conversion of Shares may be sent to the German Paying and Information Agent.

All payments to investors, including redemption proceeds and potential distributions, may, upon request, be paid through the German Paying and Information Agent.

The Prospectus, the Key Investor Information Documents, the Articles of Incorporation of the Company and the annual and semi-annual reports may be obtained, free of charge, in hardcopy form at the office of the German Paying and Information Agent during normal opening hours. The statement of changes in the composition of the investment portfolio is also free of charge upon request at the office of the German Paying and Information Agent available.

Issue, redemption and conversion prices of the Shares, and any notices to the Shareholders, are also available, free of charge, from the German Paying and Information Agent.

The issue, redemption and conversion prices of the Shares will be published on the electronic platform www.fundinfo.com.

Any notices to the Shareholders will be sent by mail to the Shareholders in Germany.

Notice to investors in Switzerland

The Fund has appointed RBC Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch as Representative and Paying Agent of the Fund in Switzerland. Consequently the place of performance and place of jurisdiction for Shares tendered in or distributed from Switzerland has been established at the registered office of RBC Investor Services Bank S.A., Esch-sur-Alzette, Zurich Branch in Zurich. Investors in Switzerland may therefore place application and redemption orders and may re-ceive information on the Sub-Funds at the offices of:

RBC Investor Services Bank S.A., Esch-sur-Alzette
Zurich Branch
Badenerstrasse 567
P.O. Box 1292
CH-8048 Zürich
Switzerland

In addition, Swiss investors may obtain copies of the Prospectus, Key Investor Information Document, Articles of Incorporation, Report and Accounts and interim reports, list of purchases and sales, as well as other publications of the Fund, free of charge from the Swiss Representative and Paying Agent:

RBC Investor Services Bank S.A., Esch-sur-Alzette
Zurich Branch
Badenerstrasse 567
P.O. Box 1292
CH-8048 Zürich
Switzerland

All notices and information requiring publication in Switzerland will be published in the 'Swiss Official Gazette of Commerce' and on the electronic platform www.fundinfo.com. Any pending changes to the Prospectus may be listed on our website; see www.investecassetmanagement.com for further details.

FUND	LAUNCH DATE
Latin American Investment Grade Corporate Debt Fund	30 May 2017
Global Total Return Credit Fund	8 June 2017

The portfolio turnover ratios have been calculated for the year from 1 July 2016 to 30 June 2017 based on the following formula:

$$\frac{(\text{Purchases} - \text{Subscriptions}) + (\text{Sales} - \text{Redemptions})}{\text{Average Net Asset Value for the Year}} \times \frac{100}{1}$$

* For this Sub-Fund which launched during the year, the portfolio turnover is calculated from the launch date to 30 June 2017.

Report of the depositary

In our capacity as depositary, in our opinion, the Fund has been managed during the period in accordance with the provisions of the principal documents of the Fund and the protection of Investors as stated in the Luxembourg law and rules made thereunder.

State Street Bank Luxembourg S.C.A.
49, Avenue J.F. Kennedy
L-1855 Luxembourg
Grand Duchy of Luxembourg

24 August 2017

Other information

Class action

Class action against Volkswagen AG ('the Litigation').

The Litigation relates to the installation by Volkswagen AG of 'defeat software' in vehicles sold worldwide between 2009 and September 2015 ('the Emissions Scandal'). Proceedings (which include statutory and civil law claims) have been brought in the German Courts on behalf of shareholders who acquired Ordinary or Preference Volkswagen shares on any German stock exchange between 1 January 2009 and 18 September 2015 inclusive, and who had not sold all of those shares prior to 21 September 2015, relating to losses as a result of the Emissions Scandal ('the Class Action').

As a shareholder in Volkswagen AG during the relevant period, the Investec Global Strategy Fund, on behalf of the Global Equity Fund, Global Strategic Equity Fund and Global Strategic Managed Fund, is participating as a Claimant in the Class Action.

Remuneration Disclosure

The remuneration policy of the Management Company sets out the policies and practices that are consistent with and promote sound and effective risk management. It does not encourage risk-taking which is inconsistent with the risk profiles, rules or articles of incorporation of the Fund. The remuneration policy is in line with the business strategy, objectives, values and interests of the Management Company and the Fund and its Shareholders, and includes measures to avoid conflicts of interest. It includes a description as to how remuneration and benefits are calculated and identifies those individuals responsible for awarding remuneration and benefits. With regard to the internal organisation of the Management Company, the assessment of performance is set in a multi-year framework appropriate to the holding period recommended to the investors of the UCITS funds managed by the Management Company in order to ensure that the assessment process is based on longer-term performance of the Fund and its investment risks and that the actual payment of performance-based components of remuneration is spread over the same period. The remuneration policy includes fixed and variable components of salaries and discretionary pension benefits that are appropriately balanced and the fixed component represents a sufficiently high proportion of the total remuneration to allow the operation of a fully flexible policy on variable remuneration components, including the possibility to pay no variable remuneration component. The remuneration policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that falls within the remuneration bracket of senior management and risk takers in each case whose professional activities have a material impact on the risk profile of the Management Company. The details of the up-to-date remuneration policy, including but not limited to, a description of how remuneration and benefits are calculated, the identity of persons responsible for awarding the remuneration and benefits, including the composition of the remuneration committee where such a committee exists, are available at www.investecassetmanagement.com/remuneration and a paper copy will be made available free of charge upon request from the registered office of the Management Company.

The table below shows the total amount of remuneration paid by the Management Company to its staff for the financial year ending 31 March 2017, split into fixed and variable remuneration, and showing the number of beneficiaries. No performance fees or any other type of remuneration was paid directly by the Fund.

Total Remuneration	\$1,049,791
Fixed Remuneration	\$652,899
Variable Remuneration	\$396,892
Number of Beneficiaries	5

The table below shows, for the same period, the aggregate amount of remuneration paid to Identified/Code Staff in respect of activities related to the Management Company and the Fund. Identified/Code Staff are staff and other individuals identified by the Management Company whose activities have a material impact on the risk profile of the Management Company or the Fund. This table excludes Identified/Code Staff activities subject to a delegation agreement.

Aggregate Remuneration	\$5,133,910
Senior Management	\$4,860,956
Other individuals with material impact	\$272,954
