## INFORMATION ON THE INVESTMENTS AND MANAGEMENT

### Classification:

Equities from countries of the European Union.

At all times, the MF is 60% exposed to at least one or several equity market(s) issued in one or several country/countries of the European Union, possibly including the Euro area market.

The MF is index-based fund of the UCITS ETF type.

### Terms of determination and allocation of amounts available for distribution:

The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The generated net capital gains will be capitalised.

### Management objective:

The MF's management objective is to replicate the MSCI Europe Net Total Return index (the "Benchmark Indicator"), listed in euro (EUR), regardless of its evolution, while insofar as possible minimizing the tracking error between the MF's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

### Benchmark indicator:

The benchmark indicator is the MSCI Europe Net Total Return index (net dividends reinvested).

The Benchmark Indicator is an equity index calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator retains the basic features of the MSCI indices, i.e.:

- a) The universe of securities included in the Benchmark Indicator;
- b) Free-float adjustment of the securities included in the Benchmark Indicator;
- c) Industry classification according to the Global Industry Classification Standard (GICS).

The Benchmark Indicator includes only securities from European countries (presently the following ones: Germany, Austria, Belgium, Denmark, Spain, Finland, France, Greece, Ireland, Italy, Norway, the Netherlands, Portugal, the United Kingdom, Sweden and Switzerland) and has as its goal to include 85% of the float-adjusted stock market capitalisation of each European country and of each group of European industries.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalisation of the European markets, while also reflecting the market's economic diversity.

The MSCI methodology and its calculation method entail the Benchmark Indicator being made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator will be available on the Internet site: <http://www.msci.com>.

The monitored performance is that of the closing prices of the Benchmark Indicator.

**Investment strategy:****Strategy employed**

The MF will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the MF will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the MF's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the MF may notably be securities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the MF's portfolio and (ii) the market value of the future exchange operation entered into by the MF are available on the page dedicated to the MF on the Internet site [www.lyxoretf.com](http://www.lyxoretf.com). The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The MF will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion.

This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the MF can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

**Balance sheet assets (excluding integrated derivatives)**

The MF may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets) including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
  - o Subordination to the main market indices or to the Benchmark Indicator,
  - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
  - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
  - o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
  - o Geographical area,
  - o Sector.

The investment on undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets of the MF. As part of these investments, the MF can subscribe to units or equities of UCITS by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the MF receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title. As part of the future optimisation of the MF's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

**Off-balance sheet assets (derivative instruments)**

The MF will have recourse to index-linked swaps traded over-the-counter, exchanging the value of the MF's assets (or of any other financial instrument or asset held by the MF, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the MF management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the MF’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.

- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

### **Securities with integrated derivatives**

None.

### **Deposits**

Up to a maximum of 20% of its net assets, the MF may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

### **Cash borrowing**

Up to a maximum of 10% of its net assets, the MF may temporarily have recourse to borrowing.

### **Temporary securities acquisition and sale operations**

None.

The manager will not have recourse to temporary securities acquisition and/or sale operations.

### **Financial guarantees**

In all cases in which the MF is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the MF’s use of forward swap contracts traded over the counter, the MF can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the MF in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the MF is totally neutralized.

Any financial guarantee received by the MF will be provided to the MF in full ownership and listed in the MF’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the MF’s assets.

Any financial guarantee received by the MF within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the MF’s net asset value;
- (e) The MF’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF’s assets.

In compliance with the aforesaid conditions, the guarantees received by the MF can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

#### **Policy related to discounts**

The MF's management company will apply a margin to the financial guarantees received by the MF. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

#### **Reinvestment of received guarantees**

The financial guarantees received on another form than cash will not be sold, reinvested or pledged.

The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

#### **Risk profile:**

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the MF, the bearer is primarily exposed to the following risks:

##### **- Equity risk**

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

##### **- Capital loss risk**

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

##### **- Liquidity risk (primary market)**

Should the MF (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the MF could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of units.

**- Liquidity risk on a place of listing**

The MF's share price can deviate from its indicative net asset value. The liquidity of the MF's units on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the MF's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

**- Counterparty risk**

The MF is exposed to the risk of bankruptcy, payment default or any other type of default of every counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the MF's assets per counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The MF will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the MF's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the MF's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

**- Risk that the management objective may only be partially achieved**

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

**- Risk related to the use of derivative instruments**

In order to achieve its investment objective, the MF uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the MF's net asset value.

**- Risk related to a change of the tax regime**

Any change to the tax legislation in any of the countries in which the MF is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the MF's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

**- Risk related to a change of the tax regime affecting the underlyings**

Any change of the tax legislation applicable to the MF's underlyings can affect the MF's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the MF (and/or to its counterparty in the FFI), the MF's net asset value may be affected.

**- Risk related to regulations**

In case of change of the regulations in any country in which the MF is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the units may be affected.

**- Risk related to the regulations applicable to the underlyings**

In case of change of the regulations applicable to the MF's underlyings, the MF's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the units.

**- Risk related to events affecting the Benchmark Indicator**

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of MF units. The calculation of the MF's net asset value can also be affected.

If the event persists, the MF's manager will decide on measures having to be adopted, which can have an impact on the MF's net asset value. "Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by the supplier of the index,
- iii) The supplier of the index is incapable of providing the level or value of the Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the MF at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

#### **- Securities transaction risk**

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the MF (and/or in a valuation of the ST by the MF's counterparty in a future financial instrument), the MF's net asset value may be affected, notably should the actual treatment of the ST by the MF differ from the ST's treatment in the methodology used by the Benchmark Indicator.

#### **- Exchange risk linked to the Benchmark Indicator**

The MF is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the index. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the MF.

#### **- Exchange risk linked to the class of units USD (EUR/USD), GBP (EUR/GBP), CHF (EUR/CHF)**

The abovementioned class of units is exposed to an exchange risk to the extent that it is listed in a currency other than that of the Benchmark Indicator. The net asset value of the abovementioned class of units can therefore decrease due to fluctuating exchange rates even though the value of the Benchmark Indicator has increased.

#### **Legal risk**

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

#### **Subscribers concerned and typical investor profile:**

The MF is "open to any subscriber".

An investor subscribing to this MF wishes to obtain an exposure to the European equity markets.

The amount that it is reasonable to invest in this MF depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this MF's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

#### **Indications on the tax treatment:**

Investors should take note that the following information constitutes only a general summary of the tax regime applicable to an investment in a French MF, under the current French tax legislation. Investors are therefore requested to study their personal situations with their usual tax advisers.

#### **France:**

The MF is eligible for a Stock savings plan.

At all times, the MF complies with the asset constraints that allow it to be acquired as part of a Stock savings plan, i.e. holding more than 75% equities of companies that have their head office in a Member states of the European Union or in another State that is a party to the agreement on the European Economic Area and that has signed with France a tax convention that includes an administrative assistance clause for the purpose of combating fraud or tax evasion.

The MF can serve as the support for a life insurance contract listed in units of account.

### **On the level of the MF**

In France, the co-ownership status of MFs means that they are automatically exempt from corporate tax; by nature, they therefore benefit from a certain degree of transparency. As such, the incomes collected and generated by the MF through its management are not taxable at the level of the MF itself.

Abroad (in countries in which the MF is invested), capital gains on the sale of foreign transferable securities and foreign income received by the MF as part of its management may, if relevant, be subject to tax (generally in the form of a withholding tax). In certain limited cases, the foreign taxation can be reduced or cancelled in the presence of tax agreements that may be applicable.

### **On the level of the bearers of MF units**

#### **Bearers residing in France**

The sums distributed by the MF to French residents as well as the capital gains or losses on transferable securities are subject to the applicable taxation. Investors are invited to study their personal situations with their usual tax advisers.

#### **Bearers not residing in France**

Subject to any applicable tax agreements, the amounts distributed by the MF may, in certain circumstances, be subject to a levy or withholding tax in France. Moreover, the capital gains realised on the purchase/sale of the MF's units are generally tax exempt in France.

Bearers residing outside of France will be subject to the provisions of the tax legislation applicable in their country of residence.

*For more details, the complete prospectus can be obtained by requesting it from the management company.*

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The UCITS complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Approval date by the AMF (French Financial Markets Authority): 13 December 2005.*
- *Fund creation date: 10 January 2006.*

## Activity report

The net asset value of the unit USD of the LYXOR MSCI EUROPE UCITS ETF MF shows an evolution of 29.69% over the fiscal year and stands at USD 16.3833 on 31/01/2018, meaning a fund performance of 76.96% since inception.

The net asset value of the unit Lyxor MSCI Europe UCITS ETF – Dist of the LYXOR MSCI EUROPE UCITS ETF MF shows an evolution of 12.52% over the fiscal year and stands at EUR 131.285 on 31/01/2018, meaning a fund performance of 69.28% since inception.

The fund replicates the performance of the MSCI EUROPE NR index, listed in euro (EUR), representative of the performance of large and mid-caps of European developed markets.

This index has shown an evolution of 12.43% over the fiscal year. The class USD not being valued to the index currency, the evolution of their net asset value is subject to the exchange risk. During the fiscal year, the USD decreased by 13.25% compared to the EUR.

This gap between the annual performance of the UCITS and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI EUROPE NR index, the MF will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the MF's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI EUROPE NR index.

The equities in the MF's assets will notably be equities that make up the MSCI EUROPE NR index, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 5 given its exposure to the Benchmark Index.

On 31/01/2018, the tracking error reached the level of 0.0579% for the MF. The level of the target tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the year.

The counterparty for the Index-Linked Swaps obtained by the fund is: Société Générale.

### Regulatory information

#### Transfer commission *(not audited by the auditor)*

None.

#### Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the UCITS that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the Financial Markets Authority General Regulations, be consulted either on the management company's website or at its head office (upon request).

### Overall risk of the UCITS

The management company's method for measuring the overall risk of the UCITS: the method chosen is the commitment method.

### ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

#### **1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)**

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG" ") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

**2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)**

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

## Portfolio ESG Rating as of 2018-01-31

### ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance; Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance; Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

### Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red indicates involvement in one or more very severe controversies
- Orange indicates involvement in controversies just shy of the criteria for a red flag
- Yellow indicates significant controversie
- Green indicates no involvement in any major ESG controversies

Red Flag	4%
Orange Flag	35%
Yellow Flag	26%
Green Flag	35%

### Portfolio Carbon Footprint as of 2018-01-31

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales
155	214	178

Portfolio rated by weight 100%  
Scope 1 reported (vs estimated) 98%  
Scope2 reported (vs estimated) 94%  
Scope 1 & 2 estimations are based on MSCI methodology

**Carbon Measurement methodology**

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio. Carbon Emissions tons CO<sub>2</sub>e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO<sub>2</sub>e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO<sub>2</sub>e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

**Portfolio exposure to transition risk**

The data below represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio

Fossil Fuel Reserves	12%
Thermal Coal	2%
Natural Gaz	10%
Oil	11%

**Portfolio exposure to issuers offering environmental solutions**

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These emitters are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	20%
20-49.9%	4%
50-100%	2%

**Breakdown of the fixed and variable compensation for the financial year**

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€fixed compensation	€variable compensation	€total
<b>Total population</b>	74	6,066,070	3,896,435	9,962,505
<b>Regulated population</b>	20	1,813,532	1,906,435	3,719,967
<b>Of which management teams</b>	15	1,123,932	713,500	1,837,432
<b>Of which other regulated people</b>	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

### Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menucorporate/nous-connaître/mentions-reglementaires/>

Amount	39,293,309

**6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.**

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

**7. Data on the earnings and costs for each type of securities financing operation and total return swap.**

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

# Statutory auditor's report

STATUTORY AUDITOR'S REPORT  
ON THE FINANCIAL STATEMENTS  
For the year ended 31 January 2018

LYXOR MSCI EUROPE UCITS ETF  
UCITS CONSTITUTED AS A FONDS COMMUN DE PLACEMENT  
Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management Company  
LYXOR INTERNATIONAL ASSET MANAGEMENT  
17, cours Valmy  
92800 PUTEAUX

## Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of LYXOR MSCI EUROPE UCITS ETF, a UCITS constituted as a fonds commun de placement, for the year ended 31 January 2018.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the UCITS at 31 January 2018 and of the results of its operations for the year then ended, in accordance with French accounting principles.

## Basis of our opinion

### *Audit standards*

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "*Statutory Auditor's responsibilities for the audit of the financial statements*" in this report.

### *Independence*

We conducted our audit engagement in accordance with the applicable rules on independence, from 01/02/2017 and up to the date of this report, and in particular we did not provide any non-audit services prohibited under Article 5, paragraph 1 of Regulation (EU) No. 537/2014 or by the auditors' professional code of ethics.

LYXOR MSCI EUROPE UCITS ETF

## Justification of our assessments - Key audit matters

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the key matters as regards to the risk of material misstatement that, in our professional judgement, were the most significant for the audit of the financial statements and our responses to these risks.

These assessments were made as part of our audit of the financial statements, taken as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

<i>Key audit matters</i>	<i>Audit response to cover these risks</i>
<p>The main risks of the CIU relate to the financial instruments in its portfolio.</p> <p>Any error in valuing or recording these financial instruments could lead to a misstatement in the calculation of the CIU's net asset value and in the financial statements.</p> <p>We therefore focused our work on the valuation and existence of the financial instruments in the portfolio.</p> <p>Valuation of financial instruments traded on a regulated or equivalent market</p> <p>Valuation of the CIU's financial instruments traded on a regulated or equivalent market is not complex as it is based primarily on listed prices provided by independent sources.</p> <p>However, the related amounts are significant and could lead to a material misstatement.</p> <p>The value of the financial instruments traded on a regulated or equivalent market is recorded in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We compared the year-end valuation of the CIU's financial instruments traded on a regulated or equivalent market with observable prices obtained from market databases.</p>

**PricewaterhouseCoopers Audit, 63, rue de Villiers 92208 Neuilly-sur-Seine Cedex, France**  
**T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, [www.pwc.fr](http://www.pwc.fr)**

Société d'expertise comptable inscrite au tableau de l'ordre de Paris - Ile de France. Société de commissariat aux comptes membre de la compagnie régionale de Versailles. Société par Actions Simplifiée au capital de 2 510 460 €. Registered office: 63 rue de Villiers 92200 Neuilly-sur-Seine. RCS Nanterre 672 006 483. TVA n° FR 76 672 006 483. Siret 672 006 483 00362. Code APE 6920 Z. Bureaux : Bordeaux, Grenoble, Lille, Lyon, Marseille, Metz, Nantes, Nice, Paris, Poitiers, Rennes, Rouen, Strasbourg, Toulouse.

LYXOR MSCI EUROPE UCITS ETF

<p>Valuation of financial contracts traded over the counter</p> <p>As part of its investment strategy, the CIU uses over-the-counter swaps. The valuation of these swaps is not observable on a regulated or equivalent market. The valuation of over-the-counter swaps is therefore a key audit matter.</p> <p>The value of the swap is recorded under the line item "financial contracts" in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The commitment related to the swap is presented in the off-balance sheet statement. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We verified that the swap's valuation as recorded at year-end agreed to the value communicated by the counterparty to the swap.</p> <p>We gained an understanding of the internal control procedure performed by the management company over swaps valuation. We verified that this procedure had been applied at year-end.</p>
<p>Existence of financial instruments</p> <p>The portfolio's financial instruments are held in custody or maintained by the CIU's depository. The depository certifies the existence of financial instruments at year-end.</p> <p>There is nonetheless a risk that these financial instruments could be inaccurately or only partially recorded in the CIU's accounting.</p> <p>The existence of these financial instruments is a key audit matter as the related amounts are material and could lead to a material misstatement.</p>	<p>We verified the existence of the portfolio's financial instruments by reviewing the CIU's reconciliation between the CIU's financial instruments held at year-end and these identified by the depository in an account opened in the CIU's name. Any material differences were examined, if applicable using trade tickets or contracts.</p>

#### Verification of the management report and other documents addressed to unit-holders

In accordance with professional standards applicable in France, we have also performed the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report, and in the documents addressed to the unit-holders with respect to the financial position and the financial statements.

LYXOR MSCI EUROPE UCITS ETF

Disclosures arising from other legal and regulatory requirements

#### *Appointment of the Statutory Auditors*

We were appointed as Statutory Auditor of LYXOR MSCI EUROPE UCITS ETF, a UCITS constituted as a fonds commun de placement, by the management company on 13/12/2005.

At 31 January 2018, our firm was in the thirteenth consecutive year of its engagement, i.e. the thirteenth year following the admission of the CIU's securities for trading on a regulated market.

Responsibilities of management and those charged with governance for the financial statements

It is the management company's responsibility to prepare the CIU's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the CIU's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the CIU or to cease operations.

It is the management company's responsibility to monitor the preparation of financial information and oversee the efficiency of the internal control and risk management system and the internal audit system relating to the preparation and processing of financial and accounting information.

These financial statements have been prepared by the management company.

Statutory Auditor's responsibilities for the audit of the financial statements

#### *Audit purpose and approach*

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As indicated in article L.823-10-1 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

**PricewaterhouseCoopers Audit, 63, rue de Villiers 92208 Neuilly-sur-Seine Cedex, France**  
**T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, [www.pwc.fr](http://www.pwc.fr)**

Société d'expertise comptable inscrite au tableau de l'ordre de Paris - Ile de France. Société de commissariat aux comptes membre de la compagnie régionale de Versailles. Société par Actions Simplifiée au capital de 2 510 460 €. Registered office: 63 rue de Villiers 92200 Neuilly-sur-Seine. RCS Nanterre 672 006 483. TVA n° FR 76 672 006 483. Siret 672 006 483 00362. LYXOR MSCI EUROPE UCITS ETF

As part of an audit conducted in accordance with professional standards applicable in France, the Statutory Auditor uses professional judgement throughout the entire audit.

He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the CIU's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

# 1 Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

## **Assessment rules**

The MF's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment. The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
  - NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
  - NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
  - Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value.
- Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
  - Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
  - Temporary acquisitions and sales of securities are assessed at the market price.
  - Units and equities in undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the MF's net asset value.
  - Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the MF's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

appendix

The exchange rates used for the assessment of financial instruments listed in a currency other than the MF's reference currency are the exchange rates disseminated by the fixing WM / Reuters on the same day of the MF's net asset value date.

#### Posting method for the trading fees

The chosen method is that of included fees.

#### Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

#### Assessment methods for off-balance sheet commitments

Off-balance sheet operations are assessed at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the CIU) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the CIU) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the CIU).

#### Operation and management fees

These fees include all of the fees invoiced directly to the MF, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transfer commission which, if relevant, may notably be collected by the custodian and management company.

For this MF, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the MF has exceeded its objectives and are invoiced to the MF;
- Transfer commissions invoiced to the MF.

For more details on the fees actually invoiced to the MF, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the CIU	Basis	Schedule rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax <sup>(1)</sup>	Net asset	maximum 0.30% per year
Outperformance commission	Net asset	None
Transfer commission	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

#### Accounting currency

Euro.

#### Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

# appendix

**Indication of other changes declared to each of the bearers individually** *(Not certified by the auditor)*

- Occurred change: None.

- Future change: None.

**Indication and justification of the changes to estimates and application provisions**

None.

**Indication of the nature of the errors corrected during the fiscal year**

None.

**Indication of the rights and conditions attached to each category of units**

The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The generated net capital gains will be capitalised.
