## IMPORTANT INFORMATION

**IMPORTANT: IF YOU ARE IN ANY DOUBT AS TO THE CONTENTS OF THIS PROSPECTUS YOU SHOULD CONSULT YOUR STOCKBROKER, BANK MANAGER, SOLICITOR ACCOUNTANT OR OTHER FINANCIAL ADVISER.**

The Directors, whose names appear below, accept responsibility for the information contained in this document. The Directors have taken all reasonable care to ensure that the facts stated herein are true and accurate in all material respects at the date hereof and that there are no other material facts, the omission of which would make misleading any statement herein whether of fact or opinion. The Directors accept responsibility accordingly.

AQR UCITS Funds (the “**Company**”) is an investment company organised under the laws of the Grand Duchy of Luxembourg as a *société d’investissement à capital variable*, is governed by Part I of the UCI Law and qualifies as a UCITS.

No person has been authorised by the Company to give any information or make any representations in connection with the offering of Shares other than those contained in this Prospectus or any other document approved by the Company or the Management Company, and, if given or made, such information or representations must not be relied on as having been made by the Company.

The distribution of this Prospectus and the offering of Shares in certain jurisdictions may be restricted. Persons into whose possession this Prospectus comes are required by the Company to inform themselves about and to observe any such restrictions. This Prospectus does not constitute an offer or solicitation by anyone in any jurisdiction in which such an offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation.

This Prospectus may only be issued with one or more Supplements (each a “**Supplement**”), each containing information relating to a separate Fund. The creation of new Funds requires the prior approval of the CSSF. If there are different classes of Shares representing a Fund, details relating to the separate classes may be dealt with in the same Supplement or in a separate Supplement for each class. The creation of further classes of Shares will be effected in accordance with the requirements of the CSSF. This Prospectus and the relevant Supplement should be read and construed as one document. To the extent that there is any inconsistency between this Prospectus and the relevant Supplement, the relevant Supplement shall prevail.

Applications for Shares will only be considered on the basis of this Prospectus (and any relevant Supplement) and the key investor information document (the “**KIID**”). The latest audited annual report and accounts and the latest unaudited semi-annual report may be obtained from the offices of the Administrator. The delivery of this Prospectus (whether or not accompanied by any reports) or the issue of Shares shall not, under any circumstances, create any implication that the affairs of the Company have not changed since the date hereof.

Potential investors should not treat the contents of this Prospectus as advice relating to legal, taxation, investment or any matters and are recommended to consult their own professional advisers concerning the acquisition, holding or disposal of Shares.

The provisions of the Articles are binding on each of its Shareholders (who are taken to have notice of them).

This Prospectus is based on information, law and practice currently in force in Luxembourg (which may be subject to change) at the date hereof. The Company cannot be bound by an out of date Prospectus when it has issued a new Prospectus, and investors should check with the Administrator that this is the most recently published Prospectus.

The Company draws the investors' attention to the fact that any investor will only be able to fully exercise his investor rights directly against the Company, notably the right to participate in general shareholders' meetings, if the investor is registered him/her/it-self and in his own name in the shareholders' register. In cases where an investor invests in the Company through an intermediary investing into the Company in his own name but on behalf of the investor, it may not always be possible for the investor to exercise certain shareholder rights directly against the Company. Investors are advised to take advice on their rights.

Complaints concerning the operation or marketing of the Company may be referred by e-mail to [AQRInvestors@hedgeserv.com](mailto:AQRInvestors@hedgeserv.com), or by telephone to +352 286 797 20.

### **Restrictions on Distribution and Sale of Shares**

**Luxembourg** - The Company is registered pursuant to Part I of the UCI Law. However, such registration does not require any Luxembourg authority to approve or disapprove either the adequacy or accuracy of this Prospectus or the assets held in the various Funds. Any representations to the contrary are unauthorised and unlawful.

**European Union ("EU")** - The Company is a UCITS for the purposes of the UCITS Directive and the Board of Directors proposes to market the Shares in accordance with the UCITS Directive in certain member states of the EU and in countries which are not member states of the EU.

**United States of America ("U.S.")** - The Shares have not been, and will not be, registered under the 1933 Act, or qualified under any applicable state statutes, and the Shares may not be transferred, offered or sold in the United States of America (including its territories and possessions) or to or for the benefit of, directly or indirectly, any US Person, except pursuant to an exemption from, or in a transaction not subject to, the registration provisions of the 1933 Act. The Company is not, and will not be, registered under the 1940 Act, and investors will not be entitled to the benefit of registration under the 1940 Act. The Company reserves the right to make a private placement of its Shares to a limited number or category of US Persons. The Shares have not been approved or disapproved by the SEC, any state securities commission or other US regulatory authority, nor have any of the foregoing authorities passed upon or endorsed the merits of this offering or the accuracy or adequacy of these offering materials. Any representation to the contrary is unlawful.

Each prospective investor shall be required to declare that such investor is not a US Person and is not applying for Shares on behalf of any U.S. Person. In the absence of written notice to the Company to the contrary, if a prospective investor provides a non-US address on the application form for investment in the Company, this will be deemed to be a representation and warranty from such investor that he/she/it is not a US Person and that such investor will continue to be a non-US Person unless and until the Company is otherwise notified of a change in the investor's US Person status.

The Articles give powers to the Board of Directors to impose such restrictions as they may think necessary for the purpose of ensuring that no Shares in the Company are acquired or held by any person in breach of the law or the requirements of any country or governmental authority or by any person in circumstances which in the opinion of the Board of Directors might result in the Company incurring any liability or taxation or suffering any other disadvantage which the Company may not otherwise have incurred or suffered and, in particular, by any U.S. Person as referred to above. The Company may compulsorily redeem all Shares held by any such person.

The value of the Shares may fall as well as rise and a Shareholder on transfer or redemption of Shares may not get back the amount he initially invested. Income from the Shares may fluctuate in money terms and changes in rates of exchange may cause the value of Shares to go up or down. The levels and basis of, and reliefs from taxation may change. There can be no assurance that the investment objectives of any Fund will be achieved.

Investors should inform themselves and should take appropriate advice on the legal requirements as to possible tax consequences, foreign exchange restrictions or exchange control requirements which they might encounter under the laws of the countries of their citizenship, residence, or domicile and which might be relevant to the subscription, purchase, holding, conversion, redemption or disposal of the Shares of the Company.

Further copies of this Prospectus and the latest KIID may be obtained from:

AQR UCITS Funds  
c/o HedgeServ (Luxembourg) S.à r.l.  
2c, rue Albert Borschette  
L-1246 Luxembourg

The distribution of this Prospectus and the offering of Shares may be restricted in certain jurisdictions. This Prospectus does not constitute an offer or solicitation in any jurisdiction in which such offer or solicitation is not authorised or the person receiving the offer or solicitation may not lawfully do so. It is the responsibility of any person in possession of this Prospectus and of any person wishing to apply for Shares to inform himself of and to observe all applicable laws and regulations of the countries of his nationality, residence, ordinary residence or domicile.

### **Generally**

This Prospectus, any Supplements and the KIID may also be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus, Supplements and the KIID. To the extent that there is any inconsistency between the English language Prospectus / Supplements / KIID and the Prospectus / Supplements / KIID in another language, the English language Prospectus / Supplements / KIID will prevail, except to the extent (but only to the extent) required by the law of any jurisdiction where the Shares are sold, that in an action based upon disclosure in a prospectus or a KIID in a language other than English, the language of the Prospectus / Supplement / KIID on which such action is based shall prevail.

Investors should read and consider the section entitled "Risk Factors" before investing in the Company.

**All or part of the fees and expenses may be charged to the capital of the Company. This will have the effect of lowering the capital value of your investment.**

**The value of investments and the income derived therefrom may fall as well as rise and investors may not recoup the original amount invested in a Fund.**

“CSSF”	the Luxembourg authority, currently the <i>Commission de Surveillance du Secteur Financier</i> , or its successor in charge of the supervision of undertakings for collective investment in the Grand-Duchy of Luxembourg

“Depository Agreement”	the depository agreement pursuant to which the Depository is appointed by the Company
“Dealing Day”	such Business Day or Business Days as shall be specified in the relevant Supplement for that Fund or any such other day or days as the Directors may determine and notify in advance to the Shareholders provided there is at least one every two weeks
“Dealing Request Deadline”	such time in respect of any relevant Dealing Day as shall be specified in the relevant Supplement for that Fund or such other time as the Directors may determine and notify to Shareholders in advance provided always that the Dealing Request Deadline is no later than the point as at which the Net Asset Value is determined for the relevant Dealing Day
“Depository”	J.P. Morgan Bank Luxembourg S.A.
“Distribution Shares”	Shares in respect of which income is distributed periodically to Shareholders
“Distributor”	AQR Capital Management, LLC
“EONIA”	European Overnight Index Average
“EU”	the European Union
“FATCA”	means sections 1471 through 1474 of the Code, any current or future regulations or official interpretations thereof, and any agreement entered into pursuant to section 1471(b) of the Code, including the intergovernmental agreement adopted between the United States and Luxembourg, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of these sections of the Code
“FCA”	Financial Conduct Authority or its successor authority in the United Kingdom
“FFI”	means a foreign “Financial Institution” as defined in FATCA
“Fund”	a sub-fund of the Company representing the designation by the Directors of a particular class of Shares as a sub-fund the proceeds of issue of which are pooled separately and invested in accordance with the investment objective and investment policies applicable to such sub-fund and which is established by the Directors from time to time with the prior approval of the CSSF
“Group of Companies”	companies belonging to the same body of undertakings and which must draw up consolidated accounts in accordance with Council Directive 83/349/EEC of 13 June 1983 on consolidated accounts and according to recognised international accounting rules, as amended
“HKMA”	Hong Kong Monetary Authority Hong Kong Exchange Fund Bills Fixings 3 Month Yield Index

“Ineligible Applicant”	<p>any person to whom a transfer of Shares (legally or beneficially) or by whom a holding of Shares (legally or beneficially) would or, in the opinion of the Directors, might:</p> <ul style="list-style-type: none"> <li>a) be in breach of any law (or regulation by a competent authority) of any country or territory by virtue of which the person in question is not qualified to hold such Shares; or</li> <li>b) require the Company, the Management Company or the Investment Manager to be registered under any law or regulation whether as an investment fund or otherwise, or cause the Company to be required to comply with any registration requirements in respect of any of its Shares, whether in the United States of America or any other jurisdiction; or</li> <li>c) cause the Company, its Shareholders, the Management Company or the Investment Manager some legal, regulatory, taxation, pecuniary or material administrative disadvantage which the Company, its Shareholders, the Management Company or the Investment Manager might not otherwise have incurred or suffered; or</li> <li>d) any US Person</li> </ul>
“Initial Offer Period”	the period set by the Directors in relation to any Fund or Class of Shares as the period during which Shares are initially on offer and as specified in the relevant Supplement
“Initial Offer Price”	the initial price payable for a Share as specified in the relevant Supplement for each Fund
“Investment Funds Legislation”	the UCITS Directive, UCITS V Level 2 and the UCI Law
“Investment Management Agreement”	the investment management agreement pursuant to which the Investment Manager is appointed to provide discretionary investment management services to the Company and the Funds
“Investment Manager”	AQR Capital Management, LLC
“Luxembourg”	the Grand Duchy of Luxembourg
“Management Company”	FundRock Management Company S.A.
“MAS”	Monetary Authority of Singapore Benchmark Govt Bill Yield 3 Month Index
“Member State”	a member state of the European Union. The states that are contracting parties to the agreement creating the European Economic Area other than the member states of the European Union, within the limits set forth by this agreement and related acts, are considered as equivalent to member states of the European Union
“ML 3 Month T Bill Index”	the BofA Merrill Lynch 3-Month U.S. Treasury Bill Index - ETF Tracker index

“Minimum Holding”	where applicable, the minimum holding for each class of Shares as specified in the relevant Supplement for each Fund
“Minimum Initial Subscription”	the minimum investment for each first subscription in a class of Shares as specified in the relevant Supplement for each Fund
“Money Market Instruments”	instruments normally dealt in on the money market which are liquid, and have a value which can be accurately determined at any time, and instruments eligible as money market instruments, as defined by guidelines issued by the CSSF from time to time
“Net Asset Value”	the net asset value of the Company, a Fund or a Class (as the context may require) as calculated in accordance with the Articles
“Net Asset Value per Share”	the Net Asset Value in respect of any Fund or Class divided by the number of Shares of the relevant Fund or Class in issue at the relevant time
“Non-Member State”	any state of Europe, America, Africa, Asia, Australia and Oceania which is not a Member State
“OECD”	the Organisation for Economic Co-operation and Development
“Prospectus”	this Prospectus, as may be amended or supplemented from time to time
“Redemption Price”	the price per Share at which Shares are redeemed or calculated in the manner described on page 17
“Reference Currency”	the base currency of the Company, the relevant Class or the relevant Fund, as the case may be
“Regulated Market”	a market in the meaning of directive 2004/39/EC of the EC Parliament and Council on markets in financial instruments, namely a multilateral system operated and/or managed by a market operator, which brings together or facilitates the bringing together of multiple third-party buying and selling interests in financial instruments in the system and in accordance with its non-discretionary rules in a way that results in a contract, in respect of the financial instruments admitted to trading under its rules or systems, and which is authorised and functions regularly and in accordance with the provisions of Title III of the Directive 2004/39/EC
“SARON”	the Swiss Average Rate Overnight index
“Share” or “Shares”	shares of any Class in the Company as the context requires
“Share Class” or “Class of Shares” or “Class”	all of the Shares issued by the Company as a particular class of Shares relating to a single Fund
“Shareholder”	a holder of Shares in the Company

"Subscription Price"	the price per Share at which Shares may be issued after the close of the Initial Offer Period calculated in the manner described on page 14
"Supplement"	a supplement to this Prospectus specifying certain information in respect of a Fund and/or one or more Classes
"SEC"	U.S. Securities and Exchange Commission
"SONIA"	Sterling Overnight Index Average
"Transferable Securities"	<ul style="list-style-type: none"> <li>(i) shares and other securities equivalent to shares ("shares");</li> <li>(ii) bonds and other debt instruments ("debt securities"); and</li> <li>(iii) any other negotiable securities that carry the right to acquire any such transferable securities by subscription or exchange, to the extent they do not qualify as Techniques and Instruments as described in Appendix 1 of this Prospectus</li> </ul>
"UCI(s)"	undertaking(s) for collective investment
"UCI Law"	the Luxembourg law of 17 December 2010 on undertakings for collective investment, as may be amended from time to time
"UCITS"	an undertaking for collective investment in transferable securities established pursuant to UCITS Directive
"UCITS Directive"	the Directive 2009/65/EC of the European Parliament and Council of 13 July 2009, as amended from time to time
"UCITS V Directive"	the Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards depositary functions, remuneration policies and sanctions
"UCITS V Level 2"	the Commission Delegated Regulation (EU) 2016/438 of 17 December 2015 supplemented Directive 2009/65/EC of the European Parliament and the Council with regards to obligations of depositaries
"US Person"	<p>means a "US Person" as defined by Rule 902 of Regulation S promulgated under the 1933 Act, and does not include any "Non-United States person" as used in Rule 4.7 under the US Commodity Exchange Act, as amended;</p> <p>Regulation S currently provides that:</p> <p>(1) "US Person" means: (a) any natural person resident in the US; (b) any partnership or corporation organised or incorporated under the</p>

laws of the US; (c) any estate of which any executor or administrator is a US Person; (d) any trust of which any trustee is a US Person; (e) any agency or branch of a non-US entity located in the US; (f) any non-discretionary or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a US Person; (g) any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organised, incorporated or (if an individual) resident in the US; and (h) any partnership or corporation if (i) organised or incorporated under the laws of any non-US jurisdiction and (ii) formed by a US Person principally for the purpose of investing in securities not registered under the 1933 Act, unless it is organised or incorporated, and owned, by accredited investors (as defined under Rule 501(a) under the 1933 Act) who are not natural persons, estates or trusts.

(2) "US Person" does not include: (a) any discretionary account or similar account (other than an estate or trust) held for the benefit or account of a non-US Person by a dealer or other professional fiduciary organised, incorporated, or, if an individual, resident in the US; (b) any estate of which any professional fiduciary acting as executor or administrator is a US Person if (i) an executor or administrator of the estate who is not a U.S Person has sole or shared investment discretion with respect to the assets of the estate and (ii) the estate is governed by non-US law; (c) any trust of which any professional fiduciary acting as trustee is a US Person if a trustee who is not a US Person has sole or shared investment discretion with respect to the trust assets, and no beneficiary of the trust (and no settlor if the trust is revocable) is a US Person; (d) an employee benefit plan established and administered in accordance with the law of a country other than the US and customary practices and documentation of such country; (e) any agency or branch of a US Person located outside the US if (i) the agency or branch operates for valid business reasons and (ii) the agency or branch is engaged in the business of insurance or banking and is subject to substantive insurance or banking regulation, respectively, in the jurisdiction where located; (f) the International Monetary Fund, the International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the United Nations and their agencies, affiliates and pension plans and any other similar international organisations, their agencies, affiliates and pension plans; and (g) any entity excluded or exempted from the definition of "US Person" in reliance on or with reference to interpretations or positions of the SEC or its staff;

Rule 4.7 of the US Commodity Exchange Act regulations currently provides in relevant part that the following persons are considered "Non-United States persons": (a) a natural person who is not a resident of the US; (b) a partnership, corporation or other entity, other than an entity organised principally for passive investment, organised under the laws of a non-US jurisdiction and which has its principal place of business in a non-US jurisdiction; (c) an estate or trust, the income of which is not subject to US income tax regardless of source; (d) an entity organised principally for passive investment such as a pool, investment company or other similar entity, provided that units of participation in the entity held by persons who do not

qualify as non-US Persons or otherwise as qualified eligible persons represent in the aggregate less than 10% of the beneficial interest in the entity, and that such entity was not formed principally for the purpose of facilitating investment by persons who do not qualify as non-US Persons in a pool with respect to which the operator is exempt from certain requirements of the US Commodity Futures Trading Commission's regulations by virtue of its participants being non-US Persons; and (e) a pension plan for the employees, officers or principals of an entity organised and with its principal place of business outside of the US.

"US" or "United States"	means the United States of America, its territories and possessions, any State of the United States and the District of Columbia
"Valuation Day"	the Business Day as of which the Administrator determines the Net Asset Value per Share of each Fund, as specified in the relevant Supplement for that Fund
"1933 Act"	means the US Securities Act of 1933, as amended
"1940 Act"	means the US Investment Company Act of 1940, as amended

In this Prospectus the words and expressions set out in the first column above shall have the meanings set opposite them unless the context requires otherwise.

All references to "BRL" and "Brazilian Real" are to the currency of the Federative Republic of Brazil, all references to "CAD" and "Canadian Dollar" are to the currency of Canada, all references to "CHF" and "Swiss Franc" are to the currency of the Swiss Confederation, all references to "Euro" and "€" are to the unit of the European single currency, all references to "US Dollars", "USD" and "US\$" are to the currency of the United States, all references to "Sterling", "GBP" and "£" are to the currency of the United Kingdom, all references to "Swedish Krona" and "SEK" are to the currency of the Kingdom of Sweden, all references to "NOK" and Norwegian Krone are to the currency of Norway, all references to "HKD" and "Hong Kong Dollars" are to the currency of the Hong Kong Special Administrative Region of the People's Republic of China, all references to "SGD" and "Singapore Dollars" are to the currency of the Republic of Singapore, all references to "JPY" and "Japanese Yen" are to the currency of Japan.

## THE COMPANY AND THE FUNDS

The Company is an open-ended investment company incorporated under the laws of Luxembourg as a *Société d'Investissement à Capital Variable* ("**SICAV**") in accordance with the provisions of Part I of the law of 17 December 2010 governing undertakings for collective investment, as may be amended from time to time. The Company was incorporated for an unlimited period on 12 December 2011 under the name of AQR UCITS Funds. The Articles were published in the *Mémorial C, Recueil Spécial des Sociétés et Associations* of the Grand Duchy of Luxembourg on 25 January 2012 and the Company is registered with the Luxembourg Trade and Companies' Register under the number B 165881. The Articles were most recently updated on 23 August 2012 and this amendment was published on 26 September 2012 in the *Mémorial C*.

The Company has appointed FundRock Management Company S.A. as its management company.

The Company is an umbrella fund designed to offer investors access to a variety of investment strategies through a range of separate Funds. At the date of this Prospectus, the Company consists of the following Funds:

- AQR UCITS Funds – AQR Global Risk Parity UCITS Fund;
- AQR UCITS Funds – AQR Emerging Equities UCITS Fund;
- AQR UCITS Funds – AQR Managed Futures UCITS Fund;
- AQR UCITS Funds – AQR Style Premia UCITS Fund;
- AQR UCITS Funds – AQR Global Core Equity UCITS Fund;
- AQR UCITS Funds – AQR Global Defensive Equity UCITS Fund;
- AQR UCITS Funds – AQR Global Enhanced Equity UCITS Fund;
- AQR UCITS Funds – AQR Systematic Fixed Income: US High Yield UCITS Fund;
- AQR UCITS Funds – AQR Systematic Total Return UCITS Fund;
- AQR UCITS Funds - AQR Style Premia: Equity Market Neutral UCITS Fund;
- AQR UCITS Funds – AQR U.S. Relaxed Constraint Equity UCITS Fund; and
- AQR UCITS Funds – AQR Global Aggregate Bond UCITS Fund.

At all times the Company's capital will be equal to the Net Asset Value of the Company and will not fall below the minimum capital required by Luxembourg law.

The Directors may establish additional Funds from time to time in respect of which a Supplement or Supplements will be issued with the prior approval of the CSSF.

The assets of each Fund will be segregated from one another and will be invested in accordance with the investment objectives and investment policies applicable to each such Fund and as set out in the relevant Supplement. Pursuant to Article 181 of the UCI Law, each Fund corresponds to a distinct part of the assets and liabilities of the

Company, i.e. the assets of a Fund are exclusively available to satisfy the rights of investors in relation to that Fund and the rights of creditors whose claims have arisen in connection with the creation and operation of that Fund.

The liabilities of a particular Fund (in the event of a winding up of the Company or a repurchase of the Shares in the Company or all the Shares of any Fund) shall be binding on the Company but only to the extent of the particular Fund's assets and in the event of a particular Fund's liabilities exceeding its assets, recourse shall not be made against the assets of another Fund to satisfy any such deficit.

The Reference Currency of each Fund and/or Class is set out in the relevant Supplement.

Shares of a Fund may be listed on the Luxembourg Stock Exchange or on another investment exchange. The Board of Directors will decide whether Shares of a particular Fund are to be listed. The relevant Supplement will specify if the Shares of a particular Fund are listed.

#### The Funds and their Investment Objectives and Policies

Details of the investment objective, investment policies and certain terms relating to an investment in the Funds will be set out in the relevant Supplement.

#### Profile of a Typical Investor

The profile of a typical investor will be set out in the relevant Supplement.

The choice of specific Fund should be determined by the investor's attitude to risk, preference for income or growth, intended investment time horizon and in the context of the investor's overall portfolio. Investors should seek professional advice before making investment decisions.

#### Classes of Shares

Each Fund may offer more than one Class of Shares. Each Class of Shares may have different features with respect to its criteria for subscription, redemption, minimum holding, fee structure, Reference Currency and dividend policy. A separate Net Asset Value per Share will be calculated for each Class. The Classes of Shares currently available for each Fund are set out in the relevant Supplement. Further Classes may be created by the Board of Directors in accordance with the requirements of the CSSF.

In addition, where applicable and stated in the relevant Supplement, for the purposes of calculating a performance fee for a Fund (as specified in the relevant Supplement), a new Class of Shares (a "**Series**") will be issued at each Dealing Day. For the purposes of identifying new Series created on any Dealing Day, such new Series will be assigned an identifier.

The limits for Minimum Initial Subscription for any Fund or Class of Shares may be waived or reduced at the discretion of the Directors.

Unless otherwise stated in the relevant Supplement:

- Title to registered shares is evidenced by entries in the Company's share register. Shareholders will receive confirmation notes of their shareholdings; and

- In principle, registered share certificates are not issued.

### Investment Restrictions

Investment of the assets of each Fund must comply with the UCI Law. The investment and borrowing restrictions applying to the Company and each Fund are as set out in Appendix 1. The Directors may impose further restrictions in respect of any Fund. With the exception of permitted investments in unlisted securities or in units of open-ended collective investment schemes or in over-the-counter derivative contracts, investments will be made on Regulated Markets. Each Fund may also hold ancillary liquid assets.

### Reports and Financial Statements

The accounting year of the Company commences on 1 April of each year and terminates on 31 March of each year. The first accounting year of the Company started on the launch date of the Company and terminated on 31 March 2013. The Company will publish an audited annual report within four months of the financial period end (i.e., by 31 July of each year). Copies of the unaudited half yearly reports (as of 30 September) will also be prepared within two months of the period end (i.e., by 30 November of each year). Copies of the annual audited financial statements and half yearly reports will be circulated to Shareholders and prospective investors upon request.

### Distribution Policy

Whether Accumulation or Distribution Shares will be issued in relation to a particular Fund will be described in the relevant Supplement.

The distribution policy applicable to each Class of Distribution Shares in relation to a particular Fund will be described in the relevant Supplement.

The Board of Directors reserves the right to introduce a distribution policy that may vary between Funds and different Classes of Shares in issue.

Subject to the relevant Supplement, the part of the year's net income corresponding to Accumulation Shares will not be paid to Shareholders and instead will be capitalised in the relevant Fund for the benefit of the Accumulation Shares.

Payments will be made in the Reference Currency of the relevant Class except where otherwise stated in the relevant Supplement. Dividends remaining unclaimed for five years after their declaration will be forfeited and revert to the relevant Fund.

In any event, no distribution may be made if, as a result thereof, the Net Asset Value of the Fund would fall below the equivalent of EUR 1,250,000.

### Publication of Net Asset Value per Share

The Net Asset Value per Share may be obtained free of charge from, and will be available at the offices of, the Administrator during business hours in Luxembourg.

## DIRECTORS

### The Board of Directors

The Board of Directors is responsible for the overall management and control of the Company in accordance with the Articles. The Board of Directors is further responsible for the implementation of each Fund's investment objective and policies as well as for oversight of the administration and operations of each Fund.

The Board of Directors shall have the broadest powers to act in any circumstances on behalf of the Company, subject to the powers reserved by law to the Shareholders.

### Directors of the Company

#### *Brendan Kalb*

Brendan R. Kalb is Managing Director and General Counsel of the Investment Manager. Mr. Kalb joined the Investment Manager in 2004 and is responsible for managing the full spectrum of the firm's legal affairs, including advising on the creation and ongoing operation of the Investment Manager's hedge funds, separately managed accounts and registered products. Prior to joining the Investment Manager, from March 2003 to January 2004 Mr. Kalb worked at the New York law firm of Willkie Farr & Gallagher LLP as an Associate in their Investment Management Group where he regularly represented registered investment companies, investment advisers and broker-dealers. Prior to joining Willkie Farr, from September 2000 to March 2003 Mr. Kalb worked for the law firm of Seward & Kissel LLP as an Associate in the firm's Financial Services & Investment Management Department. At Seward, Mr. Kalb dealt in related matters with respect to investment advisers, including commodity pool operation, management company structuring, fund marketing and advertising, employment agreements, joint ventures and seed capital arrangements. Mr. Kalb received his JD from Cornell Law School in 2000 and graduated magna cum laude with a B.A. in International Relations & Economics from the University of Pennsylvania in 1997. Mr. Kalb has spoken at a number of industry conferences on regulatory matters affecting the financial services industry and currently serves as a member of the Managed Funds Association's Investment Adviser and Government Affairs Committees, and currently acts as Vice Chairman of the MFA's CTA, CPO and Futures Committee. Mr. Kalb also serves on the Board of Advisors of the Institute for Law and Economics, a joint research center between the Law School, the Wharton School and the Department of Economics at the University of Pennsylvania. Mr. Kalb is a member of the New York State Bar and registered as an Authorised House Counsel in the State of Connecticut.

#### *Andrew Bastow*

Andrew Bastow is Managing Director and Head of European Structuring and Regulatory Affairs for AQR Capital Management (Europe) LLP where he is responsible for the legal affairs of AQR's activities in Europe. Before joining AQR, Mr Bastow served as General Counsel and Head of Government and Regulatory Affairs at Winton Capital Management in London for eight years. He is currently a Director of the General Council of the Alternative Investment Management Association and is a member of the Hedge Fund Lawyers Association.

Mr Bastow is a Solicitor of England and Wales and is also admitted as a Barrister and Solicitor of the Supreme Court of Western Australia (non-practising). Mr Bastow has also held roles with the Treasury Solicitor's Department of the Government of the United Kingdom and with the State Solicitor's Office in Western Australia where he

was engaged in a wide range of practice areas including public law, employment, regulation, prosecution and enforcement. He is a British Chevening Scholar and holds a First Class Master of Laws degree from the London School of Economics and Political Science as well as degrees in Law, Arts and Economics respectively obtained from Murdoch University and the University of Western Australia in Australia.

#### *Thomas Nummer*

Thomas Nummer is a Managing Partner in Trivona S.A. Luxembourg. Mr. Nummer acts as an independent director on Luxembourg funds and management companies as well as advising clients on product structuring, fund launches, compliance, risk and governance issues. Mr. Nummer was Managing Director at Carne Global Financial Services Luxembourg between 2011 and 2016. Prior to that, he was Director and Chief Risk Officer for Allianz Global Investors Luxembourg S.A., where he worked for eight years on a wide range of Risk and Fund Compliance issues. In particular, he built up the UCITS compliant risk management system for the Allianz fund range. In addition, Mr. Nummer was appointed as Head of Outsourcing risk for all Management Companies at Allianz Global Investors Europe. Previously, Mr. Nummer worked for Adig Investment in Luxembourg for five years, focusing on fund management (passively managed equity funds and fund of funds). Prior to that, he worked as an option trader (EUREX market maker) for AGON, Cologne. Mr. Nummer is co-chairman of the ALFI's Risk Management Committee and also Member of the Board of ALRiM, the Luxembourgish Risk Manager association. He has assisted ALFI in its dealings with the CSSF and ESMA in relation to policy formulation for both UCITS and alternative funds. Mr. Nummer holds a University degree (Dipl. Kaufmann) from the University of Trier, Germany including an academic year at Reading University, UK. Furthermore Thomas holds a post-graduate degree as Financial Analyst (CEFA) from the Society of Investment Professionals in Germany, DVFA.

#### *Antonio Thomas*

Antonio Thomas acts as an independent director with more than 28 years' experience in the funds industry for a variety of UCITS and AIFM structures. From February 2014 to September 2016 he was a partner with MPL Luxembourg responsible for establishing the Groups Super Management Company activities. Up to October 2013, Mr. Thomas was the Chairman of RBS Fund Services, which included responsibilities for NatWest Trustee & Depositary, the UK's leading Independent Trustee and RBS (Luxembourg) S.A., one of the largest 3rd party independent management companies in Luxembourg.

Prior to this, Mr. Thomas was located in Dublin, Ireland as the managing director of RBS Fund Services (Ireland) Limited, an Irish domiciled management company, for two and a half years.

Before joining the RBS Group, Mr Thomas worked for 14 years in a variety of senior management positions with F&C Asset Management Group, based in the U.K.

### **MANAGEMENT COMPANY**

The Company has appointed FundRock Management Company S.A. to serve as its management company within the meaning of the UCI Law. The Management Company is responsible, subject to the overall supervision of the Directors, for the provision of investment management services, administrative services and marketing services to the Company.

The Management Company was established in Luxembourg on 10 November 2004. Its articles of incorporation were published in the “*Mémorial*” of 6 December 2004 Nr. 1245. Its articles of incorporation were amended on 16 September 2010, this modification was published in the “*Mémorial*” of 5 November 2010 Nr. 2376, and for the last time on 31 December 2015, this modification was lodged with the Luxembourg Trade and Companies’ Register and was published in the “*Mémorial*” on 31 March 2016. The Management Company is regulated by Chapter 15 of the UCI Law since the 1<sup>st</sup> July 2011. The Management Company’s registered office is at 33, rue de Gasperich L-5826 Hesperange, Grand Duchy of Luxembourg.

The directors of the Management Company are:

- Michel Marcel Vareika, Independent Non-Executive Director, Director of Companies, FundRock Management Company S.A., Luxembourg,
- Revel Justin Wood, Executive Director, Chief Executive Officer, FundRock Management Company S.A., Luxembourg,
- Romain Denis, Executive Director - IT Projects, Data Management & Strategic Projects, FundRock Management Company S.A., Luxembourg,
- Christophe Douche, Executive Director - Risks and Operations, FundRock Management Company S.A., Luxembourg,
- Ross Thomson, Executive Director – Ireland Branch, FundRock Management Company S.A., Dublin, Ireland,
- Eric May, Non-Executive Director, Founding Partner, BlackFin Capital Partners, France,
- Kevin Charles Brown, Independent Director (Non-Executive Director), United Kingdom, and
- Tracey Mc Dermott, Independent Non-Executive Director, Managing Director, Gemini Governance & Advisory Solutions S.à r.l., Luxembourg.

In addition to the Company, the Management Company also acts as management company for other funds. The list of funds managed by the Management Company will be set out in the Company’s annual reports and may be obtained upon request from the Management Company.

In accordance with the UCI Law and with the prior consent of the Directors, the Management Company may delegate all or part of its duties and powers to any person or entity, provided such duties and powers remain under the supervision and responsibility of the Management Company. The Management Company has appointed AQR Capital Management, LLC to carry out investment management and distribution functions, and HedgeServ (Luxembourg) S.à r.l to carry out certain administrative functions in respect of the Company.

#### Remuneration Policy

The Management Company has established and applies a remuneration policy in accordance with principles laid out under UCITS V Directive and any related legal and regulatory provisions applicable in Luxembourg.

The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the UCITS that it manages and of the investors in such UCITS, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS that the Management Company manages.

As an independent management company relying on a full-delegation model (i.e. delegation of the collective portfolio management function), the Management Company ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that the Management Company's employees who are identified as risk-takers under UCITS V Directive are not remunerated based on the performance of the UCITS under management.

The details of the up-to-date remuneration policy of the Management Company, including, but not limited to, a description of how remuneration and benefits are calculated, the identity of the persons responsible for awarding the remuneration and benefits, the composition of the remuneration committee are available on [https://www.fundrock.com/pdf/Fundrock\\_Remuneration\\_policy.pdf](https://www.fundrock.com/pdf/Fundrock_Remuneration_policy.pdf).

A paper version of this remuneration policy is made available free of charge to investors at the Management Company's registered office.

The Management Company's remuneration policy, in a multi-year framework, ensures a balanced regime where remuneration both drives and rewards the performance of its employees in a measured, fair and well-thought-out fashion, which relies on the following principles<sup>1</sup>:

- (i) Identification of the persons responsible for awarding remuneration and benefits (under the supervision of the remuneration committee and subject to the control of an independent internal audit committee);
- (ii) Identification of the functions performed within the Management Company which may impact the performance of the entities under management;
- (iii) Calculation of remuneration and benefits based on the combination of individual and company's performance assessment;
- (iv) Determination of a balanced remuneration (fixed and variable);
- (v) Implementation of an appropriate retention policy with regards to financial instruments used as variable remuneration;
- (vi) Deferral of variable remuneration over 3-year periods;
- (vii) Implementation of control procedures/adequate contractual arrangements on the remuneration guidelines set up by the Management Company's respective portfolio management delegates.

---

<sup>1</sup> It should be noted that, upon issuance of final regulatory guidelines, this remuneration policy may be subject to certain amendments and/or adjustments.

## **INVESTMENT MANAGER**

With the consent of the Company, the Management Company has appointed AQR Capital Management, LLC as investment manager to manage and invest the assets of the Funds pursuant to their respective investment objectives and policies.

The Investment Manager was formed in January 1998 by Clifford S. Asness, Ph.D., David G. Kabiller, CFA, Robert J. Krail, Ph.D., and John M. Liew, Ph.D. Asness, Krail and Liew first met as students in the graduate Ph.D. finance program at the University of Chicago. They re-grouped at Goldman Sachs, where they comprised the senior management of the Quantitative Research Group at Goldman Sachs Asset Management (GSAM). At GSAM, the team managed both traditional (managed relative to a benchmark) and non-traditional (managed seeking absolute returns) mandates. The founding principals formed the Investment Manager to pursue a more entrepreneurial path while devoting a greater portion of their time to research and investment product development. Each of these principals is still active in the firm's business, with the exception of Robert Krail, who took a medical leave of absence in 2009 and has since retired.

AQR Capital Management, LLC is registered with the SEC as an investment adviser, and is permitted to provide investment management services. It is also registered with the Commodity Futures Trading Commission as a commodity pool operator and commodity trading advisor and is a member of the National Futures Association. Additionally, AQR Capital Management, LLC is a "qualified professional asset manager" as defined in Prohibited Transaction Exemption 84-14 promulgated by the U.S. Department of Labor.

Details of any sub-investment manager(s) appointed by the Investment Manager in respect of the assets of any Fund are set out in the Supplement relevant to the Fund in question.

The Investment Manager was appointed pursuant to the Investment Management Agreement. Under the Investment Management Agreement, the Investment Manager has full discretion, subject to the overall review and control of the Management Company and the Company, to manage the assets of the Company on a discretionary basis.

The Investment Management Agreement provides that the Investment Manager and its connected persons shall not be liable for losses of any kind arising from any act or omission in connection with the performance of its duties under the Investment Management Agreement, or any agreement pursuant to which a connected person is appointed to perform duties with respect to the management of the assets of the Company, with the exception of losses arising directly from fraud, negligence or wilful default on the Investment Manager's part or on the part of its connected persons. Where liability is found to arise by virtue of any act or omission, the losses and/or loss of opportunity arising shall take into account both the positive and negative performance impact of the act or omission so that these are set-off against each other in the quantification of liability.

The Investment Management Agreement also provides that in the event of any failure, interruption or delay in the performance of the Investment Manager's obligations resulting from acts, events or circumstances not reasonably within the control of the Investment Manager or its connected persons, the Investment Manager and its connected persons shall not be liable for any kind of loss or damage thereby incurred or suffered by the Company.

Save as summarised above and to the extent permitted under applicable law, the Investment Manager and its connected persons will not otherwise be liable for any kind of loss incurred or suffered by the Company.

Under the Investment Management Agreement the Management Company agrees to indemnify the Investment Manager and its connected persons against all direct expenses, losses, damages, liabilities, demands, charges and claims of any kind or nature whatsoever which may be brought against, suffered or incurred by it by reason of the performance or non-performance of its duties under the Investment Management Agreement, or any agreement pursuant to which a connected person is appointed to perform duties with respect to the management of the assets of the Company, except insofar as the Investment Manager or its connected persons shall be liable therefor as described above.

The Investment Management Agreement may be terminated by one party giving to the other party not less than 90 days' written notice. The Investment Management Agreement may also be terminated forthwith by notice in writing by either party (the "**notifying party**"), if the other party shall commit any breach of its obligations under the Investment Management Agreement and if such breach is capable of being made good, shall fail to make good such breach within 30 days of receipt of written notice from the notifying party requiring it so to do. Subject to the prior written approval of the Board of Directors, the Investment Management Agreement may also be terminated by the Management Company without notice when this is deemed by the Management Company to be in the interests of the Company's shareholders.

The Investment Manager (and/or its directors, employees, related entities and connected persons) may subscribe, directly or indirectly for Shares during and after the relevant Initial Offer Period.

## **ADMINISTRATOR**

HedgeServ (Luxembourg) S.à r.l has been appointed as the Administrator pursuant to an Administration Agreement entered into on 10 August 2015. The Administrator will carry out all administrative duties related to the administration of the Company, including the calculation of the Net Asset Value of the Shares and the provision of accounting services to the Company.

HedgeServ (Luxembourg) S.à r.l is a private limited liability company (*société à responsabilité limitée*) incorporated under the laws of the Grand-Duchy of Luxembourg and presently exists for an unlimited period of time. Its registered office is at 2c rue Albert Borschette, L-1246 Luxembourg. The Administrator is not responsible for any investment decisions of the Company or the effect of such investment decisions on the performance of the Company.

The Administrator has also been appointed as the registrar and transfer agent of the Company pursuant to the Administration Agreement. In this function the Administrator will process all subscriptions, redemptions and transfers of Shares and will register these transactions in the share register of the Company.

The relationship between the Management Company, the Company and the Administrator is subject to the terms of the Administration Agreement. The Management Company, the Company and the Administrator may terminate the Administration Agreement on ninety (90) calendar days' prior written notice. The Administration Agreement may also be terminated on shorter notice in certain circumstances.

The Administration Agreement contains provisions indemnifying the Administrator, and exempting the Administrator from liability, in certain circumstances.

Subject to the prior written consent of the Board of Directors, the Management Company reserves the right to change the administration arrangements described above by agreement with the Administrator and/or in its discretion to appoint an alternative administrator without prior notice to Shareholders. Shareholders will be notified in due course of any appointment of an alternative administrator.

The Company has also appointed the Administrator as paying agent and corporate and domiciliary agent pursuant to the Administration Agreement.

## **DEPOSITARY**

The Company has appointed J.P. Morgan Bank Luxembourg S.A. as the depositary of the Company's assets. In this framework, the Depositary will provide the Company with the services of custody, deposit, delivery and receipt of securities and cash settlement on behalf of the Company.

J.P. Morgan Bank Luxembourg S.A. was incorporated in Luxembourg as a public limited company (société anonyme) on 16 May 1973 and has its registered office at European Bank & Business Centre, 6c, route de Treves, L-2633 Senningerberg. It has engaged in banking activities since its incorporation.

The Depositary will further, in accordance with Part I the UCI Law:

- (a) ensure that the issue, redemption and cancellation of Shares effected by the Company or on its behalf are carried out in accordance with the law or the Articles;
- (b) ensure that in transactions involving the assets of the Company, the consideration is remitted to it within the usual time limits;
- (c) ensure that the income of the Company is applied in accordance with the Articles;
- (d) ensure that the value per share of the Company is calculated in accordance with the UCI Law and the Articles; and
- (e) carry out the instructions of the Company or the Investment Manager unless they conflict with the UCI Law and the Articles.

In compliance with the provisions of the Investment Fund legislation, the Depositary may, subject to certain conditions and in order to effectively conduct its duties, delegate part or all of its safe-keeping duties.

When selecting and appointing a sub-custodian or other delegate, the Depositary shall exercise all due skill, care and diligence as required by the Investment Funds Legislation to ensure that it entrusts the Company's assets only to a delegate who may provide an adequate standard of protection.

The current list of sub-custodians and other delegates used by the Depositary and sub-delegates that may arise from any delegation is available at <http://www.aqrucits.com/our-funds> and the latest version of such list may be obtained by investors from the Company upon request.

To the extent required by the Investment Fund Legislation, the Depositary's liability shall not be affected by the fact that it has entrusted all or part of the assets in its care to a third party.

J.P. Morgan Bank Luxembourg S.A. shall assume its functions and responsibilities in accordance with the Part I the UCI Law as further described in a separate depositary agreement entered into with the Company.

The rights and duties of the Depositary are governed by the Depositary Agreement with effect as from 1 June 2016. The Depositary Agreement may be terminated by any party on 90 days' notice in writing. Subject to the Investment Funds Legislation, the Depositary Agreement may also be terminated by the Depositary on 30 days' notice in writing if (i) it is unable to ensure the required level of protection of the Company's investments under the Investment Funds Legislation because of the investment decisions of the Investment Manager and / or the Company; or (ii) the Company, or the Investment Manager on behalf of the Company, wishes to invest or to continue to invest in any jurisdiction notwithstanding the fact that such investment may expose the Company or its assets to material country risk or (iii) the Depositary is not able to obtain satisfactory legal advice confirming, among other things, that in the event of an insolvency of a sub-custodian or other relevant entity in such jurisdiction, the assets of the Company held locally in custody are unavailable for distribution among, or realisation for the benefit of, creditors of the such sub-custodian or other relevant entity.

The Depositary is liable to the Company or its investors for the loss of a financial instrument held in custody by the Depositary or any of its delegates. The Depositary shall, however, not be liable if it can prove that the loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary. The Depositary is also liable to the Company or its investors for all other losses suffered by them as a result of the Depositary's negligent or intentional failure to properly fulfil its duties in accordance with the Investment Funds Legislation.

## **DISTRIBUTORS**

With the consent of the Company, the Management Company has appointed AQR Capital Management, LLC as global distributor (the "**Distributor**") under the terms of the distribution agreement.

Under the terms of the distribution agreement, the Distributor may have the power to appoint sub-distributors and sales agents, subject to the consent of the Management Company. The Distribution Agreement contains provisions indemnifying the Distributor, and exempting the Distributor from liability, in certain circumstances. The Distributor may, with the prior approval of the Management Company, appoint one or more distributors, sub distributors or sales agents in respect of the Company or specific Funds.

The Distributor and any sub-distributors (and/or its or their directors, employees, related entities and connected persons and their respective directors and employees) may subscribe, directly or indirectly, for Shares during and after the relevant Initial Offer Period.

## SUBSCRIPTIONS

### Initial Offer

Shares in the Company may be subscribed for during the relevant Initial Offer Period at the Initial Offer Price and will be issued for the first time on the first Dealing Day after expiry of the relevant Initial Offer Period. The Directors may extend or shorten the Initial Offer Period at their discretion.

Cleared funds must be received prior to the end of the Initial Offer Period.

Upon the issue of any previously unissued or dormant Share Class, the Initial Offer Price in respect of such previously unissued or dormant Share Class will be the Initial Offer Price as set out in the Supplement of the relevant Sub-Fund.

### Subsequent Subscriptions

Following the close of the relevant Initial Offer Period, Shares will be available for subscription at the Subscription Price on each Dealing Day on a forward pricing basis (see below under “**Procedure**”). The Company may also charge a preliminary charge on such a subscription for Shares as set out in “Fees and Expenses”. Shareholders may also be required to pay a dilution levy in addition to the Subscription Price as set out in the section of the Prospectus headed “Dilution Levy” and the relevant Supplement. In case the relevant Fund is a master fund of another UCITS, the relevant feeder fund will not pay any sales charge.

The Directors are authorised from time to time to resolve to close a Fund or any Class of Shares to new subscriptions on such basis and on such terms as the Directors may in their absolute discretion determine.

### Procedure

Applicants for Shares during the relevant Initial Offer Period should complete and sign an application form and send it to the Administrator by mail (or, subject to the following, by facsimile) so as to be received by the Administrator no later than the end of the Initial Offer Period. Cleared funds in the relevant Reference Currency in respect of the subscription monies (including any preliminary charge) must be received by the Administrator by the same time. If the relevant application form and/or subscription monies is/are not received by these times, the application will be held over until the first Dealing Day after the close of the Initial Offer Period and Shares will then be issued at the relevant Subscription Price on that Dealing Day.

Thereafter, applicants for Shares, and Shareholders wishing to apply for additional Shares, must send their completed and signed application form by mail (or, subject to the following, by facsimile) to the Administrator by the Dealing Request Deadline. Applications received after this deadline for any given Dealing Day shall be treated as received prior to the next Dealing Request Deadline. Cleared funds in the relevant Reference Currency and for the full amount of the subscription monies (including any preliminary charge or dilution levy) must be received by the Administrator within three Business Days following the relevant Dealing Day.

Initial applications may be made by facsimile subject to the prompt receipt by the Administrator of the original signed application form and such other supporting documents (such as documentation in relation to money laundering prevention checks) as may be required. Thereafter, Shareholders wishing to apply for additional Shares may apply for Shares by facsimile and these applications may be processed without a requirement to submit original documentation. Amendments to a

Shareholder's registration details and payment instructions will only be effected on receipt of original documentation.

Fractions of Shares to two (2) decimal places will be issued if necessary. Interest on subscription monies will accrue to the Company.

The Company reserves the right to reject any application in whole or part at its absolute discretion, in which event the amount paid on application or the balance thereof (as the case may be) will be returned (without interest) as soon as practicable in the relevant Reference Currency at the risk and cost of the applicant.

The Company may agree to the issue of Shares in exchange for assets other than cash but will only do so where, in the absolute discretion of the Board of Directors, it is determined that the Company's acquisition of such assets in exchange for Shares complies with the investment policies and restrictions laid down in the relevant Supplement to this Prospectus for each Fund, has a value equal to the relevant Subscription Price of the Shares (including any preliminary charge or distribution levy) and is not likely to result in any material prejudice to the interests of Shareholders. Such contribution in kind to any Fund will be valued independently in a special report from the Company's auditor, established at the expense of the investor. Transaction charges will be chargeable to the investor in respect of such contribution in kind.

#### Minimum Investment

The Minimum Holding and the Minimum Initial Subscription for each Class in respect of each Fund are set out in the relevant Supplement.

#### Ineligible Applicants

The application form requires each prospective applicant for Shares to represent and warrant to the Company that, among other things, it is not an Ineligible Applicant.

In particular, the Shares may not be offered, issued or transferred to any person in circumstances which, in the opinion of the Directors, might result in the Company incurring any liability to taxation or suffering any other pecuniary disadvantage which the Company might not otherwise incur or suffer, or would result in the Company being required to register under any applicable US securities laws.

Shares may generally not be issued or transferred to any US Person, except that the Directors may authorise the issue or transfer of Shares to or for the account of a US Person provided that:

- (a) such US Person is a US Tax-Exempt Investor which certifies that it is an "accredited investor" and a "qualified purchaser", in each case as defined under applicable US federal securities laws;
- (b) such issue or transfer does not result in a violation of the United States Securities Act of 1933, as amended, (the "**1933 Act**") or the securities laws of any of the states of the United States;
- (c) such issue or transfer will not require the Fund to register under the United States Investment Company Act of 1940, as amended, or to file a prospectus with the US Commodity Futures Trading Commission or the US National Futures Association pursuant to regulations under the US Commodity Exchange Act ("**CEA**");

- (d) such issue or transfer will not cause any assets of the Fund to be “plan assets” for the purposes of Part 4 of Title 1 of the US Employee Retirement Income Security Act of 1974 (“ERISA”); and
- (e) such issue or transfer will not result in any adverse regulatory or tax consequences to the Fund or its Shareholders as a whole.

Each applicant for, and transferee of, Shares who is a US Person will be required to provide such representations, warranties or documentation as may be required by the Directors to ensure that these requirements are met prior to the issue or the registration of any transfer of Shares. If the transferee is not already a Shareholder, it will be required to complete the appropriate application form.

#### Form of Shares

All the Shares will be registered Shares and will only be issued in book-stock form, meaning that a Shareholder’s entitlement will be evidenced by an entry in the Company’s register of Shareholders, as maintained by the Administrator, and not by a share certificate.

#### Suspension

The Directors may declare a suspension of the issue of Shares in certain circumstances as described under “Suspension of Valuation of Assets” on page 38. No Shares will be issued during any such period of suspension.

#### Anti-Money Laundering

Measures aimed at the prevention of money laundering and terrorist financing require a detailed verification of the identity of an applicant for Shares and where applicable the beneficial owner, on a risk sensitive basis, as well as the monitoring of the relationship on an ongoing basis. Amendments to a Shareholder’s details and payment instructions will only be effected on receipt of original documentation.

Except for applicants applying through companies who are regulated professionals of the financial sector, bound in their country by rules on the prevention of money laundering equivalent to those applicable in Luxembourg, (i) the Administrator must verify the identity of the applicant and (ii) for that purpose any applicant applying in its own name or applying through companies established in non-equivalent countries, is obliged to submit to the Administrator in Luxembourg all necessary information, which the Administrator may reasonably require to verify. In the case of an applicant acting on behalf of a third party, the Administrator must also verify the identity of the beneficial owner(s). Furthermore, any such applicant hereby undertakes that it will notify the Administrator prior to the occurrence of any change in the identity of any such beneficial owner.

In the event of delay or failure by the applicant to produce any information required for verification purposes, the Administrator may refuse to accept the application and the subscription monies relating thereto or may refuse to settle a redemption request until proper information has been provided. Investors should note specifically that where redemption proceeds are requested to be remitted to an account which is not in the name of the investor, the Administrator shall settle such redemption requests in exceptional circumstances only and reserves the right to request such information as may be reasonably necessary in order to verify the identity of the investor and the owner of the account to which the redemption proceeds have been requested to be paid. The redemption proceeds will not be paid to a third party account unless

exceptional circumstances exist and/or if the investor and/or owner of the account provides such information.

Each applicant for Shares will be required to make such representations as may be required by the Directors in connection with anti-money laundering programmes, including, without limitation, representations that such applicant is not a prohibited country, territory, individual or entity listed on the United States Department of Treasury's Office of Foreign Assets Control ("**OFAC**") website and that it is not directly or indirectly affiliated with any country, territory, individual or entity named on an OFAC list or prohibited by any OFAC sanctions programmes. Each applicant will also be required to represent that subscription monies are not directly or indirectly derived from activities that may contravene United States federal or state, or international, laws and regulations, including anti-money laundering laws and regulations.

### Data Protection

The Company, acting as data controller, may collect information including personal data as defined in applicable legislation from a Shareholder or prospective Shareholder from time to time, such as their name, first name, contact details, etc., in order to develop and process the business relationship between the Shareholder or prospective Shareholder and the Company, and for other related activities. If a Shareholder or prospective Shareholder fails to provide such information in a form which is satisfactory to the Company, the Company may restrict or prevent the ownership of Shares in the Company and the Company, the Depositary and/or the Administrator (as the case may be) shall be held harmless and indemnified against any loss arising as a result of the restriction or prevention of the ownership of Shares.

By completing and returning an application form, Shareholders consent to the use of personal data by the Company for the purposes listed above. The Company may disclose personal data to its agents, service providers or if required to do so by force of law or regulatory authority. Shareholders will upon written request to be addressed to the Company's address as specified above be given access to their own personal data provided to the Company. Shareholders may request in writing the rectification of, and the Company will upon written request rectify, personal data. All personal data shall not be held by the Company for longer than necessary with regard to the purpose of the data processing.

The Company may need to disclose personal data to entities located in jurisdictions outside the EU, which may not have developed an adequate level of data protection legislation. In case of a transfer of data outside the EU, the Company will contractually ensure that the personal data relating to investors is protected in a manner which is equivalent to the protection offered pursuant to the Luxembourg data protection law. In particular, such personal data may be disclosed to the LTA (as defined below), which in turn may, acting as data controller, disclose it to foreign tax authorities.

The personal data is not intended to be used for marketing purposes.

## REDEMPTIONS

Shareholders may apply for redemption of all or any of their Shares on any Dealing Day specified for the relevant Class of Shares in the relevant Supplement for the Fund in question. Shareholders should send a completed redemption request in the form available from the Administrator to be received by the Administrator no later than the Dealing Request Deadline for the Dealing Day in question.

### Procedure

Redemption requests may be submitted to the Administrator by facsimile, provided that the original redemption request has been received and all the documentation required by the Company (including any documents in connection with anti-money laundering procedures) and the anti-money-laundering procedures have been completed.

Any redemption requests received after the Dealing Request Deadline for a Dealing Day will be processed on the next Dealing Day.

A request for a partial redemption of Shares will be refused, or the holding redeemed in its entirety, if, as a result of such partial redemption, the Net Asset Value of the Shares retained by the Shareholder would be less than the Minimum Holding (if any).

A redemption request, once given, is irrevocable save with the consent of the Directors (which may be withheld in their discretion).

### Redemption Price

The Redemption Price per Share will be equal to the Net Asset Value per Share as of the relevant Dealing Day determined in accordance with the policy set out below on page 21. The Company may charge a redemption charge as set out in the Supplement for the Fund in question. Shareholders may also be required to pay a dilution levy as set out in the section of this Prospectus headed "Dilution Levy". Both a redemption charge and a dilution levy would have the result of reducing the redemption proceeds. In case the relevant Fund is a master fund of another UCITS, the relevant feeder fund will not pay any redemption charge.

### Settlement

Payment of redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within the number of Business Days reflected in the Supplement for the relevant Fund. Except where otherwise stated in the relevant Supplement, payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.

### Suspension

The Directors may declare a suspension of the redemption of Shares in certain circumstances as described under "Suspension of Valuation of Assets" on page 38. No Shares will be redeemed during any such period of suspension.

### Compulsory Redemptions

The Directors may effect a compulsory redemption of any or all Shares held by or for the benefit of a Shareholder at any time for the purpose of ensuring that no Shares are acquired or held by any person in breach of the law or the requirements of any country or governmental authority or by any person in circumstances which in the opinion of the Board of Directors might result in the Company, the Management Company or the Investment Manager incurring any liability or taxation or suffering any other disadvantage which the Company, the Management Company or the Investment Manager may not otherwise have incurred or suffered (including, but not limited to, Shareholders who become Ineligible Applicants or US Persons who are not able to meet the conditions set out on page 16). Furthermore, the Directors may effect a compulsory redemption of any or all Shares held by or for the benefit of a Shareholder at any time in exceptional circumstances where they determine that such a compulsory redemption is in the interest of investors. Subject to the relevant Supplement, if the Net Asset Value of the Shares held by the Shareholder is less than the Minimum Holding (if any), the Company reserves the right to require compulsory redemption of all Shares of the relevant Class held by a Shareholder or alternatively to effect a compulsory exchange of all Shares of the relevant Class held by a Shareholder for Shares of another Class in the same Fund which have the same Reference Currency but a lower Minimum Holding (if any). Where the Net Asset Value of the Shares held by a Shareholder is less than the Minimum Holding (if any) and the Company decides to exercise its right to compulsorily redeem for this reason, the Company will notify the Shareholder in writing and allow such Shareholder thirty (30) calendar days to purchase additional Shares to meet the minimum requirement.

### Deferred Redemptions

The Directors may (but are not obliged to) defer redemptions at a particular Dealing Day to the next Dealing Day where the requested redemptions exceed 10% of a Fund's Net Asset Value. The Directors will ensure the consistent treatment of all Shareholders who have sought to redeem Shares at any Dealing Day at which redemptions are deferred. The Directors will pro-rate all such redemption requests to the stated level (i.e. 10% of the Fund's Net Asset Value) and will defer the remainder until the next Dealing Day. The Directors will also ensure that all deals relating to an earlier Dealing Day are completed before those relating to a later Dealing Day are considered.

The Directors currently expect not to exercise such power to defer redemptions except to the extent that they consider that existing Shareholders would otherwise be materially prejudiced or that such exercise is necessary to comply with applicable law or regulation.

### In-Specie Redemptions

The Company shall have the right, if the Board of Directors so determines, to satisfy payment of the Redemption Price, to any Shareholder who agrees, in specie by allocating to such Shareholder investments from the portfolio of assets set up in connection with such Fund equal in value (calculated in the manner described in the Articles) as of the Dealing Day, when the Redemption Price is calculated, to the value of the Shares to be redeemed. The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other holders of Shares and the valuation used shall be confirmed by a special report of the auditor of the Company. The costs of any such transfers shall be borne by the transferee.

## Anti-Money Laundering

Investors should note that the Directors may refuse to settle a redemption request if it is not accompanied by such additional information as they, or the Administrator on their behalf, may reasonably require. This power may, without limitation to the generality of the foregoing, be exercised where proper information has not been provided for anti-money laundering verification purposes as described under “Subscriptions”.

## **EXCHANGING BETWEEN FUNDS OR CLASSES**

Except when issues and redemptions of Shares have been suspended in the circumstances described under “Suspension of Valuation of Assets” on page 38, holders of Shares may request an exchange of some or all of their Shares in one Class or Fund (the “**Original Class**”) for Shares in another Class or Fund (the “**New Class**”). Such exchanges can only take place, if following the exchange, the Shareholder’s holding in the New Class will satisfy the criteria and applicable minimum holding requirements (if any) of that Class or Fund.

### Procedure

Shareholders should send a completed exchange request in the form available from the Administrator to be received by the Administrator prior to the earlier of the Dealing Request Deadline for redemptions in the Original Class and the Dealing Request Deadline for subscriptions in the New Class. Any applications received after such time will be dealt with on the next Dealing Day.

The Directors may at their absolute discretion reject any request for the exchange of Shares in whole or in part.

Fractions of Shares to two decimal places may be issued by the Company on exchange where the value of Shares exchanged from the Original Class is not sufficient to purchase an integral number of Shares in the New Class and any balances representing entitlements of less than a fraction of a Share to two decimal places will be retained by the Company in order to discharge administration costs.

The Articles authorise the Directors to charge an exchange fee. The Directors shall only charge an exchange fee if a higher preliminary charge is applicable to the Shares of the Fund or the Class being acquired. In such case the exchange fee shall not exceed the difference between the preliminary charges applicable to the relevant Funds or Classes. Any exchange fee will be retained by the relevant Fund for the benefit of the existing Shareholders.

An exchange request, once given, is irrevocable save with the consent of the Directors (which may be withheld in their discretion) or in the event of a suspension of calculation of the Net Asset Value of the Company in respect of which the exchange requests are made.

An exchange of Shares of one Fund or Class for Shares of another Fund or Class will be treated as a redemption of Shares and a simultaneous purchase of Shares. An exchanging Shareholder may, therefore, realise a taxable gain or loss in connection with the conversion under the laws of the country of the shareholder’s citizenship, residence or domicile. No redemption charge will be levied on a redemption of Shares for the purpose of any exchange.

The number of Shares of the New Class to be issued will be calculated in accordance with the following formula:

$$S = \frac{(R \times NAV \times ER)}{SP}$$

where

S is the number of Shares of the New Class to be allotted.

R is the number of Shares in the Original Class to be redeemed.

NAV is the Net Asset Value per Share of the Original Class as at the relevant Dealing Day.

ER is the currency exchange factor (if any) as determined by the Administrator as representing the effective rate of exchange of settlement on the relevant Dealing Day applicable to the transfer of assets between the relevant Funds or Classes where the Reference Currencies are different or, where the Reference Currencies are the same, ER = 1.

SP is the Net Asset Value per Share of the New Class as at the relevant Dealing Day.

All terms and notices regarding the redemption of Shares shall equally apply to the exchange of Shares and, in particular, in respect of an exchange of Shares of one Fund for Shares of another Fund a dilution levy may be applied to “NAV” or “SP” above and the accrued Performance Fee would crystallise. For the avoidance of doubt, no redemption charge may apply to “NAV” above.

## VALUATION

### Net Asset Value and Valuation of Assets

The Net Asset Value of each Fund will be calculated by the Administrator as of each Valuation Day in accordance with the Articles.

The Net Asset Value of a Fund shall be determined as of the Valuation Day by valuing the assets of the relevant Fund (including income accrued but not collected) and deducting the liabilities of the relevant Fund.

In the event that the Investment Manager hedges the foreign currency exposure of any Class of Shares denominated in a currency other than the Reference Currency of the relevant Fund, the costs and any benefit of such hedging will be allocated solely to the relevant Class of Shares to which the hedging relates. The Net Asset Value of a Fund will be expressed in the Reference Currency of the Fund, or in such other currency as the Directors may determine either generally or in relation to a particular Class or in a specific case.

The Net Asset Value per Share shall be calculated as of the Valuation Day by dividing the Net Asset Value of the relevant Fund or attributable to a Class or Series by the total number of Shares in issue or deemed to be in issue in the Fund, Class or Series as of the relevant Valuation Day and rounding the resulting total to 2 decimal places or such number of decimal places as the Directors may determine.

In determining the value of the assets of the Company:

- (A) Transferable Securities and Money Market Instruments which are quoted, listed or traded on a Regulated Market save as hereinafter provided at (D), (E), (F), (G) and (H) will be valued at last traded market prices, which may be, the closing market price, the mid-market price or the latest market price, as appropriate. Where a security is listed or dealt in on more than one Regulated Market the relevant exchange or market shall be the principal stock exchange or market on which the security is listed or dealt on. Investments listed or traded on a Regulated Market, but acquired or traded at a premium or at a discount outside or off the relevant exchange or market may be valued taking into account the level of premium or discount as of the Valuation Day provided that a competent person (having been appointed by the Directors and approved for such purpose by the Depositary) shall be satisfied that the adoption of such a procedure is justifiable in the context of establishing the probable realisation value of the security.
- (B) The value of any transferable security which is not quoted, listed or dealt in on a Regulated Market or which is so quoted, listed or dealt in but for which no such quotation or value is available or the available quotation or value is not representative shall be the probable realisation value as estimated with care and good faith by (i) the Directors or (ii) a competent person, firm or corporation (including the Investment Manager) selected by the Directors and approved for the purpose by the Depositary or (iii) any other means provided that the value is approved by the Depositary. Where reliable market quotations are not available for fixed income securities the value of such securities may be determined using matrix methodology compiled by the Directors whereby such securities are valued by reference to the valuation of other securities which are comparable in rating, yield, due date and other characteristics.
- (C) Cash on hand or on deposit will be valued at its nominal / face value plus accrued interest, where applicable, to the end of the relevant Valuation Day.
- (D) Derivative contracts traded on a Regulated Market shall be valued at the settlement price on the relevant market. If the settlement price is not available, the value shall be the probable realisation value estimated with care and in good faith by (i) the Directors or the Investment Manager or (ii) a competent person, firm or corporation selected by the Directors and approved for the purpose by the Depositary or (iii) any other means provided that the value is approved by the Depositary. Derivative contracts which are traded 'over-the-counter' will be valued daily either (i) on the basis of a quotation provided by the relevant counterparty and such valuation shall be approved or verified at least weekly by a party who is approved for the purpose by the Depositary and who is independent of the counterparty; or (ii) using an alternative valuation provided by a competent person appointed by the Directors and approved for the purpose by the Depositary or a valuation by any other means provided that the value is approved by the Depositary (the "Alternative Valuation"). Where such Alternative Valuation method is used the Company will follow international best practice and adhere to the principles on valuation of OTC instruments established by bodies such as the International Organisation of Securities Commissions or the Alternative Investment Management Association and will be reconciled to the counterparty valuation on a monthly basis. Where significant differences arise these will be promptly investigated and explained.
- (E) Forward foreign exchange contracts shall be valued in the same manner as derivatives contracts which are not traded in a regulated market or by reference to freely available market quotations.

- (F) Notwithstanding paragraph (A) above units in collective investment schemes shall be valued at the latest available net asset value per unit or mid price as published by the relevant collective investment scheme or, if listed or traded on a Regulated Market, in accordance with (A) above.
- (G) The Directors may value securities having a residual maturity not exceeding three months and having no specific sensitivity to market parameters including credit risk, using the amortised cost method of valuation.
- (H) The value of Money Market Instruments not listed or dealt in on any stock exchange or any other Regulated Market and with remaining maturity of less than twelve (12) months and of more than sixty (60) days is deemed to be the market value thereof, increased by any interest accrued thereon. Money Market Instruments with a remaining maturity of sixty (60) days or less will be valued by the amortised cost method, which approximates market value.
- (I) The Directors may adjust the value of any investment if having regard to its currency, marketability, applicable interest rates, anticipated rates of dividend, maturity, liquidity or any other relevant considerations, they consider that such adjustment is required to reflect the fair value thereof.
- (J) Any value expressed otherwise than in the Reference Currency of the relevant Fund shall be converted into the Reference Currency of the relevant Fund at the prevailing exchange rate (whether official or otherwise) that the Directors shall determine to be appropriate.
- (K) Where the value of any investment is not ascertainable as described above, the value shall be the probable realisation value estimated by the Directors with care and in good faith or by a competent person approved for the purpose by the Depositary.
- (L) If the Directors deem it necessary a specific investment may be valued under an alternative method of valuation chosen by the Directors and approved by the Depositary.

In calculating the Net Asset Value of each Fund the following principles will apply:

- (A) In determining the value of investments of each Fund the Directors may at their discretion instead value the investments of each Fund (i) at lowest market dealing bid prices where on any Dealing Day the value of all redemption requests received exceeds the value of all applications for Shares received for that Dealing Day or at highest market dealing offer prices where on any Dealing Day the value of all applications for Shares received for that Dealing Day exceeds the value of all redemption requests received for that Dealing Day, in each case in order to preserve the value of the Shares held by existing Shareholders; or (ii) at bid and offer prices, where a fund is dual priced and bid and offer value is used to determine the price at which Shares are issued and redeemed.
- (B) Every Share agreed to be issued by the Directors with respect to each Dealing Day shall be deemed to be in issue as of the Valuation Day for the relevant Dealing Day and the assets of the Fund shall be deemed to include not only cash and property in the hands of the Depositary but also the amount of any cash or other property to be received in respect of Shares agreed to be issued after deducting therefrom (in the case of Shares agreed to be issued for cash) or providing for preliminary charges.

- (C) Where investments have been agreed to be purchased or sold but such purchase or sale has not been completed, such investments shall be included or excluded and the gross purchase or net sale consideration excluded or included as the case may require as if such purchase or sale had been duly completed unless the Directors have reason to believe such purchase or sale will not be completed.
- (D) There shall be added to the assets of the relevant Fund any actual or estimated amount of any taxation of a capital nature which may be recoverable by the Company which is attributable to that Fund.
- (E) There shall be added to the assets of the relevant Fund a sum representing any interest, dividends or other income accrued but not received and a sum representing unamortised expenses.
- (F) There shall be added to the assets of the relevant Fund the total amount (whether actual or estimated by the Directors or their delegate) of any claims for repayment of any taxation levied on income or capital gains including claims in respect of double taxation relief.
- (G) Where notice of the redemption of Shares has been received by the Company with respect to a Fund for a particular Dealing Day and the cancellation of such Shares has not been completed, the Shares to be redeemed shall be deemed not to be in issue as of the Valuation Day and the value of the assets of the Fund, as of the Valuation Day, shall be deemed to be reduced by the amount payable upon such redemption.
- (H) There shall be deducted from the assets of the Fund:
  - (1) the total amount of any actual or estimated liabilities properly payable out of the assets of the Fund including any and all outstanding borrowings of the Fund, interest, fees and expenses payable on such borrowings and any estimated liability for tax and such amount in respect of contingent or projected expenses as the Directors consider fair and reasonable as of the relevant Valuation Day;
  - (2) such sum in respect of tax (if any) on income or capital gains realised on the investments of the Company or Fund as in the estimate of the Directors will become payable;
  - (3) the amount (if any) of any distribution declared but not distributed in respect thereof;
  - (4) the remuneration of the Administrator, the Depositary, the Management Company, the Investment Manager, any Distributor and any other providers of services to the Fund accrued but remaining unpaid together with a sum equal to the value added tax chargeable thereon (if any);
  - (5) (the total amount (whether actual or estimated by the Directors) of any other liabilities properly payable out of the assets of the Fund (including all establishment, operational and ongoing administrative fees, costs and expenses) as of the relevant Valuation Day;

- (6) an amount as of the relevant Valuation Day representing the projected liability of the Fund in respect of costs and expenses to be incurred by the Fund in the event of a subsequent liquidation;
- (7) an amount as of the relevant Valuation Day representing the projected liability of the relevant calls on Shares in respect of any warrants issued and/or options written by the Fund or Class of Shares; and
- (8) any other liability which may properly be deducted.

The Directors may at their discretion permit any other method of valuation to be used if they consider that such method of valuation better reflects value generally or in particular markets or market conditions and is in accordance with good practice.

In the absence of fraud, bad faith, gross negligence or manifest error, every decision taken by the Directors or any committee of the Directors or any duly authorised person on behalf of the Company in calculating the Net Asset Value of a Class or the Net Asset Value per Share shall be final and binding on the Company and on present, past or future Shareholders, subject to the Articles.

The Directors have delegated to the Administrator the day to day responsibility for the calculation of the Net Asset Value and Net Asset Value per Share.

#### Publication of Net Asset Value per Share

The Net Asset Value per Share may be obtained free of charge from, and will be available at, the offices of the Administrator during business hours in Luxembourg.

#### Suspension of Valuation of Assets

The Directors may at any time and from time to time temporarily suspend the determination of the Net Asset Value of the Company or a Fund and the issue, exchange and redemption of Shares in any Fund:

- (A) during the whole or part of any period (other than for ordinary holidays or customary weekends) when any of the Regulated Markets on which the Company's investments are quoted, listed, traded or dealt are closed or during which dealings therein are restricted or suspended or trading is suspended or restricted; or
- (B) during the whole or part of any period when circumstances outside the control of the Directors exist as a result of which any disposal or valuation by the Company of investments of the Fund is not reasonably practicable or would be detrimental to the interests of Shareholders or it is not possible to transfer monies involved in the acquisition or disposition of investments to or from the relevant account of the Company; or
- (C) during the whole or part of any period when any breakdown occurs in the means of communication normally employed in determining the price or value of any of the Company's investments of the relevant Fund; or
- (D) during the whole or any part of any period when for any reason the price or value of any of the Company's investments cannot be reasonably, promptly or accurately ascertained; or

- (E) during the whole or any part of any period when subscription proceeds cannot be transmitted to or from the account of the Company or the Fund being unable to repatriate funds required for making redemption payments or when such payments cannot, in the opinion of the Directors, be carried out at normal rates of exchange; or
- (F) following a possible decision to merge, liquidate or dissolve the Company or, if applicable, one or several Funds; or
- (G) following the suspension of the calculation of the net asset value per share/unit, the issue, redemption and/or the conversion at the level of a master fund in which the Fund invests in its quality as feeder fund of such master fund; or
- (H) if any other reason makes it impossible or impracticable to determine the value of a portion of the investments of the Company or any Fund; or
- (I) if, in exceptional circumstances, the Directors, determine that suspension of the determination of Net Asset Value is in the interest of Shareholders (or Shareholders in that Fund as appropriate).

Any suspension of valuation of the Net Asset Value of the Company or a Fund and the issue, exchange and redemption of Shares in any Class shall be notified to Shareholders having made an application for subscription, redemption or conversion of Shares for which the calculation of the Net Asset Value has been suspended.

Such suspension as to any Fund shall have no effect on the calculation of the Net Asset Value per Share, the issue, redemption and conversion of Shares of any other Fund, if the assets within such other Fund are not affected to the same extent by the same circumstances.

#### NAV Calculation Thresholds

In accordance with CSSF Circular 02/77, the Company will apply the following tolerance thresholds in determining the materiality of a NAV calculation error for each Sub-Fund as indicated in the relevant Supplement.

<b>Type of Sub-Fund</b>	<b>Tolerance Threshold</b>
Money market UCIs / cash funds	0.25% of NAV
Bond UCIs	0.50% of NAV
Shares and other financial assets' UCIs	1.00% of NAV
Mixed UCIs	0.50% of NAV

#### **DILUTION LEVY**

In certain circumstances, the value of the property of a Fund may be reduced as a result of charges incurred in dealings in the Fund's investments and of any spread between the buying and selling prices of these investments. In order to offset this effect, known as "dilution", and the consequent potential adverse effect on the existing or remaining Shareholders, the Board of Directors has the power to charge a "dilution levy" when Shares are bought or sold. If charged, the dilution levy will be shown in addition to (and not part of) the Subscription Price or Redemption Price of the Shares, as the case may be, in the relevant documentation. If charged, the dilution levy would be paid to the Company and would become part of the property of the relevant Fund

thus protecting the value of the remaining Shareholders' interests. It is not, however, possible to predict accurately whether dilution will occur at any future point in time. Any dilution levy charged must be fair to all Shareholders and potential Shareholders. In particular, the dilution levy may be charged in the following circumstances:

- (a) on a Fund experiencing large levels of net subscriptions (i.e. subscriptions less redemptions) relative to its size;
- (b) on a Fund experiencing large levels of net redemptions (i.e. redemptions less subscriptions) relative to its size; and
- (c) in any other case where the Board of Directors is of the opinion that the interests of existing/continuing Shareholders and potential Shareholders require the imposition of a dilution levy.

In order to reduce inconsistency in the application of any dilution levy, the Board of Directors may take account of the trend of the Fund in question to expand or to contract; and the transactions in Shares as of a particular Valuation Day.

Details of the dilution levy for each Fund are set out in the relevant Supplement.

## **FEES AND EXPENSES**

Any fees or expenses payable by a Shareholder or out of the assets of the Company are set out in this section.

### Preliminary Charge

The Company is permitted to make a preliminary charge on the subscription of Shares by an investor. The current percentage rates of charge are shown in the relevant Supplement for each Fund. The maximum amount for such preliminary charge will be 3% of the value of the relevant subscription. The charge is calculated prior to the addition of any dilution levy. Any preliminary charge will be retained by the relevant Fund.

### Redemption Charge

The Investment Manager is permitted to make a redemption charge on the redemption of Shares by an investor. The current percentage rates of charge are shown in the relevant Supplement for each Fund. The charge is calculated prior to the addition of any dilution levy, as set out in the relevant Supplement. Any redemption charge will be retained by the relevant Fund.

### Management Company Fee

The Management Company will receive a management company fee and reasonable out of pocket expenses for the provision of its services. The management company fee, which is expressed as a percentage of the Net Asset Value, is specified in the relevant Supplement. The Management Company Fee shall be part of the Administrative and Operating Fee detailed below.

### Investment Management Fee

Unless otherwise stated in the relevant Supplement, in respect of each Class, the Investment Manager will be entitled to receive an Investment Management Fee equal to the rate set out in the relevant Supplement per annum of the Net Asset Value of the Shares of the relevant Class.

The Investment Manager may from time to time, and at its sole discretion, and out of its own resources decide to waive or return all or a portion of the Investment Management Fees with respect to management affiliates or other designated investors.

The Investment Manager may from time to time, and in its sole discretion, and out of its own resources decide to rebate to some or all Shareholders (including the directors), their agents or to intermediaries, part or all of the Investment Management Fee and/or Performance Fee.

Subject to applicable law and regulations, the Investment Manager, at its discretion, may on a negotiated basis, enter into private arrangements with a distributor under which the Investment Manager makes payments to or for the benefit of such distributor which represent a rebate of all or part of the fees paid by the Fund to the Investment Manager. In addition, the Investment Manager or a distributor at their discretion, subject to applicable law and regulations, may on a negotiated basis enter into private arrangements with a holder or prospective holder of Shares under which the Investment Manager or distributor are entitled to make payments to the holders of Shares of part of all of such fees. Consequently, the effective net fees payable by a holder of Shares who is entitled to receive a rebate under the arrangements described above may be lower than the fees payable by a holder of Shares who does not participate in such arrangements. Such arrangements reflect terms privately agreed between parties other than the Fund, and for the avoidance of doubt, the Fund cannot, and is under no duty to, enforce equality of treatment between Shareholders by other entities.

The Investment Manager shall also be entitled to be repaid all of its disbursements out of the assets of the Company, including legal fees, couriers' fees and telecommunication costs and expenses which shall be at normal commercial rates together with value added tax, if any, thereon.

#### Performance Fee

The Investment Manager may also be entitled to receive a Performance Fee from the Company, the details of which are set out in the relevant Supplement for each Fund.

#### Depositary's Fees

The Company shall pay to the Depositary an annual fee, which shall be part of the Administrative and Operating Fee detailed below.

#### Administrator's Fees

The Company shall pay to the Administrator an annual fee, which shall be part of the Administrative and Operating Fee detailed below.

#### Directors' Fees

The Company shall pay to Mr. Nummer and Mr. Thomas an annual fee, which is published in the corresponding annual/semi-annual report. Mr. Kalb and Mr. Bastow shall not receive a fee for acting as Director. Such Directors' fees shall be part of the Administrative and Operating Fee detailed below.

#### Company Expenses and Fees

The Company bears its own investment expenses and fees. Where applicable, these expenses include (but are not limited to) (a) all investment expenses (including, but not

limited to, specific expenses incurred in obtaining systems, research and other information utilised for portfolio management purposes, including the costs of statistics and services, service contracts for quotation equipment and related hardware and software), (b) all fees and expenses of transactional and trade-related services including, for the avoidance of doubt and without limitation, costs incurred in arranging and participating in stocklending programme, (c) all brokers' commissions, all fees for investment research and/or trade ideas, all borrowing charges on short positions taken through derivative instruments and any issue or transfer taxes or stamp duties chargeable in connection with securities transactions, (d) all interest on borrowings (e) all litigation, regulatory investigation and indemnification expenses and extraordinary expenses not incurred in the ordinary course of business, (f) the cost of termination of the Company or any Fund, (g) the costs of any liability insurance obtained on behalf of the Company or the Investment Manager.

#### Administrative and Operating Fee

The Company, on behalf of and out of the assets of the Fund for the relevant Class of Shares, may levy an Administrative and Operating Fee. The Administrative and Operating Fee will be a percentage of the Net Asset Value of a Class of Shares, and such percentage of any Administrative and Operating Fee will be specified in the relevant Supplement. The Administrative and Operating Fee shall be calculated and accrued as an expense of the relevant Share Class and shall be payable monthly in arrears.

The Administrative and Operating Fee is intended to cover the fees and expenses connected with the establishment, management and operation of the Company, each Fund and Share Class, where applicable, including, but not limited to:

- (a) the initial establishment and offering expenses (including the lump sum capital levy, legal and accounting fees) of any Fund launched;
- (b) the fees and reasonable out of pocket expenses of the Depositary (including other banks and financial institutions entrusted by the Depositary with the custody of assets) and Administrator;
- (c) the Management Company Fee;
- (d) audit fees (including in connection with the preparation of the Company's tax returns), professional advisers, the ongoing costs of registrations of the Company and its Funds with any regulatory authority in Luxembourg, the costs and expenses of any rating agency, the costs and expenses of listing and maintaining a listing of the Shares on any Stock Exchange, fees payable to an index sponsor;
- (e) all communication expenses with respect to investor services and all expenses of meetings of Shareholders and of preparing, printing and distributing financial and other reports, proxy forms, prospectuses and similar documents;
- (f) the fees, costs and expenses incurred in connection with preparing or submitting any report, filing or application required by any self-regulatory organisation, regulator or governmental entity of any competent jurisdiction;
- (g) the fees and expenses of the Directors (in accordance with the Articles), including the reasonable travel expenses of the Directors and all of the costs of directors' and officers' liability insurance for the benefit of the Directors (if any); and

- (h) the fees and expenses of any regulator, paying agent, representative, distributor or correspondent bank appointed in connection with the registration of the Company (or any Sub- Fund) or the marketing of Shares or the application for and maintenance of particular tax treatment for the Shares in any jurisdiction.

In the event that the Administrative and Operating Fee is insufficient to cover the fees and expenses referred to above, the Investment Manager will cover any shortfall. Similarly, any surplus will revert to the Investment Manager.

For the avoidance of doubt, the Investment Management Fee and Performance Fee (if any) are not included in the Administrative and Operating Fee.

#### Allocation of Assets, Charges and Expenses

All fees, duties, charges and expenses are charged to the relevant Fund in which they were incurred.

#### Costs of Establishment

All costs and expenses of establishing the Company were borne by AQR Capital Management, LLC. The total organisational costs and expenses of establishing new Funds will be payable and borne by such Funds as part of the Administrative and Operating Fee detailed above. The organisational costs and expenses for the Funds may at the discretion of the Directors be amortised on a straight-line basis over a period of up to 5 years. The Directors may, in their absolute discretion, shorten the period over which such costs and expenses are amortised. It is expected that such accounting treatment will not be material to the financial statements of the Company. If the effect of the accounting treatment becomes material in the future and there is a requirement to write off any unamortised balance of establishment expenses in the financial statement, the Directors will reconsider this policy.

#### Charges to Capital

Where the Investment Manager determines that the generation of income in a Fund has equal or higher priority to capital growth, all or part of the fees and expenses of that Fund may be charged against capital instead of against income. This will constrain and may forego the potential for future capital growth.

## **TAXATION**

### General

The sections below on Luxembourg taxation are brief summaries of the tax advice received by the Directors relating to current law and practice which may be subject to change and interpretation.

The information given below does not constitute legal or tax advice and prospective investors should consult their own professional advisers on the possible tax consequences of buying, selling, exchanging, holding or redeeming Shares under the laws of the jurisdictions in which they may be subject to tax. Investors are also advised to inform themselves as to any exchange control regulations applicable in their country of residence.

Generally the tax consequences of acquiring, holding, exchanging, redeeming or disposing of Shares in the Company will depend on the relevant laws of the jurisdiction to which the Shareholder is subject. Shareholders resident in or citizens of certain countries which have anti-offshore fund legislation may have a current liability to tax on the undistributed gains of the Company. These consequences will vary with the law and practice of the Shareholder's country of residence, domicile or incorporation and with his personal circumstances. The Directors, the Company and each of the Company's agents shall have no liability in respect of the individual tax affairs of Shareholders.

The Shares of the Company shall be widely available. The Directors confirm that the intended categories of investors are not "restricted" for the purposes of the Offshore Fund (Tax) Regulations 2009 and the Offshore Funds (Tax) (Amendment) Regulations 2011. Shares shall be marketed and made available sufficiently widely to reach the intended categories of investors, and in a manner appropriate to attract those categories of investors.

Dividends, interest and capital gains (if any) which the Company receives with respect to investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located. It is anticipated that the Company may not be able to benefit from reduced rates of withholding tax in double taxation agreements between Luxembourg and such countries. If this position changes in the future and the application of a lower rate results in a repayment to the Company the Net Asset Value will not be re-stated and the benefit will be allocated to the existing Shareholders rateably at the time of the repayment.

### **Luxembourg Taxation**

The following summary is based on the law and practice currently applicable in Luxembourg and is subject to changes therein.

#### **Taxation of the Company in Luxembourg**

The Company is not liable to any Luxembourg tax on profits or income. The Company is, however, liable in Luxembourg to a *taxe d'abonnement* of 0.05% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the aggregate Net Asset Value of the Funds at the end of the relevant calendar quarter. No such tax is payable on the value of assets which consist of units or shares of other Luxembourg funds that have already been subject to such tax. No stamp duty or other tax is payable in Luxembourg on the issue of Shares. No Luxembourg tax is payable on the realised capital appreciation of the assets of the Fund.

A reduced *taxe d'abonnement* rate of 0.01% per annum or an exemption of the *taxe d'abonnement* will be applicable to certain Classes of Shares reserved to institutional investors pursuant to article 174 (2) c) of the UCI Law as well as to certain Funds investing exclusively in money market instruments. The effective rate applicable to the various Classes of Shares is disclosed in the relevant Supplement of each Fund.

The Company is liable to a fixed registration duty of EUR 75.00 on the registration of its incorporation or of any amendment to its articles of incorporation.

Dividends and interest received by the Company on its investments may be subject to non-recoverable withholding or other taxes in the countries of origin.

In addition, the Company may be liable to certain taxes in countries where the Company carries out its investment activities. Those taxes are not recoverable by the Company in Luxembourg.

### **Taxation of Shareholders in Luxembourg**

Under current legislation, Shareholders are not subject to any capital gains, or income tax in Luxembourg (except for: those domiciled, resident or having a permanent establishment in Luxembourg).

Investors should inform themselves of, and when appropriate consult their professional advisers on, the possible tax consequences of subscribing for, buying, holding, converting, redeeming or otherwise disposing of Shares under the laws of their country of citizenship, residence, domicile and/or incorporation.

### **General**

It is expected that Shareholders in the Company will be resident for tax purposes in many different countries. Consequently, no attempt is made in this Prospectus to summarise the taxation consequences for each investor of subscribing, converting, holding or redeeming or otherwise acquiring or disposing of Shares in the Company. These consequences will vary in accordance with the law and practice currently in force in a Shareholder's country of citizenship, residence, domicile and/or incorporation and with his personal circumstances.

Investors should inform themselves of, and when appropriate consult their professional advisers on, the possible tax consequences of subscribing for, buying, holding, converting, redeeming or otherwise disposing of Shares under the laws of their country of citizenship, residence, domicile and/or incorporation.

### **FATCA**

The Foreign Account Tax Compliance Act ("**FATCA**"), which is an amendment to the U.S. Internal Revenue Code, was enacted in the United States in 2010. Generally, FATCA requires financial institutions outside the US ("**foreign financial institutions**" or "**FFIs**") to provide the U.S. Internal Revenue Service ("**IRS**") with information about financial accounts held directly or indirectly by certain specified US persons. A 30% withholding tax is imposed on certain types of US source income paid to an FFI that fails to comply with FATCA.

On 28 March 2014, the Grand-Duchy of Luxembourg entered into a Model 1 Intergovernmental Agreement ("**IGA**") with the United States of America and a memorandum of understanding in respect thereof. As a FFI under the IGA, the Company is required to comply with FATCA and intends to comply with the provisions of the IGA.

This status includes the obligation of the Company to regularly obtain and verify information on all of its Shareholders. Upon request of the Company, each Shareholder shall agree to provide certain information, including, in case of a Non-Financial Foreign Entity ("**NFFE**") (within the meaning of the IGA), the direct or indirect U.S. owners above a certain threshold of ownership of such NFFE, along with the required supporting documentation. Similarly, each Shareholder shall agree to actively provide to the Company within thirty days any information that would affect its status, as for instance a new mailing address or a new residency address.

FATCA and the IGA may result in the obligation for the Company to disclose the name, address and taxpayer identification number (if available) of the Shareholder as well as information such as account balances, income and gross proceeds (non-exhaustive list) to the Luxembourg tax authorities (*administration des contributions directes*) under the terms of the IGA. Such information will be onward reported by the Luxembourg tax authorities to the IRS.

Additionally, the Company is responsible for the processing of personal data and each Shareholder has a right to access the data communicated to the Luxembourg tax authorities and to correct such data (if necessary). Any data obtained by the Company are to be processed in accordance with the Luxembourg law dated 2 August 2002 on the protection of persons with regard to the processing of personal data, as amended. Although the Company will attempt to satisfy any obligation imposed on it to avoid imposition of FATCA withholding tax, no assurance can be given that the Company will be able to satisfy these obligations. If the Company becomes subject to a withholding tax as result of the FATCA regime, the value of the Shares held by the Shareholders may suffer material losses. A failure for the Company to obtain such information from each Shareholder and to transmit it to the Luxembourg tax authorities may trigger the 30% withholding tax to be imposed on payments of U.S. source income and from 2019 on proceeds from the sale of property or other assets that could give rise to U.S. source interest and dividends.

Any Shareholder that fails to comply with the Company's documentation requests may be charged with any taxes, financial penalties and costs incurred by the Company attributable to such Shareholder's failure to provide the information and the Company may, in its sole discretion, redeem the Shares of such Shareholder.

Shareholders should consult a U.S. tax advisor or otherwise seek professional advice regarding the above requirements.

#### Common Reporting Standard

The Company may be subject to the Standard for Automatic Exchange of Financial Account Information in Tax matters (the "**Standard**") and its Common Reporting Standard (the "**CRS**") as set out in the law dated 18 December 2015 implementing the CRS in Luxembourg (the "**CRS Law**").

Under the terms of the CRS Law, the Company is likely to be treated as a Luxembourg Reporting Financial Institution. As such, as of 30 June 2017 and without prejudice to other applicable data protection provisions as set out in the Company documentation, the Company will be required to annually report to the Luxembourg tax authority (the "**LTA**") personal and financial information related, *inter alia*, to the identification of, holdings by and payments made to (i) certain investors as per the CRS Law (the "**Reportable Persons**") and (ii) Controlling Persons of certain non-financial entities ("**NFEs**") which are themselves Reportable Persons. This information, as exhaustively set out in Annex I of the CRS Law (the "**Information**"), will include personal data related to the Reportable Persons.

The Company's ability to satisfy its reporting obligations under the CRS Law will depend on each investor providing the Company with the Information, along with the required supporting documentary evidence. In this context, the investors are hereby informed that, as data controller, the Company will process the Information for the purposes as set out in the CRS Law. The investors undertake to inform their Controlling Persons, if applicable, of the processing of their Information by the Company.

The investors are further informed that the Information related to Reportable Persons within the meaning of the CRS Law will be disclosed to the LTA annually for the purposes set out in the CRS Law. In particular, Reportable Persons are informed that certain operations performed by them will be reported to them through the issuance of statements, and that part of this information will serve as a basis for the annual disclosure to the LTA.

Similarly, the investors undertake to inform the Company within thirty (30) days of receipt of these statements should any included personal data be not accurate. The investors further undertake to immediately inform the Company of, and provide the Company with all supporting documentary evidence of any changes related to the Information after occurrence of such changes.

Any investor that fails to comply with the Company's Information or documentation requests may be held liable for penalties imposed on the Company and attributable to such investor's failure to provide the Information or subject to disclosure of the Information by the Company to the LTA.

## **RISK MANAGEMENT PROCESS**

Unless otherwise stated in the relevant Supplement, each Fund shall employ a Value-at-Risk model in determining its global exposure to financial derivative instruments and will ensure that such global exposure does not exceed the limits as set out in the CSSF circular 11/512 of 30 May 2011, as may be amended or restated from time to time.

Each Fund may invest, according to its investment objectives and in compliance with the investment restrictions set out in Appendix 1 of this Prospectus, in financial derivative instruments provided that the exposure to the underlying assets does not exceed in aggregate the investment limits laid down therein.

When a Fund invests in index-based financial derivative instruments, these investments do not have to be combined to the limits laid down in Appendix 1 of this Prospectus.

When a Transferable Security or Money Market Instrument embeds a derivative, the latter must be taken into account when complying with the requirements of this section.

## **RISK FACTORS**

The risks described herein should not be considered to be an exhaustive list of the risk which potential investors should consider before investing in a Fund. Different risks may apply to different Funds. Details of Fund specific risks in relation to a particular Fund which are additional to those described in this section will be disclosed in the relevant Fund Supplement. Prospective investors should review this Prospectus and the relevant Supplement carefully and in its entirety and consult with their professional and financial advisers before making an application for Shares.

Prospective investors should consider, among others, the following factors before subscribing for Shares:

### **General Risks**

Investors should be aware that there are risks inherent in the holding of securities:

- (a) There is no assurance that any appreciation in the value of Investments will occur, or that the investment objectives of any Fund will be achieved. Past performance is no guide to the future. The value of Shares, and any income from them, can go down as well as up, particularly in the short term, meaning that an investment may not be returned in full.
- (b) The tax treatment of the Funds may change and such changes cannot be foreseen.
- (c) Where regular investments are made with the intention of achieving a specific capital sum in the future, this will normally be subject to maintaining a specified level of investment.
- (d) The difference at any one time between subscription and redemption prices for Shares means that any investment should be viewed as medium to long term. An investment should only be made by those persons who are able to sustain a loss on their investment.

#### Amortisation of Organisational Costs

The Company's financial statements will be prepared in accordance with Luxembourg generally accepted accounting principles ("**Luxembourg GAAP**"). Luxembourg GAAP restrict the amortisation of organisational costs. Notwithstanding this, the Directors are proposing to amortise the costs and expenses of establishing the Company and the financial statements may be qualified in this regard.

#### Business Risk

There can be no assurance that the Company will achieve its investment objective in respect of any of the Funds. The investment results of the Fund are reliant upon the success of the Investment Manager.

#### Charges to Capital

Where all or part of fees and/or charges in respect of any Class or Fund may be charged against capital rather than income, this will enhance income returns but may constrain future capital growth.

#### Effect of Preliminary Charge

Where an initial charge is imposed, an investor who realises his Shares after a short period may not (even in the absence of a rise in the value of the relevant investments) realise the amount originally invested.

The Shares therefore should be viewed as medium to long-term investments.

#### Lack of Operating History

The Company is a recently formed entity and has no operating history upon which prospective investors can evaluate the likely performance of the Company. The past investment performance of the Investment Manager or any of its affiliates, or entities with which it has been associated, may not be construed as an indication of the future results of an investment in the Company. The Funds' investment policies should be evaluated on the basis that there can be no assurance that the assessment of the investment of the short-term or long-term prospects of investments will prove accurate or that the Funds will achieve their investment objective.

### Suspension of Dealings in Shares

Investors are reminded that in certain circumstances their right to redeem Shares (including a redemption by way of exchanging) may be suspended (see “Suspension of Valuation of Assets”).

### Segregation of liabilities between Funds

As a matter of Luxembourg law, the assets of each Fund will not be available to meet the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on behalf of or be subject to claims in other jurisdictions which may not necessarily recognise such ring-fencing and, in such circumstances, the assets of one Fund may be exposed to the liabilities of another.

### Depositary – Segregation, Sub-Custodians and Insolvency

Where securities are held with a sub-custodian of the Depositary or by a securities depositary or clearing system, such securities may be held by such entities in client omnibus accounts and in the event of a default by any such entity, where there is an irreconcilable shortfall of such securities, the Company may have to share that shortfall on a pro-rata basis. Securities may be deposited with clearing brokers which the Depositary is not obliged to appoint as its sub-custodians and in respect of the acts or defaults of which the Depositary shall have no liability. There may be circumstances where the Depositary is relieved from liability for the acts or defaults of its appointed sub-custodians provided that the Depositary has complied with its duties.

The Company is at risk of the Depositary or a sub-custodian entering into an insolvency procedure. During such a procedure (which may last many years) the use by the Company of assets held by or on behalf of the Depositary or the relevant sub-custodian, as the case may be, may be restricted and accordingly (a) the ability of the Investment Manager to fulfil the investment objective of each Fund may be severely constrained, (b) the Funds may be required to suspend the calculation of the Net Asset Value and as a result subscriptions for and redemptions of Shares, and/or (c) the Net Asset Value may be otherwise affected. During such a procedure, the Company is likely to be an unsecured creditor in relation to certain assets and accordingly the Company may be unable to recover such assets from the insolvent estate of the Depositary or the relevant sub-custodian, as the case may be, in full, or at all.

### Depositary Liability

In the event of loss suffered by the Company as a result of the Depositary's actions or omissions, the Company would generally, in order to bring a successful claim against the Depositary, have to demonstrate that it has suffered a loss as a result of Depositary's failure to use such reasonable care as may be expected of a leading global custodian in performing its obligations under the Depositary Agreement. The Company may also have to demonstrate that it has suffered a loss as a result of the Depositary's negligence, fraud or wilful default.

### Market Crisis and Governmental Intervention

The global financial markets are currently undergoing pervasive and fundamental disruptions which have led to extensive and unprecedented governmental intervention. Such intervention has in certain cases been implemented on an “emergency” basis without much or any notice with the consequence that some market participants' ability to continue to implement certain strategies or manage the risk of

their outstanding positions has been suddenly and/or substantially eliminated. Given the complexities of the global financial markets and the limited time frame within which governments have been able to take action, these interventions have sometimes been unclear in scope and application, resulting in confusion and uncertainty which in itself has been materially detrimental to the efficient functioning of such markets as well as previously successful investment strategies.

It is impossible to predict with certainty what additional interim or permanent governmental restrictions may be imposed on the markets and/or the effect of such restrictions on the Investment Manager's ability to fulfil a Fund's investment objective. However, the Investment Manager believes that there is a high likelihood of significantly increased regulation of the global financial markets, and that such increased regulation could be materially detrimental to the performance of a Fund's portfolio.

### Hedging Risk

The Investment Manager may, if set out in the relevant sections of the relevant Supplement, enter into certain transactions using futures, forwards or other exchange-traded or over-the-counter instruments or by the purchasing of securities ("**Hedging Transactions**") to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in a currencies other than Reference Currency of the relevant Fund and/or certain other exposures including the risk of the value of a Class of Shares.

Hedging Transactions, while potentially reducing the risk of currency or other exposure which a Class of Shares may otherwise be exposed to, involve certain other risks, including, but not limited to, the risk of a default by a counterparty, as described under "Risks associated with financial derivative instruments" below and currency and hedging risk as described under "Currency Risk" below. There is no guarantee that a Hedging Transaction will fully protect a Class of Shares against foreign exchange and/or other risks.

Please refer to the heading "Risk Warnings" in the relevant sections in the relevant Supplement for further risks associated with Hedging Transactions.

### Specific Risks

#### Concentration of Investments

A Fund may at certain times hold relatively few investments. Such a Fund could be subject to significant losses if it holds a large position in a particular investment that declines in value or is otherwise adversely affected, including default of the issuer.

#### Credit Spreads

A Fund may make investments that expose it to corporate credit spreads and movements in such spreads will thus impact on the Net Asset Value per Share of each Class.

#### Debt Securities

The Funds may invest in fixed income securities which may be not be rated by a recognised credit-rating agency or below investment grade and which are subject to greater risk of loss of principal and interest than higher-rated debt securities. Because investors generally perceive that there are greater risks associated with unrated and

below investment grade securities, the yields and prices of such securities may fluctuate more than those for higher-rated securities. The market for non-investment grade securities may be smaller and less active than that for higher-rated securities, which may adversely affect the prices at which these securities can be sold and result in losses to the Funds. The Funds may invest in debt securities which rank junior to other outstanding securities and obligations of the issuer, all or a significant portion of which may be secured on substantially all of that issuer's assets. The Funds may invest in debt securities which are not protected by financial covenants or limitations on additional indebtedness. The Funds will therefore be subject to credit, liquidity and interest rate risks. In addition, evaluating credit risk for debt securities involves uncertainty because credit rating agencies throughout the world have different standards, making comparison across countries difficult. Also, the market for credit spreads is often inefficient and illiquid, making it difficult to accurately calculate discounting spreads for valuing financial instruments.

#### Deferred Redemptions

In the event that redemption requests are received for redemption of Shares representing in aggregate more than 10% of the total number of Shares representing interests in a single Fund then in issue, redemption requests may be reduced rateably and pro rata and the redemption of Shares may be carried forward to the next following Dealing Day. In the event of a large number of redemptions, this power to defer redemptions could be exercised on a number of successive Dealing Days and materially restrict a Shareholder's ability to redeem his Shares (as described in more detail on page 18).

#### Convertible Bond Transactions

Convertible bond transactions are designed to be relatively market neutral i.e., they hedge out the directional risks generally associated with un-hedged investments in the underlying instruments. However, should the credit status of an issuer weaken, losses may result from decreases in the market conversion premium or a loss of liquidity with respect to the security. These losses will be limited by the short hedge on the underlying security, but may be substantial in relation to the Net Asset Value of the Company. The Company may also suffer losses if an issuer is acquired for cash or debt securities at a price that does not generate profits on the un-hedged portion of a position sufficient to recover the premium paid to acquire the convertible security and any unpaid accrued interest that would be lost should conversion become necessary. Losses may result when securities are called for redemption at prices below the current market prices. Frequently, these losses will include interest accrued but not paid upon conversion of the called securities. In addition, losses may occur if the terms of the convertible bond do not allow for an adjustment in the conversion terms, or the Company is forced to convert a security earlier than anticipated.

#### Credit Default Swaps

The Company may take positions in credit default swaps. A credit default swap is a type of credit derivative which allows one party (the "protection buyer") to transfer credit risk of a reference entity (the "reference entity") to one or more other parties (the "protection seller"). The protection buyer pays a periodic fee to the protection seller in return for protection against the occurrence of a number of events (each, a "credit event") experienced by the reference entity. Credit default swaps carry specific risks including high levels of gearing, the possibility that premiums are paid for credit default swaps which expire worthless, wide bid/offer spreads and documentation risks. In addition, there can be no assurance that the counterparty to a credit default swap will be able to fulfil its obligations to the Company if a credit event occurs in respect of the

reference entity. Further, the counterparty to a credit default swap may seek to avoid payment following an alleged credit event by claiming that there is a lack of clarity in, or an alternative meaning of, language used in the contract, most notably the language specifying what would amount to a credit event.

### Swap Agreements

The Company may enter into swap agreements. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swap agreements may increase or decrease the Company's exposure to long-term or short-term interest rates (in the United States or abroad), non-U.S. currency values, corporate borrowing rates, or other factors such as security prices, baskets of equity securities or inflation rates. Swap agreements can take many different forms and are known by a variety of names. The Company is not limited to any particular form of swap agreement if consistent with the terms of the Prospectus and the investment objective and policy of a Fund.

Swap agreements tend to shift the Company's investment exposure from one type of investment to another. For example, if the Company agrees to exchange payments in dollars for payments in non-U.S. currency, the swap agreement would tend to decrease the Company's exposure to U.S. interest rates and increase its exposure to non-U.S. currency and interest rates. Depending on how they are used, swap agreements may increase or decrease the overall volatility of the Company's portfolio. The most significant factor in the performance of swap agreements is the change in the specific interest rate, currency, individual equity values or other factors that determine the amounts of payments due to and from the Company. If a swap agreement calls for payments by the Company, the Company must be prepared to make such payments when due. In addition, if a counterparty's creditworthiness declines, the value of swap agreements with such counterparty can be expected to decline, potentially resulting in losses by the Company.

### Use of Swaps and Other Derivatives

The Investment Manager may make use of swaps and other forms of derivative contracts. In general, a derivative contract typically involves leverage (within the permitted limits), i.e., it provides exposure to potential gain or loss from a change in the level of the market price of a security or currency (or a basket or index) in a notional amount that exceeds the amount of cash or assets required to establish or maintain the derivative contract. Consequently, an adverse change in the relevant price level can result in a loss of capital that is more exaggerated than would have resulted from an investment that did not involve the use of leverage inherent in the derivative contract. Many of the derivative contracts used by the Company will be privately negotiated in the over-the-counter market. These contracts also involve exposure to credit risk, since contract performance depends in part on the financial condition of the counterparty. These transactions are also expected to involve significant transaction costs.

### Leverage

The investment strategies adopted by the Investment Manager often employ leverage. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the volatility of the value of the relevant Fund and thus the exposure to capital risks.

## Currency Exposure

The Shares are denominated in the Reference Currency detailed in each Fund Supplement, and the Reference Currency of the Company is EUR. The Investment Manager may hedge out currency exposure at Fund level by entering into forward foreign exchange transactions. The Investment Manager may use spot currency transactions, forward currency contracts and options when available on acceptable terms to hedge against currency fluctuations, but there can be no assurance that such hedging transactions will be effective.

Notwithstanding the foregoing, and noting that hedging techniques may not be completely effective, where the currency exposure of the Fund is not fully hedged, the value of the assets of the Fund may be affected favourably or unfavourably by fluctuations in currency rates. To the extent that hedging policy is successful, performance of the class is likely to move in line with the performance of the underlying assets and investors in a hedged class will not benefit if the class Reference Currency falls against the Reference Currency of the Fund. Furthermore, prospective investors whose assets and liabilities are predominantly in other currencies should take into account the potential risk of loss arising from fluctuations in value between the Euro, the US Dollar and the Sterling and such other currencies.

## Currency Options Trading

The Funds may acquire and sell currency options, the value of which depend largely upon the likelihood of favourable price movements in the underlying currency in relation to the exercise (or strike) price during the life of the option. Many of the risks applicable to trading the underlying currencies are also applicable to over-the-counter options trading. In addition, there are a number of other risks associated with the trading of options including the risk that the purchaser of an option may at worst lose his entire investment (the premium he pays).

## Derivatives

The Funds may utilise both exchange-traded and over-the-counter derivatives, including, but not limited to, futures, forwards, swaps, options and contracts for differences, as part of their investment policies. These instruments can be highly volatile and expose investors to a high risk of loss. Transactions in over-the-counter contracts may involve additional risk as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk. Contractual asymmetries and inefficiencies can also increase risk, such as break clauses, whereby a counterparty can terminate a transaction on the basis of a certain reduction in Net Asset Value, incorrect collateral calls or delays in collateral recovery.

Derivatives, in particular derivatives which are negotiated “over-the-counter” are subject to legal risks including the uncertainty in the applicability of laws, or the interpretation or enforceability of contracts or an action by a court or regulatory body that could invalidate a derivative contract entered into by the Company.

The prices of financial derivative instruments may be imperfectly correlated to the prices of the underlying securities, for example, because of transaction costs and interest rate movements. The prices of exchange traded financial derivative instruments may also be subject to changes in price due to supply and demand factors.

### Particular Risks of OTC Derivatives

Unlike exchange-traded options, which are standardised with respect to the underlying instrument, expiration date, contract size, and strike price, the terms of OTC derivatives, are generally established through negotiation with the other party to the instrument. While this type of arrangement allows a Fund greater flexibility to tailor the instrument to its needs, OTC derivatives may involve greater legal risk than exchange-traded instruments, as there may be a risk of loss if OTC derivatives are deemed not to be legally enforceable or are not documented correctly.

Transactions in over-the-counter contracts may involve additional risk as there is no exchange market on which to close out an open position. It may be impossible to liquidate an existing position, to assess the value of a position or to assess the exposure to risk. Contractual asymmetries and inefficiencies can also increase risk, such as break clauses, whereby a counterparty can terminate a transaction on the basis of a certain reduction in Net Asset Value, incorrect collateral calls or delays in collateral recovery.

There also may be a legal or documentation risk that the parties to the OTC derivatives may disagree as to the proper interpretation of its terms. If such a dispute occurs, the cost and unpredictability of the legal proceedings required for the Company to enforce its contractual rights may lead the Company to decide not to pursue its claims under the OTC derivatives. The Company thus assumes the risk that it may be unable to obtain payments owed to it under OTC arrangements, that those payments may be delayed or made only after the Company has incurred the costs of litigation.

### Investments in Asset Backed Securities and Mortgage Backed Securities

The Funds may have exposure to asset backed securities (“**ABS**”) and mortgage backed securities (“**MBS**”). ABS and MBS are debt securities issued by a special purpose vehicle (SPV) and which are secured by an asset pool (mortgages in the case of MBS and various types of assets in the case of ABS). Compared to other traditional fixed income securities such as corporate or government issued bonds, the obligations associated with these securities may be subject to greater counterparty, liquidity and interest rate risks as well as other types of risks, such as reinvestment risk (arising from included termination rights, prepayment options), credit risks on the underlying assets and advance repayments of principal resulting in a lower total return (especially, if repayment of the debt is not concurrent with redemption of the assets underlying the claims). ABS and MBS assets may be highly illiquid and therefore prone to substantial price volatility.

### Counterparty Risk

The Funds will be subject to the risk of the inability of any counterparty to perform with respect to transactions, whether due to its own insolvency or that of others, bankruptcy, market illiquidity or disruption or other causes and whether resulting from systemic or other reasons.

Some of the markets in which a Fund may effect transactions are “over-the-counter” (or “interdealer”) markets. The participants in such markets are typically not subject to the same credit evaluation and regulatory oversight as are members of “exchange-based” markets. In addition, many of the protections afforded to participants on some organised exchanges, such as the performance guarantee of an exchange clearing house, might not be available in connection with such “over-the-counter” transactions. This exposes the relevant Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the

terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the relevant Fund to suffer a loss. Such “counterparty risk” is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the relevant Fund has concentrated its transactions with a small group of counterparties. Moreover, although the Funds shall only transact with eligible counterparties, the Investment Manager has no formal credit function which evaluates the creditworthiness of the relevant Fund’s counterparties. The ability of a Fund to transact business with any one or number of counterparties, the lack of any separate evaluation of such counterparties’ financial capabilities and the absence of a regulated market to facilitate settlement may increase the potential for losses by the Funds.

### Securities lending

Securities lending transactions entail different risks, i.e, (i) the late delivery from the counterparty of the securities lent, which might reduce the fund’s ability to meet its redemption requests or to deliver the securities sold; (ii) the counterparty default which means that the securities may potentially not be returned or only partially returned. This risk is mitigated by the receipt of collateral, however the collateral is itself submitted to lower realisation due to inaccurate pricing, deterioration of credit rating of the issuer or adverse market movements. This risk is further mitigated by indemnification for non-return of loaned securities provided by the securities lending agent under the securities lending agency agreement with the Company for the relevant Fund wherein the Fund is indemnified for the difference, if any, between the market value of the collateral and the market value of the loaned securities as at the date that the securities were to have been returned; and (iii) the reinvestment of cash collateral may provide a lower return than the return on the initial cash receipt. Finally the reinvestment in securities entails the same risks as the risks linked to the receipt of collateral.

### Synthetic Short Selling

Typically, UCITS, such as the Company, invest on a “long only” basis. This means that their net asset value will rise (or fall) in value based on the market value of the assets they hold. A “short” sale involves the sale of a security that the seller does not own in the hope of purchasing the same security (or a security exchangeable for such security) at a later date at a lower price. To make a delivery to the buyer, the seller must borrow the security and is obligated to return the security (or a security exchangeable for such security) to the lender, which is accomplished by a later purchase of said security. Although the Company is not permitted to enter into short sales under the UCI Law, a Fund may, by employing certain derivative techniques (such as contracts for difference) designed to produce the same economic effect as a short sale (a “synthetic short”), establish both “long” and “short” positions in individual stocks and markets. As a result, as well as holding assets that may rise or fall with markets, a Fund may also hold positions that will rise as the market value falls, and fall as the market value rises. Taking synthetic short positions involves trading on margin and accordingly can involve greater risk than investments based on a long position. Investors should also consider the risk factors under “Derivatives” and “Particular Rules of OTC Derivatives” above.

### Options

There are risks associated with the sale and purchase of call options. The seller (writer) of a call option which is covered (e.g., the writer holds the underlying security) assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the

opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option. The buyer of a call option assumes the risk of losing its entire investment in the call option.

There are risks associated with the sale and purchase of put options. The seller (writer) of a put option which is covered (e.g., the writer has a short position in the underlying security) assumes the risk of an increase in the market price of the underlying security above the sales price (paid to establish the short position) of the underlying security if the market price falls below the exercise price of the option. The seller of an uncovered put option assumes the risk of decline in the market price of the underlying security below the exercise price of the option. The buyer of a put option assumes the risk of losing its entire investment in the put option.

### Developing Markets

The Funds may invest in developing market debt securities, foreign exchange instruments and equities which may lead to additional risks being encountered when compared with investments in developed markets.

Investment in developing market securities involves a greater degree of risk than an investment in securities of issuers based in developed countries. Among other things, developing market securities investments may carry the risks of less publicly available information, more volatile markets, less strict securities market regulation, less favourable tax provisions, and a greater likelihood of severe inflation, unstable or not freely convertible currency, war and expropriation of personal property than investments in securities of issuers based in developed countries. In addition, the investment opportunities of the Funds in certain developing markets may be restricted by legal limits on foreign investment in local securities.

Developing markets generally are not as efficient as those in developed countries. In some cases, a market for the security may not exist locally, and transactions will need to be made on a neighbouring exchange. Volume and liquidity levels in developing markets are lower than in developed countries. When seeking to sell developing market securities, little or no market may exist for the securities. In addition, issuers based in developing markets are not generally subject to uniform accounting and financial reporting standards, practices and requirements comparable to those applicable to issuers based in developed countries, thereby potentially increasing the risk of fraud or other deceptive practices. Furthermore, the quality and reliability of official data published by the government or securities exchanges in developing markets may not accurately reflect the actual circumstances being reported.

Some developing markets securities may be subject to brokerage or stock transfer taxes levied by governments, which would have the effect of increasing the cost of investment and which may reduce the realised gain or increase the loss on such securities at the time of sale. The issuers of some of these securities, such as banks and other financial institutions, may be subject to less stringent regulations than would be the case for issuers in developed countries and therefore potentially carry greater risk. In addition, settlement of trades in some developing markets is much slower and subject to a greater risk of failure than in markets in developed countries. Further, custodians are not able to offer the level of service and safe-keeping, settlement and administration of securities that is customary in more developed markets and there is a risk that the Company will not be recognised as the owner of securities held on its behalf by a sub-custodian.

With respect to any developing market country, there is the possibility of nationalisation, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividends, interest, capital gains or other income, limitations on the removal of funds or other assets of the Company, political changes, government regulation, social instability or diplomatic developments (including war) which could affect adversely the economies of such countries or the value of the Funds' investments in those countries. Further, the economies of developing countries generally are heavily dependent upon international trade and, accordingly, have been, and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries with which they trade. The economies of certain of these countries may be based, predominantly, on only a few industries and may be vulnerable to changes in trade conditions and may have higher levels of debt or inflation.

#### Effect of Substantial Redemptions

Substantial redemptions by Shareholders within a short period of time could require a Fund to liquidate securities positions more rapidly than would otherwise be desirable, possibly reducing the value of the assets of the Fund and/or disrupting the Investment Manager's investment strategy. Reduction in the size of a Fund could make it more difficult to generate a positive return or to recoup losses due to, among other things, reductions in a Fund's ability to take advantage of particular investment opportunities or decreases in the ratio of its income to its expenses.

#### Event Driven Investing

Event driven investing requires the investor to make predictions about (i) the likelihood that an event will occur and (ii) the impact such event will have on the value of a company financial instruments. If the event fails to occur or it does not have the effect foreseen, losses can result. For example, the adoption of new business strategies or completion of asset dispositions or debt reduction programs by a company may not be valued as highly by the market as the Investment Manager had anticipated, resulting in losses. In addition, a company may announce a plan of restructuring which promises to enhance value, but fail to implement it, which can result in losses to investors. In liquidations and other forms of corporate reorganisation, the risk exists that the reorganisation either will be unsuccessful, will be delayed or will result in a distribution of cash or a new security, the value of which will be less than the purchase price to the Company of the security in respect of which such distribution was made. The consummation of mergers and tender and exchange offers can be prevented or delayed by a variety of factors, including: (i) opposition of the management or stockholders of the target company, which will often result in litigation to enjoin the proposed transaction; (ii) intervention of a federal or state regulatory agency; (iii) efforts by the target company to pursue a "defensive" strategy, including a merger with, or a friendly tender offer by, a company other than the offeror; (iv) in the case of a merger, failure to obtain the necessary stockholder approvals; (v) market conditions resulting in material changes in securities prices; (vi) compliance with any applicable federal or state securities laws; and (vii) inability to obtain adequate financing. Because of the inherently speculative nature of event driven investing, the results of the Company's operations may be expected to fluctuate from period to period. Accordingly, Shareholders should understand that the results of a particular period will not necessarily be indicative of results that may be expected in future periods.

### Forward Foreign Exchange Contracts

A forward foreign exchange contract is a contractually binding obligation to purchase or sell a particular currency at a specified date in the future. Forward foreign exchange contracts are not uniform as to the quantity or time at which a currency is to be delivered and are not traded on exchanges. Rather, they are individually negotiated transactions. Forward foreign exchange contracts are generally effected through a trading system known as the interbank market. It is not a market with a specific location but rather a network of participants electronically linked. Documentation of transactions generally consists of an exchange of telex or facsimile messages. There is no limitation as to daily price movements on this market and in exceptional circumstances there have been periods during which certain banks have refused to quote prices for forward foreign exchange contracts or have quoted prices with an unusually wide spread between the price at which the bank is prepared to buy and that at which it is prepared to sell. Transactions in forward foreign exchange contracts are not regulated by any regulatory authority nor are they guaranteed by an exchange or clearing house. The Funds are subject to the risk of the inability or refusal of its counterparties to perform with respect to such contracts. Any such default would eliminate any profit potential and compel the Funds to cover their commitments for resale or repurchase, if any, at the then current market price. These events could result in significant losses.

### Information Rights

Upon request by a Shareholder, the Investment Manager may provide a Shareholder with information about a Fund and its positions where the Board of Directors determines that there are sufficient confidentiality agreements and procedures in place. This information may not be systematically provided to all other Shareholders in a Fund (but will be available to all Shareholders if requested). As a result, the Shareholder that has received this information may be able to act on such additional information (e.g., redeem their Shares) that other Shareholders may not systematically receive. Accordingly, not all Shareholders will have the same degree of access to the type and/or frequency of individual position listings in connection with the Company and transparency of portfolio characteristics may differ based on individual agreements with investors.

### Investment Management Risk

The investment performance of a Fund is substantially dependent on the services of certain individuals. In the event of the death, incapacity, departure, insolvency or withdrawal of these individuals, the performance of the Fund may be adversely affected.

### Legal Risk

The Funds may be subject to a number of unusual risks, including inadequate investor protection, contradictory legislation, incomplete, unclear and changing laws, ignorance or breaches of regulations on the part of other market participants, lack of established or effective avenues for legal redress, lack of standard practices and confidentiality customs characteristic of developed markets and lack of enforcement of existing regulations. Furthermore, it may be difficult to obtain and enforce a judgment in certain of the developing countries in which assets of the Funds' may be invested. There can be no assurance that this difficulty in protecting and enforcing rights will not have a material adverse effect on the Funds and their operations.

### Mid Cap Securities Risk

The prices of securities of mid cap companies generally are more volatile than those of large capitalisation companies and are more likely to be adversely affected than large cap companies by changes in earnings results and investor expectations or poor economic or market conditions, including those experienced during a recession.

### Net Asset Value Considerations

The Net Asset Value per Share is expected to fluctuate over time with the performance of the Fund's investments. A Shareholder may not fully recover his initial investment when he chooses to redeem his Shares or upon compulsory redemption, if the Net Asset Value per Share at the time of such redemption is less than the Subscription Price paid by such Shareholder or if there remain any unamortised costs and expenses of establishing the Company. In addition, where there is any conflict between Luxembourg GAAP and the valuation principles set out in the Articles and this document in relation to the calculation of Net Asset Value, the latter principles shall take precedence.

In calculating a Fund's Net Asset Value, the Administrator may consult the Investment Manager with respect to the valuation of certain investments. Whilst there is an inherent conflict of interest between the involvement of the Investment Manager in determining the valuation price of each Fund's investments and the Investment Manager's other duties and responsibilities in relation to the Funds, the Investment Manager will endeavour to resolve any such conflict of interest fairly and in the interest of investors.

### Price Fluctuations

It should be remembered that the value of Shares and the income (if any) derived from them can go down as well as up.

### Strategy Risk

Strategy risk is associated with the failure or deterioration of an entire strategy such that most or all investment managers employing that strategy suffer losses. Strategy specific losses may result from excessive concentration by multiple investment managers in the same investment or general economic or other events that adversely affect particular strategies (e.g., the disruption of historical pricing relationships). The strategies employed by the Funds may be speculative and involve substantial risk of loss in the event of such failure or deterioration, in which event the performance of the Funds may be adversely affected.

### Tax Considerations

A Fund may be subject to withholding, capital gains or other taxes on income and/or gains arising from its investment portfolio, including without limitation taxes imposed by the jurisdiction in which the issuer of securities held by that Fund is incorporated, established or resident for tax purposes. Where a Fund invests in securities that are not subject to withholding or other taxes at the time of acquisition, there can be no assurance that tax may not be withheld or imposed in the future as a result of any change in applicable laws, treaties, rules or regulations or the interpretation thereof. The relevant Fund will not be able to recover such tax and so any change would have an adverse effect on the Net Asset Value of the Shares.

Where a Fund chooses or is required to pay taxation liabilities and/or account for reserves in respect of taxes that are or may be payable in respect of current or prior periods by that Fund or the Company (whether in accordance with current or future accounting standards), this would have an adverse effect on the Net Asset Value of the Shares in that Fund. This could cause benefits or detriments to certain Shareholders, depending on the timing of their entry to and exit from the relevant Fund.

#### Risk of U.S. Withholding Tax

The Company (and each Fund) will be required to comply (or be deemed compliant) with extensive-reporting and withholding requirements known as FATCA designed to require certain U.S. persons' direct and indirect ownership of certain non-U.S. accounts and non-US entities to be reported by FFIs to the U.S. Internal Revenue Service ("IRS"). The Company (and each Fund) shall be regarded as a FFI for FATCA purposes. FATCA may impose a withholding tax of up to 30% with respect to certain U.S. source income (including dividends and interest) and from 1 January 2019 gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends paid to a FFI. Should the Company become subject to a withholding tax as a result of FATCA, the value of the Shares held by all Shareholders may be materially affected. The Company and/or its Shareholders may also be indirectly affected by the fact that the FFI does not comply with FATCA regulations even if the Company satisfies with its own FATCA obligations.

Despite anything else herein contained, the Company shall have the right to:

- (a) withhold any taxes or similar charges that it is legally required to withhold by applicable laws and regulations in respect of any shareholding in the Company;
- (b) require any investor or beneficial owner of the Shares to promptly furnish such personal data as may be required by the Fund in its discretion in order to comply with applicable laws and regulations and/or to promptly determine the amount of withholding to be retained;
- (c) divulge any such personal information to any tax authority, as may be required by applicable laws or regulations or requested by such authority; and
- (d) delay payments of any dividend or redemption proceeds to an investor until the Company holds sufficient information to comply with applicable laws and regulations or determine the correct amount to be withheld.

#### Transaction Costs

The investment policies of the Funds may involve a high level of trading and turnover of the investments of the Funds which may generate substantial transaction costs which will be borne by each Fund separately.

#### Clearing House Protections

On many exchanges, the performance of a transaction by a broker (or a third party with whom it is dealing on the Company's behalf) is "guaranteed" by the exchange or clearing house. However, this guarantee is unlikely in most circumstances to cover the Company and may not protect the Company if a broker or another party defaults on its obligations to the Company.

### Profit Sharing

In addition to receiving an Investment Management Fee, the Investment Manager may also receive a Performance Fee based on the appreciation in the Net Asset Value per Share and accordingly the Performance Fee will increase with regard to unrealised appreciation, as well as realised gains. Accordingly, a Performance Fee may be paid on unrealised gains, which may subsequently never be realised. The Performance Fee may create an incentive for the Investment Manager to make investments for a Fund, which are riskier than would be the case in the absence of a fee based on the performance of a Fund.

### Redemption Risks

Payment of redemption proceeds may be delayed if the Directors declare a temporary suspension of the determination of the Net Asset Value of the Company or a Fund in any of the exceptional circumstances as described under “Determination of the Net Asset Value of Shares – Suspension of Valuation of Assets” (below).

### Undervalued/Overvalued Securities

One of the key objectives of a Fund may be to identify and invest in undervalued and overvalued securities (“**misvalued securities**”). The identification of investment opportunities in misvalued securities is a difficult task, and there can be no assurance that such opportunities will be successfully recognised. While purchases of undervalued securities offer opportunities for above-average capital appreciation, these investments involve a high degree of financial risk and can result in substantial losses. Returns generated from the investments of the Funds may not adequately compensate for the business and financial risks assumed.

The Funds may make certain speculative investments in securities which the Investment Manager believes to be misvalued; however, there can be no assurance that the securities purchased and sold will in fact be misvalued. In addition, the Funds may be required to maintain positions in such securities for a substantial period of time before realising their anticipated value. During this period, a portion of the capital of the Funds may be committed to the securities, thus possibly preventing the Funds from investing in other opportunities.

### Volatility

Futures prices are highly volatile. Such prices are influenced by, amongst other things: government trade, fiscal, monetary and exchange control programmes and policies; national and international political and economic events; and changes in interest rates. In addition, governments from time to time intervene, directly and by regulation, in the foreign exchange markets with the specific intention of influencing exchange rates. The effect of such intervention is often heightened by a group of governments acting in concert. The other investments in which the Funds may invest, principally debt securities, will be subject to their own fluctuations in value as a result of, amongst other things, market, interest rate and currency movements. The Funds may be exposed to adverse changes in its Net Asset Value as a result of these factors.

### Availability of Investment Strategies

The success of the investment activities of the Funds will depend on the Investment Manager’s ability to identify overvalued and undervalued investment opportunities and to exploit price discrepancies in the financial markets, as well as to assess the import of news and events that may affect the financial markets. Identification and exploitation

of the investment strategies to be pursued by the Funds involves a high degree of uncertainty. No assurance can be given that the Investment Manager will be able to locate suitable investment opportunities in which to deploy all of the Funds' assets or to exploit discrepancies in the securities and derivatives markets. A reduction in money market liquidity or the pricing inefficiency of the markets in which the Funds seek to invest, as well as other market factors, will reduce the scope for the implementation of the Funds' investment strategies.

The Funds may be adversely affected by unforeseen events involving such matters as changes in interest rates, exchange rates or the credit status of an issuer, forced redemptions of securities or acquisition proposals, break-up of planned mergers, unexpected changes in relative value, short squeezes, inability to short stock or changes in tax treatment.

#### Other Activities of the Investment Manager

The Investment Manager and its members, officers, employees and affiliates, including those involved in the investment management of the Funds may be engaged in businesses in addition to the investment management of the Funds. The Investment Manager may have proprietary interests in, and manage and advise, other accounts or funds which may have investment objectives similar or dissimilar to those of the Funds and/or which may engage in transactions in the same types of securities and instruments as the Funds. The Fund's performance may differ significantly from the results achieved by the Investment Manager for other accounts managed or advised by the Investment Manager. When making an investment where conflicts of interest arise, the Investment Manager will endeavour to act in a fair, reasonable and equitable manner as between the Company and its other clients. Personnel of the Investment Manager are not required to devote all or any specified portion of their time to managing the affairs of the Company and are not required to accord exclusivity or priority to the Company in the event of limited investment opportunities, but will devote to the Company so much of their time as the Investment Manager deems necessary or appropriate. The Investment Manager may choose to trade or rebalance separate products with similar strategies at different times. Investment activities by the Investment Manager on behalf of other clients may give rise to additional conflicts of interest and demands on their time and resources. The Investment Manager may from time to time act as directors, investment managers, administrators or prime brokers in relation to or otherwise be involved with other companies established by parties other than the Company. In such event, should a conflict of interest arise, the Investment Manager will endeavour to ensure that it is resolved fairly.

#### Interest Rate Risk

The Company is subject to interest rate risk. Generally, the value of fixed income securities will change inversely with changes in interest rates. As interest rates rise, the market value of fixed income securities tends to decrease. Conversely, as interest rates fall, the market value of fixed income securities tends to increase. This risk will be greater for long-term securities than for short-term securities. The Company may attempt to minimise the exposure of the portfolio to interest rate changes through the use of interest rate swaps, interest rate futures and/or interest rate options. However, there can be no guarantee that the Investment Manager will be successful in fully mitigating the impact of interest rate changes on the portfolio.

#### Trading Judgment

The success of the proprietary valuation techniques and trading strategies employed by the Funds is subject to the judgment and skills of the Investment Manager and the

research team that it oversees. Additionally, the trading abilities of the portfolio management team with regard to execution and discipline are important to the return of the Funds. There can be no assurance that the investment decisions or actions of the Investment Manager will be correct. Incorrect decisions or poor judgment may result in substantial losses.

### Model and Data Risk

Given the complexity of the investments and strategies of each Fund, the Investment Manager relies heavily on quantitative models and information and data supplied by third parties (“**Models and Data**”). Models and Data are used to construct sets of transactions and investments, to provide risk management insights, and to assist in hedging a Fund’s investments.

When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon expose the Fund to potential risks. For example, by relying on Models and Data, the Investment Manager may be induced to buy certain investments at prices that are too high, to sell certain other investments at prices that are too low, or to miss favourable opportunities altogether. Similarly, any hedging based on faulty Models and Data may prove to be unsuccessful.

Some of the models used by the Investment Manager for one or more Funds are predictive in nature. The use of predictive models has inherent risks. For example, such models may incorrectly forecast future behaviour, leading to potential losses on a cash flow and/or a mark-to-market basis. In addition, in unforeseen or certain low-probability scenarios (often involving a market disruption of some kind), such models may produce unexpected results, which can result in losses for a Fund. Furthermore, because predictive models are usually constructed based on historical data supplied by third parties, the success of relying on such models may depend heavily on the accuracy and reliability of the supplied historical data.

All models rely on correct market data inputs. If incorrect market data is entered into even a well-founded model, the resulting information will be incorrect. However, even if market data is input correctly, “model prices” will often differ substantially from market prices, especially for instruments with complex characteristics, such as derivative instruments.

### Obsolescence Risk

A Fund is unlikely to be successful unless the assumptions underlying the models are realistic and either remain realistic and relevant in the future or are adjusted to account for changes in the overall market environment. If such assumptions are inaccurate or become inaccurate and are not promptly adjusted, it is likely that profitable trading signals will not be generated. If and to the extent that the models do not reflect certain factors, and the Investment Manager does not successfully address such omission through its testing and evaluation and modify the models accordingly, major losses may result. The Investment Manager will continue to test, evaluate and add new models, as a result of which the existing models may be modified from time to time. Any modification of the models or strategies will not be subject to any requirement that Shareholders receive notice of the change or that they consent to it. There can be no assurance as to the effects (positive or negative) of any modification of the models or strategies on a Fund’s performance.

### Crowding/Convergence Risk

There is significant competition among quantitatively-focused managers, and the ability of the Investment Manager to deliver returns consistent with a Fund's objectives and policies is dependent on its ability to employ models that are simultaneously profitable and differentiated from those employed by other managers. To the extent that the Investment Manager's models used for a Fund come to resemble those employed by other managers, the risk that a market disruption that negatively affects predictive models will adversely affect the Fund is increased, and such a disruption could accelerate reductions in liquidity or rapid repricing due to simultaneous trading across a number of funds in the marketplace.

### Risk of Programming and Modelling Errors

The research and modelling process engaged in by the Investment Manager is extremely complex and involves financial, economic, econometric and statistical theories, research and modelling; the results of that process must then be translated into computer code. Although the Investment Manager seeks to hire individuals skilled in each of these functions and to provide appropriate levels of oversight, the complexity of the individual tasks, the difficulty of integrating such tasks, and the limited ability to perform "real world" testing of the end product raises the chances that the finished model may contain an error; one or more of such errors could adversely affect a Fund's performance and, depending on the circumstances, would generally not constitute a trade error under the Fund's policies.

### Involuntary Disclosure Risk

As described above under ("Model and Data Risks" and "Crowding/Convergence Risk"), the ability of the Investment Manager to achieve its investment goals for a Fund is dependent in large part on its ability to develop and protect its models and proprietary research. The models and proprietary research and the Models and Data are largely protected by the Investment Manager through the use of policies, procedures, agreements, and similar measures designed to create and enforce robust confidentiality, non-disclosure, and similar safeguards. However, public disclosure and transparency obligations (or disclosure obligations to exchanges or regulators with insufficient privacy safeguards) could lead to opportunities for competitors to reverse-engineer the Investment Manager's Models and Data, and thereby impair the relative or absolute performance of a Fund.

### Proprietary Trading Methods

The trading methods employed by the Investment Manager on behalf of each Fund are proprietary to the Investment Manager. Therefore, subject to disclosure and transparency requirements under applicable laws and regulations, Shareholders are not able to determine details of such trading methods or whether they are being followed.

### Performance Relative to Benchmark

Where the applicable Supplement indicates that the Fund's investment objective is to outperform the Benchmark (as defined in the applicable Supplement), no assurances are given as to the performance of the Fund relative to the Benchmark. The performance of the Investment Manager may result in the Fund:

- (a) underperforming relative to the Benchmark; or

- (b) having a strong correlation to the performance of the Benchmark even during periods of outperformance or underperformance of the Benchmark.

#### Use of a Benchmark

When calculating the Performance Fee payable to the Investment Manager, certain Funds of the Company are using benchmarks within the meaning of the Benchmarks Regulation.

Therefore, to comply with its legal obligations, the Company has adopted written plans setting out actions, which it will take with respect to the relevant Fund, in the event that any of the benchmarks listed in the table below materially changes or ceases to be provided (the “**Contingency Plans**”), as required by article 28(2) of the Benchmarks Regulation.

<b>Benchmarks used by the Company within the meaning of the Benchmarks Regulation</b>
Morgan Stanley Capital International Inc. Emerging Markets Total Return Index with Net Dividends Unhedged in USD
ML 3 Month T Bill Index
EONIA
SONIA
SARON
HKMA
MAS

#### Fund Specific Risks

Please review the particular Fund Supplement for specific risks associated with each particular Fund.

### **CONFLICTS OF INTEREST**

The Directors, the Management Company, the Investment Manager, any sub-investment manager, the Depositary and the Administrator and/or their respective affiliates or any person connected with them (together the “**Relevant Parties**”) may from time to time act as directors, investment manager, manager, distributor, trustee, custodian, depositary, registrar, broker, administrator, investment adviser or dealer in relation to, or be otherwise involved in, other investment funds which have similar or different objectives to those of the Funds or which may invest in the Funds. It is, therefore, possible that any of them may, in the course of business, have potential conflicts of interest with the Funds. The Board of Directors and each of the Relevant Parties will, at all times, have regard in such event to its obligations to the Funds and will endeavour to ensure that such conflicts are resolved fairly. In addition, subject to applicable law, any Relevant Party may deal, as principal or agent, with the Funds, provided that such dealings are carried out as if effected on normal commercial terms negotiated on an arm’s length basis. Any Relevant Party may deal with the Company as principal or as agent, provided that it complies with applicable law and regulation and the provisions of the Investment Management Agreement, the Fund Management Company Agreement, the Administration Agreement or the Depositary Agreement, to the extent applicable.

The Investment Manager, any sub-investment manager or any of its or their affiliates or any person connected with the Investment Manager or any sub-investment manager may invest in, directly or indirectly, or manage or advise other investment funds or accounts which invest in assets which may also be purchased or sold by the Funds. Neither the Investment Manager, any sub-investment manager nor any of its or their affiliates nor any person connected with the Investment Manager or any sub-investment manager is under any obligation to offer investment opportunities of which any of them becomes aware to the Company or to account to the Company in respect of (or share with the Funds or inform the Company of) any such transaction or any benefit received by any of them from any such transaction, but will allocate such opportunities on an equitable basis between the Company and other clients.

In carrying out its functions, the Depositary shall act honestly, fairly, professionally, independently and solely in the interest of the Shareholders.

Potential conflicts of interest may nevertheless arise from time to time from the provision by the Depositary and/or its affiliates of other services to the Company, the Management Company, the Shareholders and/or other parties. For example, the Depositary and/or its affiliates may act as the depositary and/or administrator of other funds. It is therefore possible that the Depositary (or any of its affiliates) may in the course of its business have conflicts or potential conflicts of interest with those of the Company and/or other funds for which the Depositary (or any of its affiliates) acts.

Where a conflict or potential conflict of interest arises during the normal course of business,, the Depositary will have regard to its obligations to the Company under applicable laws, including those to act honestly, fairly, professionally and independently and solely in the interests of the UCITS, as provided under Article 25 of the UCITS Directive. In such cases, the Depositary will treat the Company and the other funds for which it acts fairly and such that, so far as is practicable, any transactions are effected on terms which are not materially less favourable to the Company than if the conflict or potential conflict had not existed. In order to prevent negative effects on the interests of the Company and its Shareholders, as provided under Article 23 of UCITS V Level 2, such potential conflicts of interest are identified, managed, monitored and disclosed in various other ways including, without limitation, the hierarchical and functional separation of Depositary's depositary functions from its other potentially conflicting tasks and by the Depositary adhering to its own conflicts of interest policy.

This Prospectus will be amended with any changes to the information regarding the description of the Depositary's duties and of conflicts of interest that may arise as well as of any safekeeping functions delegated by the Depositary. The list of third-party delegates will be made available to investors at <http://www.agrucits.com/our-funds>.

In calculating a Fund's Net Asset Value, the Administrator may consult with the Investment Manager or any sub-investment manager with respect to the valuation of certain investments. There is an inherent conflict of interest between the involvement of the Investment Manager or any sub-investment manager in determining the Net Asset Value of a Fund and the entitlement of the Investment Manager or any sub-investment manager to a management fee and/or performance fee which is calculated on the basis of the Net Asset Value of the Fund.

The foregoing does not purport to be a complete list of all potential conflicts of interest involved in an investment in the Fund.

The Directors will seek to ensure that any conflict of interest of which they are aware is resolved fairly.

## USE OF DEALING COMMISSIONS

The Investment Manager does not intend to agree to incur higher commissions or spreads for securities transactions effected through brokerage firms that provide it with research or other products or services. However, the Investment Management Agreement authorises the use of “soft dollars” to the extent permitted by applicable law. (The term “**soft dollars**” refers to the receipt by an investment manager of products and services provided by brokers without any cash payment by the investment manager, based on the volume of revenues generated from brokerage commissions for transactions executed for clients of the investment manager.) The products and services available from brokers include both internally generated items (such as research reports prepared by employees of the broker) as well as items acquired by the broker from third parties (such as quotation equipment). Research services furnished by brokers may include written information and analyses concerning specific securities, companies or sectors; market, financial and economic studies and forecasts; statistics and pricing or appraisal services, discussion with research personnel, and invitations to attend conferences or meetings with management or industry consultants. The Investment Manager is not required to weigh any of these factors equally. Information so received in addition to and not in lieu of services required to be performed by the Investment Manager and the Investment Manager’s fee is not reduced as a consequence of the receipt of such supplemental research information. Research services provided by broker-dealers used by the Company may be used by the Investment Manager or its affiliates in connection with its investment services for other accounts and, likewise, research services provided by broker-dealers used for transactions of other accounts may be utilized by the Investment Manager in performing its services for the Company. Since commission rates in the United States are negotiable, selecting brokers on the basis of considerations which are not limited to applicable commission rates may at times result in higher transaction costs than would otherwise be obtainable. Section 28(e) of the United States Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), provides a “safe harbor” to investment managers who use soft dollars generated by their advised accounts to obtain investment research and brokerage services that provide lawful and appropriate assistance to investment managers in the performance of investment decision-making responsibilities. The Investment Manager intends to limit its use of “soft dollars” to those services which would be within the safe harbor afforded by Section 28(e) of the Exchange Act.

The Company’s soft dollar arrangements are subject to applicable laws and regulations, and to the following conditions: (i) the Investment Manager will act at all times in the best interest of the Company when entering into soft commission arrangements; (ii) the services provided will be in direct relationship to the activities of the Investment Manager for the Company; (iii) brokerage commissions on portfolio transactions for the Company will be directed by the Investment Manager to broker-dealers that are entities and not to individuals; (iv) the Investment Manager will provide periodic reports to the Directors with respect to soft commission arrangements including the nature of the services it receives; and (v) soft commission agreements will be listed in such periodic reports.

## CO-MANAGEMENT AND POOLING

To ensure effective management of the Company, the Board of Directors may decide to manage all or part of the assets of one or more Funds with those of other Funds in the Company (so-called “pooling”) or, where applicable, to co-manage all or part of the assets, except for a cash reserve, if necessary, of one or more Funds with the assets of other Luxembourg investment funds or of one or more funds of other Luxembourg investment funds (hereinafter referred to as the “Party(ies) to the co-managed assets”)

for which the Company's Depositary is the appointed depositary bank. These assets will be managed in accordance with the respective investment policies of the Parties to the co-managed assets, each of which is pursuing identical or comparable objectives. Parties to the co-managed assets will only participate in co-managed assets which are in accordance with the stipulations of their respective Prospectuses and investment restrictions.

Each Party to the co-managed assets will participate in the co-managed assets in proportion to the assets it has contributed to the co-management. Assets will be allocated to each Party to the co-managed assets in proportion to its contribution to the co-managed assets. Each Party's rights to the co-managed assets apply to each line of investment in the said co-managed assets. The aforementioned co-managed assets will be formed by the transfer of cash or, where applicable, other assets from each of the Parties participating in the co-managed assets. Thereafter, the Board of Directors may regularly make subsequent transfers to the co-managed assets. The assets can also be transferred back to a Party to the co-managed assets for an amount not exceeding the participation of the said Party to the co-managed assets. Dividends, interest and other distributions deriving from income generated by the co-managed assets will accrue to each Party to the co-managed assets in proportion to its respective investment. Such income may be kept by the Party to the co-managed assets or reinvested in the co-managed assets. All charges and expenses incurred in respect of the co-managed assets will be applied to these assets. Such charges and expenses will be allocated to each Party to the co-managed assets in proportion to its respective entitlement to the co-managed assets.

In the case of an infringement of the investment restrictions affecting a Fund of the Company, when such a Fund takes part in co-management and even if the Investment Manager has complied with the investment restrictions applicable to the co-managed assets in question, the Investment Manager shall reduce the investment in question in proportion to the participation of the Fund concerned in the co-managed assets or, where applicable, reduce its participation in the co-managed assets to a level that respects the investment restrictions of the Fund.

When the Company is liquidated or when the Board of Directors of the Company decide to withdraw the participation of the Company or a Fund of the Company from co-managed assets, the co-managed assets will be allocated to the Parties to the co-managed assets in proportion to their respective participation in the co-managed assets.

The investor must be aware of the fact that such co-managed assets are employed solely to ensure effective management in as much as all Parties to the co-managed assets have the same depositary bank. Co-managed assets are not distinct legal entities and are not directly accessible to investors. However, the portion of assets and liabilities attributable to each Fund of the Company will be constantly identifiable.

## **PREVENTION OF LATE TRADING AND MARKET TIMING**

Late trading is to be understood as the acceptance of a subscription, conversion or redemption order for shares in a fund after the time limit fixed for accepting orders on the relevant day and the execution of such order at the price based on the net asset value applicable to such same day.

The Company considers that the practice of late trading is not acceptable as it violates the provisions of this Prospectus which provide that an order received after the Dealing Request Deadline is dealt with at a Subscription or Redemption Price based on the Net Asset Value calculated on the next applicable Dealing Day. As a result, subscriptions,

conversions and redemptions of Shares shall be dealt with at an unknown Net Asset Value. The Dealing Request Deadline is set out in the Supplements for each Fund.

Market timing is to be understood as an arbitrage method through which an investor systematically subscribes and redeems or converts units or shares of the same undertaking for collective investment within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the Net Asset Value of the undertaking for collective investment.

The Company considers that the practice of market timing is not acceptable as it may affect the Company's performance through an increase of the costs and/or entail a dilution of the profit. As a result, the Company reserves the right to refuse any application for subscription or conversion of Shares which might or appears to be related to market timing practices and to take any appropriate measures in order to protect investors against such practice.

## **GENERAL INFORMATION**

### **1. Shareholder meetings and reports to Shareholders**

Notice of any general meeting of Shareholders (including those considering amendments to the Articles or the dissolution and liquidation of the Company or of any Fund) shall be mailed to each Shareholder at least eight (8) days prior to the meeting and/or shall be published to the extent and in the manner required by Luxembourg law as shall be determined by the Board of Directors.

If the Articles are amended, such amendments shall be filed with the Luxembourg Trade and Companies' Register and published in the *Mémorial C*.

Detailed audited reports of the Company on its activities and on the management of its assets are published annually; such reports shall include, *inter alia*, the combined accounts relating to all the Funds, a detailed description of the assets of each Fund and a report from the Auditor.

The semi-annual unaudited reports of the Company on its activities are also published including, *inter alia*, a description of the investments underlying the portfolio of each Fund and the number of Shares issued and redeemed since the last publication.

The Company's financial statements will be prepared in accordance with Luxembourg GAAP.

The aforementioned documents will be at the disposal of the Shareholders within four (4) months for the annual reports and two (2) months for the semi-annual reports of the date thereof at the registered office of the Company. Upon request, these reports will be sent free of charge to any Shareholder and copies may be obtained free of charge by any person at the registered office of the Company.

The accounting year of the Company commences on 1 April of each year and terminates on 31 March of each year. The first accounting year of the Company started on the launch date of the Company and terminated on 31 March 2013. The Company will publish an audited annual report within four months of the financial period end (i.e., by 31 July of each year). Copies of the unaudited half yearly reports (as of 30 September) will also be prepared within two months of the period end (i.e., by 30 November of each year).

The annual general meeting takes place in Luxembourg City at a place specified in the notice of meeting each year on the third Wednesday of the month of July at 11:00 a.m.. If such day is a legal or a bank holiday in Luxembourg, the annual general meeting shall be held on the next following Business Day. Exceptionally the first annual general meeting took place on the second Wednesday of the month of May in 2013.

The Shareholders of any Class or Fund may hold, at any time, general meetings to decide on any matters that relate exclusively to such Class or Fund.

The combined accounts of the Company are maintained in Euro being the Reference Currency of the Company. The financial statements relating to the separate Funds shall also be expressed in the Reference Currency of the relevant Fund.

## **2. Dissolution and Liquidation of the Company**

The Company may be dissolved at any time by a resolution of the general meeting of Shareholders subject to the quorum and majority requirements applicable for amendments to the Articles.

Whenever the share capital falls below two-thirds of the minimum capital indicated in the Articles, the question of the dissolution of the Company shall be referred to a general meeting of Shareholders by the Board of Directors. The general meeting, for which no quorum shall be required, shall decide by simple majority of the Shares represented at the meeting.

The question of the dissolution of the Company shall also be referred to a general meeting of Shareholders whenever the share capital falls below one quarter of the minimum capital set by the Articles; in such event, the general meeting shall be held without any quorum requirement and the dissolution may be decided by Shareholders holding one quarter of the Shares represented at the meeting.

The meeting must be convened so that it is held within a period of forty (40) days from the date that the net assets have fallen below two-thirds or one quarter of the legal minimum, as the case may be.

Liquidation shall be carried out by one or several liquidators, who may be physical persons or legal entities, duly approved by the CSSF and appointed by the general meeting of Shareholders that shall determine their powers and their compensation.

The net proceeds of liquidation of each Fund shall be distributed by the liquidators to the holders of Shares of each Class of the relevant Fund in proportion to their holding of such Class.

Should the Company be voluntarily or compulsorily liquidated, its liquidation will be carried out in accordance with the provisions of Luxembourg law. Such law specifies the steps to be taken to enable Shareholders to participate in the distribution of the liquidation proceeds and provides for a deposit in escrow at the "*Caisse de Consignation*" at the time of the close of liquidation. Amounts not claimed from escrow within the statute of limitation period shall be liable to be forfeited in accordance with the provisions of Luxembourg law.

### **3. Closure of Funds and Classes**

#### **3.1 Closure decided by the Board of Directors**

In the event that for any reason the value of the total net assets in any Class or Fund has not reached or has decreased to an amount determined by the Board of Directors to be the minimum level for such Class or Fund to be operated in an economically efficient manner, or in case of a substantial modification in the political, economic or monetary situation or as a matter of economic rationalisation, the Board of Directors may decide to redeem all the Shares of the relevant Class or Fund at the Net Asset Value per Share (taking into account actual realisation prices of investments and realisation expenses) determined as of the Valuation Day at which such decision shall take effect and therefore close the relevant Fund.

The Company shall serve a written notice to the shareholders of the relevant Class or Fund prior to the effective date for the compulsory redemption. This notice will indicate the reasons and the procedure for the redemption operations. Unless it is otherwise decided in the interests of, or to keep equal treatment between the Shareholders, the Shareholders of the Class or the Fund concerned may continue to request redemption or conversion of their Shares free of charge (but taking into account actual realisation prices of investments and realisation expenses) prior to the effective date of the compulsory redemption.

#### **3.2 Closure decided by the shareholders**

Notwithstanding the powers conferred to the Board of Directors by the preceding paragraph, the general meeting of Shareholders of any Class within any Fund may, upon a proposal from the Board of Directors, redeem all the Shares of the relevant Class within the relevant Fund and refund to the Shareholders the Net Asset Value of their Shares (taking into account actual realisation prices of investments and realisation expenses) calculated as of the Valuation Day at which such decision shall take effect. There shall be no quorum requirements for such general meeting of Shareholders which shall decide by resolution taken by simple majority of those present or represented and voting.

#### **3.3 Consequences of the closure**

Assets which may not be distributed to their beneficiaries upon the implementation of the redemption will be deposited with the Depositary for the period required by Luxembourg law; after such period, the assets will be deposited with the *Caisse de Consignation* on behalf of the persons entitled thereto.

All redeemed Shares shall be cancelled.

The liquidation of the last remaining Fund of the Company will result in the liquidation of the Company as referred to in Article 145(1) of the UCI Law.

### **4. Mergers**

#### **4.1 Mergers decided by the Board of Directors**

In the event that for any reason the value of the total net assets of the Company or in any Fund has not reached or has decreased to an amount determined by the Board of Directors to be the minimum level for the Company or such Fund to be operated in an economically efficient manner, or in case of a substantial modification in the political,

economic or monetary situation or as a matter of economic rationalisation, the Board of Directors may decide to proceed with a merger (as defined by the UCI Law) of the assets of the Company or any Fund with those of (i) another existing Fund within the Company or another sub-fund of another Luxembourg or foreign UCITS (the “**new sub-fund**”) or of (ii) another Luxembourg or foreign UCITS (the “**new UCITS**”), and to redesignate the Shares of the Company or the Fund concerned as Shares of the new UCITS or the new sub-fund, as applicable.

In case the Company or the Fund involved in a merger is the receiving UCITS (as defined by the UCI Law), the Board of Directors will decide on the effective date of the merger it has initiated.

Such a merger shall be subject to the conditions and procedures imposed by the UCI Law, in particular concerning the merger project to be established by the Board of Directors and the information to be provided to the Shareholders.

## **4.2 Mergers decided by the Shareholders**

Notwithstanding the powers conferred to the Board of Directors by the preceding section, a merger (within the meaning of the UCI Law) of the assets and of the liabilities attributable to any Fund with another Fund within the Company may be decided upon by a general meeting of the Shareholders of the Fund concerned for which there shall be no quorum requirements and which will decide upon such a merger by resolutions taken by simple majority vote of the Shareholders validly cast. The general meeting of the Shareholders of the Fund concerned will decide on the effective date of such a merger it has initiated within the Company, by resolution taken with no quorum requirement and adopted at a simple majority of the Shares present or represented at such meeting.

The shareholders may also decide a merger (within the meaning of the UCI Law) of the assets and of the liabilities attributable to the Company or any Fund with the assets of any new UCITS or new sub-fund within another UCITS. Such a merger and the decision on the effective date of such a merger shall require resolutions of the shareholders of the Company or Fund concerned taken with 50% quorum requirement of the Shares in issue and adopted at a 2/3 majority of the Shares present or represented at such meeting, except when such a merger is to be implemented with a Luxembourg UCITS of the contractual type (“*fonds commun de placement*”), in which case resolutions shall be binding only on such Shareholders who have voted in favour of such merger. If the merger is to be implemented with a Luxembourg UCITS of the contractual type (“*fonds commun de placement*”), Shareholders who have not voted in favour of such merger will be considered as having requested the redemption of their Shares, except if they have given written instructions to the contrary to the Company. The assets which may not or are unable to be distributed to such Shareholders for whatever reason will be deposited with the Depositary for the period required by Luxembourg law; after such period, the assets will be deposited with the *Caisse de Consignation* on behalf of the persons entitled thereto.

Where the Company (or any of the Funds, as the case may be) is the absorbed entity, which thus ceases to exist, irrespective of whether the merger is initiated by the Board of Directors or by the shareholders, the general meeting of Shareholders of the Company (or of the relevant Fund, as the case may be) must decide the effective date of the merger. Such general meeting is subject to a quorum requirement of 50% of the Shares in issue and to a 2/3 majority vote of the Shareholders present or represented.

## **5. Directors' Interests**

The interests of the Directors and their interests in companies associated with the management, administration, promotion and marketing of the Company and the Shares are set out below:

- (a) Each of Mr. Kalb and Mr. Bastow is an employee of the Investment Manager.
- (b) The Directors or companies of which they are officers or employees may subscribe for Shares in the Company. Their applications for Shares will rank *pari passu* with all other applications.

## **6. Indemnity**

The Articles provide that every Director, agent, auditor, or officer of the Company and his personal representatives shall be indemnified and secured harmless out of the assets of the Company against all actions, proceedings, costs, charges, expenses, losses, damages or liabilities incurred or sustained by him in or about the conduct of the Company business or affairs or in the execution or discharge of his duties, powers, authorities or discretions, including actions, proceedings, costs, charges, expenses, losses, damages or liabilities incurred by him in defending (whether successfully or otherwise) any civil proceedings concerning the Company in any court whether in Luxembourg or elsewhere. No such person shall be liable: (i) for the acts, receipts, neglects, defaults or omissions of any other such person; or (ii) by reason of his having joined in any receipt for money not received by him personally; or (iii) for any loss on account of defect of title to any property of the Company; or (iv) on account of the insufficiency of any security in or upon which any money of the Company shall be invested; or (v) for any loss incurred through any bank, broker or other agent; or (vi) for any loss, damage or misfortune whatsoever which may happen in or arise from the execution or discharge of the duties, powers, authorities, or discretions of his office or in relation thereto, unless the same shall happen through his own gross negligence or wilful misconduct against the Company.

## **7. General**

Copies of the following documents may be obtained free of charge during usual business hours on any full bank business day in Luxembourg at the registered office of the Company:

- (a) the Articles and any amendments thereto;
- (b) the latest Prospectus;
- (c) the latest KIIDs;
- (d) the Fund Management Company Agreement between the Company and the Management Company;
- (e) the Depositary Agreement between the Company and the Depositary;
- (f) the Investment Management Agreement between the Company, the Management Company and the Investment Manager;
- (g) the Administration Agreement between the Company, the Management Company and the Administrator;
- (h) the Distribution Agreement between the Company, the Management Company and the Distributor;

- (i) the latest reports and accounts referred to under the heading “Shareholder meetings and reports to Shareholders; and
- (j) the Management Company's remuneration policy.

The agreements referred to above may be amended by mutual consent between the parties thereto.

## APPENDIX 1 : INVESTMENT RESTRICTIONS AND POWERS

The Board of Directors shall, based upon the principle of risk spreading, have power to determine the corporate and investment policy for the investments for each Fund, the Reference Currency of a Fund and the course of conduct of the management and business affairs of the Company.

Except to the extent that more restrictive rules are provided for in connection with a specific Fund under the relevant Supplement, the investment policy shall comply with the investment rules and restrictions laid down hereafter:

### **1. Permitted Investments**

The investments of a Fund must comprise only one or more of the following:

- 1.1** Transferable Securities and Money Market Instruments admitted to or dealt in on a Regulated Market;
- 1.2** Transferable Securities and Money Market Instruments dealt in on another market in a Member State that is regulated, operates regularly and is recognised and open to the public;
- 1.3** Transferable Securities and Money Market Instruments admitted to official listing on a stock exchange in an Non-Member State or dealt in on another market in an Non-Member State which is regulated, operates regularly and is recognised and open to the public;
- 1.4** recently issued Transferable Securities and Money Market Instruments, provided that:
  - (a) the terms of issue include an undertaking that application will be made for admission to official listing on a Regulated Market, stock exchange or on another regulated market as described under 1.1 to 1.3 above;
  - (b) such admission is secured within one year of issue;
- 1.5** units of UCITS and/or other UCIs within the meaning of Article 1 (2), points a) and b) of the UCITS Directive, whether or not established in a Member State, provided that:
  - (a) such other UCIs are authorised under laws which provide that they are subject to supervision considered by the CSSF to be equivalent to that laid down in EU law, and that cooperation between authorities is sufficiently ensured;
  - (b) the level of protection for unitholders in such other UCIs is equivalent to that provided for unitholders in a UCITS, and in particular that the rules on assets segregation, borrowing, lending, and uncovered sales of Transferable Securities and Money Market Instruments are equivalent to the requirements of UCITS Directive;
  - (c) the business of the other UCIs is reported in half-yearly and annual reports to enable an assessment of the assets and liabilities, income and operations over the reporting period; and
  - (d) no more than 10% of the assets of the UCITS or of the other UCIs, whose acquisition is contemplated, can, according to their constitutional

documents, be invested in aggregate in units of other UCITS or other UCIs.

- 1.6** deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than twelve (12) months, provided that the credit institution has its registered office in a Member State or, if the registered office of the credit institution is situated in a Non-Member State, provided that it is subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;
- 1.7** financial derivative instruments, in particular options and futures, including equivalent cash-settled instruments, dealt in on a Regulated Market or other market referred to in 1.1 to 1.3 above, and/or financial derivative instruments dealt in over-the-counter ("over-the-counter derivatives" / ("OTC")), provided that:
- (a) the underlying consists of instruments covered by this section 1, financial indices, interest rates, foreign exchange rates or currencies, in which the Funds may invest according to their investment objectives;
  - (b) the counterparties to over-the-counter derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the CSSF;
  - (c) the over-the-counter derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative;
  - (d) exposure to the underlying assets does not exceed the investment restrictions set out in 2.12 below; and
  - (e) Under no circumstances shall these operations cause the Fund to diverge from its investment objectives.
- 1.8** Money Market Instruments other than those dealt in on a Regulated Market, and which fall within the definition given in the Definitions section of this Prospectus, to the extent that the issue or the issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that such instruments are:
- (a) issued or guaranteed by a central, regional or local authority or by a central bank of a Member State, the European Central Bank, the EU or the European Investment Bank, an Non-Member State or, in case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more member states of the EU belong, or
  - (b) issued by an undertaking any securities of which are dealt in on Regulated Markets referred to in 1.1, 1.2 or 1.3 above, or
  - (c) issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law, or by an establishment which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those laid down by EU law; or
  - (d) issued by other bodies provided that investments in such instruments are subject to investor protection equivalent to that laid down in the first, the second or the third indent and provided that the issuer is a company

whose capital and reserves amount to at least ten million Euro (EUR 10,000,000) and which presents and publishes its annual accounts in accordance with Directive 78/660/EEC, is an entity which, within a Group of Companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.

**1.9** shares issued by one or several other Funds of the Company (the “Target Fund”), under the following conditions:

- (a) the Target Fund does not invest in the investing Fund;
- (b) not more than 10 % of the assets of the Target Fund may be invested in other Funds of the Company;
- (c) the voting rights linked to the transferable securities of the Target Fund are suspended during the period of investment;
- (d) in any event, for as long as these securities are held by the Company, their value will not be taken into consideration for the calculation of the Net Asset Value for the purposes of verifying the minimum threshold of the net assets imposed by the UCI Law; and
- (e) there is no duplication of management/subscription or repurchase fees between those at the level of the Fund of the Company having invested in the Target Fund and this Target Fund.

**1.10** However, each Fund:

- (a) shall not invest more than 10% of its net assets in Transferable Securities or Money Market Instruments other than those referred to above under 1.1 to 1.4 and 1.8 above;
- (b) shall not acquire either precious metals or certificates representing them;
- (c) may hold cash and cash equivalents on an ancillary basis; such restriction may exceptionally and temporarily be exceeded if the Board of Directors considers this to be in the best interest of the shareholders;
- (d) may acquire movable and immovable property which is essential for the direct pursuit of its business;
- (e) may borrow up to 10% of its net assets, provided that such borrowings (i) are made only on a temporary basis or (ii) enables the acquisitions of immovable property essential for the direct pursuit of its business. Where a Fund is authorised to borrow under points (i) and (ii), that borrowing shall not exceed 15% of its assets in total. Collateral arrangements with respect to the writing of options or the purchase or sale of forward or futures contracts are not deemed to constitute "borrowings" for the purpose of this restriction; and
- (f) may acquire foreign currency by means of a back-to-back loan.

## **2. Investment Restrictions**

**2.1** For the purpose of calculating the restrictions described in 2.3 to 2.7 and 2.10 below, companies which are included in the same Group of Companies are regarded as a single issuer.

- 2.2** To the extent an issuer is a legal entity with multiple sub-funds where the assets of a sub-fund are exclusively reserved to the investors in such sub-fund and to those creditors whose claim has arisen in connection with the creation, operation and liquidation of that sub-fund, each sub-fund is to be considered as a separate issuer for the purpose of the application of the risk diversification rules.

### **Transferable Securities and Money Market Instruments**

- 2.3** No Fund may purchase additional Transferable Securities and Money Market Instruments of any single issuer if:
- (a) upon such purchase more than 10% of its net assets would consist of Transferable Securities and Money Market Instruments of such issuer; or
  - (b) the total value of all Transferable Securities and Money Market Instruments of issuers in which it invests more than 5% of its net assets would exceed 40% of the value of its net assets. This limitation does not apply to deposits and over-the-counter derivative transactions made with financial institutions subject to prudential supervision.
- 2.4** A Fund may invest on a cumulative basis up to 20% of its net assets in Transferable Securities and Money Market Instruments issued by the same Group of Companies.
- 2.5** The limit of 10% set forth above under 2.3(A) above is increased to 35% in respect of Transferable Securities and Money Market Instruments issued or guaranteed by a Member State, by its local authorities, by any Non-Member State or by a public international body of which one or more Member State(s) are member(s).
- 2.6** The limit of 10% set forth above under 2.3(A) above is increased up to 25% in respect of qualifying debt securities issued by a credit institution which has its registered office in a Member State and which, under applicable law, is submitted to specific public control in order to protect the holders of such qualifying debt securities. For the purposes hereof, "qualifying debt securities" are securities the proceeds of which are invested in accordance with applicable law in assets providing a return which will cover the debt service through to the maturity date of the securities and which will be applied on a priority basis to the payment of principal and interest in the event of a default by the issuer. To the extent that a relevant Fund invests more than 5% of its net assets in debt securities issued by such an issuer, the total value of such investments may not exceed 80% of the net assets of such Fund.
- 2.7** The securities specified under 2.5 and 2.6 above are not to be included for purposes of computing the ceiling of 40% set forth above under 2.3(B) above.
- 2.8** Notwithstanding the ceilings set forth above, each Fund is authorised to invest, in accordance with the principle of risk spreading, up to 100% of its net assets in Transferable Securities and Money Market Instruments issued or guaranteed by a Member State of the EU, by its local authorities, by any other Member State of the OECD such as the U.S., by certain non-Member States of the OECD (currently Brazil, Indonesia, Russia and South Africa) or by a public international body of which one or more Member State(s) of the EU are member(s) (collectively, the **"Public Issuers"**), provided that (i) such securities

are part of at least six different issues and (ii) the securities from any or such issue do not account for more than 30% of the net assets of such Fund.

When investing in financial derivative instruments on Transferable securities or Money Market Instruments issued or guaranteed by Public Issuers, the diversification requirements set out in the preceding paragraph do not need to be complied with, provided however that any direct investments in the relevant Transferable Securities or Money Market Instruments together with any investments in financial derivative instruments on such Transferable Securities or Money Market Instruments do not represent, on an aggregate basis, more than 100% of the relevant Fund's net assets.

**2.9** Without prejudice to the limits set forth hereunder under 2.22 and 2.23 below, the limits set forth in 2.3 above are raised to a maximum of 20% for investments in shares and/or bonds issued by the same body when the aim of the Fund's investment policy is to replicate the composition of a certain stock or debt securities index which is recognised by the CSSF, on the following basis:

- (a) the composition of the index is sufficiently diversified,
- (b) the index represents an adequate benchmark for the market to which it refers, and
- (c) it is published in an appropriate manner.

The limit of 20% is raised to 35% where that proves to be justified by exceptional market conditions in particular in regulated markets where certain Transferable Securities or Money Market Instruments are highly dominant, provided that any investment up to this 35% limit is only permitted for a single issuer.

### **Bank Deposits**

**2.10** A Fund may not invest more than 20% of its net assets in deposits made with the same body.

### **Derivative Instruments**

**2.11** The risk exposure to a counterparty in an over-the-counter derivative transaction may not exceed 10% of the Fund's net assets when the counterparty is a credit institution referred to in 2.8 above or 5% of its net assets in other cases.

**2.12** Investment in financial derivative instruments shall only be made provided that the exposure to the underlying assets does not exceed in aggregate the investment limits set out in this section. When the Fund invests in index-based financial derivative instruments, these investments do not have to be combined with the limits set out above.

**2.13** When a Transferable Security or Money Market Instrument embeds a derivative, the latter must be taken into account when complying with the requirements of 1.7 above as well as with the risk exposure and information requirements laid down in the present Prospectus.

## Units of open-ended funds

- 2.14** Unless otherwise provided in a Fund's specific part of this Prospectus, a Fund may not invest in aggregate more than 10% of its net assets in the units of other UCITS or other UCIs. If a Fund is authorised to invest in aggregate more than 10% of its net assets in the units of other UCITS or other UCIs, the investment in the units of a single other UCITS or a single other UCI may however not exceed 20% of the relevant Fund's net assets.
- 2.15** When a Fund invests in the units of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same management company or by any other company with which the management company is linked by common management or control, or by a substantial direct or indirect holding, that management company or other company may not charge subscription or redemption fees on account of the Fund's investment in the units of such other UCITS and/or other UCIs.
- 2.16** A Fund that invests a substantial proportion of its assets in other UCITS and/or other UCIs shall disclose in the relevant Fund's part of this Prospectus the maximum level of the management fees that may be charged both to the Fund itself and to the other UCITS and/or other UCIs in which it intends to invest. In its annual report, the Company shall indicate the maximum proportion of management fees charged both to the Fund itself and to the UCITS and/or other UCIs in which it invests.

## Master-Feeder structure

- 2.17** Each Fund may act as a feeder fund (the "**Feeder**") of a master fund. In such case, the relevant Fund shall invest at least 85% of its assets in shares/units of another UCITS or of a sub-fund of such UCITS (the "**Master**"), which is not itself a Feeder nor holds units/shares of a Feeder. The Fund, as Feeder, may not invest more than 15% of its assets in one or more of the following :
- (a) ancillary liquid assets in accordance with Article 41 second indent of second paragraph of the UCI Law;
  - (b) financial derivative instruments, which may be used only for hedging purposes, in accordance with Article 41 first indent, point g) and Article 42 second and third indents of the UCI Law; and
  - (c) movable and immovable property which is essential for the direct pursuit of the Company's business.
- 2.18** When a Fund invests in the shares/units of a Master which is managed, directly or by delegation, by the same management company or by any other company with which the management company is linked by common management or control, or by a substantial direct or indirect holding, that management company or other company may not charge subscription or redemption fees on account of the Fund's investment in the shares/units of the Master.
- 2.19** A Feeder Fund that invests into a Master shall disclose in the relevant Fund's part of this Prospectus the maximum level of the management fees that may be charged both to the Feeder Fund itself and to the Master in which it intends to invest. In its annual report, the Company shall indicate the maximum proportion of management fees charged both to the Fund itself and to the Master. The Master shall not charge subscription or redemption fees for the investment of the Feeder into its shares/units or the disinvestment thereof.

## **Combined limits**

- 2.20** Notwithstanding the individual limits laid down in 2.3, 2.10 and 2.11 above, a Fund shall not combine, where this would lead to investing more than 20% of its assets in a single body, any of the following:
- (a) investments in Transferable Securities or Money Market Instruments issued by that body,
  - (b) deposits made with that body, and/or
  - (c) exposures arising from over-the-counter derivative transactions and efficient portfolio management techniques undertaken with that body.
- 2.21** The limits set out in 2.3, 2.5, 2.6, 2.10, 2.11 and 2.20 above may not be combined, and thus investments in Transferable Securities or Money Market Instruments issued by the same body, in deposits or derivative instruments made with this body carried out in accordance with 2.3, 2.5, 2.6, 2.10, 2.11 and 2.20 above may not exceed a total of 35% of the net assets of each Fund.
- 2.22** The Company may not acquire such amount of shares carrying voting rights which would enable the Company to exercise legal or management control or to exercise a significant influence over the management of the issuer.
- 2.23** The Company may acquire no more than (i) 10% of the outstanding non-voting shares of the same issuer; (ii) 10% of the outstanding debt securities of the same issuer; (iii) 10% of the Money Market Instruments of any single issuer; or (iv) 25% of the outstanding shares or units of the same UCITS or other UCI.

The limits set forth in (ii) to (iv) may be disregarded at the time of acquisition if at that time the gross amount of the debt securities or of the Money Market Instruments or the net amount of the instruments in issue cannot be calculated.

- 2.24** The limits set forth above under 2.22 and 2.23 do not apply in respect of:
- (a) Transferable Securities and Money Market Instruments issued or guaranteed by a Member State or by its local authorities;
  - (b) Transferable Securities and Money Market Instruments issued or guaranteed by any Non-Member State;
  - (c) Transferable Securities and Money Market Instruments issued by a public international body of which one or more Member State(s) are member(s);
  - (d) Shares in the capital of a company which is incorporated under or organised pursuant to the laws of a state which is not a Member State provided that (i) such company invests its assets principally in securities issued by issuers having their registered office in that state, (ii) pursuant to the laws of that State a participation by the relevant Fund in the equity of such company constitutes the only possible way to purchase securities of issuers of that state, and (iii) such company observes in its investments policy the restrictions set forth under 2.3, 2.7, 2.10, 2.11 and 2.14 to 2.23.; or
  - (e) Shares held by one or more Funds in the capital of subsidiary companies which carry on the business of management, advice or marketing in the country where the subsidiary is established, in regard to the redemption of shares at the request of shareholders exclusively on its or their behalf.

### **3. Global Exposure**

Unless otherwise disclosed in the relevant Supplement, each Fund shall employ a Value-at-Risk model in determining its global exposure to financial derivative instruments and will ensure that such global exposure does not exceed the limits as set out in the CSSF circular 11/512 of 30 May 2011.

A Fund shall ensure that its global exposure relating to derivative instruments does not exceed the total net value of its portfolio. The exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, foreseeable market movements and the time available to liquidate the positions.

### **4. Additional investment restrictions:**

- 4.1** No Fund may acquire commodities or precious metals or certificates representative thereof, provided that transactions in foreign currencies, financial instruments, indices or Transferable Securities as well as futures and forward contracts, options and swaps thereon are not considered to be transactions in commodities for the purposes of this restriction.
- 4.2** No Fund may invest in real estate or any option, right or interest therein provided that investments may be made in securities secured by real estate or interests therein or issued by companies which invest in real estate or interests therein.
- 4.3** The investment policy of a Fund may replicate the composition of an index of securities or debt securities, in compliance with the Grand-Ducal Regulation of 8 February 2008 relating to certain definitions of the UCI Law and implementing the UCITS Directive.
- 4.4** A Fund may not grant loans or guarantees in favour of a third party, provided that such restriction shall not prevent each Fund from investing in non fully paid-up Transferable Securities, Money Market Instruments or other financial instruments, as mentioned in 1.5, 1.7 and 1.8 above and shall not prevent the lending of securities in accordance with applicable laws and regulations (as described further in 'Securities Lending and Borrowing' below).
- 4.5** The Company may not enter into uncovered sales of Transferable Securities, Money Market Instruments or other financial instruments as listed in 1.5, 1.7 and 1.8 above.
- 4.6** The ceilings set forth above may be disregarded by each Fund when exercising subscription rights attaching to securities in such Fund's portfolio.
- 4.7** If such ceilings are exceeded for reasons beyond the control of a Fund or as a result of the exercise of subscription rights, such Fund must adopt as its priority objective in its sale transactions the remedying of such situation, taking due account of the interests of its shareholders.
- 4.8** The Board of Directors has the right to determine additional investment restrictions to the extent that those restrictions are necessary to comply with the laws and regulations of countries where Shares of the Company are offered or sold.

## **5. Techniques and Instruments**

### **5.1 General**

The Company may employ techniques and instruments relating to Transferable Securities and Money Market Instruments provided that such techniques and instruments are used for the purposes of efficient portfolio management and investment purposes within the meaning of, and under the conditions set out in, applicable laws, regulations and circulars issued by the CSSF from time to time. In particular, those techniques and instruments should not result in a change of the declared investment objective of the relevant Fund or add substantial supplementary risks in comparison to the stated risk profile of the relevant Fund.

The risk exposure to a counterparty generated through efficient portfolio management techniques and OTC financial derivatives must be combined when calculating counterparty risk limits.

All revenues arising from efficient portfolio management techniques, net of direct and indirect operational costs and fees, will be returned to the Company. In particular, fees and cost may be paid to agents of the Company and other intermediaries providing services in connection with efficient portfolio management techniques as normal compensation of their services. Such fees may be calculated as a percentage of gross revenues earned by the Company through the use of such techniques. Information on direct and indirect operational costs and fees that may be incurred in this respect as well as the identity of the entities to which such costs and fees are paid – as well as any relationship they may have with the Depositary or Investment Manager – will be available in the annual report of the Company.

### **5.2 Securities Lending and Borrowing**

The Company may more specifically enter into securities lending transactions provided that the following rules are complied with in addition to the abovementioned conditions:

- (a) The borrower in a securities lending transaction must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law;
- (b) The borrower in a security lending transaction must be a financial institution specialised in this type of transaction and located in an OECD member state. The borrower will be approved by the Investment Manager under the Investment Manager's approved list of borrowers and its rating will not be the main selection criteria.
- (c) The Company may only lend securities to a borrower either directly or through a standardised system organised by a recognised clearing institution or through a lending system organised by a financial institution subject to prudential supervision rules considered by the CSSF as equivalent to those provided by EU law and specialised in this type of transaction; and
- (d) The Company may only enter into securities lending transactions provided that it is entitled at any time under the terms of the agreement to request the return of the securities lent or to terminate the agreement.

The Company will ensure that the volume of the securities lending transactions is kept at an appropriate level or that it is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations and that these transactions do not jeopardise the management of the Company's assets in accordance with its investment policy.

Under normal circumstances, it is generally expected that the actual percentage of the assets held by a Fund that may be subject to securities lending transactions at any time will not exceed 20% of the Fund's net assets value. In exceptional circumstances, such percentage may be increased up to a maximum of 30% of a Fund's net assets value. The actual percentage depends on factors including but not limited to, the amount of relevant transferable securities held within a Fund and the market demand for such securities at any given time.

Assets used in the context of securities lending transactions will be limited to the assets that the Fund is authorised to invest in pursuant to its investment policy.

Information on the effective use of securities lending by each Fund, will be provided in the Fund's Supplement, if implemented by such Fund.

The risk exposure to the counterparty arising from securities lending transactions and OTC financial derivative instruments should be combined when calculating the counterparty risk limits foreseen under section 2.11 of this Appendix 1.

The securities lending agent on behalf of the Fund will ensure that its counterparty delivers collateral either in the form of cash, or in the form of securities compliant with the applicable Luxembourg regulations, as described below.

For further details on the risks linked to such transactions, please refer to the Section "Risk factors" to the Prospectus.

Under normal circumstances, it is generally expected that the actual percentage of the assets held by a Fund that may be subject to securities borrowing transactions at any time will not exceed 20% of the Fund's net assets value. In exceptional circumstances, such percentage may be increased up to a maximum of 30% of a Fund's net assets value. The actual percentage depends on factors including but not limited to, the amount of relevant transferable securities held within a Fund and the market demand for such securities at any given time. Each Fund may borrow securities under the following circumstances in connection with the settlement of a sale transaction: (a) during a period the securities have been sent out for re-registration; (b) when the securities have been loaned and not returned in time; (c) to avoid a failed settlement when the Depositary fails to make delivery; and (d) as a technique to meet its obligation to deliver the securities being the object of a repurchase agreement when the counterparty to such agreement exercises its right to repurchase these securities, to the extent such securities have been previously sold by the relevant Fund.

Assets used in the context of securities borrowing transactions will be limited to the assets that the Fund is authorised to invest in pursuant to its investment policy.

Information on the effective use of securities borrowing by each Fund, will be provided in the Fund Supplement, if implemented by such Fund.

### **5.3 Reverse repurchase and repurchase agreement transactions**

The Company may enter into repurchase agreements that consist of forward transactions at the maturity of which the Company (seller) has the obligation to

repurchase the assets sold and the counterparty (buyer) the obligation to return the assets purchased under the transactions. The Company may further enter into reverse repurchase agreements that consist of forward transactions at the maturity of which the counterparty (seller) has the obligation to repurchase the asset sold and the Company (buyer) the obligation to return the assets purchased under the transactions. The Company may also enter into transactions that consist of the purchase/sale of securities with a clause reserving for the counterparty/Company the right to repurchase the securities from the Company/counterparty at a price and term specified by the parties in their contractual arrangements.

Assets used in the context of reverse repurchase and repurchase agreement transactions will be limited to the assets that the Fund is authorised to invest in pursuant to its investment policy.

At present, it is not intended that any Funds will enter into reverse repurchase and/or repurchase agreement transactions. Should this be no longer the case, this Prospectus will be amended accordingly.

The Company's involvement in such transactions is, however, subject to the additional following rules:

- (a) The counterparty to these transactions must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law; and
- (b) The Company may only enter into reverse repurchase agreement and/or repurchase agreement transactions provided that it is able at any time (a) to recall the full amount of cash in a reverse repurchase agreement or any securities subject to a repurchase agreement, subject to repurchase agreement maturity, or (b) to terminate the agreement in accordance with applicable regulations and subject to prevailing repurchase agreement market rates. However, fixed-term transactions that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the Company.

#### **5.4 Total Return Swap Agreements**

A total return swap is an agreement in which one party (total return payer) transfers the total economic performance of a reference obligation to the other party (total return receiver). Total economic performance includes income from interest and fees, gains or losses from market movements, and credit losses.

Except otherwise stated in the relevant Fund's supplement, under normal circumstances, it is generally expected that the actual percentage of the assets held by a Fund that may be subject to total return swap agreements at any time will be within the Fund's range of expected level of leverage based on the sum of notionals of financial derivative instruments approach and as set out in the relevant Fund's supplement, where applicable. Except otherwise stated in the relevant Fund's supplement, in exceptional circumstances such percentages are not expected to exceed the maximum value of the Fund's range of expected level of leverage.

The Company may more specifically enter into total return swap agreements provided that the following rules are complied with:

- (a) The counterparty in a total return swap agreement must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law;
- (b) The counterparty in a total return swap agreement must be a financial institution specialised in this type of transaction and located in an OECD member state. The counterparty will be approved by the Investment Manager under the Investment Manager's approved list of counterparties and its rating will not be the main selection criteria.

Only the assets used pursuant to the investment policy of a Fund may be further used for the purpose of total return swaps agreements of this relevant Fund.

Information on the effective use of total return swap agreements and specific details on these transactions will be provided in the Fund Supplement, if implemented by such Fund.

## **5.5 Collateral Management**

### General

In the context of OTC financial derivatives transactions and efficient portfolio management techniques, the Company may receive collateral with a view to reduce its counterparty risk. This section sets out the collateral policy applied by the Company in such case. All assets received by the Company in the context of efficient portfolio management techniques (securities lending, repurchase or reverse repurchase agreements) shall be considered as collateral for the purposes of this section.

### Eligible collateral

Collateral received by the Company may be used to reduce its counterparty risk exposure if it complies with the criteria set out in applicable laws, regulations and circulars issued by the CSSF from time to time notably in terms of liquidity, valuation, issuer credit quality, correlation, risks linked to the management of collateral and enforceability. In particular, collateral should comply with the following conditions:

- (a) Any collateral received other than cash should be of high quality, highly liquid and traded on a regulated market or multilateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to pre-sale valuation;
- (b) It should be valued on at least a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place;
- (c) It should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
- (d) It should be sufficiently diversified in terms of country, markets and issuers with a maximum exposure of 20% of the Fund's net asset value to any single issuer on an aggregate basis, taking into account all collateral received, except for Funds which are fully collateralised in financial instruments issued or guaranteed by governments or public international bodies. Such Funds should receive securities from at least six different issues, and securities from any single issue should not account for more than 30% of the Funds NAV;

- (e) Where there is a title of transfer, collateral received should be held by the Depositary. For other types of collateral arrangement, collateral can be held by a third party custodian which is subject to prudential supervision and which is unrelated to the provider of the collateral; and
- (f) It should be capable of being fully enforced by the Company at any time without reference to or approval from the counterparty.

Subject to the abovementioned conditions, collateral received by the Company may consist of:

- (a) Cash and cash equivalents, including short-term bank certificates and Money Market Instruments;
- (b) Bonds issued or guaranteed by a Member State of the OECD or by their local public authorities or by supranational institutions and undertakings with EU, regional or worldwide scope, having a maturity of up to five years;
- (c) US corporate debt securities, having a maturity of up to five years;
- (d) US and non-US equity securities; and
- (e) Other securities eligible under article 41 of the UCI Law.

#### Level of collateral

The Company will determine the required level of collateral for OTC financial derivatives transactions and efficient portfolio management techniques by reference to the applicable counterparty risk limits set out in this Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions.

The Fund will determine efficient portfolio management techniques by reference to the applicable counterparty risk limits set out in the Prospectus and taking into account the nature and characteristics of transactions, the creditworthiness and identity of counterparties and prevailing market conditions. The level of collateral will be adjusted on a daily valuation of the counterparty risk limits.

#### *Securities lending*

The Fund will generally require the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 102-105% of the total value of the securities lent.

#### *OTC financial derivative transactions*

The Fund will generally require the counterparty to an OTC derivative to post any collateral in favour of the Fund.

#### Haircut policy

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined by the Company for each asset class based on its haircut policy. The policy takes into account a variety of factors, depending on the nature of the collateral received, such as the issuer's credit standing, the maturity, currency, price volatility of the assets and, where applicable, the outcome of liquidity stress tests carried out by the Company under normal and exceptional liquidity conditions.

Collateral will be valued, on a daily basis, using available market prices and taking into account appropriate discounts which will be determined by the Fund for each asset class taking into account the nature of the collateral received, such as the issuer's credit standing, the maturity, currency, price volatility of the assets and, where applicable, the outcome of liquidity stress tests carried out by the Fund under normal and exceptional liquidity conditions.

A minimum of the following haircuts are applied:

Collateral Instrument Type	Haircut
Cash	2%
Government bonds	2%
US or OECD government debt securities	2%
US corporate debt securities	2%
US equity securities	2%
Non-US equity securities	5%
Other securities	2%

#### Reinvestment of collateral

Non-cash collateral received by the Company may not be sold, re-invested or pledged.

Cash collateral received by the Company can only be:

- (a) placed on deposit with credit institutions which have their registered office in an EU Member State or, if their registered office is located in a third-country, are subject to prudential rules considered by the CSSF as equivalent to those laid down in EU law;
- (b) invested in high-quality government bonds;
- (c) used for the purpose of reverse repo transactions provided the transactions are with credit institutions subject to prudential supervision and the Company is able to recall at any time the full amount of cash on accrued basis; and/or
- (d) invested in short-term money market funds as defined in the Guidelines on a Common Definition of European Money Market Funds.

Re-invested cash collateral should be diversified in accordance with the diversification requirements applicable to non-cash collateral as set out above.

A Fund may incur a loss in reinvesting the cash collateral it receives. Such a loss may arise due to a decline in the value of the investment made with cash collateral received. A decline in the value of such investment of the cash collateral would reduce the amount of collateral available to be returned by the relevant Fund to the counterparty at the conclusion of the transaction. The relevant Fund would be required to cover the difference in value between the collateral originally received and the amount available to be returned to the counterparty, thereby resulting in a loss to the Fund.

## SUPPLEMENT 1: AQR Global Risk Parity UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Global Risk Parity UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Global Risk Parity UCITS Fund
<b>Investment Objective</b>	The Fund seeks efficiently to deliver exposure to a broadly diversified set of global risk premia covering equities, government bonds and eligible, diversified commodity indices. There can be no assurance that the Fund will achieve its investment objective.
<b>Investment Policy</b>	<p>The Fund is actively managed and will seek to achieve its Investment Objective through exposures to global developed and emerging stocks, developed government bonds, global inflation protected bonds and eligible, diversified commodity indices, among other exposures (each an “<b>Asset Class</b>” and together the “<b>Asset Classes</b>”). The Fund seeks to implement a broadly diversified and higher long-term risk-adjusted return combination of these market exposures and then levers this combination (up or down) to the desired risk level.</p>
<b>Investment Approach</b>	<p>The Fund seeks to maintain a constant level of portfolio volatility while targeting an equal risk allocation across three major categories (equity risk, nominal fixed income risk and inflation risk) (the “<b>Risk Premia</b>”), taking into consideration the expected volatility and correlations among the categories. The Fund will seek to take into consideration both the expected volatility of each Risk Premium and the expected correlations across the different Risk Premia.</p> <ul style="list-style-type: none"><li>• <u>Equity Risk</u>: global developed equities, global emerging equities, U.S. mid-cap equities, U.S. small cap equities.</li><li>• <u>Nominal Fixed Income Risk</u>: global developed bonds.</li><li>• <u>Inflation Risk</u>: global inflation linked government bonds, swaps on eligible, diversified commodity indices.</li></ul> <p>The instruments expected to be used for this purpose include:</p> <ul style="list-style-type: none"><li>• stock index futures: The Fund will mainly target well diversified national or regional stock indices on a world-wide basis;</li><li>• swaps on stock indices;</li><li>• bond futures;</li><li>• treasury inflation-protected securities (“<b>TIPS</b>”) and inflation linked bonds;</li><li>• currency forwards and swaps.</li></ul> <p>In constructing the investments of the Fund, the Investment Manager will invest in diversified commodity indices (each of which is in compliance with the ESMA Guidelines 2012/832) via derivatives like swaps. The exposure of the Fund to any single</p>

commodity will not exceed 20% of the Fund's net assets.

The Fund may invest in asset-backed securities or mortgage-backed securities up to 20% of the Fund's net assets.

It is anticipated that the exposure to global emerging equities generally will be achieved through derivatives or individual stock positions.

AQR Capital Management, LLC ("**AQR**" or the "**Investment Manager**") uses a customised process to estimate volatilities and correlations for the Risk Premia on a daily basis. Based on these estimates, the Fund adjusts position sizes in each asset class in order to maintain a constant level of portfolio volatility and an equal risk allocation across the Risk Premia. In periods of increasing volatility for an asset class, the Fund will reduce position sizes in order to maintain a steady level of targeted risk. Conversely, in periods of declining volatility for an asset class, the Fund will increase position sizes in response.

The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.

The Fund shall be subject to prudent risk management at all times and will comply with all relevant provisions of the UCI Law.

#### **Cash Manager**

With the consent of the Company and the Management Company, AQR has appointed UBS Global Asset Management (Americas) Inc. with registered office at One North Wacker Drive, Chicago, IL 60606, USA ("**UBS**" or the "**Cash Manager**") under a Cash Management Agreement to serve as sub-investment manager and adviser to AQR, however limited to the investment and reinvestment of the Fund's highly liquid assets, composed of a broad range of fixed income securities.

The Cash Manager is a wholly-owned subsidiary of UBS AG, a publicly traded Swiss bank. UBS is registered with the US Securities and Exchange Commission as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended.

The Cash Manager is entitled to receive a cash management fee paid out of the Investment Manager's own assets.

#### **Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

Due to the sophistication of the Investment Policy and the Investment Approach, which will consist in a combination of sophisticated sub-investment strategies, the Fund is only suitable for institutional investors and Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. The Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management  
and Expected  
Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the absolute Value at Risk (“VaR”) approach.

In financial mathematics and financial risk management, the VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

The Fund will be limited to a 99% one-month VaR of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps will be taken to reduce the risk levels of the fund as rapidly as is prudent.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund's expected level of leverage will generally vary from 100% to 450% of the Fund's NAV. Based on the commitment approach, the Fund's expected level of leverage will generally vary from 100% to 450% of the Fund's NAV. The methodology applied

for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Mixed UCI's
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD, HKD or JPY, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD, HKD or JPY, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.</p> <p>Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.

<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy to this Fund.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.

### **Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fees**

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “Net Aggregate Subscriptions”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee. The Expense Cap shall include expenses paid to the Management Company, the Investment Manager, directors, accountants and auditors, legal advisers, the Administrator, the Depositary and also includes regulatory fees (including the *taxe d’abonnement*) and organisation costs but shall not include expenses directly relating to the Fund’s trading program, including brokerage commissions, fees of any unaffiliated sub-advisers and any withholding or transfer taxes.

### **Fees and Expenses**

#### **Management Company Fees**

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

### **Initial Offer Period**

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes. Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Risk Factors**

Investors’ attention is particularly drawn to the section entitled “Risk Factors” on page 35 of the Prospectus, especially to the risk factors relating to Debt Securities, Swap Agreements, Use of Swaps and other Derivatives, Derivatives, Particular Risks of OTC Derivatives, Counterparty Risk, Developing Markets, Forward Foreign Exchange Contracts and Strategy Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 2: AQR Emerging Equities UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Emerging Equities UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Emerging Equities UCITS Fund
<b>Investment Objective</b>	The Fund's investment objective is to outperform the Morgan Stanley Capital International Inc. Emerging Markets Total Return Index with Net Dividends Unhedged in USD (the " <b>Benchmark</b> ") by an average of 200 basis points per calendar year (net of fees) over a full market cycle.
<b>Investment Policy</b>	<p>The Fund is actively managed and seeks to add value by employing a disciplined approach emphasising both bottom-up security selection decisions and top-down country and currency allocation. The Fund intends to utilise a set of valuation, momentum, economic and additional factors to generate an investment portfolio based on asset allocation and stock selection models. The Fund generally will be managed by both underweighting and overweighting securities, industries, countries and currencies relative to the Benchmark.</p> <p>In order to expand the set of investment opportunities, the Fund will have the ability to gain exposure to securities of issuers in countries and denominated currencies not included in the Benchmark. The Fund will invest primarily in equity and equity-related securities (including without limitation equity index futures, equity index swaps), and currency forwards. However, the Fund's investment portfolio may also include, without limitation, UCITS-eligible exchange-traded funds, options, warrants, equity swaps, futures and other financial instruments. The Fund may also invest in short-term instruments, including U.S. Government securities, bank deposits, money market instruments or such other liquid investments deemed appropriate by the Investment Manager to employ excess cash or for temporary defensive purposes. Additionally, a portion of the assets of the Fund may be held in cash in order to be used for derivatives' margining and collateral requirements.</p> <p>Although the Fund will generally make direct investments, the Fund may also invest indirectly through one or more wholly-owned subsidiaries where the Directors consider that this would be commercially or tax efficient or provide the only practicable means of access to the Fund's investment strategy.</p> <p>The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.</p> <p>As part of its investment approach, the Fund will also enter into securities lending and securities borrowing transactions, in order to provide low-risk incremental income to Shareholders.</p> <p>When entering into the above mentioned transactions, the Fund will request its counterparties to post collateral in the form of cash or US treasury bills having a maturity of up to five years. Collateral received in the framework of securities lending and borrowing transactions will comply with the rules</p>

provided in the main body of the Prospectus under section 5.5 headed “Collateral Management”.

**Total return swaps**

Financial derivative instruments utilised by the Fund may include total return swaps.

The total return swaps will be entered into with first class financial institutions acting as swap counterparties selected at the choice and discretion of the Fund, subject to the conditions laid down in the main body of the Prospectus under section 5.4 headed “Total Return Swap Agreements”.

Where the Fund enters into a total return swap or invests in other derivatives with similar characteristic:

- the assets held by the Fund should comply with the investment limits set in this Prospectus; and
- the underlying exposures of such derivatives must be taken into account to calculate the investment limits set out in the Prospectus.

Counterparties do not have any discretion over the composition or day to day management of the Fund investment portfolio or over the underlying financial derivative instruments.

**Sub-Investment Manager**

No sub-investment manager will be appointed with respect to the Fund. AQR Capital Management, LLC will act directly as investment manager for the Fund with no delegation of its duties.

**Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

**Risk Management and Expected Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks which are material for the Fund, including operational risks.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the relative Value at Risk (“**VaR**”) approach, by reference to the Fund’s Benchmark.

In financial mathematics and financial risk management, the VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is

computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund's expected level of leverage will generally vary from 75% to 600% of the Fund's NAV. Based on the commitment approach, the Fund's expected level of leverage will generally vary from 50% to 150% of the Fund's NAV. The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS and other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Shares and other financial assets' UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Day. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Request Deadline. Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.

## Summary of Shares

Name	Class A Shares	Class B Shares	Class C Shares	Class D Shares	Class E Shares
Type	Institutional				
Accumulation/ Distribution	Accumulation				
Share Class Reference Currency	US Dollars	Euro	Sterling	Swiss Franc	Euro
Reference Currency of the Fund	The Reference Currency of the Fund is USD.				
Initial Offer Price	US\$ 100	EUR 100	GBP 100	CHF 100	Euro 100
Minimum Initial Subscription*	US\$ 100,000	EUR 100,000	GBP 100,000	CHF 100,000	Euro 100,000
Preliminary Charge	NA				
Swing Pricing	<p>The swing pricing procedure shall be implemented in accordance with the Fund's Swing Pricing Policy.</p> <p>Under certain circumstances, investment and/or disinvestment costs may have an adverse effect on the shareholders' interests in the Fund. In order to prevent this effect, called "dilution", the Directors have the authority to allow for the Net Asset Value per Share to be adjusted by effective dealing and other costs and fiscal charges which would be incurred on the effective acquisition or disposal of assets in the Fund if the net capital activity exceeds such threshold percentage (the "<b>Threshold</b>") as may be determined from time to time by the Directors, of the Fund's total net assets on a given Valuation Day. Unless determined otherwise by the Directors in accordance with the Swing Pricing Policy, the Threshold shall be the lesser of (a) \$10 million or (b) 1% of the Net Asset Value of the Fund on the relevant Valuation Day. The swing pricing procedure is detailed below.</p> <p>If the net capital activity on a given Valuation Day leads to a net inflow of assets in excess of the Threshold in the Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in the Fund is adjusted upwards by the swing factor that shall be determined from time to time by the Directors.</p> <p>If the net capital activity on a given Valuation Day leads to a net outflow of assets in excess of the Threshold in the Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in the Fund is adjusted downwards by the swing factor that shall be determined from time to time by the Directors.</p> <p>Under no circumstances shall the swing factor exceed 0.5% of the Net Asset Value per Share of the Fund. Further, for the purpose of calculating the expenses of a Fund which are based on the Net Asset Value of the relevant Fund (including any applicable Performance Fee), the Administrator will continue to use the Net Asset Value prior to any such Swing Pricing Adjustments being applied.</p>				

## Investment Management Fees, Administrative and Operating Fee and Performance Fee

	A CLASS SHARES (USD Accumulation)		
	Net Aggregate Subscriptions (Subscriptions less Redemptions)	Investment Management Fee**	Administrative and Operating Fee ***
Class A1	Below USD 50 million	0.85%	0.09%

	C CLASS SHARES (GBP Accumulation)		
	Net Aggregate Subscriptions (Subscriptions less Redemptions)	Investment Management Fee**	Administrative and Operating Fee ***
Class C1	Below GBP 33 million	0.85%	0.09%
Class C2	GBP 33 million and above but below GBP 133 million	0.75%	0.09%
Class C3	GBP 133 million and above	0.70%	0.09%

	D CLASS SHARES (CHF Accumulation)		
	Net Aggregate Subscriptions (Subscriptions less Redemptions)	Investment Management Fee**	Administrative and Operating Fee ***
Class D1	Below CHF 50 million	0.85%	0.09%
Class D2	CHF 50 million and above but below CHF 200 million	0.75%	0.09%
Class D3	CHF 200 million and above	0.70%	0.09%

**Share Class Transfers.** Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.

**Performance Fee.** No performance fees will apply to any of the A, B, C, or D Classes.

E CLASS SHARES (EUR Accumulation)			
Net Aggregate Subscriptions (Subscriptions less Redemptions)	EUR 50 million and above but below EUR 100 million	EUR 100 million and above but below EUR 150 million	EUR 150 million and above
Fixed Fee	0.20%	0.10%	0.00%
Administrative and Operating Fee	0.09%	0.09%	0.09%
Tier 1 Hurdle (before deduction of any Fixed Fee or Administrative and Operating Fee)	0.35%	0.25%	0.15%

Tier 1 Performance Fee (above Tier 1 Hurdle)	15%	15%	15%
Tier 2 Hurdle	2%	2%	2%
Tier 2 Performance Fee	30%	30%	30%

The “Hurdle” will be calculated with respect to excess returns measured over a benchmark, which will be the Morgan Stanley Capital International Inc. Emerging Markets Total Return Index with Net Dividends Unhedged in Euro, as further described in the “Performance Fee (Class E Shares only)” section below.

**Duration**            The Fund is established for an unlimited duration.

**Listing**                It is not currently intended to list the Shares of the Fund on any stock exchange.

### **Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fees**

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

### **Initial Offer Period**

The Initial Offer Period commenced at 8:00 a.m. (Luxembourg time) on 2 December 2013 and closed at 5:00 p.m. (Luxembourg time) on 13 December 2013. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

## **Fees and Expenses**

### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled "Fees and Expenses".

### Local Tax ("*Taxe d'Abonnement*")

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund's Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

### Performance Fee (Class E Shares only)

The Investment Manager may be entitled to receive a Performance Fee in relation to Class E Shares. The Performance Fee will be calculated in respect of each twelve month period ending on 31 March in each year (a "**Calculation Period**"). The first Calculation Period was the period commencing on the Business Day immediately following the close of the Initial Offer Period and ending on 31 March 2014. The Performance Fee will be calculated and accrued as an expense of Class E Shares as of each Valuation Day.

The Performance Fee is based on the Net Asset Value per Share as at the end of each Calculation Period. The Net Asset Value per Share will include net realised and net unrealised gains and losses (both capital and income) and as a result, performance fees may be paid on unrealised gains, which may subsequently never be realised.

As at the last Valuation Day in each Calculation Period, the Performance Fee payable will be equal to the aggregate of:

- (A) 15 per cent of the appreciation in the Net Asset Value during that Calculation Period equal to or above the Tier 1 Hurdle (as specified above) up to but less than the Tier 2 Hurdle (as specified above); and
- (B) 30 per cent of the appreciation in the Net Asset Value during that Calculation Period equal to or above the Tier 2 Hurdle.

In the event that the appreciation in the Net Asset Value is less than the Tier 1 Hurdle or the Initial Offer Price per Share, no Performance Fee shall be payable in relation to the Shares.

The Hurdle will be calculated with respect to excess returns measured over a benchmark, which will be the Morgan Stanley Capital International Inc. Emerging Markets Total Return Index with Net Dividends Un-hedged in Euro.

#### *Crystallisation of Performance Fee*

The Performance Fee, if any, will be crystallised (i) at the end of each Calculation Period, for each Class of Shares; and (ii) as of any other date Shares are redeemed, in respect of the Shares being redeemed. The Performance Fee will be payable to the Investment Manager in arrears within 14 Business Days of the month end in which the Performance Fee is crystallised.

Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of Shares will, unless determined otherwise by the Directors, be treated as if there was a redemption of such Shares by the transferor and a subscription (at the most recent Price) for such Shares by the transferee on the date of the transfer. However, a transfer will not be treated as a redemption and subscription where the relevant transfer of Shares will not result in a change in the beneficial ownership of the Shares. Crystallised Performance Fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class

The Investment Manager may from time to time and in its sole discretion and out of its own resources decide to rebate to some or all Shareholders (or their agents including the directors), or to intermediaries, part or all of the crystallised Performance Fee.

If the appointment of the Investment Manager is terminated during a Calculation Period, the Performance Fee in respect of the then current Calculation Period will be crystallised as of the date of the termination.

#### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

#### **Specific Risk Factors**

##### *Equity Securities – General Considerations*

The Fund will engage in trading equity securities. Market prices of equity securities as a group have dropped dramatically in a short period of time on several occasions in the past, and they may do so again in the future. In addition, actual and perceived accounting irregularities may cause dramatic price declines in the equity securities of companies reporting such irregularities or which are the subject of rumours of accounting irregularities. These factors may adversely affect the Fund and, consequently, the Net Asset Value per Share.

### *Emerging Market Securities*

The Fund will invest in emerging market securities which may lead to additional risks being encountered when compared with investments in more developed markets. Investment in the securities of issuers based in emerging markets involves a greater degree of risk than an investment in securities of issuers based in more developed countries. Among other things, emerging market securities investments may carry the risks of less publicly available information, more volatile markets, less strict securities market regulation, less favourable tax provisions, and a greater likelihood of severe inflation, unstable or not freely convertible currency, war, corruption and expropriation of personal property than investments in securities of issuers based in more developed countries. In addition, the Fund's investment opportunities in certain emerging markets may be restricted by legal limits on foreign investment in local securities. Emerging markets generally are not as efficient as those in more developed countries. In some cases, a market for the security may not exist locally, and transactions will need to be made on a neighbouring exchange. Volume and liquidity levels in emerging markets are lower than in developed countries.

When seeking to sell emerging market securities, little or no market may exist for the securities. In addition, issuers based in emerging markets are not generally subject to uniform accounting and financial reporting standards, practices and requirements comparable to those applicable to issuers based in more developed countries, thereby potentially increasing the risk of fraud or other deceptive practices. Furthermore, the quality and reliability of official data published by the government or securities exchanges in emerging markets may not accurately reflect the actual circumstances being reported.

Some emerging markets securities may be subject to brokerage or stock transfer taxes levied by governments, which would have the effect of increasing the cost of investment and which may reduce the realised gain or increase the loss on such securities at the time of sale. The issuers of some of these securities, such as banks and other financial institutions, may be subject to less stringent regulations than would be the case for issuers in more developed countries and therefore potentially carry greater risk. In addition, settlement of trades in some emerging markets is much slower and subject to a greater risk of failure than in markets in more developed countries.

Furthermore, custodians are not able to offer the level of service and safe-keeping, settlement and administration of securities that is customary in more developed markets and there is a risk that the Fund will not be recognised as the owner of securities held on its behalf by a sub-custodian. Securities traded in certain emerging markets may be subject to additional risks as a consequence of, amongst other things, the inexperience of financial intermediaries, a lack of modern technology, the possibility of temporary or permanent termination of trading and social, political and economic instability generally. As a result certain risks associated with emerging markets securities may be heightened. In addition, certain countries may restrict or prohibit investment opportunities in issuers and/or industries deemed important to national interests, which may affect the market price, liquidity and rights of securities in which the Fund may invest.

With respect to any emerging market country, there is the possibility of nationalisation, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividends, interest, capital gains or other income, limitations on the removal of funds or other assets of the Fund, political changes, government regulation, social instability or diplomatic developments (including war) which could affect adversely the economies of such countries or the value of the Fund's investments in those countries.

Many emerging market countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in interest rates and corresponding currency devaluations and fluctuations in the rate of exchange between currencies and costs associated with the currency conversion have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries in which the Fund may invest.

Repatriation of investment income, capital and the proceeds of sales by foreign investors may require governmental registration and/or approval in some emerging markets countries. New or additional repatriation restrictions may be imposed subsequent to an investment by the Fund. If such restrictions were imposed, the Fund's response might include, but not be limited to, applying to the appropriate authorities for waiver of the restrictions or engaging in transactions in other markets designed to offset the risks of decline in the relevant country. Such restrictions will be considered in relation to the Fund's liquidity needs, amongst other things.

Government involvement in the private sector varies in degree between emerging market countries in which the Fund may invest. Such involvement may, in certain cases, include government ownership of companies in certain sectors, wage and price controls or imposition of trade barriers and other protectionist measures. There can be no assurance that some future event in relation to an emerging market country will not lead to price controls, forced mergers of companies, expropriation or creation of government monopolies, to the possible detriment of the investments of the Fund.

Corruption is perceived as a problem in certain emerging markets countries. Corrupt practices may have an adverse impact on the assets in which the Fund intends to invest. Corruption may also affect the ability of the Fund to enforce its legal rights.

Many of the laws that govern private investment, securities transactions and other contractual relationships in emerging markets are new and largely untested. As a result, the Fund may be subject to a number of unusual risks, including inadequate investor protection, contradictory legislation, incomplete, unclear and changing laws, ignorance or breaches of regulations on the part of other market participants, lack of established or effective avenues for legal redress, lack of standard practices and confidentiality customs characteristic of developed markets and lack of enforcement of existing regulations. Regulatory controls and corporate governance of companies in emerging markets may confer little protection on minority shareholders. Anti-fraud and anti-insider trading legislation is often rudimentary. The concept of fiduciary duty to shareholders by officers and directors is also limited when compared to such concepts in developed markets. In certain instances management may take significant actions without the consent of shareholders and anti-dilution protection also may be limited. Furthermore, it may be difficult to obtain and enforce a judgment in certain of the emerging markets in which assets of the Fund will be invested. There can be no assurance that any difficulty in protecting and enforcing rights will not have a material adverse effect on the Fund and its operations.

### **Risk Factors**

In addition to the specific risk factors set out above, investors' attention is particularly drawn to the section entitled "Risk Factors" on page 35 of the Prospectus, especially to the risk factors relating to Swap Agreements, Use of Swaps and other Derivatives, Derivatives, Particular Risks of OTC Derivatives, Counterparty Risk, Developing Markets and Strategy Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Performance Relative to Benchmark.

### SUPPLEMENT 3: AQR Managed Futures UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Managed Futures UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Managed Futures UCITS Fund
<b>Investment Objective</b>	The Fund seeks to produce attractive risk-adjusted returns while maintaining low-to-zero long-term average correlation to traditional markets.
<b>Investment Policy</b>	<p>The Fund is actively managed and will seek to achieve its Investment Objective by investing in a diversified portfolio of equity, currency and fixed-income instruments, both long and short, in an effort to provide exposure and performance that is, on average, lowly correlated to the equity markets. The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process that pursues short to intermediate-term price trends in the corresponding market for the instrument, while modulating its positions by systematically assessing whether a given trend looks over-extended on a short or long term basis. The over-extended signals evaluate whether a market move is anomalously large relative to history. If it is, this is an indication that the trend is less likely to continue. In addition, the signals evaluate whether the market trend has gone on for so long that the market has strayed from its fundamental value. This is also an indicator that the trend may not continue. When overextended signals make this determination, the conviction in the trend is reduced, and the size of the position is reduced accordingly.</p> <p>It is expected that the Fund will invest primarily in futures contracts, currency forward contracts, and swaps. The futures contracts will include equity index futures, bond futures, and interest rate futures. Currency forwards will include both developed and emerging market forwards and non-deliverable forwards. Swaps investments may include swaps on equity indices, bond indices, and interest rate swaps. A portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds, bank deposits and/or U.S. Government securities (including U.S. treasury bills). A portion of these assets may be used for derivatives' margining and collateral requirements. There are no geographic limits on the market exposure of the Fund's assets. This flexibility allows AQR to look for investments or gain exposure to asset classes and markets around the world, including emerging markets, that it believes will enhance the Fund's ability to meet its investment objective.</p> <p>The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.</p>
<b>Cash Manager</b>	With the consent of the Company and the Management Company, AQR has appointed UBS Global Asset Management (Americas) Inc. with registered office at One North Wacker Drive, Chicago, IL 60606, USA (" <b>UBS</b> " or the " <b>Cash Manager</b> ") under a Cash Management Agreement to serve as sub-investment manager and adviser to AQR, however limited to the investment and reinvestment of the Fund's highly liquid assets, composed of a broad range of fixed income securities.

The Cash Manager is a wholly-owned subsidiary of UBS AG, a publicly traded Swiss bank. UBS is registered with the US Securities and Exchange Commission as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended.

The Cash Manager is entitled to receive a cash management fee paid out of the Investment Manager's own assets.

**Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

Due to the extensive use of derivatives including, but not limited to, the use of short term interest rate contracts, the Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management and Expected Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the absolute Value at Risk ("**VaR**") approach.

In financial mathematics and financial risk management, VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

The Fund will be limited to a 99% one-month VaR of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps will be taken to reduce the risk levels of the fund as rapidly as is prudent.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative

instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund's expected level of leverage will generally vary from 900% to 2100% of the Fund's NAV. Based on the commitment approach, the Fund's expected level of leverage will generally vary from 500% to 1800% of the Fund's NAV. The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

The high leverage is mainly driven by short term interest rate futures contracts (fixed income instruments with a duration of 3 months used for duration management). The short duration exposure combined with the low volatility of near-term interest rates leads to an extremely low volatility in those instruments and therefore requires large notional positions in order to achieve a meaningful exposure in those markets. Accordingly, the high notional leverage is not necessarily representative of economic risk in the Fund.

The Fund makes extensive use of foreign exchange forward contracts as part of its investment policy. These contracts can lead to inflated levels of leverage when measured using the sum of the notionals approach. Please note that the levels of leverage are lower when measured using the commitment approach, once netting and hedging arrangements have been taken into account. Please note further that in certain circumstances (such as when the Fund experiences a large redemption) this Fund may have a higher than expected number of offsetting foreign exchange forward contracts; this can temporarily lead to an inflated level of leverage when measured using the sum of the notionals approach.

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Mixed UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.

<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day. Payment will be made in the currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy to this Fund.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.

## Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fees

### \* Minimum Initial Subscription

Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

### \*\* Investment Management Fee

The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. The Directors may reduce the Investment Management Fee.

### \*\*\* Performance Fees

The Investment Manager may be entitled to receive a Performance Fee in relation to the Shares. The Performance Fee will be calculated in respect of each twelve month period ending on 31 March in each year (a “**Calculation Period**”). The first Calculation Period will be the period commencing on the Business Day immediately following the close of the Initial Offer Period and ending on 31 March 2015. The Performance Fee will be calculated and accrued as an expense of the Shares as of each Valuation Day.

The Performance Fee is based on the Net Asset Value per Share as at the end of each Calculation Period. The Net Asset Value per Share will include net realised and net unrealised gains and losses (both capital and income) and as a result, performance fees may be paid on unrealised gains, which may subsequently never be realised.

As at the last Valuation Day in each Calculation Period, the Performance Fee payable will be equal to 10 per cent of New Net Appreciation in the Net Asset Value during that Calculation Period equal to or above the Benchmark Hurdle (as specified above) (“**New Net Appreciation**”).

In the event that New Net Appreciation in the Net Asset Value is less than the Benchmark Hurdle, no Performance Fee shall be payable in relation to the Shares.

### *Crystallisation of Performance Fee*

The Performance Fee, if any, will be crystallised i) at the end of each Calculation Period, for each Class of Shares; and ii) as of any other date Shares are redeemed, in respect of the Shares being redeemed. The Performance Fee will be payable to the Investment Manager in arrears within 14 Business Days of the month end in which the Performance Fee is crystallised

Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of Shares will, unless determined otherwise by the Directors, be treated as if there was a redemption of such Shares by the transferor and a subscription (at the most recent Price) for such Shares by the transferee on the date of the transfer. However, a transfer will not be treated as a redemption and subscription where the relevant transfer of Shares will not result in a change in the beneficial ownership of the Shares. Crystallised Performance Fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the

Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The Investment Manager may from time to time and in its sole discretion and out of its own resources decide to rebate to some or all Shareholders (or their agents including the directors), or to intermediaries, part or all of the crystallised Performance Fee.

If the appointment of the Investment Manager is terminated during a Calculation Period, the Performance Fee in respect of the then current Calculation Period will be crystallised as of the date of the termination.

#### **\*\*\*\* The Administrative and Operating Fee**

The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

#### **Local Tax (“Taxe d’Abonnement”)**

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

#### **Management Company Fees**

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

#### **Administration and Depositary Fees**

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.14% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

#### **Initial Offer Period**

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

## **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

## **Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" on page 35 of the Prospectus, especially to the risk factors relating to Concentration of Investments, Credit Spreads, Debt Securities, Swap Agreements, Use of Swaps and other Derivatives, Leverage, Currency Exposure, Derivatives, Particular Risks of OTC Derivatives, Counterparty Risk, Synthetic Short Selling, Developing Markets, Forward Foreign Exchange Contracts, Strategy Risk, Interest Rate Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 4: AQR Style Premia UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Style Premia UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Style Premia UCITS Fund
<b>Investment Objective</b>	The Fund seeks to produce high risk-adjusted returns while maintaining low-to-zero correlation to traditional markets.
<b>Investment Policy</b>	<p>The Fund is actively managed and will seek to achieve its Investment Objective by aiming to provide exposure to four separate investment styles (each a “<b>Style</b>” and together “<b>Styles</b>”), as further described below: value, momentum, carry and defensive, using both “long” and “short” positions within the following asset groups (“<b>Asset Groups</b>”): equities, bonds, interest rates and currencies.</p> <p>The Fund may achieve its exposure to any of the Asset Groups by using derivatives rather than holding those assets directly. The Fund may also use derivatives for hedging purposes.</p> <p>The Fund implements the Styles by investing globally (including in emerging markets) in a broad range of instruments, including, but not limited to, equities (primarily those issued by large and mid-cap companies), futures (including index futures, bond futures and interest rate futures), currency forwards, options and swaps (including equity swaps, swaps on index futures, total return swaps and interest rate swaps). The Fund has also exposure to bonds, including U.S. Government securities and sovereign debt issued by other developed countries. The Fund may invest in debt securities of any credit rating, maturity or duration.</p> <p>The Fund will utilise customised trading algorithms in order to minimise market impact and reduce trading costs. The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process.</p> <p>The Styles employed by the Fund are:</p> <p><b>Value:</b> Value strategies favour investments that appear cheap over those that appear expensive based on fundamental measures related to price, seeking to capture the tendency for relatively cheap assets to outperform relatively expensive assets.</p> <p><b>Momentum:</b> Momentum strategies favour investments that have performed relatively well over the medium-term, seeking to capture the tendency that an asset’s recent relative performance will continue in the near future.</p> <p><b>Carry:</b> Carry strategies favour investments with higher yields, seeking to capture the tendency for higher- yielding assets to provide higher returns than lower-yielding assets.</p> <p><b>Defensive:</b> Defensive strategies favour investments with low-risk characteristics, seeking to capture the tendency for lower risk and higher-quality assets to generate higher risk-adjusted returns than higher</p>

risk and lower-quality assets.

The Fund is actively managed and the Fund's exposures to Styles and Asset Groups will vary based on AQR's evaluation of investment opportunities. Not all Styles are represented within each Asset Group; however, the Fund as a whole aims to maintain balanced exposure to all four Styles to diversify risk and enhance return.

The Fund allows strategy-level risk to vary over time depending on the attractiveness of investment opportunities. However, the Fund imposes a cap on risk at the strategy level defined as a percentage of each strategy's long-term risk target. A portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds, bank deposits and/or U.S. Government securities (including U.S. treasury bills). A portion of these assets may be used for derivatives' margining and collateral requirements.

There is no guarantee that the Fund's objectives will be met.

**Total return swaps** Financial derivative instruments utilised by the Fund may include total return swaps.

The total return swaps will be entered into with first class financial institutions acting as swap counterparties selected at the choice and discretion of the Fund, subject to the conditions laid down in the main body of the Prospectus under section 5.4 headed "Total Return Swap Agreements".

Where the Fund enters into a total return swap or invests in other derivatives with similar characteristic:

- the assets held by the Fund should comply with the investment limits set in this Prospectus; and
- the underlying exposures of such derivatives must be taken into account to calculate the investment limits set out in the Prospectus.

Counterparties do not have any discretion over the composition or day to day management of the Fund investment portfolio or over the underlying financial derivative instruments.

**Cash Manager** With the consent of the Company and the Management Company, AQR has appointed UBS Global Asset Management (Americas) Inc. with registered office at One North Wacker Drive, Chicago, IL 60606, USA ("UBS" or the "**Cash Manager**") under a Cash Management Agreement to serve as sub-investment manager and adviser to AQR, however limited to the investment and reinvestment of the Fund's highly liquid assets, composed of a broad range of fixed income securities.

The Cash Manager is a wholly-owned subsidiary of UBS AG, a publicly traded Swiss bank. UBS is registered with the US Securities and Exchange Commission as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended. The Cash Manager is entitled to receive a cash management fee paid out of the Investment Manager's own assets.

**Profile of Typical Investor** The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with

investing in Shares of the Fund.

Due to the extensive use of derivatives including, but not limited to, the use of short term interest rate contracts, the Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management  
and Expected  
Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the absolute Value at Risk (“VaR”) approach.

In financial mathematics and financial risk management, VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

The Fund will be limited to a 99% one-month VaR of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps will be taken to reduce the risk levels of the fund as rapidly as is prudent.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund's expected level of leverage will generally vary from 800% to 2900% of the Fund's NAV. Based on the commitment approach, the Fund's expected level of leverage will generally vary from 700% to 2700% of the Fund's NAV. The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

The high leverage is mainly driven by short term interest rate futures contracts (fixed income instruments with a duration of 3 months used for duration management). The short duration exposure combined with the low volatility of near-term interest rates leads to an extremely low volatility in those instruments and therefore requires large notional positions in order to achieve a meaningful exposure in those markets. Accordingly, high notional leverage is not necessarily representative of economic risk in the Fund.

Most Styles are relative value and, for the most part, U.S. Dollar neutral; therefore, more leverage is needed to achieve meaningful risk exposure and expected returns compared to directional strategies. This Fund has very high diversification, both across Styles and Asset Groups. When combined, the Fund requires additional leverage to achieve meaningful levels of volatility. Even though the above level of leverage seems high, over half the leverage is in short-term interest rates futures, which when converted to the risk of 10 year bond equivalents, effective leverage would be 28 times lower.

**Investment in collective investment schemes**

The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.

**NAV Tolerance Threshold**

Mixed UCIs

**Valuation Day**

Each Dealing Day.

**Dealing Day**

Every Business Day

**Dealing Request Deadline**

1:00 p.m. (Luxembourg time) on each Dealing Day.

**Settlement**

Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days

Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the

Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day. Payment will be made in the currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.

<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy to this Fund.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

## Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fee

### \* Minimum Initial Subscription

Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

### \*\* Investment Management Fee

The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. The Directors may reduce the Investment Management Fee.

### \*\*\* Performance Fees

The Investment Manager may be entitled to receive a Performance Fee in relation to the Shares. The Performance Fee will be calculated in respect of each twelve month period ending on 31 March in each year (a “**Calculation Period**”). The first Calculation Period will be the period commencing on the Business Day immediately following the close of the Initial Offer Period and ending on 31 March 2015. The Performance Fee will be calculated and accrued as an expense of the Shares as of each Valuation Day.

The Performance Fee is based on the Net Asset Value per Share as at the end of each Calculation Period. The Net Asset Value per Share will include net realised and net unrealised gains and losses (both capital and income) and as a result, performance fees may be paid on unrealised gains, which may subsequently never be realised.

As at the last Valuation Day in each Calculation Period, the Performance Fee payable will be equal to 10 per cent of New Net Appreciation in the Net Asset Value during that Calculation Period equal to or above the Benchmark Hurdle (as specified above) (“**New Net Appreciation**”).

In the event that New Net Appreciation in the Net Asset Value is less than the Benchmark Hurdle, no Performance Fee shall be payable in relation to the Shares.

### *Crystallisation of Performance Fee*

The Performance Fee, if any, will be crystallised i) at the end of each Calculation Period, for each Class of Shares; and ii) as of any other date Shares are redeemed, in respect of the Shares being redeemed. The Performance Fee will be payable to the Investment Manager in arrears within 14 Business Days of the month end in which the Performance Fee is crystallised

Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of Shares will, unless determined otherwise by the Directors, be treated as if there was a redemption of such Shares by the transferor and a subscription (at the most recent Price) for such Shares by the transferee on the date of the transfer. However, a transfer will not be treated as a redemption and subscription where the relevant transfer of Shares will not result in a change in the beneficial ownership of the Shares. Crystallised Performance Fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The Investment Manager may from time to time and in its sole discretion and out of its own resources decide to rebate to some or all Shareholders (or their agents including the directors), or to intermediaries, part or all of the crystallised Performance Fee.

If the appointment of the Investment Manager is terminated during a Calculation Period, the Performance Fee in respect of the then current Calculation Period will be crystallised as of the date of the termination.

#### **\*\*\*\* The Administrative and Operating Fee**

The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

#### **Local Tax (“Taxe d’Abonnement”)**

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

### **Additional Notes on Fees and Expenses**

#### **Management Company Fees**

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

#### **Administration and Depositary Fees**

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.14% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Initial Offer Period**

The Initial Offer Period for Shares will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

### **Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" on page 35 of the Prospectus, especially to the risk factors relating to Concentration of Investments, Credit Spreads, Debt Securities, Swap Agreements, Use of Swaps and other Derivatives, Leverage, Currency Exposure, Derivatives, Particular Risks of OTC Derivatives, Counterparty Risk, Synthetic Short Selling, Developing Markets, Forward Foreign Exchange Contracts, Strategy Risk, Interest Rate Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 5: AQR Global Core Equity UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Global Core Equity UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Global Core Equity UCITS Fund.
<b>Investment Objective</b>	The investment objective of the Fund is to outperform the Morgan Stanley Capital International Inc. World Total Return Index, (Net), U.S. Dollar unhedged, (the “ <b>Benchmark</b> ”) by investing in international equities and cash. There can be no assurance that the Fund will achieve its investment objective.
<b>Investment Policy</b>	The Fund is actively managed and will seek to achieve its Investment Objective by investing its assets in equity or equity-related securities of attractively valued companies with positive momentum and a stable business.
<b>Investment Approach</b>	<p>Companies are considered to be good value investments if they appear cheap based on multiple fundamental measures, including price-to-book and price-to-earnings ratios relative to other securities in its relevant universe at the time of purchase. In assessing positive momentum, the Fund favours securities with strong medium-term performance relative to other securities in its relevant universe at the time of purchase. Further, the Fund favours stable companies in good business health, including those with strong profitability and stable earnings. The Fund may add to or modify the economic factors employed in selecting securities. In this case investors will be informed of the modification and the Prospectus will be updated accordingly.</p> <p>The Fund generally invests in companies with market capitalisations within the range of the Benchmark at the time of purchase.</p> <p>The Investment Manager determines the weight of each security in the portfolio using a combination of the float-adjusted market capitalisation of the security and the Investment Manager’s assessment of attractiveness of the security based on each factor described above.</p> <p>The Investment Manager utilises portfolio optimisation techniques to determine the frequency of trading, taking into account the transaction costs associated with trading each equity instrument. The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.</p> <p>The Fund invests primarily in common stocks. The Fund may also invest in or use equity index futures contracts and UCITS eligible exchange-traded funds as a substitute for investing in</p>

conventional securities in order to gain exposure to the equity market and to maintain liquidity to pay for redemptions. A portion of the Fund's assets may be held in cash or short term cash equivalent investments, including, but not limited to short-term investment funds.

The Fund also engages in currency transactions with counterparties primarily in order to hedge against a decline in the value of portfolio holdings denominated in particular currencies and to provide temporary exposure to a particular currency in lieu of leaving cash inflows uninvested. Currency transactions include forward currency contracts and exchange listed currency futures. A forward currency contract involves a privately negotiated obligation to purchase or sell (with delivery generally required) a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. The Fund seeks to diversify currency exposures and to avoid the risk of high exposures to any one currency, including U.S. dollars.

As part of its investment approach, the Fund will also enter into securities lending and securities borrowing transactions, in order to provide low-risk incremental income to Shareholders.

When entering into the above mentioned transactions, the Fund will request its counterparties to post collateral in the form of cash or US treasury bills having a maturity of up to five years.

Collateral received in the framework of securities lending and borrowing transactions will comply with the rules provided in the main body of the Prospectus under section 5.5 headed "Collateral Management".

**Sub-Investment  
Manager**

No sub-investment manager will be appointed with respect to the Fund. The Investment Manager will act directly as investment manager for the Fund with no delegation of its duties.

**Profile of Typical  
Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

**Risk Management  
and Expected Level  
of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the Commitment approach.

This approach measures the global exposure related to positions on financial derivative instruments and other efficient portfolio management techniques under consideration of netting and hedging effects. Net Commitment may not exceed the total net value of the portfolio of the Sub-Fund.

Under the standard commitment approach, each financial derivative instruments position is converted into the market value of an equivalent position in the underlying asset of that financial derivative instrument.

**Investment in collective investment schemes**

The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.

**NAV Tolerance Threshold**

Shares and other financial assets' UCIs.

**Valuation Day**

Each Dealing Day.

**Dealing Day**

Every Business Day.

**Dealing Request Deadline**

1:00 p.m. (Luxembourg time) on each Dealing Day.

**Settlement**

Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day.

Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day. Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.

**Price Publication**

The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.

**Share Class Transfers**

Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the

Transfer Agent on behalf of each eligible Shareholder.

**Performance Fee** No Class of the Fund will have a Performance Fee.

**Duration** The Fund is established for an unlimited duration.

**Listing** It is not currently intended to list the Shares of the Fund on any stock exchange.

Class D3	CHF 200 million and above	0.25%	0.09%

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

### **Initial Offer Period**

The Initial Offer Period is expected to commence at 8:00 a.m. (Luxembourg time) on 27 October 2014 and close at 5:00 p.m. (Luxembourg time) on 1 December 2014. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### **Fees and Expenses**

#### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

### **Specific Risk Factors**

Investors’ attention is particularly drawn to the section entitled “Risk Factors”, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Mid Cap Securities Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Performance Relative to Benchmark.

## SUPPLEMENT 6: AQR Global Defensive Equity UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Global Defensive Equity UCITS Fund should be read in conjunction with the full text of this Prospectus.

**Name of Fund** AQR UCITS Funds – AQR Global Defensive Equity UCITS Fund.

**Investment Objective** The Fund seeks total return. There can be no assurance that the Fund will achieve its investment objective.

**Investment Policy** The Fund is actively managed and pursues a “defensive” strategy, seeking to provide downside protection with upside potential through active stock selection, risk management and diversification.

**Investment Approach** The Fund pursues its objective by investing its assets in equity or equity related securities of global issuers. An issuer will be considered a global issuer if it is organised, domiciled, or has a principal place of business in a country that is part of the Morgan Stanley Capital International Inc. World Total Return Index, (Net), U.S. Dollar unhedged), or if an instrument provides exposure to the change in value of a company that meets that definition. However, the Fund may also invest in issuers organised, domiciled, or with a principal place of business in other countries if the Investment Manager considers it advisable to achieve the Fund’s investment objective. Pending investment in equities of global issuers or for use as collateral to meet margin requirements, the Fund may invest in short-term instruments, including U.S. Government securities, bank certificates of deposit, money market instruments or funds, and such other liquid investments deemed appropriate by the Investment Manager. The Fund may also invest in these securities without limit (but within relevant UCITS limits) for temporary defensive purposes.

The Fund pursues a defensive strategy, meaning it seeks to participate in rising equity markets while mitigating downside risk in declining markets. In other words, the Fund expects to lag the performance of traditional global equity funds when these markets are rising, but to exceed the performance of traditional international equity funds during international equity market declines. To achieve this result, the Fund will be broadly diversified across companies, industries and countries and will invest in companies that the Investment Manager has identified to have stable businesses with low leverage, low earnings-per-share variability and other measures of risk and high profitability.

The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.

The Fund may also invest in or use equity index futures contracts and UCITS eligible exchange-traded funds as a substitute for investing in conventional securities in order to gain exposure to

the equity market and to maintain liquidity to pay for redemptions.

The Fund also engages in currency transactions with counterparties primarily in order to hedge against a decline in the value of portfolio holdings denominated in particular currencies and to provide temporary exposure to a particular currency in lieu of leaving cash inflows uninvested. Currency transactions include forward currency contracts and exchange listed currency futures. A forward currency contract involves a privately negotiated obligation to purchase or sell (with delivery generally required) a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. The Fund seeks to diversify currency exposures and to avoid the risk of high exposures to any one currency, including U.S. dollars.

As part of its investment approach, the Fund will also enter into securities lending and securities borrowing transactions, in order to provide low-risk incremental income to Shareholders.

When entering into the above mentioned transactions, the Fund will request its counterparties to post collateral in the form of cash or US treasury bills having a maturity of up to five years.

Collateral received in the framework of securities lending and borrowing transactions will comply with the rules provided in the main body of the Prospectus under section 5.5 headed "Collateral Management".

**Sub-Investment  
Manager**

No sub-investment manager will be appointed with respect to the Fund. The Investment Manager will act directly as investment manager for the Fund with no delegation of its duties.

**Profile of Typical  
Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

The Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund.

By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

<b>Risk Management and Expected Level of Leverage</b>	<p>In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.</p> <p><u>Calculation of global exposure</u></p> <p>As part of this risk-management process, the global exposure of the Fund is measured and controlled by the Commitment approach.</p> <p>This approach measures the global exposure related to positions on financial derivative instruments and other efficient portfolio management techniques under consideration of netting and hedging effects. Net Commitment may not exceed the total net value of the portfolio of the Sub-Fund.</p> <p>Under the standard commitment approach, each financial derivative instruments position is converted into the market value of an equivalent position in the underlying asset of that financial derivative instrument.</p>
<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Shares and other financial assets' UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.</p>

Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.

<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

### **Initial Offer Period**

The Initial Offer Period is expected to commence at 8:00 a.m. (Luxembourg time) on 27 October 2014 and close at 5:00 p.m. (Luxembourg time) on 1 December 2014. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### **Fees and Expenses**

#### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund..

#### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

#### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Risk Factors**

Investors’ attention is particularly drawn to the section entitled “Risk Factors”, especially to the risk factors relating to Debt Securities, Swap Agreements, Use of Swaps and other Derivatives, Derivatives, Particular Risks of OTC Derivatives, Counterparty Risk, Developing Markets, Forward Foreign Exchange Contracts and Strategy Risk, Mid Cap Securities Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 7: AQR Global Enhanced Equity UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Global Enhanced Equity UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Global Enhanced Equity UCITS Fund.
<b>Investment Objective</b>	The investment objective of the Fund is to outperform the Morgan Stanley Capital International Inc. World Total Return Index, (Net), U.S. Dollar unhedged, (the “ <b>Benchmark</b> ”) by investing in international equities and cash. There can be no assurance that the Fund will achieve its investment objective.
<b>Investment Policy</b>	The Fund is actively managed and will seek to achieve its investment objective over a long-term investment horizon, typically 5 to 7+ years through the implementation of a disciplined set of strategies based on value, momentum, economic and additional factors based on stock and industry selection models.
<b>Investment Approach</b>	<p>The investment approach of the Fund will be to take positions in international equity markets, either directly or through derivative exposure. These positions will generally be taken (i) in securities issued by companies domiciled in countries within the Benchmark, or countries to be admitted to the Benchmark within 180 days of purchase; or (ii) equity securities of companies listed (or expected to be listed within 6 months of their acquisition) on any recognised stock exchange which the Investment Manager considers to be of sufficient liquidity and subject to adequate regulatory oversight. The Fund will seek to implement a disciplined set of economically intuitive and rigorously tested strategies based on value, momentum and other investment themes which are designed to generate attractive returns.</p> <p>Value strategies favour securities that appear cheap on fundamental measures, often as a result of distress or lack of favour. Value strategies are negative on “glamour” or popular securities that appear overpriced. Examples of value strategies for choosing individual equities include price to earnings and price to book ratios.</p> <p>Momentum strategies favour securities with strong recent performance. Research has shown that securities that have done well recently on average continue to do well. Examples of momentum strategies for choosing individual equities include simple price momentum or changes in analysts’ earnings estimates.</p> <p>Returns are intended to be derived from the consistent use of uncorrelated fundamental rather than opportunistic investment criteria. In addition, the Fund will seek to incorporate execution costs in portfolio construction, resulting in lower overall execution costs.</p> <p>The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment</p>

Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.

The Fund's portfolio will be highly diversified and, at optimal Fund size, will generally hold at least 250 stocks. In addition, the Investment Manager's use of risk models allows it to allocate efficiently risk to sources that are thought to provide added value with a view to obtaining better management of risk and a strong potential to achieve risk/return targets.

The Fund may also invest in or use equity index futures contracts, UCITS eligible exchange-traded funds or other eligible instruments as a substitute for investing in conventional securities in order to gain exposure to the equity market and to maintain liquidity to pay for redemptions. A portion of the Fund's assets may be held in cash or cash-equivalent investments, including, but not limited to short-term investment funds.

The Fund also engages in currency transactions with counterparties primarily in order to provide temporary exposure to a particular currency in lieu of leaving cash inflows uninvested. Currency transactions include forward currency contracts and exchange listed currency futures.

As part of its investment approach, the Fund will also enter into securities lending and securities borrowing transactions, in order to provide low-risk incremental income to Shareholders.

When entering into the above mentioned transactions, the Fund will request its counterparties to post collateral in the form of cash or US treasury bills having a maturity of up to five years.

Collateral received in the framework of securities lending and borrowing transactions will comply with the rules provided in the main body of the Prospectus under section 5.5 headed "Collateral Management".

**Sub-Investment  
Manager**

No sub-investment manager will be appointed with respect to the Fund. The Investment Manager will act directly as investment manager for the Fund with no delegation of its duties.

**Profile of Typical  
Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

The Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund.

By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial

markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management  
and Expected  
Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the Commitment approach.

This approach measures the global exposure related to positions on financial derivative instruments and other efficient portfolio management techniques under consideration of netting and hedging effects. Net Commitment may not exceed the total net value of the portfolio of the Sub-Fund.

Under the standard commitment approach, each financial derivative instruments position is converted into the market value of an equivalent position in the underlying asset of that financial derivative instrument.

**Investment in  
collective  
investment  
schemes**

The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.

**NAV Tolerance  
Threshold**

Shares and other financial assets' UCIs.

**Valuation Day**

Each Dealing Day.

**Dealing Day**

Every Business Day.

**Dealing Request  
Deadline**

1:00 p.m. (Luxembourg time) on each Dealing Day.

**Settlement**

Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.

Payment of the redemption proceeds will be made as soon as

practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.

Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.

<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “Net Aggregate Subscriptions”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

## **Initial Offer Period**

The Initial Offer Period for the Class E Shares will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

## **Fees and Expenses**

### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Specific Risk Factors**

Investors’ attention is particularly drawn to the section entitled “Risk Factors” of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Mid Cap Securities Risk, Trading Judgement, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Performance Relative to Benchmark.

## SUPPLEMENT 8: AQR Systematic Fixed Income : US High Yield UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Systematic Fixed Income: US High Yield UCITS Fund should be read in conjunction with the full text of this Prospectus.

**Name of Fund** AQR UCITS Funds – AQR Systematic Fixed Income: US High Yield UCITS Fund.

**Investment Objective** The investment objective of the Fund is to outperform the Bank of America Merrill Lynch US High Yield Index (H0A0), (the “**Benchmark**”). There can be no assurance that the Fund will achieve its investment objective.

**Investment Policy** The Fund is actively managed and seeks to achieve its investment objective by investing in credit or credit-related securities of attractively valued companies with positive momentum, attractive carry and a stable business while also providing some downside protection.

**Investment Approach** The Fund pursues its objective by providing exposure to separate investment styles (each a “**Style**” and together “**Styles**”), as further described below: value, momentum, carry and defensive, using long positions in credit or credit-related securities.

The Styles employed by the Fund are:

**Value:** Value strategies favour investments that appear cheap over those that appear expensive based on fundamental measures related to price, seeking to capture the tendency for relatively cheap assets to outperform relatively expensive assets.

**Momentum:** Momentum strategies favour investments that have performed relatively well over the medium-term, seeking to capture the tendency that an asset’s recent relative performance will continue in the near future.

**Carry:** Carry strategies favour investments with higher yields, seeking to capture the tendency for higher-yielding assets to generate higher returns than lower-yielding assets.

**Defensive:** Defensive strategies favour investments with low-risk characteristics, seeking to capture the tendency for lower risk and higher quality assets to generate higher risk-adjusted returns than higher risk and lower-quality assets. The Fund is actively managed and the Fund’s exposures to Styles and investments will vary based on AQR’s evaluation of investment opportunities. The Fund as a whole aims to maintain balanced exposure to the Styles to diversify risk, enhance return and provide some downside protection.

The Fund manages active risk relative to the Benchmark, aiming to keep ex-ante forecast tracking error of the common

credit portion of the Fund from exceeding a fixed cap.

The Fund invests primarily in cash bonds issued by entities that are subject to credit risk. These will be typically corporate entities domiciled in developed markets and denominated in local currency. In addition, the fund may also invest in bonds which include, but are not limited to, foreign currency denominated bonds issued by corporate and sovereign entities domiciled in emerging markets.

The Fund may also invest in or use other instruments including, but not limited to interest rate swaps, credit default swaps, credit default swap indices, bond futures and UCITS eligible exchange-traded funds as a substitute for investing in conventional securities in order to gain exposure to the credit market and to maintain liquidity to pay for redemptions.

A portion of the Fund's assets may be held in cash or short term cash equivalent investments, including, but not limited to short-term investment funds. Pending investment in credit instruments or for use as collateral to meet margin requirements, the Fund may invest in short-term instruments, including U.S.

Government securities, bank certificates of deposit, money market instruments or funds, and such other liquid investments deemed appropriate by the Investment Manager. The Fund may also invest in these securities without limit (but within relevant UCITS limits) for temporary defensive purposes.

The Fund may also engage- in currency transactions with counterparties primarily in order to hedge against a decline in the value of portfolio holding denominated in particular currencies and to provide temporary exposure to a particular currency in lieu of leaving cash inflows uninvested. Currency transactions include forward currency contracts and exchange listed currency futures. A forward currency contract involves a privately negotiated obligation to purchase or sell (with delivery generally required) a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract.

The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.

There is no guarantee that the Fund's objectives will be met.

**Sub-Investment  
Manager**

No sub-investment manager will be appointed with respect to the Fund. The Investment Manager will act directly as investment manager for the Fund with no delegation of its duties.

<b>Profile of Typical Investor</b>	<p>The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.</p> <p>Due to the sophistication of the Investment Policy and the Investment Approach, which will consist in a combination of sophisticated sub-investment strategies, the Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. The Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.</p> <p>A Financially Sophisticated Investor for this purpose means an investor who:</p> <p>(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and</p> <p>(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.</p>
<b>Risk Management and Expected Level of Leverage</b>	<p>In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.</p> <p><u>Calculation of global exposure</u></p> <p>As part of this risk-management process, the global exposure of the Fund is measured and controlled by the Commitment approach.</p> <p>This approach measures the global exposure related to positions on financial derivative instruments and other efficient portfolio management techniques under consideration of netting and hedging effects. Net Commitment may not exceed the total net value of the portfolio of the Sub-Fund.</p> <p>Under the standard commitment approach, each financial derivative instruments position is converted into the market value of an equivalent position in the underlying asset of that financial derivative instrument.</p>
<b>Investment in collective investment schemes</b>	<p>The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.</p>

<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy to this Fund.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.

<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

## Notes to Summary of Shares

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

## Initial Offer Period

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

## Fees and Expenses

### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Specific Risk Factors**

Investors’ attention is particularly drawn to the section entitled “Risk Factors” of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Debt Securities Risk, Trading Judgment, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Performance Relative to Benchmark.

## SUPPLEMENT 9: AQR Systematic Total Return UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Systematic Total Return UCITS Fund should be read in conjunction with the full text of this Prospectus.

**Name of Fund** AQR UCITS Funds – AQR Systematic Total Return UCITS Fund

**Investment Objective** The investment objective of the Fund is to seek total returns commensurate with its long-term risk target. The Fund will allocate its assets to three investment sub-strategies, each sub-strategy having a distinguishable set of investment objectives (as set out below), namely: the Risk-Balanced Market Exposure Strategy, the Multi-Asset Trend Timing Strategy, and the Market Neutral Security Selection Strategy (each is referred to as a “**Sub-Strategy**” and together “**the Sub-Strategies**”). There can be no assurance that the Fund will achieve its investment objective.

**Investment Policy** The Fund is actively managed and seeks to achieve its investment objective by making a diversified allocation across the three Sub-Strategies. Fluctuations in allocations across the three Sub-Strategies may occur due to Sub-Strategy signals, performance or risk control.

**Investment Approach** Risk-Balanced Market Exposure Strategy

The Risk-Balanced Market Exposure Strategy is designed to deliver exposure to a broadly diversified set of global market risk premia covering equities, government bonds and eligible diversified commodity indices. The Sub-Strategy seeks to maintain a targeted Sub-Strategy level volatility while also targeting an equal risk allocation across its three major categories (equity risk, nominal interest rate and inflation risk) (the “**Market Risk Premia**”), taking into consideration their expected volatilities.

The Investment Manager uses a customised process to estimate volatilities and correlations for the Market Risk Premia. Based on these estimates, the Sub-Strategy adjusts position sizes in each Market Risk Premium in order to maintain a targeted level of volatility and an equal risk allocation across the Market Risk Premia. In periods of higher-than-average expected volatility for an asset class, the Sub-Strategy will hold smaller positions in order to maintain a steady level of targeted risk. Inversely, in periods of lower –than-average expected volatility for an asset class, the Sub-Strategy will hold larger-than-average positions in response.

Multi-Asset Trend Strategy

The Multi-Asset Trend Strategy is designed to invest in a diversified portfolio of equity, currency and fixed-income

instruments and eligible diversified commodity indices, both long and short, in an effort to provide exposure and performance that is, on average, lowly correlated to equity and fixed income markets. The positions that the Sub-Strategy takes in each instrument are mainly based on a systematic, quantitative investment process that pursues short to intermediate-term price trends in each instrument, while modulating its positions by systematically assessing whether a given trend looks over-extended on a short or long-term basis.

#### Market Neutral Security Selection Strategy

The Market Neutral Security Selection Strategy is designed to target positive excess returns over a cash investment while exhibiting low-to-zero correlation to traditional investments. The Investment Manager pursues these goals by utilising quantitative return forecasting models and systematic risk-control methods to take “long” and “short” positions in various global equities. Investment in “short” positions will be made through financial derivative instruments.

The instruments expected to be used across all of the Sub-Strategies in the implementation of the investment objective of the Fund may include, but are not limited to:

- futures contracts including, single equity futures, bond futures, interest rate futures, currency futures and futures on stock indices (which will be mainly well diversified national or regional stock indices on a world-wide basis);
- treasury inflation-protected securities (“**TIPS**”) and inflation linked bonds;
- currencies;
- currency forwards including developed and emerging market forwards and non-deliverable forwards;
- swaps, including swaps on equity indices, bond indices, bond futures, commodity swaps (each of which is in compliance with the ESMA Guidelines 2012/832) and interest rate swaps;
- global equities, equity-like securities;
- fixed income instruments, including government and corporate bonds;
- repurchase instruments;
- UCITS eligible exchange-traded funds;

- other derivative products;
- asset-backed securities and mortgage-backed securities up to 20% of the Fund's net assets.

A portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds, bank deposits and/or U.S. Government securities (including U.S. treasury bills). A portion of these assets may be used for derivatives' margining and collateral requirements.

There are no geographic limits on the market exposure of the Fund's assets. This flexibility allows the Investment Manager to look for investments or gain exposure to asset classes and markets around the world, including emerging markets, that it believes will enhance the Fund's ability to meet its investment objective.

The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process..

The Fund is actively managed and the Fund's exposures to Sub-Strategies will vary based on AQR's evaluation of investment opportunities. The Fund as a whole aims to maintain balanced exposure to all three Sub-Strategies to diversify risk and enhance return.

The Fund shall be subject to prudent risk management at all times and will comply with all relevant provisions of the UCI Law.

## **Cash Manager**

With the consent of the Company and the Management Company, the Investment Manager has appointed UBS Global Asset Management (Americas) Inc. with registered office at One North Wacker Drive, Chicago, IL 60606, USA ("**UBS**" or the "**Cash Manager**") under a Cash Management Agreement to serve as sub-investment manager and adviser to the Investment Manager, however limited to the investment and reinvestment of the Fund's highly liquid assets, composed of a broad range of fixed income securities.

The Cash Manager is a wholly-owned subsidiary of UBS AG, a publicly traded Swiss bank. UBS is registered with the US Securities and Exchange Commission as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended.

The Cash Manager is entitled to receive a cash management fee paid out of the Investment Manager's own assets.

## **Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares

of the Fund.

Investors in Classes A3, B3, C3 and D3 Shares are institutional investors who subscribe the Shares during their initial subscription period or strategic investors (subject to the discretion of the Board).

Due to the extensive use of derivatives including, but not limited to, the use of short term interest rate contracts, the Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investors.

A Financially Sophisticated Investor for this purpose means an investor who:

- (a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and
- (b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management  
and Expected  
Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the absolute Value at Risk (“**VaR**”) approach.

In financial mathematics and financial risk management, VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

The Fund will be limited to a 99% one-month VaR of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps

will be taken to reduce the risk levels of the fund as rapidly as is prudent.

### Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund's expected level of leverage will generally vary from 500% to 1500% of the Fund's NAV. Based on the commitment approach, the Fund's expected level of leverage will generally vary from 500% to 1500% of the Fund's NAV. The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

The high leverage of the Fund is generally driven by short term interest rate futures contracts (fixed income instruments with a duration of 3 months used for duration management). The short duration exposure combined with the low volatility of near-term interest rates leads to an extremely low volatility in those instruments and therefore requires large notional positions in order to achieve a meaningful exposure in those markets. Accordingly, the high notional leverage is not necessarily representative of economic risk in the Fund.

The Fund makes extensive use of foreign exchange forward contracts as part of its investment policy. These contracts can lead to inflated levels of leverage when measured using the sum of the notionals approach. Please note further that in certain circumstances (such as when the Fund experiences a large redemption) this Fund may have a higher than expected number of offsetting foreign exchange forward contracts; this can temporarily lead to an inflated level of leverage when measured using the sum of the notionals approach.

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Shares and other financial assets' UCIs
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for, and their USD equivalent for Share Class IAB1F, must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.</p> <p>With the exception of the Share Class IAB1F, payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Share Class IAB1F is denominated in BRL and payments will be made in USD only through a specific process under which risks associated with the exchange rate fluctuations shall be borne by investors subscribing to Share Class IAB1F. Any costs incurred in this context, including but not limited to hedging related costs, shall be borne by investors subscribing to Share Class IAB1F.</p> <p>Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>

<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy to this Fund.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

## Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fees

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$500 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

\*\*\*\* Subscriptions and redemptions for Share Class IAB1F may only be settled in USD.

### Initial Offer Period

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### Fees and Expenses

#### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

#### Administration and Depositary Fees

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

#### Local Tax (“*Taxe d’Abonnement*”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund's Net Asset Value, payable quarterly. The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled "Fees and Expenses".

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk as well as the exposure to capital risks due to increased volatility as a consequence of the Fund's use of leverage.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

### **Specific Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Debt Securities Risk, Trading Judgment, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Leverage.

## SUPPLEMENT 10: AQR Style Premia: Equity Market Neutral UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Style Premia: Equity Market Neutral UCITS Fund should be read in conjunction with the full text of this Prospectus.

**Name of Fund** AQR UCITS Funds – AQR Style Premia: Equity Market Neutral UCITS Fund

**Investment Objective** The Fund seeks to provide investors with returns from the potential gains from its long and short equity positions.

**Investment Policy** The Fund is actively managed and is designed to be market or beta-neutral, which means that the Fund seeks to achieve returns that are not closely correlated with the returns of the equity markets in which the Fund invests. Accordingly, the Investment Manager, on average, intends to target a portfolio beta of zero over a normal business cycle.

**Investment Approach** The Fund is actively managed and will seek to achieve its Investment Objective by aiming to provide exposure to three separate investment styles (each a “**Style**” and together “**Styles**”), as further described below: value, momentum, and defensive, using both “long” and “short” positions. Investment in “short” positions will be made through financial derivative instruments.

The Fund may achieve its exposure using derivatives rather than holding those assets directly. The Fund may also use derivatives for hedging purposes, including equities (primarily those issued by large and mid-cap companies), futures (primarily equity index futures), currency forwards, and swaps (equity index swaps, swaps on index futures, total return swaps).

The Fund will utilise customised trading algorithms in order to minimize market impact and reduce trading costs. The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process.

The Styles employed by the Fund are:

**Value:** Value strategies favour investments that appear cheap over those that appear expensive based on fundamental measures related to price, seeking to capture the tendency for relatively cheap assets to outperform relatively expensive assets.

**Momentum:** Momentum strategies favour investments that have performed relatively well over the medium-term, seeking to capture the tendency that an asset's recent relative performance will continue in the near future.

**Defensive:** Defensive strategies favour investments with low-risk characteristics, seeking to capture the tendency for lower risk and higher-quality assets to generate higher risk-adjusted returns than higher risk and lower-quality assets.

The Fund is actively managed and the Fund's exposures to Styles \will vary based on the Investment Manager's evaluation of investment opportunities. The Fund as a whole aims to maintain balanced exposure to all three Styles to diversify risk and enhance return.

A portion of the Fund's assets may be held in cash or cash equivalent investments, including, but not limited to, short-term investment funds, bank deposits and/or U.S. Government securities (including U.S. treasury bills). A portion of these assets may be used for derivatives' margining and collateral requirements.

There is no guarantee that the Fund's objectives will be met.

**Total return swaps** Financial derivative instruments utilised by the Fund may include total return swaps.

The total return swaps will be entered into with first class financial institutions acting as swap counterparties selected at the choice and discretion of the Fund, subject to the conditions laid down in the main body of the Prospectus under section 5.4 headed "Total Return Swap Agreements".

Where the Fund enters into a total return swap or invests in other derivatives with similar characteristic:

- the assets held by the Fund should comply with the investment limits set in this Prospectus; and
- the underlying exposures of such derivatives must be taken into account to calculate the investment limits set out in the Prospectus.

Counterparties do not have any discretion over the composition or day to day management of the Fund investment portfolio or over the underlying financial derivative instruments.

**Cash Manager** With the consent of the Company and the Management Company, the Investment Manager has appointed UBS Global Asset Management (Americas) Inc. with registered office at One North Wacker Drive, Chicago, IL 60606, USA ("**UBS**" or the "**Cash Manager**") under a Cash Management Agreement to serve as sub-investment manager and adviser to the Investment Manager, however limited to the investment and reinvestment of the Fund's highly liquid assets, composed of a broad range of fixed income securities.

The Cash Manager is a wholly-owned subsidiary of UBS AG, a publicly traded Swiss bank. UBS is registered with the US Securities and Exchange Commission as an investment adviser pursuant to the Investment Advisers Act of 1940, as amended.

The Cash Manager is entitled to receive a cash management fee paid out of the Investment Manager's own assets.

**Profile of Typical Investor**

The typical investor in the Institutional Share Classes A will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

**Risk Management and Expected Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the absolute Value at Risk (“**VaR**”) approach.

In financial mathematics and financial risk management, VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

The Fund will be limited to a 99% one-month VaR of 20% of NAV. That is, if the risk manager estimates that the probability of a loss of 20% of NAV over the immediately forthcoming 20 Business Days is greater than 1%, steps will be taken to reduce the risk levels of the fund as rapidly as is prudent.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund’s expected level of leverage will generally vary from 200% to 500% of the Fund’s NAV. Based on the commitment approach, the Fund’s expected level of leverage will generally vary from 200% to 500% of the Fund’s NAV. The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility).

Most Styles are relative value and, for the most part, U.S. Dollar neutral; therefore, more leverage is needed to achieve meaningful risk exposure and

	expected returns compared to directional strategies. When combined, the Fund requires additional leverage to achieve meaningful levels of volatility.
<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Mixed UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day. Payment will be made in the currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

## Investment Management Fees, Administrative and Operating Fee and Performance Fee

\* Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

\*\* Investment Management Fee. The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the Net Asset Value of the Fund as set forth in the table above. In relation to each investment and for the purposes of the calculation of the Investment Management Fee, an investor’s Share Class will be determined by the Shareholder’s total amount of subscriptions less the total amount of redemptions (the “**Net Aggregate Subscriptions**”). For example, if a Shareholder invests US\$200 million (or more) Net Aggregate Subscriptions in A Class Shares, such Shareholder’s total investment will fall within the lowest fee level category of A Class Shares (i.e. Class A3). The Directors may reduce the Investment Management Fee.

\*\*\* The Investment Manager may be entitled to receive a Performance Fee in relation to the Shares. The Performance Fee will be calculated in respect of each twelve month period ending on 31 March in each year (a “**Calculation Period**”). The first Calculation Period will be the period commencing on the Business Day immediately following the close of the Initial Offer Period and ending on 31 March 2017.

The Performance Fee will be calculated and accrued as an expense of the Shares as of each Valuation Day.

The Performance Fee is based on the Net Asset Value per Share as at the end of each Calculation Period. The Net Asset Value per Share will include net realised and net unrealised gains and losses (both capital and income) and as a result, performance fees may be paid on unrealised gains, which may subsequently never be realised.

As at the last Valuation Day in each Calculation Period, the Performance Fee payable will be equal to 10 per cent of New Net Appreciation in the Net Asset Value during that Calculation Period equal to or above the Benchmark Hurdle (as specified above) (“**New Net Appreciation**”).

In the event that New Net Appreciation in the Net Asset Value is less than the Benchmark Hurdle, no Performance Fee shall be payable in relation to the Shares.

### *Crystallisation of Performance Fee*

The Performance Fee, if any, will be crystallised i) at the end of each Calculation Period, for each Class of Shares; and ii) as of any other date Shares are redeemed, in respect of the Shares being redeemed. The Performance Fee will be payable to the Investment Manager in arrears within 14 Business Days of the month end in which the Performance Fee is crystallised.

Furthermore, for the purposes of the calculation of the Performance Fee, a transfer of Shares will, unless determined otherwise by the Directors, be treated as if there was a redemption of such Shares by the transferor and a subscription (at the most recent Price) for such Shares by the transferee on the date of the transfer. However, a transfer will not be treated as a redemption and subscription where the relevant transfer of Shares will not result in a change in the beneficial ownership of the Shares. Crystallised Performance Fees shall remain in the relevant Class (but

shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager, and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The Investment Manager may from time to time and in its sole discretion and out of its own resources decide to rebate to some or all Shareholders (or their agents including the directors), or to intermediaries, part or all of the crystallised Performance Fee.

If the appointment of the Investment Manager is terminated during a Calculation Period, the Performance Fee in respect of the then current Calculation Period will be crystallised as of the date of the termination.

\*\*\*\* The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

### **Initial Offer Period**

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

### **Fees and Expenses**

#### **Management Company Fees**

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

#### **Administration and Depositary Fees**

The fees payable to the Depositary and Administrator, which are part of the Administrative and Operating Fee, will not exceed 0.20% per annum, determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

#### **Local Tax (“*Taxe d’Abonnement*”)**

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

### **Specific Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Debt Securities Risk, Trading Judgment, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 11: AQR U.S. Relaxed Constraint Equity UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR U.S. Relaxed Constraint Equity UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR U.S. Relaxed Constraint Equity UCITS Fund
<b>Investment Objective</b>	The investment objective of the Fund is to outperform the Russell 1000® Index (the “ <b>Benchmark</b> ”).
<b>Investment Policy</b>	<p>The Fund is actively managed and will seek to achieve its investment objective over a long-term investment horizon, typically 5 to 7+ years through the implementation of a disciplined set of strategies based on value, momentum, economic and additional factors based on stock and industry selection models.</p> <p>The Fund will target a long-term average forecasted tracking error of 3% to 4% relative to the Benchmark. Actual realized tracking error will vary based on market conditions and other factors.</p>
<b>Investment Approach</b>	<p>There is no guarantee that the Fund will meet its investment objective.</p> <p>The Fund pursues its investment objective by investing in equity securities, generally U.S. equity securities of companies with market capitalizations similar to those of constituents of the Benchmark at the time of purchase, either directly or through derivative exposure. The Fund may also invest in or use equity index futures contracts, UCITS eligible exchange-traded funds or other eligible instruments as a substitute for investing in conventional securities in order to gain exposure to the equity market and to maintain liquidity to pay for redemptions. A portion of the Fund’s assets may be held in cash or cash-equivalent investments, including, but not limited to short-term investment funds.</p> <p>The Fund’s portfolio will be managed by both overweighting and underweighting securities, industries, and sectors relative to the Benchmark. “Relaxed Constraint” in the Fund’s name reflects the Fund’s strategy to take long as well as short positions in the equity securities in which it invests, as opposed to a traditional “long-only” portfolio which does not establish short positions (i.e., relaxing the “long-only” constraint). Investment in “short” positions will be made through financial derivative instruments. The Fund generally intends to target a long exposure of 130% of the Fund’s net assets with a short exposure of 30% of the Fund’s net assets.</p> <p>The Fund will seek to implement a disciplined set of economically intuitive and rigorously tested strategies based on value, momentum and other investment themes which are designed to generate attractive returns.</p> <ul style="list-style-type: none"><li>- <b>Value Strategies:</b> Value strategies favour securities that appear cheap on fundamental measures, often as a result of distress or lack of favour. Value strategies are negative on “glamour” or popular</li></ul>

securities that appear overpriced. Examples of value strategies for choosing individual equities include price to earnings and price to book ratios.

- **Momentum strategies:** Momentum strategies favour securities with strong recent performance. Research has shown that securities that have done well recently on average continue to do well. Examples of momentum strategies for choosing individual equities include simple price momentum or changes in analysts' earnings estimates.

Returns are intended to be derived from the consistent use of uncorrelated fundamental rather than opportunistic investment criteria. In addition, the Fund will seek to incorporate execution and other costs in portfolio construction.

The Investment Manager determines the long or short weight of each equity security in the portfolio using a systematic, quantitative investment process. This process considers the Investment Manager's assessment of attractiveness of the equity security based on various factors, including those described above, stock weights in the benchmark index, estimated transaction costs associated with trading each equity security, and additional criteria that form part of the Investment Manager's security selection process. The Fund will utilise customised trading algorithms in order to minimize market impact and reduce trading costs.

The Fund may achieve its exposure using derivatives rather than holding those assets directly. The Fund may also use derivatives for hedging purposes, including equities (primarily those issued by large and mid-cap companies), futures (primarily equity index futures), currency forwards, and swaps (equity index swaps, swaps on index futures, total return swaps).

## **Total Return Swaps**

Financial derivative instruments utilised by the Fund may include total return swaps.

The total return swaps will be entered into with first class financial institutions acting as swap counterparties selected at the choice and discretion of the Fund, subject to the conditions laid down in the main body of the Prospectus under section 5.4 headed "Total Return Swap Agreements".

Where the Fund enters into a total return swap or invests in other derivatives with similar characteristic:

- the assets held by the Fund should comply with the investment limits set in this Prospectus; and
- the underlying exposures of such derivatives must be taken into account to calculate the investment limits set out in the Prospectus.

Counterparties do not have any discretion over the composition or day to day management of the Fund investment portfolio or over the underlying financial derivative instruments.

**Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

The Fund is only suitable for institutional investors and retail investors who are Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund.

By consequence, the Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investors.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management and Expected Level of Leverage**Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the relative Value at Risk (“**VaR**”) approach, by reference to the Fund’s Benchmark.

In financial mathematics and financial risk management, the VaR is a widely used measure of the risk of loss on a specific portfolio of financial assets. For a given investment portfolio, probability and time horizon, VaR is defined as a threshold value such that the probability that the mark-to-market loss on the investment portfolio over the given time horizon exceeds this value (assuming normal markets and no trading in the investment portfolio) is the given probability level.

Leverage

There are two methods of calculating the leverage of the Fund: the commitment approach and the sum of notionals of financial derivative instruments approach. Under the commitment approach, leverage is computed by converting financial derivatives into equivalent positions in the underlying assets. Leverage is then quantified as the sum, as an absolute value, of the individual exposures, after consideration of effects of netting and coverage. The sum of notionals approach defines the leverage as the sum of the absolute value of the notional of all financial derivative instruments in the Fund.

Based on the sum of notionals of financial derivative instruments approach, the Fund’s expected level of leverage will generally vary from 150% to 200% of the Fund’s NAV. Based on the commitment approach, the Fund’s expected level of leverage will generally vary from 150% to 200% of the Fund’s NAV.

The methodology applied for the leverage calculation is the sum of notionals, in accordance with CSSF Circular 11/512. The level of leverage could sometimes be higher under certain circumstances including but not limited to changes in the reference market conditions (e.g. low market volatility) and the investment allocation (e.g. rebalancing between the long/short strategies and, hence, between the asset classes used to implement them).

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Shares and other financial assets' UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on each Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days.</p> <p>Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.</p> <p>Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request..</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Duration</b>	The Fund is established for an unlimited duration.

<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy for this Fund.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

## **Notes to Summary of Shares, Investment Management Fees, Performance Fees and Administrative and Operating Fees**

### **\* Minimum Initial Subscription**

Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

### **\*\* Investment Management Fee**

The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the average daily Net Asset Value of the Fund as set forth in the table above. Management fees are accrued daily and are payable by the Fund monthly in arrears as of the end of each calendar month. The Directors may reduce the Investment Management Fee.

### **\*\*\* The Administrative and Operating Fee**

The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

## **Initial Offer Period**

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

## **Fees and Expenses**

### **Management Company Fees**

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

### **Administration and Depositary Fees**

The fees payable to the Depositary and Administrator are determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

### **Local Tax (“*Taxe d’Abonnement*”)**

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund's Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled "Fees and Expenses".

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes.

Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Specific Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, , Trading Judgment, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors and Proprietary Trading Methods.

## SUPPLEMENT 12: AQR Global Aggregate Bond UCITS Fund

The information contained in this part of this Prospectus in relation to AQR UCITS Funds – AQR Global Aggregate Bond UCITS Fund should be read in conjunction with the full text of this Prospectus.

<b>Name of Fund</b>	AQR UCITS Funds – AQR Global Aggregate Bond UCITS Fund.
<b>Investment Objective</b>	The investment objective of the Fund is to maximize total return through capital growth and income by outperforming the Bloomberg Barclays Global Aggregate Bond Index (the “ <b>Benchmark</b> ”). There can be no assurance that the Fund will achieve its investment objective.
<b>Investment Policy</b>	The Fund is actively managed and seeks to achieve its investment objective by investing primarily in investment grade global fixed and floating rate debt securities, using derivative strategies where appropriate, and currency allocation.
<b>Investment Approach</b>	<p>The Fund pursues its objective by providing exposure to multiple investment themes, included but not limited to, value, momentum, carry and defensive, using long positions in interest rate, credit and related securities as well as currencies.</p> <p><b>Value Strategies:</b> Value strategies favour investments that appear cheap over those that appear expensive based on fundamental measures related to price, seeking to capture the tendency for relatively cheap assets to outperform relatively expensive assets.</p> <p><b>Momentum Strategies:</b> Momentum strategies favour investments that have performed relatively well and/or with relatively improving fundamentals over the medium-term, seeking to capture the tendency that an asset's recent relative performance will continue in the near future.</p> <p><b>Carry Strategies:</b> Carry strategies favour investments with higher yields, seeking to capture the tendency for higher-yielding assets to generate higher returns than lower-yielding assets.</p> <p><b>Defensive Strategies:</b> Defensive strategies favour investments with low-risk characteristics, seeking to capture the tendency for lower risk and higher quality assets to generate higher risk-adjusted returns than higher risk and lower-quality assets.</p> <p>The Fund will generally be managed by both underweighting and overweighting securities, countries and currencies relative to the Benchmark. In order to expand the set of investment opportunities, the Fund will have the ability to gain exposure to securities of issuers in countries and denominated currencies not included in the Benchmark.</p>

The Fund will primarily invest its total assets, excluding cash and cash equivalents, either directly or through the use of financial derivative instruments, in a portfolio of global fixed and floating rate debt securities. Issuers of these securities may be located in any country.

The Fund may invest in domestic or foreign debt issued by corporate and sovereign entities domiciled in emerging markets.

The Fund may also invest in or use other instruments including, but not limited to interest rate swaps, credit default swaps, credit default swap indices, bond and interest rate futures and forward contracts and UCITS eligible exchange-traded funds as a substitute for investing in conventional securities in order to gain exposure to the bond market and to maintain liquidity to pay for redemptions. The Fund may also invest in convertible bonds, as well as equities and equity-linked instruments.

The Fund may invest in bonds secured by other assets (“**securitized products**”), specifically, asset-backed securities, mortgage-backed securities (including specified pools and related derivatives such as “To-Be-Announced”), commercial mortgage-backed securities, and covered bonds.

The Fund may invest up to 20% of its Net Assets Value in ABS and MBS. Investment in ABS and MBS will be mainly be achieved through investments in mortgage TBAs.

The Fund may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for the purposes of hedging and for efficient portfolio management. These instruments may also include, but are not limited to, futures, options, contracts, contracts for difference, forward contracts on financial instruments and options on such contracts, credit linked instruments, mortgage TBAs and swap contracts including by private agreement and other fixed income, currency and credit derivatives.

A portion of the Fund’s assets may be held in cash or short term cash equivalent investments, including, but not limited to short-term investment funds. Pending investment in credit instruments or for use as collateral to meet margin requirements, the Fund may invest in short-term instruments, including government securities, bank certificates of deposit, money market instruments or funds, and such other liquid investments deemed appropriate by the Investment Manager. The Fund may also invest in these securities, within the limits provided by the UCI Law, for temporary defensive purposes.

The Fund may also engage- in currency transactions with counterparties. Currency transactions include forward currency contracts and exchange listed currency futures. A forward currency contract involves a privately negotiated obligation to purchase or sell (with delivery generally required) a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract.

The positions that the Fund takes in each instrument are based on a systematic, quantitative investment process. The Investment Manager will utilise customised trading algorithms to try to minimise market impact and reduce trading costs.

**Sub-Investment Manager**

No sub-investment manager will be appointed with respect to the Fund. The Investment Manager will act directly as investment manager for the Fund with no delegation of its duties.

**Profile of Typical Investor**

The typical investor in the Institutional Share Classes will be an institutional investor who understands and appreciates the risks associated with investing in Shares of the Fund.

Due to the sophistication of the Investment Policy and the Investment Approach, which will consist in a combination of sophisticated sub-investment strategies, the Fund is only suitable for institutional investors and Financially Sophisticated Investors who can bear the economic risk of the loss of their investment in the Fund. The Retail Share Classes may not be acquired by a retail investor who is not a Financially Sophisticated Investor.

A Financially Sophisticated Investor for this purpose means an investor who:

(a) has knowledge of, and investment experience in, financial markets generally and financial products which invest in securities and/or derivatives with complex features; and

(b) understands and can evaluate the strategy, characteristics and risks of the Fund in order to make an informed investment decision.

**Risk Management and Expected Level of Leverage**

In accordance with the UCI Law and the applicable regulations, in particular Circular CSSF 11/512, the Fund uses a risk-management process which enables it to assess the exposure of the Fund to market, liquidity and counterparty risks, and to all other risks, including operational risks, which are material for the Fund.

Calculation of global exposure

As part of this risk-management process, the global exposure of the Fund is measured and controlled by the commitment approach.

This approach measures the global exposure related to positions on financial derivative instruments and other efficient portfolio management techniques under consideration of netting and hedging effects. Net Commitment may not exceed the total net value of the portfolio of the Sub-Fund.

Under the standard commitment approach, each financial derivative instruments position is converted into the market value of an equivalent position in the underlying asset of that financial derivative instrument.

<b>Investment in collective investment schemes</b>	The Fund will not invest more than 10% of its net assets in aggregate in the units of other UCITS or other collective investment schemes.
<b>NAV Tolerance Threshold</b>	Bond UCIs.
<b>Valuation Day</b>	Each Dealing Day.
<b>Dealing Day</b>	Every Business Day.
<b>Dealing Request Deadline</b>	1:00 p.m. (Luxembourg time) on the Business Day falling five Business Days prior to the relevant Dealing Day.
<b>Settlement</b>	<p>Cleared funds for the full amount of the subscription price of the Shares being subscribed for must be delivered to the account of the Administrator within 3 Business Days following the relevant Dealing Day with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case, cleared funds for the full amount of the subscription price of the Shares must be delivered to the account of the Administrator within 2 Business Days. Payment of the redemption proceeds will be made as soon as practicable after the relevant Dealing Day and normally within 10 Business Days of the Dealing Request Deadline. The Company will endeavour to pay redemption proceeds for the Fund within 3 Business Days of the Dealing Day, with the exception of Classes of Shares with a Share Class Reference Currency of SGD or HKD, in which case the Company will endeavour to pay redemption proceeds within 4 Business Days of the Dealing Day.</p> <p>Payment will be made in the Reference Currency of denomination of the Shares being redeemed by direct transfer in accordance with instructions given by the redeeming Shareholder to the Administrator and at the Shareholder's risk. Payments made on receipt of faxed instructions will only be processed where payment is made to the account of record as provided on either (a) the original, duly signed, initial application form, or (b) the original, duly signed bank mandate change request.</p>
<b>Price Publication</b>	The Net Asset Value per Share of each Class will be updated following each calculation of Net Asset Value and will be available from the Administrator.
<b>Share Class Transfers</b>	Where relevant, transfers between Share Classes will occur on the first Business Day of the month following the date on which Net Aggregate Subscriptions result in a Shareholder becoming eligible for such Share Class. Such transfers will be instructed by the Investment Manager through communications to the Transfer Agent on behalf of each eligible Shareholder.
<b>Performance Fee</b>	No Class of the Fund will have a Performance Fee.

<b>Duration</b>	The Fund is established for an unlimited duration.
<b>Listing</b>	It is not currently intended to list the Shares of the Fund on any stock exchange.
<b>Reference Currency of the Fund</b>	The Reference Currency of the Fund is USD.
<b>Dilution Levy</b>	The Board of Directors will not apply a dilution levy for this Fund.
<b>Share Class Currency Hedging</b>	The Investment Manager may enter into Hedging Transactions to hedge the Fund's exposure to foreign exchange risk where Classes of Shares are denominated in currencies other than Reference Currency of the Fund and/or certain other exposures including the risk of the value of a Class of Shares.

#### \* Minimum Initial Subscription

Investors should refer to the section of the Prospectus headed “Important Information” which may refer to an alternative Minimum Initial Subscription requirement for investors from a particular country. The Directors may reduce or waive the Minimum Initial Subscription at their sole discretion.

#### \*\* Investment Management Fee

The Investment Management Fee paid to the Investment Manager will be calculated at an annual rate equal to a percentage of the average daily Net Asset Value of the Fund as set forth in the table above. Management fees are accrued daily and are payable by the Fund monthly in arrears as of the end of each calendar month. The Directors may reduce the Investment Management Fee.

#### \*\*\* The Administrative and Operating Fee

The Administrative and Operating Fee is equal to a percentage (as specified in the table Summary of Shares above) of the Net Asset Value of the relevant Share Class and shall be calculated in the same manner as the calculation of the Investment Management Fee. The Directors may reduce the Administrative and Operating Fee.

#### **Initial Offer Period**

The Initial Offer Period for Fund will commence at any moment upon decision of the Board of Directors. Shares are available for issue during the Initial Offer Period at the price set out above.

The Company reserves the right to close and/or reopen the Share Classes for further subscriptions at any time in its sole discretion.

#### **Fees and Expenses**

##### Management Company Fees

The Management Company Fee, which is part of the Administrative and Operating Fee, will not exceed 0.03% per annum of the total net assets of the Fund.

##### Administration and Depositary Fees

The fees payable to the Depositary and Administrator are determined as of each Valuation Day on the basis of the Net Asset Value of the assets attributable to the relevant Class of Shares and paid out as of the relevant Valuation Day.

##### Local Tax (“Taxe d’Abonnement”)

In respect of the Institutional Share Classes, 0.01% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

In respect of the Retail Share Classes, 0.05% per annum of the value of the Fund’s Net Asset Value, payable quarterly.

The Local Tax shall not be part of the Administrative and Operating Fee detailed above.

Details on other fees and expenses to be incurred by the Company are detailed in the main body Prospectus under the heading entitled “Fees and Expenses”.

### **Risk Profile of the Fund**

The Fund is available for investment by institutional investors in respect of the Institutional Share Classes. Typical investors are expected to be informed investors who can bear the economic risk of the loss of their investment in the Fund and who are willing to accept capital and income risk. The Fund provides an exposure to asset classes with a high intrinsic volatility and/or limited liquidity.

The Fund is available for investment by retail investors who are Financially Sophisticated Investors in respect of the Retail Share Classes.

### **Specific Risk Factors**

Investors' attention is particularly drawn to the section entitled "Risk Factors" of the general part of the Prospectus, especially to the risk factors relating to, Derivatives, Counterparty Risk, Forward Foreign Exchange Contracts and Strategy Risk, Debt Securities Risk, Trading Judgment, Model and Data Risk, Obsolescence Risk, Crowding/Convergence Risk, Risk of Programming and Modelling Errors, Proprietary Trading Methods and Performance Relative to Benchmark.
