

VanEck UCITS ETFs plc

Condensed Interim Report & Unaudited Financial Statements For the financial period ended 30 June 2025

Company Registration Number: 548554

This interim report may be translated into other languages. Any such translation shall be a direct translation of the English text. In the event of any inconsistency or ambiguity in relation to the meaning of any word or phrase in the translation, the English text will prevail. Any disputes as to the terms thereof shall be governed by, and construed in accordance with, the law of Ireland.

PLEASE NOTE: This report has been prepared for use in Switzerland only.

Please be aware that each time performance data are published the following applies:

- past performance is no indication of current or future performance and
- the performance data do not take account of the commissions and costs incurred on the issue and redemption of units.

The representative in Switzerland is Zeidler Regulatory Services (Switzerland) AG, Neustadtgasse 1a, CH-8400 Winterthur (as of 1 September 2025: Stadthausstrasse 14, CH-8400 Winterthur), Switzerland. The prospectus, the articles of association, the Key Information Documents, the adjusted annual report and semi-annual report as well as a list containing all purchases and sales which have been made during the reporting period can be obtained free of charge at the representative in Switzerland, Zeidler Regulatory Services (Switzerland) AG.

The paying agent in Switzerland is Helvetische Bank AG, Seefeldstrasse 215, CH-8008 Zurich, Switzerland.

Manager's Report

MARKET REPORT

Gold Miners

This market background summary covers VanEck Gold Miners UCITS ETF and VanEck Junior Gold Miners UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Gold Miners UCITS ETF returned 53.12% and VanEck Junior Gold Miners UCITS ETF returned 58.06%.
- Gold prices averaged above \$3,000 per ounce throughout first half of 2025, underpinned by investor focus on the U.S. Federal Reserve (the "Fed")'s evolving monetary policy and recurring labor market signals.
- Over the course of the year, FOMC communications suggested that inflation was gradually easing, though persistent price pressures, partially attributed to lingering effects of Trump-era policies remained a key concern. These factors led to fluctuating expectations regarding the pace of Fed rate cuts, impacting gold's performance as a non-yielding asset.
- According to World Gold Council data, gold ETFs saw a powerful resurgence in H1 2025, attracting 397 tonnes (US\$38bn) in inflows. This pushed total holdings to 3,616 tonnes and boosted global assets under management by 41% to US\$383bn, the highest month-end level since August 2022. The surge was driven by broad-based demand across regions, reflecting gold's renewed appeal as a safe haven amid a weakening dollar, rangebound yields, and elevated geopolitical risk.
- Geopolitical tensions continue to enhance gold's appeal as a safe-haven asset, with ongoing conflict in Ukraine, the protracted war in Israel, rising tensions between China and Taiwan, and recent escalations involving Tehran. In this uncertain environment, gold is increasingly seen as a strategic hedge within diversified investment portfolios.
- Our long-term outlook for higher gold prices remains intact, with the next key level to watch at \$3,500, supported by persistent geopolitical tensions, potentially stickier inflation, growing efforts by countries to diversify away from the U.S. dollar by increasing gold reserves, and the looming risk of a U.S. or global economic recession.

Morningstar US ESG Wide Moat

This market background summary covers VanEck Morningstar US ESG Wide Moat UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Morningstar US ESG Wide Moat UCITS ETF returned (1.77%).
- VanEck Morningstar US ESG Wide Moat UCITS ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the US Sustainability Moat Index TM (MSUSSMNU). The index targets U.S. companies with sustainable competitive advantages, i.e., "moats," and attractive valuations in the view of Morningstar's team of more than 100 equity analysts, subject to ESG screening based on Sustainalytics data.
- According to the forward-looking process of Morningstar's Equity Research group, companies with moats have the potential to create above-average returns for longer periods of time. The index's approach to investing in U.S. companies with wide economic moats when they are attractively priced has resulted in long-term outperformance versus the broad U.S. equity market.
- The largest sectors represented in the portfolio are Health Care, Information Technology and Consumer Staples.

Emerging Markets Government Debt

This market background summary covers VanEck J.P. Morgan EM Local Currency Bond UCITS ETF.

Manager's Report (continued)

MARKET REPORT (continued)

Emerging Markets Government Debt (continued)

- For the period from 1 January 2025 to 30 June 2025, VanEck J.P. Morgan EM Local Currency Bond UCITS ETF returned 11.62%.
- Local currency bonds within emerging markets (EM) have historically offered the greatest diversification benefit compared to U.S. dollar-denominated EM sovereign or corporate bonds, due to their relatively low correlation with other asset classes.
- Continued inflationary pressures may benefit commodity sensitive currencies.
- Many EM central banks were well ahead of the Fed in hiking rates over, which gives them room to ease their policies and support the economy. At the same time, most of Developed Markets countries are still struggling to contain inflation and are therefore cautious about lowering the rates, despite the weakening economy.
- Average credit quality of the local EM benchmark is investment grade (Baa2/BBB) and multiple notches higher than the hard currency benchmark, which is on average high yield (Ba1/BB+), reflecting the difference in composition.

Fallen Angels

This market background summary covers VanEck Global Fallen Angel High Yield Bond UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Global Fallen Angel High Yield Bond UCITS ETF returned 7.44%.
- Fallen angel bonds are part of the overall high yield universe but unique in that they were originally issued with investment grade ratings and later downgraded to non-investment grade, or high yield. This results in differentiating characteristics versus the broader high yield bond market such as, a higher average credit quality and the crossover from investment grade to high yield markets is where the value proposition of fallen angels originates.
- Yield to Worst of the ETF dropped from the end of 2024 to 6.33% (while as of 31 December 2023 it was 6.81%) reflecting expectations of slow rate cuts in the developed markets and tightened spreads.
- Spreads compressed slightly in H1 2025, to a tune of 15 bps.
- As of 30 June 2025, the ETF had a 19.3% allocation to the energy sector, which could continue benefiting from disruptions following the geopolitical situation.

US Fallen Angels

This market background summary covers VanEck US Fallen Angel High Yield Bond UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck US Fallen Angel High Yield Bond UCITS ETF returned 4.51%.
- Fallen angel bonds are part of the overall high yield universe but unique in that they were originally issued with investment grade ratings and later downgraded to non-investment grade, or high yield. This results in differentiating characteristics versus the broader high yield bond market such as, a higher average credit quality and the crossover from investment grade to high yield markets is where the value proposition of fallen angels originates.
- Yield to Worst of the ETF sharply decreased YTD to 6.25% (while as of 31 December 2024 it was 6.86%) reflecting a decline in portfolio's duration and slightly tightened spreads.
- Spreads tightened slightly in H1 2025.

Manager's Report (continued)

MARKET REPORT (continued)

Emerging Markets Corporate Debt

This market background summary covers VanEck Emerging Markets High Yield Bond UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Emerging Markets High Yield Bond UCITS ETF returned 4.16%.
- EM USD high yield corporates currently provide an overall average yield of around 7.8%, a yield pickup of 0.8% over U.S. high yield, while maintaining similar levels of duration.
- While providing higher yields, EM universe contains a greater portion of bonds rated BB, and fewer rated CCC and below, versus high yield U.S. corporate bonds.
- From a fundamental standpoint, EM issuers currently exhibit more favorable debt metrics versus U.S. high yield issuers including interest coverage and leverage; as a result, investors are getting paid more by issuers with less leverage.
- EM high yield corporate bonds may benefit from elevated global inflation, with high exposure to sectors such as Energy (21.3%) and Basic Materials (15.3%).

Global Mining

This market background summary covers VanEck S&P Global Mining UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck S&P Global Mining UCITS ETF returned 23.48%.
- Secular trends have driven rising demand for green metals such as copper, lithium, and rare earth elements, with growth expected to continue. However, lithium prices have declined amid a slower-than-expected recovery in Chinese demand and a surge in supply. Copper, in contrast, has maintained strong demand and pricing, supporting profitability in the sector. Looking ahead, technological progress, especially in low-carbon solutions, is likely to fuel the next phase of demand growth.
- The wars in Ukraine and the Middle East have intensified both the push for energy transition and growing national security concerns, particularly around access to strategic metals. Rare earth elements are vital for defense technologies, including radar systems, missile guidance, and jet engines. In response, several governments, especially NATO members, have committed to increasing defense budgets, with a recent agreement to target defense spending at 5% of GDP, reflecting the elevated importance of securing critical resources.
- In the long term, emerging applications such as Cybertrucks (with up to three drive motors), robotics (with unit usage potentially comparable to EVs), and eVTOLs are expected to drive additional demand. In the short term, however, there is continued downside pressure on lithium and battery metals prices.
- Valuations of mining companies remain attractive, relative to both historical averages and other sectors of the economy.

Esports and Video Gaming

This market background summary covers VanEck Video Gaming and eSports UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Video Gaming and eSports UCITS ETF returned 30.86%.
- The gaming and eSports industry has rebounded strongly, driven by recovery trends and structural growth opportunities. This renaissance can be seen as investor confidence in the sector's recovery and future growth potential.

Manager's Report (continued)

MARKET REPORT (continued)

Esports and Video Gaming (continued)

- Gaming's recovery is underway, with revenues projected to grow 6% annually to \$257 billion by 2028, underscoring its deep integration into global culture. While challenges such as competitive pressure and dependence on blockbuster titles persist, the industry has adapted through mobile expansion, diversified revenue streams, and robust monetization models that support long-term resilience.
- Emerging technologies like AI are transforming gaming economics, helping reduce development costs, automate testing, and enable new revenue levers such as contextual in-game advertising. Generative AI, in particular, holds promise for cost-efficient content creation, supporting earnings growth while empowering companies to innovate and scale more sustainably.
- 2025 is shaping up to be a transformative year for gaming and esports, marked by major milestones that signal both commercial momentum and cultural resonance. Nintendo's successful Switch 2 launch reaffirmed the strength of its franchise-led strategy, with record-breaking console sales in Japan and global launch figures that surpassed even the PlayStation 4's debut. Meanwhile, the 2025 Esports World Cup in Riyadh is setting a new benchmark for competitive gaming with over 20 titles, a \$70 million prize pool, and global stars like Cristiano Ronaldo as brand ambassador. The event underscores esports' expanding mainstream relevance and long-term potential as a scalable, international media platform.

Morningstar Global Wide Moat

This market background summary covers VanEck Morningstar Global Wide Moat UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Morningstar Global Wide Moat UCITS ETF returned 16.47%.
- VanEck Morningstar Global Wide Moat UCITS ETF provides exposure to global firms with Morningstar Economic Moat Ratings that are trading at the lowest current market price/fair value ratios.
- As of 30 June 2025, most of the companies in the index were located in the U.S. (roughly 35% weight, down from 41% at the end of 2024), China (close to 12%) and Japan (slightly below 10%). Top 3 sectors of Global Wide Moat companies were Industrials, Healthcare and Information Technology.

Semiconductor

This market background summary covers VanEck Semiconductor UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025 VanEck Semiconductor UCITS ETF returned 14.51%.
- The sub-fund experienced a sharp downturn in Q1'25, caused by the emergence of DeepSeek Large Language Model (LLM), which managed to achieve results similar to those of U.S. LLM companies while being trained on less powerful hardware. This was followed by a swift recovery in Q2 led by revived sentiment around AI majors (NVIDIA/Broadcom), TSMC and equipment producers.
- The growth in demand for electronic chips was largely driven by the artificial intelligence sector, as computing power needed for this technology requires the use of a large number of semiconductors. As of 30 June 2025 NVIDIA was the largest company in the world by market capitalization, approaching the 4 billion mark.
- Semiconductors remain at the heart of industrial sovereignty issues, with companies starting to take advantage of the benefits offered by the U.S. Chips Act as well as European industrial subsidies.

Manager's Report (continued)

MARKET REPORT (continued)

Semiconductor (continued)

- The rivalry between China and the United States over the supply of semiconductors continues. China has launched an investigation into the American giant Micron to detect any "risks" to its "national security". This investigation is taking place against a backdrop of tension between the two powers. The U.S. are seeking to restrict China's access to powerful electronic chips and manufacturing technology, while China is trying to emancipate itself from the United States and develop its own semiconductor industry.

Hydrogen

This market background summary covers VanEck Hydrogen Economy UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025 VanEck Hydrogen Economy UCITS ETF returned 0%.
- Hydrogen projects are highly capital intensive and in its Global Hydrogen Review 2023, the International Energy Agency (IEA) estimates that a 3% rise in cost of capital can lead to a 50% increase of a project costs.
- The extent of the barriers that new projects must overcome is revealed in Hydrogen Insights 2023, where the Hydrogen Council and McKinsey & Co calculate that the cost of producing renewable hydrogen rose by up to 65%, to about 4.5 to 6.5 USD per kilogram.
- These inflationary pressures have coincided with a drop in fossil fuel prices, especially natural gas, making clean hydrogen even less competitive. For natural gas, increased production capacity and mild winters are both boosting supply and reducing demand.
- Despite the ongoing underperformance, we remain positive on this rapidly expanding renewable form of energy whose applications could range from cars to planes through ships and industrial establishments.
- Clean hydrogen is seen as essential for achieving net-zero emissions by 2050, with governments signaling its central role in the energy transition during the COP28 climate summit in Dubai. Additionally, according to the Hydrogen Council and McKinsey, clean hydrogen offers a scalable and cost-effective option for deep decarbonization in sectors such as steel, maritime, aviation, and ammonia, as well as providing energy storage and transportation solutions.
- Although the costs of producing renewable hydrogen rose by up to 65% due to inflationary pressures, impacting the economics of hydrogen projects, declining inflation and lower policy interest rates could ease these headwinds.

Digital Assets

This market background summary covers VanEck Crypto and Blockchain Innovators UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Crypto and Blockchain Innovators UCITS ETF returned 13.78%.
- VanEck Crypto and Blockchain Innovators UCITS ETF is a pure-play product investing in companies truly involved in the blockchain ecosystem. Digital assets equities can be viewed as a leveraged bet on digital assets, outperforming them during bull markets but underperforming them over market downturns. Over H1 2025, digital assets equities registered robust performance.

Manager's Report (continued)

MARKET REPORT (continued)

Digital Assets (continued)

- Trump's victory and the official issuance of a U.S. strategic Bitcoin reserve have emerged as major catalysts behind Bitcoin's ongoing rally. The performance has been broad-based, not concentrated in a handful of holdings, and reflects a notable shift in sentiment toward crypto, particularly Bitcoin. While the reserve marks a historic milestone, there is growing discussion around conservative mechanisms to expand it further, such as through structured acquisitions or treasury diversification frameworks. Additionally, the rally has been bolstered by the rising number of corporates holding Bitcoin in their treasuries, highlighting growing institutional adoption.

Rare Earth

This market background summary covers VanEck Rare Earth and Strategic Metals UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Rare Earth and Strategic Metals UCITS ETF returned 3.14%.
- The VanEck Rare Earth and Strategic Metals UCITS ETF (REMX), is closely tied to the MVIS Global Rare Earth/Strategic Metals Index (MVREMXTR), which in the last year allocated 40%-50% of its portfolio to lithium-related companies, while at least 25% of the portfolio is focused on companies involved in the extraction and processing of Rare Earth elements.
- Recent declines in lithium prices due to weaker-than-expected electric vehicle (EV) demand and increased supply of battery metals, influenced negatively "REMX" performance. Despite short-term volatility, the long-term forecast for rare earths and strategic metals remains positive, because they are crucial for decarbonization efforts, especially in the EV sector and wind-solar energy production. The global energy transition, aiming to meet Paris Agreement goals, implies a significant increase in demand, with the share of clean energies in rare earths total demand potentially rising to more than 40% (Global Critical Minerals Outlook 2025). For instance, EVs and energy storage systems are projected to account for over 90% of lithium demand by 2030 in the Net Zero Emissions Scenario, according to the IEA.
- Access to and availability of rare earth elements remain a globally significant issue. These 17 metals are essential for technological progress and critical advancements across multiple industries, including computers, batteries, defense systems, and monitors, underscoring their vital importance.
- Geopolitical factors highlight the importance of countries establishing comprehensive mineral strategies, encompassing everything from exploration to recycling. Despite inherent risks, investing in this sector enables contributions to sustainable development, economic growth, and global technological progress.
- In H2 2025, rare earths and strategic metals are poised for a dynamic year, with volatility in prices, growing demand, and geopolitical influences shaping the market. Investors should monitor Chinese policies, supply diversification efforts, and demand trends in EVs and renewables to navigate the landscape effectively.

Oil Services

This market background summary covers VanEck Oil Services UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Oil Services UCITS ETF returned (13.88%).

Manager's Report (continued)

MARKET REPORT (continued)

Oil Services (continued)

- Oil services companies within the ETF show a positive correlation with oil, historically regarded as an inflation hedge. These companies also wield significant pricing power over downstream players, allowing them to effectively navigate periods of widespread price increases. While inflation is currently declining, global factors could lead to more persistent inflationary pressures than anticipated. Investing in the upstream oil services sector could provide strategic advantages in such a scenario.
- Brent crude prices have shown volatility amid the geopolitical tensions. While there was a brief spike, prices have since stabilised. The U.S. Energy Information Administration (EIA) forecasts Brent crude prices to average around \$65.97 per barrel in 2025, with a potential decline to \$59 per barrel in 2026. However, some analysts warn that a significant escalation in the conflict could push prices above \$100 per barrel.
- Escalating geopolitical tensions in the Middle East, particularly involving Iran, as well as the ongoing war between Russia and Ukraine, may exert upward pressure on oil prices, given the region's strategic role in global supply. While ceasefire talks in the Israel-Gaza conflict have offered some relief, the broader landscape remains volatile.
- The oil and oil services industries are undergoing a dynamic transformation, driven by evolving environmental standards, rapid technological innovation, and shifts in global refining capacity. These trends present exciting opportunities for forward-looking companies to lead the next phase of energy development. Significant investments in both upstream and downstream operations are paving the way for a more efficient, cleaner, and digitally advanced energy sector. From digital drilling platforms to emissions-reducing refining technologies, the sector is becoming more agile and responsive to global demands.

China New

This market background summary covers VanEck New China UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck New China UCITS ETF returned 12.33%.
- China is undergoing a structural change that sees consumer-oriented sectors replacing heavy industries. Factors contributing to this shift are a growing upper middle class, further technological developments, an aging population and a particularly high number of millennials in the country.
- The transition towards a new economic model is underway: the sectors shaping the Chinese economy include healthcare, consumer staples and discretionary as well as technology.
- VanEck New China UCITS ETF experienced an uptick in performance in the first half of 2025, continuing the trend started in the second half of 2024.

Space

This market background summary covers VanEck Space Innovators UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025 VanEck Space Innovators UCITS ETF returned 36.70%.
- The global space economy is forecast to grow from \$630 billion in 2023 to \$1.8 trillion by 2035, driven by innovations in satellite communications, reusable rockets, and AI-powered Earth observation technologies.

Manager's Report (continued)

MARKET REPORT (continued)

Space (continued)

- Advances in reusable rocket technology are drastically lowering launch costs, enabling more frequent and affordable satellite deployment, while shrinking barriers to space exploration for commercial players.
- NASA's Artemis program aims to establish a sustainable lunar presence, with Artemis 2 set to take a crew around the Moon in 2026, laying the groundwork for Mars exploration.
- Space technologies are increasingly supporting terrestrial industries, with satellites enabling global Internet of Things networks, autonomous navigation systems, and climate monitoring efforts to combat CO2 emissions.
- India's first lunar landing in 2023 and China's Tiangong space station expansion reflect growing participation by emerging economies in the global space race.
- Space tourism is transitioning from short, suborbital flights to more immersive experiences, including potential extended stays on orbiting stations, unlocking a new frontier for leisure and adventure.

Future of Food

This market background summary covers VanEck Sustainable Future of Food UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Sustainable Future of Food UCITS ETF returned 7.32%.
- Technological innovation is reshaping the food sector, with advancements in precision agriculture, vertical farming, and alternative proteins addressing critical challenges such as resource efficiency, climate resilience, and feeding a growing global population sustainably. These technologies are expected to drive long-term growth and investment opportunities.
- Consumer demand for transparency and sustainability is driving a shift toward plant-based foods, organic options, and eco-friendly packaging. This trend reflects growing awareness of environmental and health impacts, creating significant growth potential for companies leading in these areas.
- Climate change and environmental constraints are increasing the urgency for sustainable food systems. With the agri-food sector responsible for nearly 30% of global greenhouse gas emissions, innovations in carbon-efficient farming and waste reduction are likely to gain further momentum.
- Geopolitical and supply chain pressures have underscored the need for localised and resilient food production methods. Technologies such as urban farming and advanced logistics are enabling new models to meet regional food security needs.
- Shifts in dietary preferences toward alternative proteins are gaining traction, supported by younger, sustainability-focused generations. Companies in the plant-based, cultured meat, and fermentation-based protein sectors stand to benefit significantly from this shift.

Genomics and Healthcare Innovators

This market background summary covers VanEck Genomics and Healthcare Innovators UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Genomics and Healthcare Innovators UCITS ETF returned 5.54%.
- VanEck's Genomics ETF invests in the innovative companies harnessing scientific advances to develop breakthrough treatments and give patients more control over how they access care.

Manager's Report (continued)

MARKET REPORT (continued)

Genomics and Healthcare Innovators (continued)

- The healthcare market in America alone consumes 18% of GDP, equivalent to \$4.9trn a year. In other wealthy countries, the share is lower, around 10%, but it is increasing as populations age. Just as science is developing new gene therapies, so too the pandemic has made people comfortable with digitally-mediated care.

Circular Economy

This market background summary covers VanEck Circular Economy UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Circular Economy UCITS ETF returned 10.89%.
- The VanEck Circular Economy UCITS ETF invests in companies involved in a new economic model that is expanding rapidly. Circular economy is a model of production and consumption which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products in order to extend their lifecycle as long as possible. These companies are at the forefront of the recycling and reuse-related solutions, opposed to the traditional take-make-waste economy.
- This new economic model not only entails environmental benefits but also tangible economic advantages. As an example, it is estimated that recycled aluminium and copper require 95% and 85% less energy respectively, compared to primary material production.
- As the world gradually transitions towards a carbon-free economy, waste management, recycling and reuse solutions are set to be on the rise. We expect the companies actively involved in this thematic to benefit from this development.

Bionic Engineering

This market background summary covers VanEck Bionic Engineering UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Bionic Engineering UCITS ETF returned 1.33%.
- As the global population ages, so does the demand for biologically-inspired systems that improve the quality of later life. VanEck's Bionic Engineering ETF tracks the performance of the portfolio of innovative companies delivering medical, dental or vision-related implants, bioprinting, prosthesis, or preservation of organs and tissue.
- The VanEck Bionic Engineering UCITS ETF capitalizes on the burgeoning AI and robotics market, which has seen significant growth. In healthcare, AI and robotics are revolutionizing patient care and medical procedures. AI algorithms analyze vast amounts of medical data to identify patterns and predict outcomes, enabling personalised treatments and early disease diagnosis. Robotics enhance precision in surgical procedures and patient rehabilitation.
- The demand for biologically inspired applications is rising as the global population ages. Innovations in medical implants, prosthetics, and bioprinting are crucial to meet the needs of an aging population. Advanced implants and AI-powered prosthetics provide greater mobility and comfort for users.

Uranium and Nuclear Technology

This market background summary covers VanEck Uranium and Nuclear Technologies UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Uranium and Nuclear Technologies UCITS ETF returned 42.09%.

Manager's Report (continued)

MARKET REPORT (continued)

Uranium and Nuclear Technology (continued)

- As the global demand for electricity continues to rise, the need for clean and reliable sources of energy becomes increasingly important. Nuclear energy, with its low carbon emissions and high efficiency, is a vital part of the sustainable energy mix.
- Uranium Spot Prices reversed in Q2'25 towards the long-term price level of ~80 \$/lb. The long-term price levels stayed intact throughout the spot turmoil, indicating that thesis for nuclear demand is still intact – major miners & utilities tend to sign delivery contracts 2-3 years in advance.
- US Administration signed 4 executive orders designed to support the uranium / nuclear industries
 - “Deploying Advanced Nuclear Reactor Technologies for National Security” dedicated to promoting nuclear energy for AI data centers and nuclear technology exports.
 - “Ordering the Reform of the Nuclear Regulatory Commission” aimed at removing excessive regulatory hurdles and speeding up nuclear plant construction approvals.
 - “Reforming Nuclear Reactor Testing at the Department of Energy” aimed at supporting development of modern nuclear reactor designs.
 - “Reinvigorating the Nuclear Industrial Base” specifying measures for funding nuclear energy projects and domestic nuclear fuel production/processing.
- In the wake of AI boom, low carbon footprint and stability of Nuclear Energy attract large IT players looking to limit their environmental impact, while keeping a consistent energy supply.
- Amazon signed a deal with Talen Energy which includes up to 1,920 MW of nuclear power through 2042, at full capacity by 2032.
- Google signed an agreement with startup Kairos Power to purchase energy from Small Modular Reactors (SMRs) starting 2030.
- Five U.S. miners are restarting domestic operations in Texas, Wyoming, Arizona and Utah mines that were closed in the aftermath of Fukushima disaster.
- While China and, to a lesser degree, India leads the world in new Nuclear Plant construction, developed markets, especially in Europe, provided another tailwind to the industry by extending the lifetime of the existing plants en masse. In Europe, out of the 109 currently functioning reactors, 75 were allowed to extend their lifetime, following a stringent certification process.

Defense

This market background summary covers VanEck Defense UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Defense UCITS ETF returned 56.49%.
- 23 of 32 NATO member countries are meeting the 2% defense spending requirement per Dec 2024, up from 11 in 2023 demonstrating an accelerated global commitment to military preparedness. NATO estimates that all member states will hit the target in 2025.
- A new target was announced in June 2025, calling for defense spending to reach 3.5% of GDP by 2035, along with an additional 1.5% in other defense-related expenditures.
- Public sentiment toward investing in defense has evolved, reflecting increasing awareness of geopolitical risks and the role of defense technologies in addressing global security challenges. This changing perception may influence investor sentiment and contribute to growing interest in defense-focused investments like the VanEck Defense UCITS ETF.

Manager's Report (continued)

MARKET REPORT (continued)

Defense (continued)

- NATO polling reveals a significant shift in public sentiment across Europe, with 76% of polled in favor of maintaining or even increasing (41%) defense spending levels, showing growing awareness of defense investments as critical for maintaining security and stability.
- Investments in advanced defense technologies continue to rise, with sectors such as cybersecurity and unmanned systems seeing substantial growth. SIPRI reports indicate significant procurement and R&D investments aimed at enhancing military capabilities, particularly in cybersecurity solutions and autonomous platforms.
- The VanEck Defense UCITS ETF provides targeted exposure to the global defense industry with the passive investment strategy taking into account the modern aspects of warfare such as cybersecurity, artificial intelligence, and satellite technologies. The strategy recognizes the contentious nature of the sector by excluding companies involved in controversial weapons and in (imminent) violation of OECD Guidelines/UN Global Compact Principles. The pure-play approach of the strategy (company inclusion requirement of >50% revenue from defense related activities) has proven to capture the stellar performance of the sector as reflected in the returns of the ETF.

Morningstar US Wide Moat

This market background summary covers VanEck Morningstar US Wide Moat UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Morningstar US Wide Moat UCITS ETF returned 1.10%.
- VanEck Morningstar US Wide Moat UCITS ETF provides exposure to U.S. firms with Morningstar Economic Moat Ratings that are trading at the lowest current market price/fair value ratios.
- "Moats" are expected to last for 20 years or longer and are based on switching costs, intangible assets, network effect, cost advantage, and efficient scale.
- Almost 80% of the sub-fund is coming from 4 sectors, namely Information Technology (28%), Health Care (20%), Industrials (20%) and Consumer Staples (13%).

Morningstar US SMID Moat

This market background summary covers VanEck Morningstar US SMID Moat UCITS ETF.

- For the period from 1 January 2025 to 30 June 2025, VanEck Morningstar US Wide Moat UCITS ETF returned 0.86%.
- VanEck Morningstar US SMID Moat UCITS ETF provides exposure to U.S. Small and Mid-cap firms with Morningstar Economic Moat Ratings that are trading at the lowest current market price/fair value ratios.
- SMID cap stocks have historically provided greater return potential relative to large caps. This outperformance was more likely on the longer period of time, while shorter periods of time might not show the same characteristics.
- Most of the companies in the sub-fund come from Consumer Discretionary, Industrials and Information Technology Sectors.

Quantum Computing

This market background summary covers VanEck Quantum Computing UCITS ETF.

Manager's Report (continued)

MARKET REPORT (continued)

Quantum Computing (continued)

- From its launch on 21 May 2025 to 30 June 2025, VanEck Quantum Computing UCITS ETF returned 9.44%.
- Early and diversified access to quantum computing through Europe's first ETF dedicated on Quantum Computing, offering exposure to both pure-play innovators and established tech leaders driving R&D and commercialization.
- Positioned for long-term potential, the ETF targets a breakthrough technology still in early stages, with uncertain timelines but high transformative promise and strong patent ownership as a foundation for future value.
- Quantum Nearing Inflection Point: NVIDIA CEO Jensen Huang stated that quantum computing is approaching a critical inflection point and may begin solving real-world problems within a few years, reflecting growing optimism. At GTC Paris, he praised Europe's quantum progress, showcased NVIDIA's hybrid Cuda-Q platform, and met with quantum startup Pasqal.
- EU Advances Quantum Sovereignty: The EU has already committed over €11 billion to quantum R&D, aiming to build coordinated infrastructure and strengthen technological sovereignty. A forthcoming "Quantum Act" in 2026 will support defense integration, funding frameworks, and talent development across member states.
- IBM has announced building the largest quantum computer ever, codenamed Starling, with a target of 200 logical qubits (equivalent to ~10,000 physical qubits) by 2029. The system is projected to perform 20,000× more quantum operations than current systems and aims to be the first fully fault-tolerant quantum computer, unlocking practical applications in fields like optimization, materials discovery, and drug development.

The sub-fund returns are based on the calculated ending net asset value ("NAV") for the financial period under review. The sub-fund returns are net of management fees.

* VanEck Quantum Computing UCITS ETF's inception date is 21 May 2025. Sub-fund's performance and indices' performance do not cover the entire reported period.

Important information on performance

The performance data quoted represents past performance. All sub-fund and Index performances are calculated in USD.

Past performance is not a guarantee of future results. Performance information for the sub-fund is net of expenses and/or fees. These returns do not reflect the deduction of taxes that a shareholder would pay on the sale of sub-fund shares.

Investment return and value of the shares of the sub-fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted.

The "Net Asset Value" (NAV) of a VanEck UCITS ETFs Plc sub-fund is determined at the close of each business day and represents the dollar value of one share of the sub-fund; it is calculated by taking the total assets of the sub-fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value.

Manager's Report (continued)

MARKET REPORT (continued)

Important information on performance (continued)

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with sub-fund returns. Investors cannot invest directly in the Index. Returns for actual sub-fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Tracking Error

The realised tracking error is the annualised standard deviation of the difference in daily returns between a sub-fund and its index. Tracking error shows the consistency of the returns relative to the index over the defined period of time.

Anticipated tracking error is based on the annualised standard deviation of the difference in daily returns between a sub-fund and its index under normal market conditions.

Cash management, efficient portfolio management techniques including securities lending along with transaction costs from rebalancing and currency hedging, can impact both tracking error and the return differential between the sub-fund and its benchmark index. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

In addition to the above, the sub-funds may also have a tracking error due to withholding tax charged to the sub-funds on any income received from its investments. The level of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed by the sub-funds with various tax authorities, any benefits obtained by the sub-funds under a tax treaty or any securities lending activities carried out by the sub-funds.

VanEck UCITS ETFs plc

Manager's Report (continued)

MARKET REPORT (continued)

Tracking Error (continued)

The table below shows the anticipated annual tracking error of the sub-funds against the realised tracking error of the sub-funds. Realised tracking error is an annualised figure calculated using data from the preceding 12 months observation period.

Sub-fund	Anticipated Tracking Error 1 year	Realised Tracking Error 1 year
VanEck Gold Miners UCITS ETF	Up to 0.20%	0.06%
VanEck Junior Gold Miners UCITS ETF	Up to 0.40%	0.15%
VanEck Video Gaming and eSports UCITS ETF	Up to 0.20%	0.06%

VanEck Morningstar SMID Moat UCITS ETF	Up to 0.20%	0.06%
VanEck Quantum Computing UCITS ETF*	Up to 0.20%	N/A

* Sub-fund's performance and indices' performance do not cover the entire reported period. VanEck Quantum Computing UCITS ETF's inception date is 21 May 2025.

Only VanEck Defense UCITS ETF (DFNS) and VanEck Hydrogen Economy UCITS ETF (HDRO) exceeded Tracking error Expectations due to the following explanations:

-DFNS: One structural contributor to tracking error in the DFNS stems from the fact that the sub-fund holds a Tel Aviv-listed security, while the index uses the U.S.-listed equivalent. This listing deviation inherently introduces valuation differences, especially when markets are not simultaneously open. At month-end, the Israeli market was closed while the U.S. remained open, allowing the index price to drift while the sub-fund was still valued at the last available Tel Aviv close. This created a pricing discrepancy of 12 bps at the end of June, which pushed the tracking error above the 20 bps threshold. When both listings are actively trading, pricing deviations tend to remain moderate.

-HDRO: Mainly driven by tracking difference caused during September 2024 rebalance. During the September rebalance, the sub-fund needed to increase weight in following security significantly: Sino-Synergy Hydrogen Energy Technology. Due to liquidity, the sub-fund was not able to execute the trade Market-on-Close on Friday, in line with the Index, but was forced to execute multiple trades during the week. This led to a difference in portfolio return between HDRO and the Index.

VanEck Quantum Computing UCITS ETF (the “sub-fund”)

The investment objective of the sub-fund is to replicate the price and the performance, before fees and expenses, of MarketVector™ Global Quantum Leaders Index (the "Index") that provides exposure to companies involved in the development of quantum computing technology or are leaders in ownership of quantum computing related patents.

As at 30 June 2025, the sub-funds of the Company are listed on Euronext Dublin, London Stock Exchange, Borsa Italiana, XETRA, Six Swiss Exchange and some on Euronext Paris.

2. Basis of Preparation

These condensed interim unaudited financial statements have been prepared in accordance with IAS 34, "Interim Financial Reporting", and Irish Statute comprising the Companies Act 2014, the UCITS Regulations and the Central Bank UCITS Regulations. These condensed interim unaudited financial statements should be read in conjunction with the annual audited financial statements for the financial year ended 31 December 2024.

These condensed interim unaudited financial statements have been prepared on a going concern basis which assumes that the Company will continue in operational existence for the foreseeable future. These condensed interim unaudited financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss.

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

2. Basis of Preparation (continued)

The preparation of these condensed interim unaudited financial statements in conformity with International Financial Reporting Standards ("IFRS") requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The Board of Directors make estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. There are no estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.

New standards, amendments and interpretations issued and effective for the financial period beginning 1 January 2025

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2025.

The following new and amended standard and interpretations do not have a material impact on the Company's financial statements:

- Lack of Exchangeability (Amendments to IAS 21).

There are no other new standards, amendments or interpretations issued and effective for the financial period beginning 1 January 2025 that have a material impact on the Company's financial position, performance or disclosures in its financial statements.

New standards, amendments and interpretations issued but not effective for the financial period beginning 1 January 2025 and not early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2025, and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Company.

- Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments.
- IFRS 18 – Presentation and Disclosure in Financial Statements.
- IFRS 19 – Subsidiaries without Public Accountability: Disclosures.

There are no other new standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a material impact on the Company.

3. Material Accounting Policies

Consistent accounting policies, presentation and methods of computation have been followed in these condensed financial statements as were applied in the preparation of the Company's audited financial statements as at and for the financial year ended 31 December 2024, as described in those financial statements.

4. Share Capital

The Authorised Share Capital of the Company is 2 subscriber shares of €1 each and 1,000,000,000 participating shares of no par value. There are no rights of pre-emption attached to the shares.

The company complies with the minimum investment limits by ensuring that registered shareholder holds a minimum of 50,000 shares.

Shareholders are entitled to attend and vote at general meetings of the Company. Every shareholder, holding shares that are present in person or by proxy shall have one vote and on a poll, every shareholder present in person or by proxy shall have one vote for every share of which they are the holder.

VanEck UCITS ETFs plc

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

4. Share Capital (continued)

The Directors are authorised to allot relevant securities up to an amount equal to the authorised share capital of the Company. No shares were allotted during the financial period ended 30 June 2025 and the financial year ended 31 December 2024.

The Directors reserve the right to reject, in whole or in part, any application for shares. In particular, if the Directors determine that it would be detrimental to the existing shareholders to accept a cash application for shares of any sub-fund which represents more than 10% of the Net Asset Value of such sub-fund, the Directors may decide that all or part of the application for shares in excess of 10% be deferred until the next Dealing Day. If the Directors decide to defer all or part of the application in excess of 10% the applicant shall be informed prior to the deferral taking place.

Capital Management

The redeemable participating shares issued by each sub-fund provide a shareholder with the right to request redemption for cash at a value proportionate to the registered shareholder's share in the net assets at each redemption date. The Company's objectives in managing the redeemable shares are to ensure to maximise returns to all registered shareholders, and to manage liquidity risk arising from redemptions.

The proceeds from shares issued and the payments for shares redeemed in USD are included within the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. During the financial period ended 30 June 2025 the number of redeemable shares issued was as follows:

For sub-fund launches, terminations and name changes, please refer to Note 14.

Refer to pages 71 to 82 for details of amounts received on issue of redeemable participating shares and amounts paid on redemption of redeemable participating shares.

Net Asset Value per Share is detailed in the financial statements on pages 244 to 248.

5. Cash and Cash Equivalents and Bank overdraft

The cash balances and bank overdraft at the financial period ended 30 June 2025 and the financial year ended 31 December 2024 were held at the Depository. The credit rating of State Street Custodial Services (Ireland) Limited was AA- at 30 June 2025 (31 December 2024: AA-).

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

6. Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

IFRS 13 'Fair Value Measurement' requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Condensed Statement of Financial Position.

The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value. The fair value of financial assets and financial liabilities traded in an active market (such as trading securities) are based on quoted market prices at the close of trading on the reporting date.

The quoted market price used for financial assets held by the sub-funds is the current bid price; the appropriate quoted market price for financial liabilities is the last traded price.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at the reporting date.

The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The fair values of the investments for the below sub-funds are based on quoted prices in active markets, the sub-funds' financial assets measured at fair value are considered Level 1 for the financial period ended 30 June 2025 and financial year ended 31 December 2024:

VanEck Gold Miners UCITS ETF
VanEck Morningstar Global Wide Moat UCITS ETF
VanEck Morningstar US ESG Wide Moat UCITS ETF
VanEck Video Gaming and eSports UCITS ETF
VanEck Semiconductor UCITS ETF
VanEck Crypto and Blockchain Innovators UCITS ETF
VanEck New China UCITS ETF
VanEck Space Innovators UCITS ETF
VanEck Sustainable Future of Food UCITS ETF
VanEck Genomics and Healthcare Innovators UCITS ETF
VanEck Circular Economy UCITS ETF
VanEck Bionic Engineering UCITS ETF
VanEck Uranium and Nuclear Technologies UCITS ETF
VanEck Oil Services UCITS ETF
VanEck Defense UCITS ETF
VanEck S&P Global Mining UCITS ETF
VanEck Hydrogen Economy UCITS ETF
VanEck Junior Gold Miners UCITS ETF
VanEck Rare Earth and Strategic Metals UCITS ETF
VanEck Morningstar US SMID Moat UCITS ETF
VanEck Morningstar US Wide Moat UCITS ETF
VanEck Quantum Computing UCITS ETF

with the exceptions, if any, that are detailed in the following table.

VanEck UCITS ETFs plc

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

6. Financial Assets and Financial Liabilities at Fair Value through Profit or Loss (continued)

The fair values of the investments for the below sub-funds are based on inputs other than quoted prices, the sub-funds' financial assets are considered Level 2 for the financial period ended 30 June 2025 and financial year ended 31 December 2024:

VanEck J.P. Morgan EM Local Currency Bond UCITS ETF
 VanEck Global Fallen Angel High Yield Bond UCITS ETF
 VanEck Emerging Markets High Yield Bond UCITS ETF
 VanEck US Fallen Angel High Yield Bond UCITS ETF

with the exceptions, if any, that are detailed in the following table.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial period.

The Company's assets and liabilities (by class) not measured at fair value at financial period ended 30 June 2025 but for which fair value is disclosed within the fair value hierarchy are considered Level 2, except for cash and cash equivalents, which are considered Level 1.

The table below lists all the exceptions to the fair value levels that are considered default for each sub-fund's investments which have been presented on the previous page and above, including:

- Level 3 valuation for the current financial period and prior financial year

Security Name	Level	Fair Value as at	Level	Fair Value as at

Scilex Holding Co.	-	-	2	624

7. Efficient Portfolio Management

The Company may, on behalf of each sub-fund and subject to the conditions and within the limits laid down by the Central Bank of Ireland, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes.

Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a sub-fund and may not be speculative in nature.

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

7. Efficient Portfolio Management (continued)

The sub-funds may invest in financial derivative instruments (“FDI”) for efficient portfolio management or hedging purposes. The sub-funds may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the sub-fund. These techniques and instruments may include investments into hedging transactions on currencies to protect against a decline in the value of investments denominated in currencies other than USD, and against any increase in the cost of investments denominated in currencies other than USD. The sub-funds employ the commitment approach to assess the global exposure and to ensure that the sub-fund’s use of derivative instruments is in accordance with the requirements of the Central Bank of Ireland.

Forward foreign currency contracts can be used to hedge out unwanted currency exposures and to limit the sub-funds exposure to anticipated changes in exchange rates. There are no forward foreign currency contracts held at the financial period ended 30 June 2025 and the financial year ended 31 December 2024.

The sub-funds may enter into stock lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management in accordance with the provisions of the Central Bank UCITS Regulations. The sub-funds did not enter into such agreements during the financial period ended 30 June 2025 or the financial year ended 31 December 2024.

8. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On this basis, it is generally not chargeable to Irish tax on its income or gains.

However, Irish tax can arise on the happening of a “chargeable event” in the Company. A chargeable event includes any payments of distributions to shareholders, any encashment, repurchase, redemption, cancellation or transfer of shares and any deemed disposal of shares as described below for Irish tax purposes arising as a result of holding shares in the Company for a period of eight years or more. Where a chargeable event occurs, the Company is required to account for the Irish tax thereon.

No Irish tax will arise on the Company in respect of chargeable events where:

- a) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations; or
- b) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- c) an exchange of shares representing one sub-fund for another sub-fund of the Company; or
- d) an exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another company; or
- e) certain exchanges of shares between spouses and former spouses.

In the absence of an appropriate declaration, the Company will be liable to Irish tax on the occurrence of a chargeable event. There were no chargeable events during the financial period under review. Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

9. Expenses

Total Fee

The Total Fee, a percentage of the Net Asset Value of the relevant class of shares, is payable by the Company out of the sub-funds’ assets to the Manager.

VanEck UCITS ETFs plc

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

* Or such lower amount as may be advised to Shareholders from time to time.

For sub-fund launches, terminations and name changes, please refer to Note 14.

From the Total Fee charged to each sub-fund the Company covers and pays all of the ordinary fees, operating costs and expenses payable by the sub-funds, including investment management and advisory fees, directors' fees, registration, transfer agency, administration and depositary fees, registrar fees, regulators and auditors, marketing fees and certain legal expenses of the Company. Refer to pages 47 to 58 for details of the Total fee payable for each sub-fund.

The Manager has agreed to discharge the Company's audit fee, out of the Total Fee. Such fees will be borne by the Manager.

10. Related Parties

Mr. Adam Phillips, Mr. Jonathan R. Simon, Mr. Gregory Krenzer and Mr. Gijsbert Koning are related to VanEck Associates Corporation and also serve as directors or officers of affiliates of VanEck Associates Corporation. Mr. Jon Lukomnik, Mr. Adrian Waters and Ms. Mary Canning are independent Directors of the Company. Mr. Adam Phillips and Mr. Jonathan R. Simon are also members of the Supervisory Board of VanEck Asset Management BV. Mr. Jon Lukomnik is also an independent Director of the VanEck US mutual funds. Mr. Gijsbert Koning is a director of VanEck Asset Management BV. Mr. Adrian Waters, Ms. Mary Canning and Mr. Jon Lukomnik are each entitled to receive a directors' fee of €30,000 (30 June 2024 €30,000) per annum as

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

10. Related Parties (continued)

payment for their services to the Company. For the financial period ended 30 June 2025, these Directors were paid fees amounting to USD49,564 (31 December 2024: USD99,892).

As outlined on page 3 of this report, VanEck Associates Corporation acts as Investment Manager to certain sub-funds of the Company pursuant to an investment management agreement between the Manager and the Investment Manager. VanEck Asset Management B.V. (the "Manager") acts as Manager and Distributor. The Manager is a 99% owned subsidiary of VanEck Associates Corporation. The Manager receives the net amount of Total fees less operating costs and expenses payable by the sub-funds as disclosed in Note 9. The Total fee is disclosed in the Condensed Statement of Comprehensive Income and amounts owed at the financial period end are disclosed in the Condensed Statement of Financial Position.

VanEck Switzerland AG and VanEck (Europe) GmbH are related parties, by virtue of the fact that they have a distribution agreement with the Manager and have the same ultimate parent group, VanEck Associate Corporation, which held 225,000 (31 December 2024: 695,000) outstanding shares in the Company.

The index licensing fees related to these indexes are borne by the Manager. MV Index Solutions was paid a fee of USD2,352,815 for the financial period ended 30 June 2025 (31 December 2024: USD696,631).

A Director Mr. Gijsbert Koning held 83,524 shares at the beginning of the financial period, purchasing 5,095 shares during the financial period and holding 88,619 shares with a value of USD1,654,760 (31 December 2024: USD1,266,850) as at 30 June 2025. Angkor Holding B.V., an entity controlled by Mr. Gijsbert Koning held 4,090 shares at the beginning of the financial period as Director. The entity held 4,090 shares with a value of USD227,771 (31 December 2024: USD206,905) as at 30 June 2025. All transactions with Angkor Holding B.V. and Mr. Gijsbert Koning during the financial period were on normal commercial terms. Family members of Mr. Gijsbert Koning have USD66,220 (31 December 2024: USD66,222) outstanding worth of shares of the Company as at 30 June 2025.

Two (31 December 2024: Two) recordholders of shares own 72.47% (31 December 2024: 71.55%) of the Company on behalf of Nominee accounts.

11. Connected Persons Transactions

Regulation 41 of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

As required under Central Bank UCITS Regulation 78.4, the Directors, as responsible persons are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 41(1) are applied to all transactions with a connected person; and all transactions with a connected persons that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 41(1).

12. Contingent Liabilities and Commitments

There were no significant liabilities or commitments as at financial period ended 30 June 2025 and financial year ended 31 December 2024.

The Investment Manager did not enter into any directed brokerage services on behalf of the sub-funds during the period ended 30 June 2025 and year ended 31 December 2024.

Notes to the Financial Statements for the financial period ended 30 June 2025 (continued)

13. Segregation of Liability

Under the provisions of the Companies Act 2014, the Directors maintain for each sub-fund a separate portfolio of assets. As between shareholders, each portfolio of assets is invested for the exclusive benefit of the relevant sub-fund. The shareholders are only entitled to the assets and profits of that sub-fund in which they participate. The Company is considered one single legal entity. With regard to third parties, in particular towards the Company's creditors, the Company is responsible for all liabilities incurred by a sub-fund exclusively based on the assets of this relevant sub-fund. Among the shareholders, the liabilities of each sub-fund shall only be incurred to the sub-fund.

While the provisions of the Companies Act provide for segregated liability between sub-funds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims.

Accordingly, it is not free from doubt that the assets of a sub-fund of the Company may not be exposed to the liabilities of other sub-funds of the Company.

14. Sub-fund launches, terminations and name changes events

VanEck Morningstar US SMID Moat UCITS ETF and VanEck Morningstar US Wide Moat UCITS ETF launched on 12 January 2024.

A Global Depositary Receipt (GDR) is very similar to an American depositary receipt or an ADR. It is a type of bank certificate that represents shares in a foreign company, such that a foreign branch of an international bank then holds the shares. The shares themselves trade as domestic shares, but globally, various bank branches offer the shares for sale.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period . If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

Statement of Portfolio Changes - VanEck Morningstar Global Wide Moat UCITS ETF

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

* In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period. A material change is defined as aggregate purchases of a security exceeding 1 per cent of the total value of the purchases for the financial period and/or aggregate disposals greater than 1 per cent of the total value of sales for the financial period. If there are fewer than 20 purchases/sales that meet the material changes definition, the Company shall disclose those purchases/sales so at least 20 purchases/sales are disclosed.

There were no other sale transactions during the financial period ended 30 June 2025.

An American Depositary Receipt (ADR) is a stock that trades in the United States but represents a specified number of shares in a foreign corporation. ADRs are bought and sold on American markets just like regular stocks, and are issued/sponsored in the U.S. by a bank or brokerage.

* Sub-fund launched during the financial period. For sub-fund launches, terminations and name changes, please refer to Note 14.

** In accordance with the Central Bank UCITS Regulations, the interim report documents material changes that have occurred in the disposition of the assets of the Company during the financial period.
